EYE-SIGHT AND HEARING.**

All Batteries must be accompanied by our United States Registered Label "GENUINE," and our PATENT COMPOUND STOPPER. They are of convenient size and shape to carry in the vest pocket. Are always ready for use and last a lifetime. No family should be without one. Any one having purchased a Battery during the last ten years may return it to us with Five Dollars and receive our IMPROVED BATTERY IN EXCHANGE. Batteries sent to any part of the world on receipt of price, TEN DOLLARS.

EXTRACTS FROM TESTIMONIALS.

Julian Pascal, the eminent pianist, now at Leipsic Conservatory, Leipsic, Germany, says the battery cured him in five minutes of the severest attack of neuralgia. "I shall never be without one," he says.

S. J. Anderson, the eminent organist and composer, of No. 239 York Street, Jersey City, N. J., writes under date of December 1, 1894: "Your Improved Battery was received. I greatly prefer it to the old style battery which I purchased at 88 Fifth Avenue in 1884. It is stronger and very convenient to carry in the pocket. I would not be without it. It is invaluable, and in my experience as organist, choirmaster, and as voice tutor I have found it a most reliable helper for the ailments of vocalists, colds, catarrh trouble and stoppages, headaches, etc., and have been thanked many times for the relief afforded by its use. My daughter has found it very beneficial and prizes it highly."

Rev. Baker Smith writes from the Pastor's Study, Presbyterian Church, Sparta, Sussex County, N. J., that his testimonial of June 2, 1886, is genuine, and that after a trial of years he is more than ever convinced of the excellent merits of the Wonder Cure Battery.

Send money per Express, cash in Registered Letter, or Draft to our order, and goods will be forwarded at once. Write name and address plainly. Give State and County.

New York Life Insurance Company,

JOHN A. MCCALL,
President.

346 and 348 BROADWAY,
NEW YORK CITY.

Commissioners' Certificate.

NEW YORK CITY, November 28, 1894.

WE, the Insurance Commissioners and Superintendents of the States of Massachusetts, Illinois, Kansas, Kentucky, Missouri, Ohio, and Texas, pursuant to the invitation of the President of the Company, dated June 1, 1894, do hereby certify that we have been for the past four months engaged in a thorough and searching official investigation into the affairs of the New York Life Insurance Company of the City of New York.

We further certify that each Stock and Bond owned, each Collateral Loan, each Bond and Mortgage Loan made, the Cash and each Bank Certificate of Deposit, was carefully examined, checked, and verified; that the Policy Loans and Premium Notes were examined and checked with the Reserve on each Policy that Interest and Rents due and accrued, unreported and deferred Premiums, were also verified; that the values of Stocks and Bonds owned, and Real Estate owned, were individually and closely scrutinized and conservatively made; that the title to each piece of property secured, and Bond and Mortgage Loan made since the 1891 New York State Insurance Department Investigation, was examined and found satisfactory. That the Policy Reserve was checked and verified by the Actuaries of our several State Insurance Departments, and that every Policy and its Reserve, on the books of the Company, was checked individually with the Valuation Policy Registers of the Massachusetts Department; that all Sundry Liabilities were also verified; that each debit and credit entry in the Company's books was checked from the date of the said New York State Investigation; and that as a result, on the most conservative basis of valuation, we found the Company possessed of **ASSETS** satisfactory to us amounting to

\$155,453,428.73

And that, after providing for all possible Liabilities, including \$135,058,291.00 for outstanding Policy Reserve, as per the "Combined Experience Table of Morality," with 4 per cent interest, the total of the same amounted to \$138,124,363.81.

We further certify that, by the severest test, the **NET SURPLUS** to policy-holders, after providing for every Liability, and deducting Agents' Balances, was on June 30, 1894,

\$17,329,064.92

In Witness Whereof, we have hereto subscribed our respective names, in the City of New York, the day and year above written.

PREFACE.

THE WORLD ALMANAC AND ENCYCLOPEDIA is again presented to its readers, with improvements in its mechanical and editorial arrangement. Having become the every-day companion and adviser of so many hundreds of thousands of people, it is proper that their convenience in the use of the volume should have special consideration in its preparation, and with this in view a change for the better has been made in its binding and some of its typographical features. It will be found that the employment of bolder figures in a work so largely statistical will be a comfort to the eye, and that the new method of binding will conduce to greater ease in the handling of the volume, as well as to its greater endurance.

To meet the wants of the ever-widening circle of its friends additional information has been introduced in this year's issue of the ALMANAC of the usual diversified character. The scope of this annual may be said to extend, like its circulation, to the ends of the earth, for such, in effect, are Iceland and New Zealand, Russian-Asia and the Cape of Good Hope, from which orders have been received, and to embrace all things in it. THE ALMANAC has a growing vogue in most foreign countries, and is now accepted in Europe as the only popular exposition of American statistics, and how it is regarded by the most progressive people of the East is evidenced by a call for three thousand copies of this issue from a bookseller in Japan. To respond liberally to this general demand for the book has been the aim in its compilation, and thus, while new topics have been introduced, all the standing departments, astronomical, educational, financial, religious, military, sporting, literary, political, local, etc., have been extended and improved.

Among the special features of the present edition, appearing for the first time, are the financial statements of over three hundred and sixty universities and colleges. To the elaborate exposition of railroad systems in the United States and Canada has been added summaries of their latest reports of receipts and expenditures. Much attention has been given to the labor problem. A new tabular history of strikes in this country appears, as well as the text of the President's proclamations in July and the recommendations of the Government Strike Commission. In the sporting department will be found the record of Vigilant's adventures in British waters, and in the department of literature a reprint of THE WORLD ALMANAC's notable list of "The Hundred Greatest Novels," and of Sir John Lubbock's "Hundred Books Best Worth Reading," and a record of the Harvard-Yale debates. The lovers of whist will welcome a statement of the new and enlarged rules of their fascinating game. The president of the Church of Latter-Day Saints contributes a specially written article on the organization and tenets of the believers in the Mormon faith. The platform and secret oath of the mysterious A. P. A. are given, and other new matters are the new Congress just elected, the text of the Chinese Exclusion Treaty, a synopsis of the new Constitution of the State of New York, the rates established by the new Tariff compared with those of the McKinley and 1883 Tariffs, and facts about transoceanic cables. A novel feature is a census of the population of principal cemeteries of our great cities. The latest gleanings from the United States Census as to population, manufactures, real estate-mortgages, farm products, etc., are presented. Of not less interest is an estimate of the present population of each of the States and Territories, made by their Governors for this issue of the ALMANAC. And it may be added that the valuable information about our British neighbors and about continental royalties, governments, and peoples is repeated, after careful revision to date by THE WORLD's resident correspondents abroad.

This enumeration covers but a part of the varied contents of the ALMANAC, and in view of the many thousand statements and many million figures involved, it is not expected that the work will be free from errors, and the editor again extends the request to all friends of this publication to inform him of needed corrections, that they may be made in succeeding editions. And he embraces the occasion to thank many hundreds of correspondents for suggestions, most of which are valuable and, when available, will be used hereafter.

Occurrences During Printing.

SOME weeks are occupied in printing a volume so bulky as THE WORLD ALMANAC, and it is necessarily put to press in parts or "forms." Changes are in the mean time occurring. Advantage is taken of the going to press of the last form to insert information of the latest possible date, which is done below. The readers of the ALMANAC are requested to observe these additions, corrections, and changes, and it would be well to make note of them on the pages indicated.

69. Death Roll. David B. Knickerbacker (61), Protestant Episcopal Bishop of Indiana, Indianapolis, Ind., Dec. 31; George M. Stearns (64), lawyer, Brookline, Mass., pneumonia, Dec. 31; Susan Fenimore Cooper (82), author, philanthropist, Cooperstown, N. Y., apoplexy, Dec. 31; John Lord, L. L. D., historian and lecturer, died at Stamford, Ct.; General Philip S. Post, Representative in the Fifty-third and re-elected to the Fifty-fourth Congress from the Tenth District of Illinois, died at Washington, D. C., Dec. 6.
103. Civil Service Rules. The President has extended the rules to cover other bureaus of the public service and several thousand additional clerks since the publication of these rules.
105. Qualifications for Voting in Texas. An alien who has declared intention and has resided one year in the State and six months in the county can vote. In New York the term of citizenship is ninety days instead of ten.
106. In the State of Washington all voters in all cities and towns and all voting precincts having a voting population of 250 or more must be registered. The Constitutional Amendment providing for woman suffrage in Kansas was defeated in November, 1894.
109. National Association of Democratic Clubs. Charles J. Canda is Treasurer, in place of Roswell P. Flower. J. M. Martin, William E. Russell, and Tom L. Johnson are now members of the Executive Committee, instead of N. W. McIvor, Patrick A. Collins, and Michael Harter, respectively.
135. Society of the War of 1812 in the State of New York. Frederic Gallatin has been elected, a member of the Board of Directors, succeeding General James M. Varnum, resigned.
163. United States Post-Office statistics, fiscal year 1894: Number of post-offices, 69,805; miles of post-office routes, 454,746; receipts, \$75,080,479; expenditures, \$84,324,414.
178. Savings Banks. The amount of deposits in Minnesota banks is \$8,954,575; depositors number 38,493; average savings is \$232.63.
190. The lowest price reached by wheat in the Chicago market in 1894 was in September, when it touched 50. The highest was in April—65 1/4.
217. Bristol City Line. Funnel, black, white band in centre, blue star in centre of white band.
231. United States Hay Fever Association. President David Willis is dead.
240. Julia Marlowe was born in Calbeck, England, in 1865.
249. American Authors' Guild. The officers are: James Grant Wilson, President; Julia Ward Howe, First Vice-President; Professor Moses Coit Tyler, Second Vice-President; Albert Matthews, Third Vice-President; Titus Munson Coan, Treasurer; Craven L. Betts, Secretary; Colonel Thomas W. Higginson, Richard H. Stoddard, Louise Chandler Moulton, Ellen H. Walworth, Olive Thorne Miller, Elizabeth Akers Allen, Cynthia Cleveland, Dr. Newland Maynard, Edwin H. Shannon, Managers.
251. National Academy of Sciences. Council Thomas C. Mendenhall's address is Worcester, Mass., instead of Washington, D. C.
266. University Boat Racing, Harvard and Yale Elights. Yale's time in 1894 was 23 minutes 47 seconds.
272. Amateur Skating Records. The time given for distance fifty yards to one-quarter mile, inclusive, is seconds instead of minutes.
279. Universities and Colleges. A number of blanks sent to officers for information were returned too late for use in this edition.
300. National Educational Association. Next annual meeting will take place at Denver, July 5-12, 1895.
303. State Flowers. Montana has adopted the "bitter root." Vermont has adopted the "red clover."
304. Irish National Club (Parnellites). Stephen McFarland, President; H. C. Bannon, Treasurer; James S. Rice, Recording Secretary. Irish National Federation, Treasurer Eugene Kelly is dead.
311. American Bible Society. Hon. Robert C. Winthrop is dead.
314. National Woman's Christian Temperance Union. At the annual meeting in November, 1894, Mrs. Lillian N. M. Stevens, of Maine, was elected Vice-President at Large and Mrs. C. C. Hoffman, Recording Secretary.
328. Princess Victoria Alice (Alix), daughter of Princess Alice of Hesse, has married the Emperor Nicholas II. of Russia.
358. The Postmaster of Worcester, Mass., is J. Everts Greene.
360. The Army. Major-General O. O. Howard has been retired.
364. U. S. Naval Academy at Annapolis. Captain Philip H. Cooper, U. S. Navy, has been appointed Superintendent.
391. Delaware vote for President in 1892. The vote given at Kent County is intended for New Castle County, and vice versa.
392. Florida, Judiciary—Supreme Court: Chief Justice, Milton H. Mabry; Associate Justices, R. Fenwick Taylor and Benjamin S. Liddon; Clerk, James B. Whitfield—all Democrats.
425. Pennsylvania (present State Government). Governor, Daniel H. Hastings; Lieutenant-Governor, Walter Lyon; Secretary of State, Frank Reeder; Secretary of Internal Affairs, James W. Latta; Treasurer, Samuel M. Jackson; Auditor-General, Amos H. Mylin—all Republicans.
441. The name of the Bijou Theatre has not been changed.
444. Central National Bank, Edwin Langdon has been elected President. Hanover National Bank, William Halls, Jr., has been appointed Cashier and James M. Donald has been elected Vice-President. Tradesmen's National Bank, President James E. Granniss is dead.
445. The Federal Bank has stopped business.
446. Bar Association of New York. Joseph Larocque has been elected President; Benjamin H. Bristow and Thomas H. Hubbard have been elected Vice-Presidents instead of Francis C. Barlow and Charles E. Strong, respectively.
452. Italian Consul-General G. P. Riva has been superseded by G. Bianchi. Dominican Consul is A. Wosy Gil, 31 Broadway, New York. The Salvation Army headquarters have been removed from 111 Reade Street to 120 West Fourteenth Street.

THE CONTINUOUS INSTALMENT POLICY

ISSUED BY

THE MUTUAL LIFE INSURANCE COMPANY

OF NEW YORK.

ITS PROVISIONS AND ADVANTAGES.

IN offering this novel plan of insurance The Mutual Life Insurance Company has duly considered the many objections made, that frequently those receiving the full amount of a policy at once are so unaccustomed to handling or investing large sums of money that they are very liable to lose all very soon.

By this new "Continuous Instalment Policy" a certain proportion is paid the Beneficiary each year succeeding the death of the Insured for a specified time, and should the Beneficiary outlive that period, payments for same amount continue to be made until death. Should the Beneficiary die before the completion of the stipulated term, the legal representatives of the Beneficiary will receive the same amount each year during the specified period. But should the Beneficiary die during the life of the Insured, the legal representatives of the Insured become the recipients of the yearly instalments until the completion of the term.

The "Continuous Instalment Policy" is a contract in which the annual rate is based upon the ages of both the Insured and Beneficiary, but the premium, which is much reduced, is only payable during the life of the one insured. Participating in the profits of the company, the Insured may, at the completion of the distribution periods, apply the dividend towards extinguishing the future premiums, taking any balance in cash, or may take the whole dividend in cash.

No assignment of this policy or any portion of it or interest in it or of any future instalment will be valid unless made by the Beneficiary with the written consent of the Insured.

Each instalment as it becomes due will be paid to the specified Beneficiary personally, or upon his or her order for each payment, and after the expiration of the instalment period satisfactory evidence will be required each year that said Beneficiary is living. No instalment will be paid to any other party during the life of the Beneficiary unless the assignment of said instalment complies strictly with the above requisites.

If after three full annual premiums have been paid the holder is unable to continue the payments, the company will, upon legal surrender of the policy within six months, issue a full-paid non-participating policy for three-fourths of the amount of a full-paid policy secured under a corresponding ordinary life policy.

Such full-paid policy becomes due and payable in one sum immediately upon the acceptance of satisfactory proof of the death of the Insured.

Further information regarding this form of policy, or any particulars concerning the various other forms of policies issued by The Mutual Life Insurance Company, may be obtained of the company's agents.

RICHARD A. McCURDY, President.

IT REACHES THE UTTERMOST PARTS OF THE EARTH.

In the preparation of data for THE WORLD ALMANAC AND ENCYCLOPEDIA the question of its universal utility is of the first importance. While some of the information is essentially of a local character, yet the work in its entirety is determined from a broad and world-wide standpoint. In addition to the complete statistics of all matters pertaining to the United States—National, sectional, or local—an adequate conception of its international character may be had by reference to the list of contents in the front pages of the ALMANAC. There we find mentioned:

Armies of Asia,	Climate of Foreign Cities,	Mexico,
Armies of Europe,	Coinage of Nations,	Ministers of the United States
Armies of South America,	Consular Service,	Abroad,
Army and Navy List, British,	Continents, Area of,	Moneys, Foreign,
Austria,	Countries of the World,	Navies of Asia,
Banking Statistics of the World,	Earth's Population,	Navies of Europe,
Bavaria,	Education in Europe,	Navies of South America,
Belgium,	England,	Netherlands,
Bonaparte Family,	European Languages,	Oxford and Cambridge Boat Race,
Bourbon-Orleanist Family,	Facts About the Earth,	Passport Regulations,
Brazil,	Foreign Shipping,	Population of Largest Cities of the
British Colonies,	France,	Earth,
British Empire,	Germany,	Portugal,
Calendars—Greek Church,	Indebtedness of Nations,	Protestants in the World,

Surely a work of great magnitude like THE WORLD ALMANAC AND ENCYCLOPEDIA, comprehending, as it does, the vital facts of the earth, cannot be confined to sectional use—this is best confirmed by the orders for copies of the ALMANAC recently received from Monrovia, Liberia, and Cape Town, Africa; Buenos Ayres, Argentine Republic; Taku, North China; Shanghai, China; Sydney, Australia; Sitka, Alaska, and Vigo, Spain—good illustrations of the wide scope it covers. Countless endorsements from prominent people in all parts of the globe attest their keen appreciation of THE WORLD ALMANAC AND ENCYCLOPEDIA. “It is a wonderful book” is the significant expression of *K. Y. Fuku Yama, of Yokohama, Japan.*

The 1894 edition was the largest ever issued, and yet the supply was exhausted prior to October 1. Its use is contagious, and it needs no other endorsement than that of the person using it.

So eagerly is the ALMANAC sought for by the masses that the press in many sections of the United States have found it of immense value in increasing their circulation by giving the ALMANAC as a premium to new patrons.

Owing to the diverse character of the subjects included in its pages (and there are upwards of thirteen hundred subjects treated), no one can appeal to the work in vain, hence its unbounded popularity.

Are you interested in any of the Colleges on the American or European Continent? You can obtain valuable information concerning them in the ALMANAC not obtainable elsewhere.

Are you interested in the popular games and sports of the day? They are all recorded in the ALMANAC.

Are you politically inclined? Study the ALMANAC.

Are you religiously bent? No other work embodies all sects and denominations as completely as THE WORLD ALMANAC.

Are you a Mason or member of the many fraternal organizations throughout the country? Consult the ALMANAC for important data of these associations.

Are you interested in educational matters? No better authority than the ALMANAC extant.

Are you a financier? The ALMANAC is indispensable.

Are you a railroad man? The ALMANAC treats of every important feature of railroad systems.

These and hundreds of other questions can only be answered authoritatively by

The World Almanac and Encyclopedia,

as the information it contains is official.

It is the standard almanac of America, and is destined to become, in the nomenclature of almanac usage, the almanac *par excellence* of the world.

Largest Circulation of any Newspaper Published in the English Language.

C. W. Lovell's New Process Bookbinding Machine.

PATENTED IN THE UNITED STATES, ENGLAND, FRANCE, GERMANY, AND BELGIUM.

THIS copy of *The World Almanac* is bound by the New Process Machine. Please examine, and notice how flexible and strong it is. **THERE IS NEITHER THREAD NOR WIRE STAPLES** used in its manufacture.

The process has been on the market for nearly 3 years, millions of books have been circulated and their advantages acknowledged.

The machine can be seen running in C. W. Lovell's Book Bindery, 409 Pearl Street, New York City, where bookbinders and any one interested are cordially invited to inspect the new process of making books.

The New Process Machine binds 7,000 books per day.

C. W. Lovell's Auto Book=Trimming Machine.

PATENTED IN THE UNITED STATES, ENGLAND, FRANCE, GERMANY, AND BELGIUM.

This copy of The World Almanac has been trimmed on the Auto Book-Trimmer, which cuts only one book at a time, ensuring absolute accuracy.

The machine can be seen at C. W. LOVELL'S BOOK BINDERY, 409 PEARL STREET, NEW YORK CITY.

The machine trims 40 books per minute, equal to 2,400 books per hour. Like the New Process Bookbinding Machine, it is a new departure in bookmaking.

The World.

THE history of a great newspaper is a history of the times, except possibly on its industrial side. This has been the case with THE WORLD. Despite the depression of the year 1894, THE WORLD reached its highest altitude in circulation under its present proprietorship, attaining an average in the month of November of more than half a million copies per day, and its power as a servant of the people was doubly demonstrated.

Aggregated for the year, the circulation of THE WORLD exceeded one hundred and sixty-five million copies. Nearly one million advertisements were received and printed. The press-room, before the largest in point of capacity and output of any in existence, was further augmented by the addition of a great sextuple press, the finest ever built, and additional perfecting color press exceeding in size any previously constructed. The paper required was seventeen thousand three hundred and ninety-five tons, or thirty-four million seven hundred and ninety thousand pounds. The ink used in turning this vast amount of raw material into newspapers amounted to nearly half a million pounds. Fifty typesetting machines, the largest plant in operation anywhere, and much additional hand labor "set up" more than ninety-two thousand columns, or upward of six hundred and fifteen millions of printers' "ems," representing in separated types about one billion three hundred and seventy-five million pieces.

THE WORLD'S home in the Pulitzer Building becomes year by year more of a centre of popular interest. It is always open and its visitors come from every clime. Not less than one hundred thousand came in 1894.

THE WORLD'S achievements for the year 1894 just closed had for their crowning the triumph of The Greater New York and The Better New York. The election of November 6 made possible the creation of the second largest city on earth and opened the way for an intelligent and honest municipal government. With this also came the beginning of real Rapid Transit on Manhattan Island. For these three ends THE WORLD was first to speak, and it did not cease in its exertions until this, the greatest of all its tasks in the direction of public service, had been carried to fruition.

Political conditions, growing out of the mastery of a party by individuals and the smothering of true democracy and the public interest for personal gains, impeded municipal progress. When down-right dishonesty did not prevail, tyranny and oppression did. The people were deprived of their power by bosses. But when THE WORLD'S battle ended the bosses had been destroyed and the city restored to its people.

Before the now famous Lexow Committee began its work THE WORLD had produced evidence, which, added to the exertions of the Rev. Charles H. Parkhurst, D. D., made the coming of such a committee a necessity. The corruption in the Police Department was no more than a sample of wrongs in other sections of the City Government. THE WORLD forced the letting of dock department bids in open competition by securing a legislative enactment, and turned the light on the diversion to political purposes of the \$1,000,000 appropriation secured through its exertions for the benefit of unemployed labor on Central Park improvements.

This tribute came from Recorder John W. Goff:

"THE WORLD has been in the van. It has done more than any other agency to win this fight. From the commencement it was determined, definite, and uncompromising. In the midst of uncertainty it was certain. When fear dominated the public mind THE WORLD sounded a bugle note which inspired confidence that has been maintained, and the people have nobly responded."

Dr. Charles H. Parkhurst wrote this sentiment:

"THE WORLD never fought a finer battle than in this campaign. What we have to do now is not simply to keep what we have obtained, but to prolong the process of education by which present results have been reached."

On election night THE WORLD had as its guests many distinguished citizens of New York and the nation. The results were announced from the dome by powerful electric signals, and so promptly that by 6.25 P. M. the Greater New York knew it had redeemed itself.

THE GREATER NEW YORK.

It is not quite seven years since THE WORLD took the first step towards the consolidation of Brooklyn, Staten Island, and other adjacent territory with the metropolis into a Greater New York. The people were polled as they entered the city by bridge and ferries, and the substantial unanimity shown led to the Greater New York Commission. This body formulated a bill that failed before the Legislature of 1893, but in 1894 THE WORLD took up the question of submitting the matter to a popular vote, and prevailed upon the Legislature to pass the measure which led to the ratification of the plan by the people of the communities concerned. Thus a magnificent municipality of more than 3,000,000 people, outnumbering all the cities of the world save London, will soon be created by legislative processes already in motion. Signed statements secured by THE WORLD from members of the Legislature within a week after election show that no impediment now remains.

THE ELMIRA REFORMATORY HORROR.

During the year THE WORLD'S investigation into the cruelties practised at the Elmira Reformatory was continued, and the Superintendent, Z. R. Brockway, was convicted, not by this newspaper's charges, but by the official report to the Legislature of the State Board of Charities. This was based upon a painstaking and careful inquiry, in the course of which more than two hundred witnesses were examined, and it was unanimously agreed to by the members of the board. The report of the State Board of Charities to the Legislature said:

"The total number of blows struck during this period of five years foots up to 19,497, averaging 7.56 for each spanking. It is an extraordinary fact and a painful one to consider that this enormous amount of paddling, averaging the last year nearly two cases a day, has been in every case inflicted by the General Superintendent himself. It does not seem possible to your committee that any human being could inflict upon others such severe punishment, so constantly and in such amounts, without being absolutely brutalized thereby and losing all sympathy with human suffering."

Despite this conclusive report, the local Board of Managers declined to remove Brockway, and secured through Gov. Flower the appointment of a special commission, before whom the former testimony was presented in amplified and reconfirmed form. The decision of the commission was still pending in December. The decision of the people of the State has been heard again and again. It sustains THE WORLD. More than \$21,000 has been expended by THE WORLD in its efforts to secure just and humane treatment for the inmates of the Elmira Reformatory.

INCOME TAX VICTORY.

The success of the Income Tax principle in the Congress of the United States in 1894 illustrates the national influence of THE WORLD as an educator of public men in the public interest. Alone and unaided THE WORLD has fought for an income tax almost from the first day of Joseph Pulitzer's proprietorship. Indeed, it was exactly five days after he assumed its management that THE WORLD took its stand squarely for an income tax. That was one of the ten doctrines announced at the time, all of which have since come to fruition, and are worth studying at this time. They were as follows:

- (1) Tax Luxuries.
- (2) Tax Inheritances.
- (3) Tax Large Incomes.
- (4) Tax Monopolies.
- (5) Tax the Privileges of Corporations.
- (6) A Tariff for Revenue.
- (7) Reform the Civil Service.
- (8) Punish Corrupt Office-Holders.
- (9) Punish Vote-Buying.
- (10) Punish Employers Who Coerce Their Employés in Elections.

It was eleven years ago that THE WORLD recommended these ten corner-stones of reform to the politicians, "in place of long-winded resolutions," and every one of them has since received the vindication of popular approval.

The Income Tax struggle in the House and United States Senate in 1894 is easily recalled. Alone in the Eastern States THE WORLD strenuously upheld the justice of the Democratic measure and furnished arguments and ammunition for the champions of the measure in Congress. And finally as a part of the Wilson Tariff bill the Income Tax section passed the House by a large Democratic majority and won its way through a more reluctant Senate. It is now a law of the land and will relieve people of unjust tax burdens.

To show just how the Income Tax would operate in New York THE SUNDAY WORLD compiled and published a list of all the men and women in this city and Brooklyn with a million dollars or over. There were over eleven hundred of these individuals who, it was shown, would pay into the National Treasury more than three million dollars per year. This would be about a tenth of the entire

revenue expected by the Government from the Income Tax, and it would all be paid by millionaires without falling upon any of them oppressively. Next in importance to this striking table in the Income Tax controversy was the statement made through THE WORLD by James C. Carter, the leader of the New York Bar. Mr. Carter came out squarely in favor of the tax, saying the Government should notice inequalities of wealth and that the Income Tax was the most equitable of all forms of taxation.

ARMOR-PLATE FRAUDS.

The country was startled during the early spring by THE WORLD'S expose of armor-plate frauds. The Carnegie Company, according to the revelations which patient inquiry on the part of THE WORLD revealed, had been furnishing the ships of the new navy with armor plate that was honeycombed and worthless for purposes of defence. The stories of these frauds were so circumstantial that the Government took up the matter and the Navy Department sent a secret committee to the mills at Homestead, Pa., to investigate the frauds. But even here THE WORLD'S work did not stop. It found that the committee, instead of hearing impartial testimony and thus getting at the facts, was prevented from reaching any witnesses except such as the Carnegie Company approved. No witnesses were allowed on the ground where the inquiry was held unless they had a written pass from the Superintendent. After the publication of this fact in May the evil was corrected to some extent.

During the committee's investigation THE WORLD kept on with its revelations, the committee merely following up these leads. It was shown that not only was the armor plate itself defective and full of blow holes, but the very bolts upon which the safety of American war vessels depended were unfit for use. Secretary of the Navy Herbert and a party of experts examined the plates of the coast defender Monterey and found them full of blow holes, just as THE WORLD had predicted. Officers said that under the impact of a round shot the armor would crumble to pieces. So many new frauds were brought to light by THE WORLD that Congress itself took the matter in hand and appointed a committee to sift affairs to the bottom. The Carnegie Company was fined and compelled to refund to the Government a heavy rebate for defective work.

THE FREE BREAD FUND.

When the hard times fell upon the poor of the city, when an army of workless ones swarmed through the streets vainly seeking employment, when the bake shops were surrounded by hungry-looking women and men with faces pressed against the pane, when the hard winter of 1893-94 seemed without hope for that great class whose earnings were cut off, when the outlook was darkest for the poor—then THE WORLD came to the rescue and started its Free Bread Fund. In the fall and winter this fund gave away 1,410,889 loaves of bread.

The fund began August 26, 1893, with a personal contribution of 10,000 loaves from Mr. Joseph Pulitzer. A distributing depot was opened at No. 154 Allen Street, and subsequently larger quarters were secured at No. 18 Delancey Street. On the first day 4,000 loaves of bread were given away to the hungry people, and for sixty-five days free bread was distributed to all who came. Altogether 266,273 loaves of bread were given away during that time, and, there having come a temporary improvement in the labor market, with less want and suffering, the fund was discontinued. The second subscription list was opened by Mr. Joseph Pulitzer with an additional personal contribution of 20,000 loaves of bread. The fund grew rapidly, and on January 8 the second distribution of bread began from No. 210 Houston Street. Each day the number of people applying for bread grew larger. Many of the applicants, it was learned, were coming every morning from the far west side of the city. Investigation showed a necessity for a depot in that part of the town, and one was opened January 29 on the corner of Forty-ninth Street and Eleventh Avenue. Soon the applicants there were as many as at the Houston street depot and the total daily distribution ranged between 6,000 and 9,000 loaves. It soon became necessary to establish a depot in Harlem, and quarters were secured at Ninety-fourth Street and Second Avenue on February 15.

From that time on the three depots continued to distribute bread daily to the hungry and starving people, whose stories revealed many sad tales of privation and suffering. By the middle of February the average daily distribution had risen to over 11,000 loaves and thousands of families were thus enabled to tide over the hard times. The work was kept up until April 1, when nearly a million and a half loaves had been distributed.

THE CONVICTION OF JOHN Y. M'KANE.

THE WORLD has fought for the righting of wrongs in Brooklyn with quite the same vigor that marked its crusade in the greater city. The election of 1893, though resulting in a vast reform victory in Kings County, left in its wake a grievous crime against the liberties of the people in the election frauds in the town of Gravesend, planned and carried out by John Y. M'Kane. This man had made himself a miniature monarch, who violated law and right with impunity and defied the man-

dates of the courts with the declaration, "Injunctions don't go here." Long before the election THE WORLD had called attention to the flagrant defiance of law and decency on the part of McKane and his heelers, who had been running things with a high hand. It was shown that there were not more than 2,000 voters in the town, but that the McKane ring had so inflated the registry as to swell the list to over 6,600. McKane refused to permit the registry lists to be inspected as the law provides. When the Supreme Court issued a mandamus to compel him to allow copies to be made, his answer was to seize the men bearing the order, send them to jail, and refuse their release on bail.

Commenting upon this outrage THE WORLD said:

"There is but one thing to do in the matter. Whatever the courts may succeed in doing towards releasing the imprisoned men or securing something like an election in Gravesend, John Y. McKane and all who have abetted him in this crime must be indicted, tried, and sent to prison for long terms. If the machinery of the law is not competent to accomplish that, and is not vigorously used to that end, then order is at end in Kings County, and civilized, popular government has given place to anarchy directed by a usurping despot. There can be no quibbling or shuffling in a case like this."

With characteristic audacity McKane went THE WORLD for \$100,000 damages, but a few weeks afterwards, on the 2d of March, 1894, he sued to Sing Sing under a six years' sentence. THE WORLD's fight for honest elections had won. For further fruit, his fellow-conspirators were also found guilty. Kenneth F. Sutherland, after a sentence of one year and \$500 fine, ran away to Canada. He came back after several months' absence and received an additional year on another count. R. V. B. Newton was sentenced for nine months and \$750 fine; A. S. Jamieson, eighteen months; M. P. Ryan, six months and \$500 fine; F. Bader, five months and \$500 fine; B. Cohen, four months and \$500 fine, and so on down through the list of the whole McKane gang, who for years had ruled Coney Island and Gravesend.

The ring was completely demolished and the convicted men were taken to prison in groups of five. In an honest election in April, 1894, the total number of votes cast was only 1,928.

The invasion of streets without proper consents by the Nassau Electric Road was a violation of public rights checked by THE WORLD. The political combination which had secured privileges from the old ring was compelled to stop and obey the law.

Policy gambling had become a curse to the poor of Brooklyn. THE WORLD's crusade forced the police to act until half a dozen policy-dealers were in prison and the evil driven into obscurity.

THE GREAT RAILWAY STRIKE OF 1894.

The great Pullman strike, which centred attention on Chicago during the first half of July, afforded an illustration of the difference between THE WORLD's method of gathering news and that of ordinary newspapers. Here was an event open to all to report as they saw fit. The journals of America contented themselves with giving mere accounts of the occurrences. THE WORLD did all this, of course, and sent a special force of trained writers that the work might be perfectly done. But it did more. Not content with the mere recital of events, it sent into the homes of the Pullman workers and there learned upon the spot the real story of the strike, and of the causes which led to the boycott of the Pullman cars. Pullman's employes, living in his houses, for which they paid excessive rents, overcharged by him for light and water, and squeezed at every turn to swell the dividends of the Pullman company, told the story of their wrongs, and thus gained at once a widespread sympathy. It was shown by the actual figures given by these employes of Pullman that their life was little short of slavery, and that the boasted model town of Pullman was, in effect, only such in name.

Through all the anxious time when the country was asking itself whether civil war had come again THE WORLD printed day by day statements of the exact situation, written and signed by the men at the head of the movement on both sides. Every day President Eugene Debs, of the American Railway Union, wrote out his view of the situation, while John M. Egan, of the Managers' Association, presented the side of the railways. J. R. Sovereign, General Master Workman of the Knights of Labor, also contributed signed statements of how the strike affected labor in other parts of the country.

In addition to these, on July 15 THE WORLD printed the written views of the Governors of many States, of the Mayors of big cities of the Union, of labor leaders, of millionaires, of editors, of plain business men everywhere. These letters went beyond the mere question of strike and discussed the future of labor, the value of arbitration, and allied questions which were of burning interest just at that time. Later in the year, on November 13, when the finding of the special Strike Commission was made public, it again secured and printed the views of labor leaders and railway rulers on the subject.

WITH THE JAPANESE ARMY.

When the war broke out between China and Japan THE WORLD engaged and despatched to the battle grounds in Corea an able and brilliant war correspondent. No other American newspaper sent

a war correspondent, and so the cables and letters written on the spot and sent to THE WORLD have been the only detailed and exact accounts that have come out of that remote land. Many of the newspapers of Europe have copied this correspondence. The cabling of war news directly from China and Japan is the latest revelation of the possibilities of modern journalism. Letters by mail have been printed in THE WORLD exactly two weeks after the date of mailing in Japan. The point where they were written is nearly 9,000 miles from THE WORLD office, and the seemingly impossible feat is accomplished by having the letters opened the minute they arrived in San Francisco or Victoria, B. C. An agent in each of those Pacific slope cities puts the correspondence on the wire the minute the ship comes in and it is telegraphed to New York. The first detailed account of the greatest battle of the war, that at Ping-Yang, came to THE WORLD that way.

Similarly on November 14 THE WORLD published the only account that has yet appeared anywhere of the great naval battle between the Japanese and Chinese fleets—the first in which modern ironclads ever met.

SAVING AN INNOCENT BOY.

THE WORLD'S never-sleeping watchfulness over the liberties of the people enabled it to save an innocent boy from spending fifteen years in jail. James M. Scanlon, a weak lad not yet out of his teens, was convicted November 10, 1893, of stealing \$75 worth of jewelry from a butcher named Lissner. There was only one witness against the lad, and the testimony of this witness contradicted itself over and over again. The sentence, too, seemed out of proportion to the crime, and was shown to be unjust when compared to the sentence that had just been inflicted upon Francis H. Weeks, an embezzler, who had stolen millions. The million-dollar thief and clubman got off with a ten years' sentence; the \$75 victim got fifteen years.

THE WORLD began gathering testimony, and it was shown by Supt. Richards, of the Olive Tree lodging-house, conducted by the Calvary Protestant Episcopal Church, that young Scanlon had spent the whole of that night in his place. Mr. Richards testified to having seen the lad go to bed at 9.30 in the evening, after taking a bath, and that he was asleep in bed at 6.30, when the witness left the following morning. It was during these hours that the robbery had occurred for the commission of which young Scanlon had been sentenced to fifteen years in prison.

When THE WORLD began its investigation a curious state of facts, which looked very much like inhuman police persecution of an inoffensive and somewhat weak-minded boy, was developed. Scanlon had kept a news-stand. A police officer was in the habit of taking newspapers from Scanlon's news-stand without paying for them. When the bill for papers had amounted to nearly \$5, Scanlon asked him for his pay, but he replied with abusive epithets, and from that time on conducted a series of persecutions against the boy. These included clubbings and beatings, and Scanlon lived in a state of constant terror of this policeman, who arrested him, and it was shown that the arrest was made after consultation with Lissner. Governor Flower carefully investigated all the evidence in the case, including the five-column article printed in THE WORLD November 29. He thereupon promptly signed a pardon March 29. This was handed to a WORLD reporter, who took it at once to the Elmira Reformatory, and Scanlon was set free.

JUSTICE FOR COACHMAN HOWARD.

Previous to the last campaign in New York ex-Vice-President Levi P. Morton, Republican candidate for Governor, hired a coachman in England. The man's name was John James Howard, and after he came over to take his position Secretary Carlisle had him held as a contract laborer brought here illegally. In spite of THE WORLD'S opposition to Mr. Morton's candidacy at the time, it pointed out the shame and littleness of these proceedings, which were meant to affect the political issue. Everybody recalls the result and remembers that the case against Howard was quickly dropped.

In line with this spirit of fairness was the verbatim report of Thomas B. Reed's speech at the opening of the campaign in Maine. THE WORLD was the only paper that gave the speech in full, although opposed to Reed's politics. Two days later the *Tribune*, the leading Republican organ, reprinted the speech from THE WORLD.

IN FOREIGN LANDS.

In every land and under every flag where matters of human interest transpire there is at hand a WORLD correspondent to take up the story and flash it under the ocean. From Tripoli to Siam, and from Morocco to Mexico come special cable despatches. Richard Croker fled to Mexico only to run into the arms of a WORLD correspondent, and then hurried to Europe to be met at the steamship dock by another. Ex-Vice-President Morton, W. C. Whitney, Chauncey Depew, in fact all the celebrities for whom the country cares, were kept in evidence through THE WORLD'S columns during all their journeyings over Europe.

Among the notable achievements during the year was the foreshadowing of Mr. Gladstone's retirement from public life, followed up by the prediction that Lord Rosebery would be Prime Minister, and by an accurate forecast of his policy. THE WORLD was the first also to announce that Lord Rosebery, in deference to public opinion, would abandon the turf. The death of the great Hungarian patriot Kossuth, in Turin; the extraordinary scenes along the route as his body was carried back to his native land, and the remarkable funeral in Budapest were depicted in THE WORLD with a fulness and fidelity found nowhere else.

The assassination of President Carnot, of France; the election of Casimir-Perier to succeed him, the death of Czar Alexander, and the succession of Czar Nicholas were portrayed in a manner suited to the importance of the events. Emperor William's startling warning, uttered at a dinner in Berlin, that war with Russia might be expected in three months if the commercial treaty was not ratified, came to THE WORLD by special cable despatch before the guests who heard it had recovered from their astonishment.

The story of the wreck of the famous Kearsarge, conqueror of the Alabama, was a striking example of THE WORLD'S ability to surmount difficulties to get the news. Admiral da Gama's surrender to the American Admiral at Rio and the closing scenes of the insurrection there, described by the correspondent sent from New York on the celebrated dynamite cruiser *Nittheroy*, were a fitting conclusion to THE WORLD'S unequalled reports of the war in Brazil. In the same category of exploits belong THE WORLD'S accounts of the wars in Nicaragua, Honduras, Salvador, Peru, and other Central and South American countries. Other occurrences which first saw light in THE WORLD were the flight of the Princess Colonna with her children from Paris to America, the separation of Mr. and Mrs. W. K. Vanderbilt while on a tour of the globe, the arrival of Audinet Gibert in Paris to challenge Santa Maria to mortal combat, and the details of Constance Fenimore Woolson's suicide in Venice.

The narratives of the sufferings of Peary's polar expedition, of the governmental transformation scenes in Hawaii, of the perilous adventures of Dr. Cook's Arctic excursion, of the acquisition of the Sultanate of Morocco by Abdul Aziz, and of the tribulations of Samoa suggest the scope of THE WORLD'S newsgetting. That other countries have found out that THE WORLD is the best medium through which to reach the American people is shown in its having been selected by Sir Charles Russell, while Great Britain's Attorney-General, to make known the purport of his Behring Sea Award bill, by the Irish leaders in Parliament to convey St. Patrick's Day greetings to their brethren in America, by Nicaragua's Commissioner at Bluefields to define his attitude, and by the people of Brazil to express their grateful appreciation of the friendship of the United States.

FIGHTING THE TRUSTS.

In no one matter that affects the public has THE WORLD waged a more persistent and vigorous warfare than against the Trusts and combinations of capital which have grown of late years into threatening greatness. From the day of President Cleveland's election down to the present time the columns of this newspaper have called upon him to compel Attorney-General Olney to enforce the law against Trusts. From the illegal combination of whiskey manufacturers up to that most shameless of all—the Sugar Trust—the guns of THE WORLD have been trained and these assaults are about to bear fruit. One Trust after another has been shown to be violating the law, and openly violating it. The law itself has been quoted again and again and the easy method of forcing submission to it pointed out. In an editorial of September 1, after quoting the statute against illegal combinations, THE WORLD said:

"The Sugar Trust is a confessed 'combination, conspiracy, trust, agreement, or contract' in restraint of trade, to increase the market price of sugar, and, under section 2 of the law of 1890, to 'monopolize or attempt to monopolize' the trade in refined sugar between the several States. The present Trust was formed in 1891 under the laws of New Jersey. It consists of refineries, formerly disconnected with one another, capable of producing 86 per cent of the sugar consumed in this country. Of the twenty-four refineries fourteen are working, two being consolidated into one, and nine are not working. Four have been dismantled and two were burned and have not been rebuilt. The independent refineries are controlled by the Trust, which permits them to exist so long as they charge Trust prices. The Trust also fixes the prices charged by the grocers, and refuses to supply them if they do not accept its terms. Therefore it is a conspiracy in restraint of trade and commerce. The combination or trust was entered into for the purpose of controlling the price and production of sugar. How it controlled production has been explained by H. O. Havemeyer's testimony before the Senate Committee June 12. By this testimony it was demonstrated as well as confessed that the Sugar Trust was formed for the purpose of 'restraining lawful trade or commerce;' that it was intended to 'monopolize or attempt to monopolize' the trade in refined sugar between the States; and that its object, which was successful, was to 'increase the market price' of sugar. The case is made out against the Trust. Its officers are shown to be guilty of a misdemeanor and liable to a fine of from \$100 to \$5,000, and to imprisonment for terms of from one month to twelve months."

THE TARIFF REFORM BATTLE.

THE WORLD's long struggle for Tariff Reform was fittingly ended by the adoption of the Wilson bill last summer. On the very day after its passage THE WORLD printed opinions written by Wilson himself, by every prominent Senator, by every interested Congressman. It also secured the views of McKinley and Harrison on the new measure. The fight against those who weakly surrendered to the Sugar Trust is still too fresh in the minds of all to need recalling here.

The effect of the new Wilson tariff on prices was interestingly illustrated and a page article printed a few months after the measure became a law. Elaborate tables were given, showing the prices of staple necessities during September, 1894, and September, 1893. In every case, from woollens to silk, a reduction of from 10 to 40 per cent was shown. The workman's dollar buys more now by at least 10 cents than it bought under the McKinley tariff.

THE STANDARD OIL COMPANY AND RUSSIA.

In May THE WORLD published a page article on the Standard Oil Company, giving the entire text of the secret agreement between the Standard people and the Russian Minister of Finance, who acted for the oil refiners of Baku, in Southern Russia. It also printed a list of the names of the refiners included in the agreement. Only two copies of the agreement were in this country.

The agreement partitioned off the markets of the world between the Standard Company and the Russian refiners, and all opposition was to be wiped out. A condition demanded by the Minister of Finance was that the Standard should break up the independent producers and refiners in the United States, who supplied the independent oil plants in Germany, especially the one at Mannheim.

The publication of the agreement in THE WORLD shattered the contract. William Libby and William Rockefeller, the agents of the Standard in Europe, endeavored to counteract the adverse influence of THE WORLD's article, which was copied or quoted by all the leading European papers. The Emperor of Germany had THE WORLD's article read to him in its entirety, and he sent a personal message to Herr Posth, the head of the Mannheim oil plant, and assured him of his desire to aid him in the fight against the American monopoly. The blow to the Standard Company was a severe one, for the Russian agreement has not been carried out and the German Government has encouraged the opening of a new independent plant at Hamburg.

WOMEN IN POLITICS.

The phenomenal activity of women in political affairs and the success which attended their efforts to secure municipal reform in the New York City election of 1894 received their first recognition in THE WORLD. It was before any steps had been taken to organize the woman's movement, but as significant of their subsequent action, that THE WORLD, on September 30, contained nearly a page of interviews with the leading women of New York. These included social leaders, writers and woman's rights agitators. They expressed their views of the situation with clearness and force, insisting that the time had arrived when women should take an active part in helping to redeem New York from the corrupt powers which controlled it. These interviews clearly foreshadowed an active participation of women in the municipal election then impending, and many farseeing political managers realized for the first time that they had a new and unknown element to deal with. Within a week of the first publication the initial organization of the woman's movement had been consummated. Then from week to week THE WORLD followed the development of this new and mighty force, which it is now believed was largely instrumental in bringing about the stupendous overturning of political parties witnessed at the election.

GAMBLING AT SARATOGA.

The most startling special story of the summer was Nellie Bly's exposure in THE SUNDAY WORLD of the wickedness of Saratoga, published August 19, when the season there was at its height. Vivid and striking were the pictures in this story of "The Wickedest Summer Resort," and of the wild reign of extravagance at a time when many were suffering for bread. The scenes and incidents at the race tracks, in the great hotels, and in the fashionable gambling-houses of Saratoga at night were drawn from the life. It was shown that not Monte Carlo nor Long Branch in their palmiest days had ever surpassed Saratoga, where the season of 1894 was one of the most "successful" in its history. Nellie Bly personally visited the gambling-hell maintained by Caleb W. Mitchell, the President of Saratoga Village. She afterwards visited Mr. Mitchell and interviewed him at length on the iniquities of gambling, giving him an opportunity to justify himself. To the wild gambling life at Saratoga, pursued by men and women alike, it was shown that all the other excesses of the place were subservient, but that the nightly orgies there taking place were the natural result of the influx of a fast set and of prevailing lawlessness in the town's affairs.

BITS OF ENTERPRISE.

Along towards the last days of the legislative session strenuous efforts were made to have the pay of policemen increased. On May 30 THE WORLD printed an exclusive article showing that the police

of New York City were trying to raise \$87,500 for purposes of bribery. Each man was assessed \$15, the money to go where it would get most votes.

Richard Croker after a hurried trip to Europe returned to this country July 5. As Mr. Croker was the most interesting personality in America just at that time THE WORLD ordered one of its foreign correspondents, Mr. Henry F. Keenan, author of the "Money Makers," to sail with him. It also engaged Julius M. Price, F. R. G. S., of London, to accompany the party as artist. The result was that on the morning after Mr. Croker's arrival THE WORLD printed nearly three pages of story and pictures giving interesting details of a remarkable voyage.

The great Vanderbilt divorce case, which has since filled the public eye, came to THE WORLD first in a cable from Paris on August 29. Similarly the divorce case involving Mrs. J. Coleman Drayton, a daughter of Mrs. Astor, was given to THE WORLD to publish in the regular order of news affairs. Other journals took up these matters a day later.

The discovery of alleged bullet-proof coats in Europe interested all intelligent people, and it seemed as if modern warfare would be revolutionized. In order to put the matter to the test Meg Merrilles allowed herself to be shot at. The heaviest kind of ammunition was used. A sheet of the new bullet-proof felt hung down from her neck and was her sole protection. Shot after shot was fired, but the bullets failed to penetrate the felt, and the utility of the new discovery was demonstrated.

A night in Chambers Street Hospital, spent by one of the young women of THE SUNDAY WORLD, revealed the horrors of that institution and brought about a much-needed reform in its treatment of casual patients.

Meg Merrilles spent a week with Engine Company No. 17, in their quarters at No. 91 Ludlow Street, dressed in boy's clothes, for convenience, with rubber boots and rubber coat. She lived the life of one of the fire-laddies, attending regularly to her duties, jumping from sleep at the alarm, sliding half-awake down the pole, swinging on the engine as it left the house, dashing into smoke and fire, and in every way sharing the hardships, the dangers, and the glory. She drove engine horses back from fires, carried a choking baby through dense smoke to a place of safety at the risk of her own life, and wound up the week of remarkable activity by helping her associates fight the big fire at Broadway and Leonard street, that threatened the entire dry-goods district of New York City.

When scientists from all over the country held their annual reunion in Brooklyn THE WORLD secured from these wise men written expressions of opinion on the progress of the Darwinian theory, the chances of reaching the North Pole, the outlook for a practical flying machine, and kindred subjects of wide interest.

In the spring and again in the fall THE WORLD, through its thousand correspondents, secured a careful estimate of the crop outlook, showing in many instances that the Government report was erroneous.

The padrone system was an iniquity of the Street-Cleaning Department which THE WORLD exposed in the interests of justice to the hard-working Italians, whose ignorance of American affairs was being taken advantage of. These men, it was shown, were being mulcted of a share of their wages by padrones who secured them employment in the department. As soon as the facts were exposed in THE WORLD a measure was introduced in the Legislature, and quickly passed, putting a stop to the system.

Mrs. Hettie Green, the richest woman in America, was also the most mysterious until THE SUNDAY WORLD in two stories of a page each told the story of her daily life and put the tax collectors upon her track. For thirty years she had successfully kept her whereabouts a secret, and while being worth \$30,000,000, she had no permanent residence. THE WORLD found this remarkable woman in a Brooklyn boarding-house and described with faithful detail her surroundings and daily life. The tax collectors immediately started upon her track to collect money which had previously escaped them.

THE WORLD last spring discovered that a regular system of smuggling Chinamen into this country by means of bogus admission papers was in vogue, so reporters made connections with some of the biggest gangs of smugglers, worked with them for months until the system was thoroughly sifted and all the facts obtained. These were then placed before the Government officials, with the result that warrants were issued for the arrest of nearly a score of Chinamen and white men engaged in the business.

At that time coolies were being illegally brought in from Canada at the rate of from 50 to 120 a week. THE WORLD's exposure of the traffic broke it up completely, and since then the number of Chinamen coming over the border does not exceed three or four a month.

Early in October a woman was found murdered in the woods near Scituate, R. I. Her identity was as much a mystery as the name of her murderer. One of the detective-reporters of THE WORLD was sent to unravel the mystery, and within a week he had not only discovered that the woman was Emily Chambers, but found the murderer and saw him safely locked up in jail.

Nellie Bly performed a number of remarkable feats, many of which were of distinct service to the public. She interviewed at length young John Jacob Astor and learned his views on the obligations of wealth and the duty of millionaires as citizens; she visited the Delaware jail and described the whip-

ping-post as she saw it there in operation; she took the Keeley cure at White Plains and explained the treatment in THE SUNDAY WORLD, and then she visited Athlete Muldoon at his sanitarium in the country. Nellie Bly likewise tried a bout with Pugilist Corbett and exposed the humbug of an alleged mind-reader and a magnetic girl who were astonishing New York.

The remarkable achievements of Nikola Tesla, who has startled the electrical world by many sensational discoveries, were described in THE WORLD of Sunday, July 22, and therein the inventor gave his views on electricity and the progress he expected in the future. A few weeks later Meg Merrilies, the versatile young woman who has performed many unusual feats and done no little public service through THE SUNDAY WORLD, told how she had taken one million volts of electricity. The stupendous current passed through her body without doing harm.

SOME OF THE WORLD'S CONTRIBUTORS.

The list of contributors to THE WORLD during the past year comprises the names of the leading men and women in every intellectual department. Edward Atkinson wrote on the interesting subject of American women in industrial life, Julia Ward Howe contributed original poetry, Raymon Moore, composer of "Sweet Marie," wrote his new song, "Dear Louise," for THE SUNDAY WORLD; O'Donovan Rossa, upon his return from Ireland after an exile of a quarter of a century, wrote his observations for THE WORLD, and Arthur T. Cumnock, Harvard's greatest captain, described the dangers and brutalities of football.

In the realm of fiction the contributors to THE SUNDAY WORLD included all the best-known writers. Rudyard Kipling's "Strange Tale of the Jungle" was first published in THE SUNDAY WORLD, and has been followed by several other original stories by the same author. Other well-known writers who contributed original work during the year were A. Conan Doyle, Hamlin Garland, Mary E. Wilkins, "The Duchess," and Gilbert Parker. Congressman W. L. Wilson, author of the Wilson Tariff, wrote on tariff topics for THE WORLD, and Rev. Dr. Parkhurst contributed articles on the city government.

During the past summer Ward McAllister visited Europe for the first time in over thirty years. Mr. McAllister writes only for THE WORLD, and its columns on Sundays contained during the summer the interesting comments in Europe of this shrewd observer of social manners and customs. Reginald De Koven's musical criticisms are published exclusively in its columns. Mrs. Schuyler Van Rensselaer also wrote extensively on art for THE SUNDAY WORLD during the year, being a regular contributor.

In literature Miss Jeannette N. Gilder contributed a weekly review of some striking new book, giving copious extracts previous to publication.

Bill Nye's weekly budget of humor has been exclusively published in New York by THE SUNDAY WORLD. A fitting complement to Nye's humor have been the cartoons of McDougall, always timely and striking, and during the political campaign especially effective in exposing shams and humbugs.

THE SUNDAY WORLD was the first American journal to exploit the Napoleonic revival which has since permeated magazine literature and invaded the book shelves. The story of THE SUNDAY WORLD was published July 1, and it contained all the new Napoleonic material discovered in Europe up to that time.

Seven days later THE WORLD described in an elaborately illustrated article the daily life and ambitions of William Waldorf Astor, who has abandoned New York for a residence in London, where he now edits the *Pall Mall Gazette*.

MONKEYS THAT TALK.

Professor Garner, the expert in the Simian language, returned early in the year from his expedition to the heart of Africa, whither he had gone with a steel cage to immerse himself in the depth of the jungle and put his theories to practical test by attempting to talk with the monkeys. His contention that monkeys had a well-defined language, of which he had learned many words, and that it was by no means impossible that men, in time, might come to converse with them, opened up vast possibilities. The result of his trip to Africa was awaited with widespread interest not only by scientists but the general public. Over his own signature Professor Garner told in THE SUNDAY WORLD the remarkable story of his adventures.

NOTABLE ART WORK.

THE WORLD on Sunday especially has achieved some remarkable feats of illustration during the year. One of the most striking pictures ever printed was the portrait of Chiko, the famous Central Park gorilla, whose features were so much like those of a human being. Chiko appeared to have all the intelligence of a man, and was an object of deep interest to every visitor to the park. The big picture of his face occupied nearly a page of THE SUNDAY WORLD. Another striking illustrated feature was a page of kinetoscope pictures, published just at the time when Edison had perfected that invention. These instantaneous photographs, taken at the rate of forty-six per second, showed different views of Sandow, the athlete, a jumping boy, etc. On June 3 THE SUNDAY WORLD published enlarged life-size

pictures of the hand of Rusie, the pitcher of the Giants, in the act of throwing the ball. On July 22 the Sunday edition printed some original sketches made in Paris by Charles D. Gibson, and this was followed up November 11 by some further examples of Mr Gibson's work. In color-printing, which THE WORLD successfully inaugurated, some striking effects have been achieved as the process has been perfected. November 11 THE SUNDAY WORLD printed a picture of Henry G. Marquand's \$50,000 piano, giving the colors of the gold, ivory, and lapis-lazuli with which that extraordinary instrument is inlaid. The same edition contained a page portrait, in colors, of Monsignor Satolli.

Among other notable pictorial features of THE WORLD were Chinese war pictures, drawn by a Chinaman; Japanese war pictures, drawn by a Jap; a page of portraits of the noted beauties at the summer resorts; two pages of reproductions of the famous portraits of New York society women exhibited at the Academy of Design, and a page of portraits of the fashionable patronesses of the Horse Show.

IN THE FIELD OF SPORTS.

In all departments of sports THE WORLD has taken the lead, going outside the beaten tracks. Baseball, whose revival in 1894 was predicted and aided by THE WORLD, received an especially large share of attention. In pugilism THE WORLD has been not less enterprising. The greatest battle of the year, the encounter between Mitchell and Corbett, was the subject of special enterprise, and the result was foreshadowed to WORLD readers by the full information conveyed to them by a corps of special correspondents and artists at the training quarters of the champions.

THE WORLD has continued to be the leading authority on racing. Its turf reports have been imitated all over the country, which attests their value more substantially than any other form of endorsement. All the important developments of the turf world have been either forestalled or promptly reported. In this THE WORLD has labored to build up and purify, as well as to provide a true record of things done.

Football received much attention. Experts were employed to observe the organization and practice of teams. The games were reported with a view to the satisfaction of both the special and the general reader. Heffelfinger, Harvard's great ex-captain, Cumnock, and others of equal celebrity were employed to furnish WORLD readers reliable forecasts and reports. This policy was followed out in regard to the entire series of inter-collegiate contests. In rowing the same policy was followed, and WORLD readers knew before events all the circumstances that might affect results and knew after them just how everything took place. Lawn tennis, canoeing, cricket, cycling, swimming, shooting, and every form of game which occupied attention during the year received the same full treatment. The National Trotting Circuit and the National L. A. W. racing circuit were covered by special and expert correspondents, and the wonderful performances of an extraordinary season fully described. The great public discussion opened up by THE WORLD as to the propriety of women riding bicycles was one of the features of the summer.

Golf, which succeeded the summer games and reached great popularity, especially among society people, was described and illustrated and the contests were reported in careful detail, not attempted elsewhere.

Yachting in foreign waters attracted unusual attention because of the visit of Vigilant to England. Full cable reports of the international races were printed daily. The Yale-Oxford games were fully reported by cable.

THE EVENING WORLD'S WORK.

Something of the marvellous quickness with which THE WORLD gathers news and puts it upon the street may be gathered from the fact that during the last November elections the evening edition gave the results of the day's balloting in its first night extra, which was issued at 7 o'clock. It told the whole story of the great Republican tidal wave in its last extra that night at 11 o'clock. Whenever anything was scheduled to happen between sunrise and the zenith of night, and it was something the public wanted immediate information about, THE EVENING WORLD was on the spot to report it and put out an extra, even as late as midnight. And when the happening came as a surprise THE EVENING WORLD was on the spot just the same, and told the story of the occurrence almost as fast as Puck promised to girdle the earth. When the Brooklyn Tabernacle burned on a Sunday afternoon there was a WORLD "extra" on the street before the firemen had subdued the flames, and when President Sadi-Carnot, of the French Republic, was stabbed one Sunday morning another WORLD "extra" placed the story of the disaster in the hands of thousands of persons in New York, Brooklyn, and Jersey City within a few hours after the assassination. In these instances, as in the Camperdown-Victoria naval disaster and in all great sporting and other events, the first news reached the public eye by way of WORLD "extras." No item of general or unusual interest has been permitted to grow cold while waiting; everything that deserved immediate announcement to the public was served up hot and fresh.

Its public services during 1894 deserve to be embalmed in memory with those of the preceding years, with the securing of free lectures, of the Saturday half holiday, of the weekly payment of wages, and so on. When the tug Nichol went down and fifty or more lives were lost THE EVENING

WORLD in the cause of humanity, and in answer to the appeals of bereft and breaking hearts, sought to recover the bodies of the drowned. It unyieldingly pursued the policy dealers and other gamblers, and unsparingly exposed certain dens of iniquity that, in consequence, have been blotted out. It brought to light an amazing number of naturalization frauds, and demonstrated a wholesale conspiracy to flood the ballot-box with corruption. It made the street-car companies yield in some measure to demands of their patrons for more seats by compelling them to put on more cars. Among the last of its acts was the demand that bakers furnish bread at a lower price than five cents a loaf. THE EVENING WORLD asked that the price be made four cents a loaf without lessening the weight of the bread, and it showed forcibly by facts and figures that with flour as cheap as it had become the bakers were making an unwarrantable profit out of the public at the four-cents-a-loaf rate. So vigorously was the reduction insisted upon that a victory for the people, and especially for the poorer classes, was quickly won. Its search-light was turned upon the Park Board in the last months of the year, and the diversion from its legitimate purpose of the \$1,000,000 appropriated for relief work in the parks last winter was exposed. This money should have gone into the pockets of workingmen, to whom and their families the hard times had brought distress, but workingmen didn't get the \$1,000,000, as THE EVENING WORLD made plain.

WISE AND BROAD PHILANTHROPY.

Now we may see what the people's paper did in the field of philanthropy. Its Sick Babies' Fund, one of the most beautiful and result-yielding of charities, kept a large corps of free doctors in the tenements from May 15 to October 15, in which time the lives of more than 20,000 little ones were saved. The Christmas-Tree Fund, companion charity of that just named, gave about 50,000 poor children toys and other articles on the festival of all festivals, and filled them with a joy they would not have experienced but for THE EVENING WORLD'S vigilant interest in them and the kindness and humanity of its several hundred thousand readers. Nearly \$25,000 was contributed to the Sick Babies' Fund alone last year. This and the Christmas-Tree Fund are permanent New York institutions and are immensely popular. Another great work of charity carried on in 1894 was the Free Food Commission, organized in the depth of a distressful winter, and which inside of two months gave to the poor of the city, irrespective of creed, color, or nationality, about \$75,000 worth of the very best fish, fowl, vegetables, and fruit that could be had in this market. It was a timely and much needed distribution of food, for many families were starving, and it recalled the glorious work of the same kind done the previous winter, when THE WORLD'S Temporary Relief Fund kept roofs over thousands and fed all who came that were hungry. The ever-resounding shibboleth, "Above all a newspaper and beyond all the friend of the people," sums up the qualities, and gives one an idea of what the evening edition is—the greatest afternoon newspaper on earth.

WORK IN NEW JERSEY.

In the sister State of New Jersey, just across the river, THE WORLD wields almost as much influence as in New York. In the matter of supplying exclusive news it led all papers, local and otherwise. When the Legislature came together in January the deadlock, which THE WORLD had predicted in every detail, came about and verified the accuracy of its information.

After the breaking of the deadlock THE WORLD kept close watch over the Assemblymen, Senators, and lobbyists, and week after week exposed the schemes and plans by which corporations and corrupt politicians endeavored to use the law-making power. Thus vicious measures were kept off the statute books and the eyes of the people were opened to the manner in which the legislators had not only violated their promise of restoring "home rule" to the larger cities of the State, but had inflicted upon the people laws which advanced the interests of trusts and gave tremendous advantages to certain corporations. THE WORLD exposed also the incompetency shown in the drawing up of new statutes and unmasked the aims of the individuals who persuaded the Legislature to meddle with the school laws. It exposed the schemes for which the Jersey City Board of Street and Water Commissioners were indicted and also laid bare the methods by which the taxpayers of Jersey City were being systematically robbed. In Newark it gave the past public records of the men whom Mayor Lebkuecher appointed to positions in the Board of Works and conclusively proved that on more than one occasion they had conspired to rob the city of its just dues. An investigation was also made into the methods of the Monmouth County Board of Freeholders, and the result was an exposure which gave the taxpayers of the county the greatest sensation they ever had. Chief Justice Beasley, recognizing the popular demand, appointed a special commission to take the matter up.

CONNECTICUT MATTERS.

Connecticut is also close at hand, and there, too, THE WORLD has lent special aid to reforms and has been a power for good. It brought out in a clear light many political issues as well as social absurdities and aided materially in crystallizing the popular demand for a revision of the ancient Constitution under which the State has been struggling for nearly a century. Corruption in office has

been exposed wherever found, the peculiar system of quashing liquor indictments has been brought to public notice, the misuse of the State's school fund received the denunciation and exposure it merited, and every desirable public enterprise has received zealous encouragement and support. Connecticut people have fallen into the habit of writing to *THE WORLD* when they want abuses corrected just as city people write. And the appeal is always heeded.

THE TWICE-A-WEEK WORLD.

THE TWICE-A-WEEK WORLD is issued every Tuesday and every Friday, and is as fresh as a daily and as varied as a weekly. It is more complete than any weekly issued, and publishes as many news items as are contained in a metropolitan daily of the same date, though the latter may be fourteen or sixteen pages in size.

THE TWICE-A-WEEK WORLD is fresh, bright, clean, and Democratic. Nothing that would be offensive to the home circle is allowed a place in its columns. The news is carefully sifted and weighed and accuracy and clearness of statement are sought always.

A striking feature of *THE TWICE-A-WEEK WORLD* is its cartoons, which illuminate and explain the political situation. Special attention is paid to these and skilled artists do the work.

While *THE TWICE-A-WEEK WORLD* makes the publication of the news of our own country its first care, a due share of space is allotted to the important happenings of Europe and all the remainder of the world.

The special features of *THE TWICE-A-WEEK WORLD* have been arranged with much thought. The editorial page is the most varied. Besides a sufficient quantity of well-written editorial upon all important questions, there is a column of the Doctor's Advice, a most useful department in all households; two columns of clean, wholesome, intelligible fun, a column of religious news and thought on Fridays, and a column of selected poems, sentimental, pathetic, and humorous, on Tuesdays. The last column of this page in every issue is filled by "News Briefs," in which a great variety of interesting news is told in short space.

A full and accurate report of all important markets is printed every Tuesday, and a condensed table every Friday. This is one of the most valuable departments of *THE TWICE-A-WEEK WORLD* and great care is bestowed upon its preparation.

A short story is printed every week and these are stories worth reading. Many of them are written specially for *THE TWICE-A-WEEK WORLD*, and are vivid and striking. They are wholesome and moral in tone always. A half page every week is devoted specially to the women and children. There is also a half page about the farm written by an expert, and widely quoted. The checkers department is prepared by one of the ablest and best informed players in the country.

There is a column every week about the movements and doings of the noted people of the world. A historian presents some vivid facts from history for the children, and a geographer tells the striking things about our country.

These special features will be varied constantly and increased.

The premium department is of solid money value to every subscriber to *THE TWICE-A-WEEK WORLD*. In it scores of articles that are wanted in every home are offered at prices much lower than the same goods could be purchased elsewhere, the department being conducted solely in the interest of *THE TWICE-A-WEEK WORLD*'s subscribers.

Besides the general edition of *THE TWICE-A-WEEK WORLD*, there is an extra edition which contains a page of special New York and New Jersey news.

THE MONTHLY WORLD.

THE MONTHLY WORLD is a unique and interesting publication, which has had a great success. It consists of thirty-two pages crowded with good reading, and copiously illustrated.

No one who is fond of literature can afford to do without the monthly. It is essentially of a literary character, and the class of articles it publishes appeals to cultivated tastes. There are stories, miscellany, and descriptive articles covering a great variety of subjects. It is not heavy, and plenty of healthy fun, the cream of the latest and best humor, is sprinkled through its columns. Poetry is not neglected, and the selections are made with much care.

A feature of each issue is the first page of the cover, which always contains a large picture and a sketch of some celebrated man or woman who is occupying at the time a large share of the public attention.

There is enough in the monthly to keep an assiduous reader busy for days. The table of contents in each issue is worth studying.

THE astronomical calculations in this Almanac were expressly made for it by Dr. Morrison of Washington, D. C., and are expressed in local *mean time*.

Chronological Eras.

The year 1895 corresponds to the year 7403-04 of the Byzantine era; to 5655-5656 of the Jewish era (the year 5656 beginning at sunset on September 18); to 2648 since the foundation of Rome; to 2671 of the Olympiads or the third year of the 668th Olympiad; to 2555 of the Japanese era, and to the 28th year of the Meiji; to 1312-13 of the Mohammedan era or the era of the Hegira (the year 1313 begins on June 24, 1895). The 120th year of the Independence of the United States of America begins on July 4.

Divisions of Time.

THE interval between two consecutive transits of a fixed star over any meridian or the interval during which the earth makes one absolute revolution on its axis is called a *Sidereal Day*, and is invariable, while the interval between two consecutive transits of the Sun over any meridian is called an *Apparent Solar Day*, and its length varies from day to day by reason of the variable motion of the earth in its orbit, and the inclination of this orbit to the equator, on which time is measured.

A *Mean Solar Day* is the average or mean of all the apparent solar days in a year. *Mean Solar Time* is that shown by a well-regulated clock or watch, while *Apparent Solar Time* is that shown by a well-constructed sun-dial; the difference between the two at any time is the *Equation of Time*, and may amount to 16 minutes and 21 seconds. The *Astronomical Day* begins at noon and the *Civil Day* at the preceding midnight. The *Sidereal* and *Mean Solar Days* are both invariable, but one day of the latter is equal to 1 day, 3 minutes and 56.555 seconds of the former.

The interval during which the earth makes one absolute revolution round the Sun is called a *Sidereal Year*, and consists of 365 days, 6 hours, 9 minutes and 9.6 seconds, which is invariable.

The *Tropical Year* is the interval between two consecutive returns of the Sun to the Vernal Equinox. If this were a fixed point, the *Sidereal* and *Tropical Years* would be identical; but in consequence of the disturbing influence of the moon and planets on the spheroidal figure of the earth, the Equinox has a slow, retrograde mean motion of 50.26", annually, so that the Sun returns to the Equinox sooner every year than he otherwise would by 20 minutes, 23.6 seconds; the *Tropical Year*, therefore, consists of 365 days, 5 hours, 48 minutes and 46 seconds. The *Tropical Year* is not of uniform length; it is now slowly decreasing at the rate of .595 seconds per century, but this variation will not always continue.

Julius Cæsar, in B. C. 45, was the first to reform the calendar by ordering that every year whose date number is exactly divisible by 4 contain 366 days, and all other years 365 days. The intercalary day was introduced by counting the *sixth* day before the Kalends *twice*; hence the name *bissexile*, from *bis*, twice, and *sex*, six. He also changed the beginning of the year from 1st of March to the 1st of January, and also changed the name of the fifth month (quintilis) to July, after himself. The average length of the Julian year is therefore 365.24 days, which, however, is too long by 11 minutes and 14 seconds, and this would accumulate in 400 years to about three days. The Julian Calendar continued in use until A. D. 1582, when the date of the beginning of the seasons occurred 10 days later than in B. C. 45, when this mode of reckoning time was introduced.

The *Gregorian Year* was introduced by Pope Gregory XIII. with the view of keeping the Equinox to the same day of the month. It consists of 365 days, but every year exactly divisible by 4, and the centennial years, which are exactly divisible by 400, contain 366 days; and if in addition to this arbitrary arrangement the centennial years exactly divisible by 4,000 contain 365 days, the error in the Gregorian system will amount to only one day in about 20 centuries. If, however, 31 leap years were intercalated in 128 years, instead of 32 as at present, the calendar would be practically exact and the error would not amount to more than a day in 100,000 years. The length of the mean Gregorian year may therefore be set down at 365 days, 5 hours, 49 minutes, 12 seconds. The Gregorian Calendar was introduced into England and her colonies in 1752, at which time the Equinox had retrograded 11 days since the Council of Nice in A. D. 325, when the festival of Easter was established and the Equinox occurred on March 21; hence September 3, 1752, was called September 14, and at the same time the commencement of the legal year was changed from March 25 to January 1, so that the year 1751 lost the months of January and February and the first 24 days of March. The difference between the Julian and Gregorian Calendars is now 12 days. Russia and the Greek Church still employ the Julian Calendar for civil and ecclesiastical purposes.

Standard Time.

PRIMARILY, for the convenience of the railroads, a standard of time was established by mutual agreement in 1883, by which trains are run and local time regulated. According to this system, the United States, extending from 65° to 125° west longitude, is divided into four time sections, each of 15° of longitude, exactly equivalent to one hour. The first (eastern) section includes all territory between the Atlantic coast and an irregular line drawn from Detroit to Charleston, S. C., the latter being its most southern point. The second (central) section includes all the territory between the last-named line and an irregular line from Bismarck, N. D., to the mouth of the Rio Grande. The third (mountain) section includes all territory between the last-named line and nearly the western borders of Idaho, Utah and Arizona. The fourth (Pacific) section covers the rest of the country to the Pacific coast. Standard time is uniform inside each of these sections, and the time of each section differs from that next to it by exactly one hour. Thus at 12 noon in New York City (eastern time), the time at Chicago (central time) is 11 o'clock A. M.; at Denver (mountain time), 10 o'clock A. M., and at San Francisco (Pacific time), 9 o'clock A. M. Standard time is 16 minutes slower at Boston than true local time, 4 minutes slower at New York, 8 minutes faster at Washington, 19 minutes faster at Charleston, 28 minutes slower at Detroit, 18 minutes faster at Kansas City, 10 minutes slower at Chicago, 1 minute faster at St. Louis, 28 minutes faster at Salt Lake City, and 10 minutes faster at San Francisco.

On shipboard, for purpose of discipline and to divide the watch fairly, the crew is mustered in two divisions: the Starboard (right side, looking toward the head), and the Port (left). The day commences at noon, and is thus divided: Afternoon Watch, noon to 4 P. M.; First Dog Watch, 4 P. M. to 6 P. M.; Second Dog Watch, 6 P. M. to 8 P. M.; First Watch, 8 P. M. to midnight, Middle Watch, 12 A. M. to 4 A. M.; Morning Watch, 4 A. M. to 8 A. M.; Forenoon Watch, 8 A. M. to noon. This makes seven WATCHES, which enables the crew to keep the watches, or alternately, as the Watch which comes on duty at noon one day has the afternoon next day, and the men who have only four hours' rest one night have eight hours the next. This is the reason for having Dog Watches, which are made by dividing the hours between 4 P. M. and 8 P. M. into two Watches. Time is kept by means of "Bells," although sometimes there is but one Bell on the ship. — *Whitaker*.

The above table applies to ordinary years only. For leap year, one day must be added to each number of days after February 28.

EXAMPLE.—To find the number of days between June 3, 1893, and February 16, 1894: The figures opposite the third day in the first June column are 154; those opposite the sixteenth day in the second February column are 412. Subtract the first from the second product—i. e., 154 from 412, and the result is 258, the number of days between the two dates.

The Ancient Hour.

THE early Egyptians divided the day and night each into twelve hours, a custom adopted by the Jews or Greeks probably from the Babylonians. The day is said to have first been divided into hours from B. C. 293, when a sun-dial was erected in the temple of Quirinus, at Rome. Previous to the invention of water-clocks, B. C. 168, the time was called at Rome by public criers. In early England one expedient for measuring time was by wax candles, three inches burning an hour. The first perfect mechanical clock was not made until about A. D. 1250. Day began at sunrise among most of the Northern nations, at sunset among the Athenians and Jews, and at midnight among the Romans, as with us.

The Ancient and Modern Year.

THE Athenians began the year in June, the Macedonians in September, the Romans first in March and afterward in January, the Persians on August 11, the ancient Mexicans on February 23, the Mohammedans in July. The Chinese year, which begins early in February, is similar to the Mohammedan in having 12 months of 29 and 30 days alternately; but in every nineteen years there are seven years which have 13 months. This is not quite correct, and the Chinese have therefore formed a cycle of 60 years, in which period 22 intercalary months occur.

ASTRONOMICAL SIGNS AND SYMBOLS.

☉	The Sun.	♃	Mars.	♁	Conjunction.
☾	The Moon.	♃	Jupiter.	♁	Quadrature.
☿	Mercury.	♄	Saturn.	♁	Opposition.
♁	Venus.	♅	Uranus.	♁	Ascending Node.
♁	The Earth.	♆	Neptune.	♁	Descending Node.

Two heavenly bodies are in "conjunction" (♁) when they have the same *Right Ascension*, or are on the *same meridian*, *i. e.*, when one is due *north* or *south* of the other; if the bodies are near each other as seen from the earth, they will rise and set at the same time; they are in "opposition" (♁) when in opposite quarters of the heavens, or when one rises just as the other is setting. "Quadrature" is half way between conjunction and opposition. By "greatest elongation" is meant the greatest apparent *angular* distance from the sun; the planet is then generally most favorably situated for observation. Mercury can only be seen with the naked eye at this time. When a planet is in its "ascending" (♁) or "descending" (♁) node" it is crossing the plane of the earth's orbit. The term "Perihelion" means nearest, and "Aphelion" farthest, from the sun. An "occultation" of a planet or star is an eclipse of it by some other body, usually the moon.

I.—ECLIPSES.

There will be five Eclipses in the year 1895, as follows:

1. A total Eclipse of the Moon, March 10, visible in the United States.

The point of the Moon's limb at which the first contact with the shadow takes place is 126° from the north point toward the East. Magnitude of the Eclipse 1.63, the Moon's diameter being regarded as unity.

2. A partial Eclipse of the Sun March 25, invisible in the United States except the northeast corner of Maine, where the Eclipse ends at sun rise. Visible in Nova Scotia, New Brunswick, Newfoundland, Greenland, Iceland, British Islands, the Azores and the northwest corners of Spain and Portugal and the extreme western portion of France.

3. A partial Eclipse of the Sun August 20, invisible in America. Visible in Russia and Siberia.

4. A total Eclipse of the Moon September 3-4, visible in the United States.

The number of asteroids discovered up to present date is 378. A number of these small planets have not been observed since their discovery, and are practically lost. Consequently it is now sometimes a matter of doubt, until the elements have been computed, whether the supposed new planet is really new, or only an old one rediscovered.

"It is supposed that a Centauri, one of the brightest stars of the Southern Hemisphere, is the nearest of the fixed stars to the earth. The researches on its parallax by Henderson and Maclear gave it for its distance from the earth, in round numbers, 20,000,000,000,000 miles. At the inconceivably rapid rate at which light is propagated through space, it would require three years and three months to reach the earth from this star."—Whitaker.

The French Revolutionary Era.

In September, 1793, the convention decreed that the common era should be abolished in all civil affairs, and that the new French era should begin on September 22, 1792, the day of the true autumnal equinox, and that each succeeding year should begin at the midnight of the day on which the true autumnal equinox falls. The year was divided into twelve months of thirty days each. In ordinary years there were five extra days, from the 17th to the 21st of our September, and at the end of every fourth year was a sixth complementary day. This reckoning was first used on November 22, 1793, and was continued until December 31, 1805, when it was discontinued, and the Gregorian calendar, used throughout the rest of Europe, was resumed. The following were the dates for the year 1804, the last complete year of this style of reckoning:

Vendémaire (Vintage),	Sept. 23 to Oct. 22.	Germinal (Budding),	Mar. 22 to April 21.
Brumaire (Foggy),	Oct. 23 to Nov. 22.	Floreal (Flowers),	April 21 to May 20.
Frimaire (Foggy),	Nov. 23 to Dec. 21.	Prairial (Pasture),	May 21 to June 20.
Nivôse (Snowy),	Dec. 22 to Jan. 21.	Messidor (Harvest),	June 20 to July 19.
Pluviôse (Rainy),	Jan. 21 to Feb. 20.	Thermidor (Hot),	July 20 to Aug. 19.
Ventôse (Windy),	Feb. 20 to Mar. 19.	Fructidor (Fruit),	Aug. 19 to Sept. 18.

The months were divided into three decades of ten days each, but to make up the 365 five were added at the end of September: Primidi, dedicated to Virtue; Duodi, to Genius; Tridi, to Labor; Quartidi, to Opinion, and Quintidi, to Rewards. To Leap Year, called Olympic, a sixth day, September 22 or 23, Sextidi, "the day of the Revolution," was added.

The current French names of the months are: Janvier (January), Février (February), Mars (March), Avril (April), Mai (May), Juin (June), Juillet (July), Août (August), Septembre (September), Octobre (October), Novembre (November), Décembre (December).

The days of the week are: Dimanche (Sunday), Lundi (Monday), Mardi (Tuesday), Mercredi (Wednesday), Jeudi (Thursday), Vendredi (Friday), Samedi (Saturday).

Sundays and Fast Days are legal holidays in all the States which designate them as such.

ARBOR DAY is a legal holiday in Kansas, North Dakota, Rhode Island and Wyoming, the day being set by the Governor—in Nebraska, April 22; California, September 9; Colorado, on the third Friday in April; Montana, third Tuesday in April; Utah, first Saturday in April; and Idaho, on Friday after May 1.

Every Saturday after 12 o'clock noon is a legal holiday in New York, New Jersey and the city of New Orleans. Pennsylvania and Maryland, and June 1 to September 30 in New Castle Co., Del.

There is no national holiday, not even the Fourth of July. Congress has at various times appointed special holidays. In the second session of the Fifty-third Congress it passed an act making Labor Day a public holiday in the District of Columbia, and it has recognized the existence of certain days as holidays, for commercial purposes, in such legislation as the Bankruptcy act, but with the exception named, there is no general statute on the subject. The proclamation of the President designating a day of Thanksgiving only makes it a holiday in those States which provide by law for it.

In the monthly calendars which follow this page the times of rising and setting of the sun are for the upper limb, and of the moon for the centre. Refraction and parallax have been taken into account in both cases. Although computed for Boston, New York, Washington, and Charleston, they will serve with sufficient accuracy, for all ordinary purposes, for all other places situated on or near the same parallel of latitude.

NOTE. — To ascertain any day of the week, first look in the table for the year required, and under the months are figures which refer to the corresponding figures at the head of the columns of days below. For Example: To know on what day of the week July 4 will be in the year 1895, in the table of years look for 1895, and in a parallel line, under July, is fig. 1, which directs to col. 1 below, in which it will be seen that July 4 falls on Thursday.

* 1752 same as 1772 from Jan. 1 to Sept. 2. From Sept. 14 to Dec. 31 same as 1780 (Sept. 3-13 were omitted).—This Calendar is from Whitaker's London Almanack, with some revisions.

The Geological Strata.

The strata composing the earth's crust is divided by most geologists into two great classes: 1. Those generally attributed to the agency of water. 2. To the action of fire; which may be subdivided as follows: (a) Aqueous formations, stratified, rarely crystalline (sedimentary or fossiliferous rocks; metamorphic or unfossiliferous). (b) Igneous formations, unstratified, crystalline (volcanic, as basalt; platonic, as granite).

The geological record is classified into five main divisions or periods: 1. The Archæan, lifeless and dawn of life. 2. The Palæozoic (ancient life). 3. The Mesozoic (middle life). 4. The Cenozoic (recent life). 5. Quaternary, the age in which man's first appearance is indicated.

Facts About the Earth.

ACCORDING to Clark, the equatorial semi-diameter is 20,926,202 feet=3963,296 miles, and the polar semi-diameter is 20,854,895 feet=3950,738 miles. One degree of latitude at the pole=69.407 miles. One degree of latitude at the equator=68.704 miles.

POPULATION OF THE EARTH BY CONTINENTS.

(From Proceedings of the Royal Geographical Society for January, 1891.)

Asia	14,710,000	850,000,000	57.7				
Australasia	3,288,000	4,730,000	1.4				

The above estimate was made by Ernest George Ravenstein, F.R.G.S., the geographer and statistician, and is for 1890.

An estimate of population of the earth, made by Drs. Wagner and Supan, editors of "Bevölkerung der Erde" (Perthes, Gotha, 1891), is as follows: Europe, 357,379,000; Asia, 825,954,000; Africa, 163,953,000; America, 121,713,000; Australasia, 3,230,000; Oceanic Islands, 7,420,000; polar regions, 80,400. Total, 1,479,729,400. The estimate of area of the continents and islands by the same authorities is 52,821,684.

Ravenstein's estimate of the earth's fertile region, in square miles, is 28,269,200; steppe, 13,901,000; desert, 4,180,000; polar region, 4,888,800.

The population of the earth at the death of the Emperor Augustus, estimated by Bodio, was 54,000,000. The population of Europe hardly exceeded 50,000,000 before the fifteenth century.—Mullhall.

The area and cubic contents of the earth, according to the data of Clark, given above, are: Surface, 196,971,984 square miles; cubic contents, 259,944,035,515 cubic miles.

Murray (Challenger expedition) states the greatest depth of the Atlantic Ocean at 27,366 feet; Pacific Ocean, 30,000 feet; Indian Ocean, 18,582 feet; Southern Ocean, 25,200 feet; Arctic Ocean, 9,000 feet. The Atlantic Ocean has an area, in square miles, of 24,536,000; Pacific Ocean, 50,309,000; Indian Ocean, 17,084,000; Arctic Ocean, 4,781,000; Southern Ocean, 30,592,000. The highest mountain is believed to be Deodhunga, one of the Himalayas, 29,002 feet.

For population of the earth according to creed, see RELIGIOUS STATISTICS.

The human family is subject to forty-five principal governments. As to their form they may be classified as follows: *Absolute monarchies*, China, Madagascar, Morocco, Persia, Russia, Siam, Turkey; *Limited monarchies*, Austria-Hungary, Belgium, British Empire, Denmark, Germany, Greece, Italy, Japan, Netherlands, Portugal, Roumania, Servia, Spain and Sweden and Norway; *Republics*, Argentine Republic, Bolivia, Brazil, Chili, Colombia, Costa Rica, Ecuador, France, Guatemala, Hawaii, Hayti, Honduras, Mexico, Nicaragua, Orange Free State, Paraguay, Peru, Salvador, San Domingo, Switzerland, Transvaal, United States of America, Uruguay, Venezuela. Besides these are the undefined despotisms of Central and South Africa, and a few insignificant independent States.

The average duration of human life is about 33 years. One quarter of the people on the earth die before age 6, one half before age 16, and only about 1 person of each 100 born lives to age 65. The deaths are calculated at 67 per minute, 97,790 per day and 35,639,835 per year; the births at 70 per minute, 100,800 per day and 36,792,000 per year.

These estimates by Mullhall (1891) exhibit the superior growth of the English language in the last ninety years. Another authority (see "English Speaking Religious Communities") estimates the number using the English language in 1893 at over 117,000,000. English is fast becoming the polite tongue of Europe.

Weather Signals

OF THE WEATHER BUREAU, U. S. DEPARTMENT OF AGRICULTURE.

THE Weather Bureau furnishes, when practicable, for the benefit of the general public and those interests dependent to a greater or less extent upon weather conditions, the "Forecasts" which are prepared daily, at 10 A. M. and 10 P. M., for the following day. These weather forecasts are telegraphed to observers at stations of the Weather Bureau, railway officials, and many others, and are so worded as to be readily communicated to the public by means of flags or steam-whistles. The flags adopted for this purpose are five in number, and of the form and dimensions indicated below:

EXPLANATION OF FLAG SIGNALS.

No. 1.
White Flag.

Clear or fair weather.

No. 2.
Blue Flag.

Rain or snow.

No. 3.
White and Blue Flag.

Local rains.

No. 4.
Black Triangular Flag.

Temperature signal.

No. 5.
White Flag with
black square in
centre.

Cold wave.

Number 1, white flag, six feet square, indicates clear or fair weather. Number 2, blue flag, six feet square, indicates rain or snow. Number 3, white and blue flag (parallel bars of white and blue), six feet square, indicates that local rains or showers will occur, and that the rainfall will not be general. Number 4, black triangular flag, four feet at the base and six feet in length, always refers to temperature; when placed above numbers 1, 2 or 3 it indicates warmer weather; when placed below numbers 1, 2 or 3 it indicates colder weather; when not displayed, the indications are that the temperature will remain stationary, or that the change in temperature will not vary more than five degrees from the temperature of the same hour of the preceding day from June to August, inclusive, seven degrees from November to March, inclusive, and not more than six degrees for the remaining months of the year. Number 5, white flag, six feet square, with black square in centre, indicates the approach of a *sudden* and *decided* fall in temperatures, and is usually ordered at least twenty-four hours in advance of the cold wave. When number 5 is displayed, number 4 is always omitted.

A special storm flag, red with black square in centre (not shown above), is prescribed for use in North and South Dakota, Minnesota (except at Lake stations), Iowa, Nebraska and Wyoming, to indicate high winds, accompanied by snow, with temperature below freezing.

When displayed on poles, the signals should be arranged to read downward; when displayed from horizontal supports, a small streamer should be attached to indicate the point from which the signals are to be read.

INTERPRETATION OF DISPLAYS.

- No. 1, alone, indicates fair weather, stationary temperature.
- No. 2, alone, indicates rain or snow, stationary temperature.
- No. 3, alone, indicates local rain, stationary temperature.
- No. 1, with No. 4 above it, indicates fair weather, warmer.
- No. 1, with No. 4 below it, indicates fair weather, colder.
- No. 2, with No. 4 above it, indicates warmer weather, rain or snow.
- No. 2, with No. 4 below it, indicates colder weather, rain or snow.
- No. 3, with No. 4 above it, indicates warmer weather with local rains.
- No. 3, with No. 4 below it, indicates colder weather with local rains.
- No. 1, with No. 5, indicates fair weather, cold wave.
- No. 2, with No. 5, indicates wet weather, cold wave.

Communications with reference to the display of these symbols and signals should be addressed to the Director of the State Service in which the station is located or to the Chief of the Weather Bureau, Washington, D. C. (For wind signals, see next page.)

The several States, with headquarters, in which State Weather Services are in operation are:

Alabama, Montgomery.	Md., Baltimore (for Del. also.)	Ohio, Columbus.
Arizona, Tucson.	Mass., Boston (for N. England)	Oklahoma, Oklahoma City.
Arkansas, Little Rock.	Michigan, Detroit.	Oregon, Portland.
California, Sacramento.	Minnesota, Minneapolis.	Pennsylvania, Philadelphia.
Colorado, Denver.	Mississippi, Vicksburg.	South Carolina, Columbia.
Florida, Jacksonville.	Missouri, Columbia.	South Dakota, Huron.
Georgia, Atlanta.	Montana, Helena.	Tennessee, Nashville.
Idaho, Idaho Falls.	Nebraska, Lincoln.	Texas, Galveston.
Illinois, Springfield.	Nevada, Carson City.	Utah, Salt Lake City.
Ind., Indianapolis or Lafayette	New Jersey, New Brunswick.	Virginia, Lynchburg.
Iowa, Des Moines.	New Mexico, Santa Fé.	Washington, Seattle.
Kansas, Topeka.	New York, Ithaca.	West Virginia, Parkersburg.
Kentucky, Louisville.	North Carolina, Raleigh.	Wisconsin, Milwaukee.

White Pennant.

Red Pennant.

Red Pennant.

Storm.

Westerly winds.
When displayed in connection with Storm Signal.

Easterly winds.
When displayed in connection with Storm Signal.

Information Signal.
When displayed alone*

A red flag with a black center indicates that a storm of marked violence is expected. The pennants displayed with the flags indicate the direction of the wind; red, easterly (from northeast to south); white, westerly (from southwest to north). The pennant above the flag indicates that the wind is expected to blow from the northerly quadrant; below, from the southerly quadrant.

STORM SIGNALS.

Northeasterly winds.

Southeasterly winds.

Northwesterly winds.

Southwesterly winds.

By night a red light will indicate easterly winds, and a white light above a red light will indicate westerly winds.

Hoisting signals for each quadrant is an opinion only, offered to aid the public.

* When displayed at stations on the Great Lakes indicates that winds are expected which, in the opinion of the forecast official, may prove dangerous to smaller classes of vessels and tows, without reference to any stated velocity. When displayed at stations on the Atlantic, Pacific, and Gulf coasts indicates that the local observer has received information from the central office of a storm covering a limited area, dangerous only for vessels able to sail to certain points. The signal serves as a notification to shipmasters that information will be given them upon application to the local observer.

EXAMPLE.—To find the approximate time of high tide at Atlantic City, N. J., on any day, find first the time of high water at New York under the desired date, and then subtract 20 minutes, as in the above table; the result is the time of high water required.

Rules for Foretelling the Weather.

ADAPTED FOR USE WITH ANEROID BAROMETERS, A RISING BAROMETER.

A RAPID rise indicates unsettled weather.
 A gradual rise indicates settled weather.
 A rise with dry air and cold increasing in summer indicates wind from the northward; and if rain has fallen, better weather may be expected.

A rise with moist air and a low temperature indicates wind and rain from the northward.
 A rise with southerly winds indicates fine weather.

A STEADY BAROMETER.
 With dry air and reasonable temperature indicates a continuance of very fine weather.

A FALLING BAROMETER.
 A rapid fall indicates stormy weather.
 A rapid fall with westerly wind indicates stormy weather from the northward.

A fall with a northerly wind indicates storm, with rain and hail in summer, and snow in winter.

A fall with increased moisture in the air, and heat increasing, indicates wind and rain from the southward.

A fall with dry air and cold increasing in winter indicates snow.
 A fall after very calm and warm weather indicates rain with squally weather.

The barometer rises for northerly winds, including from north-west by north to the eastward for dry, or less wet weather, for less wind, or for more than one of these changes, except on a few occasions, when rain, hail, or snow comes from the northward with strong wind.

The barometer falls for southerly wind, including from south-east by south to the westward, for wet weather, for stronger wind or for more than one of these changes, except on a few occasions, when moderate wind, with rain or snow, comes from the northward.

The above printed rules are in use by the Seawanhaka Corinthian Yacht Club of New York.

Astronomical Facts.

THE mean obliquity of the ecliptic for the year 1895 is 23° 27' 10.2". Mean annual sidereal duration, 0.46".

The present accepted value of the solar parallax is 8.81" at the earth's mean distance, which is 92,790,000 miles, with a probable error of about 75,000 miles more or less.

The eccentricity of the earth's orbit is 0.016771; we are therefore 3,112,560 miles nearer to the sun at perihelion (January 1) than at aphelion (about July 1).

Length of the sidereal year, 365 days, 9 hours, 9 minutes, 9.6 seconds of mean time.

ASTRONOMICAL FACTS—Continued.

Length of the tropical year (from equinox to equinox), 365 days, 5 hours, 48 minutes, 46.07 seconds of mean time.

Mean distance from earth to moon, 238,855 miles.

The length of a second's pendulum, that is, one which vibrates once in a second, in vacuo, at any place whose latitude is l , is $39.01254 + 0.20827 \sin^2 l$ inches. At New York it is 39.1013 inches.

The acceleration of gravity in one second of mean solar time is $32.086528 + 0.171293 \sin^2 l$ feet. The half of this is the distance through which a body falls (in a vacuum) in one second.

The velocity of light is 186,337 miles per second.

Light requires 8 minutes and 18 seconds to pass from the sun to the earth when at its mean distance, as given above; therefore, when we look at the sun we see him, not where he actually is, but where he was about 8 minutes and 18 seconds ago; his true place is then always in advance of his apparent place.

From June 16 to August 1 both the upper and lower transits take place during daylight. The azimuth at the time of greatest eastern or western elongation can be easily computed from the formula:

$$\sin A = \frac{\sin p}{\cos l}$$

where A denotes the Azimuth, p the polar distance, and l the latitude of the place.

DATE OF GREATEST ELONGATION.

To find the time of greatest eastern or western elongation, let H denote the hour angle, and l and p as before, then we shall have

$$\cos H = \tan p \tan l.$$

And the hour angle in mean time is

$$I_m = I^\circ \times 0.0664846.$$

This quantity, H_m , added to or subtracted from the time of transit given above, according to the elongation required, will give the mean time of the greatest elongation at any place whose north latitude is l .

The above calculations were made for THE WORLD ALMANAC by Dr. Morrison, Washington, D. C.

Floriculture in the United States.

The floriculture industry in the United States in the census year was made the subject of a special investigation by the Census Bureau, with the following results, the statistics applying solely to the business of flower merchants or florists:

Number of establishments.....	4,659	Product of year: Rose bushes.....	49,058,353
Square feet of glass covering.....	38,823,247	" Hardy plants and shrubs.....	38,280,872
Value of establishments.....	\$88,355,722	" All other plants.....	152,885,282
Men employed.....	16,847	Total value of product.....	\$12,036,477
Women employed.....	1,953	Cut flowers in addition.....	14,175,329

Floriculture, though carried on as a business in the United States for more than a century, assumed important proportions only within the past twenty-five years. In addition to the Society of American Florists, 965 State and local floral societies and clubs and 358 horticultural societies, aided by the agricultural and horticultural press, helped to develop this industry to its present large proportions.

At what age does one become "old"? Five centuries ago a man was old at fifty. But the hale and hearty gentlemen of to-day who has just turned sixty would probably protest against being classed among old people, even if famous. That his susceptibilities may not be wounded, therefore, a separating dash has been discreetly introduced after age sixty-five.

* The fact of Mr. Salmon's age and relation with the Royal College of Surgeons of England has been verified by Secretary Edward Trimmer, of that institution, in response to an inquiry by the Editor of the ALMANAC. Mr. Salmon will have completed his 105th year in March, 1895. He obtained his diploma April 7, 1809, and is the oldest Freemason in the world.

Acts of the Fifty-third Congress,

FIRST AND SECOND SESSIONS.

THE principal bills of a public nature which passed during the first session of the Fifty-third Congress, which was convened at the call of the President, August 7, 1893, were:

Chapter 1. An act in aid of the California Midwinter International Exposition.

Chapter 8. An act to repeal part of an act approved July 14, 1890, entitled "An act directing the purchase of silver bullion and the issue of treasury notes thereon, and for other purposes." [The Silver Purchase Repeal Act.]

Chapter 14. An act to amend an act to prohibit the coming of Chinese persons into the United States, approved May 5, 1892.

The principal bills and joint resolutions of a public nature (exclusive of appropriation bills) passed during the second session of the Fifty-third Congress, which convened in regular session December 4, 1893, and adjourned August 28, 1894, were as follows:

Chapter 21. An act to improve the methods of accounting in the Post-Office Department, and for other purposes.

Chapter 25. An act to repeal all statutes relating to supervisors of elections and special deputy marshals, and for other purposes. [The Force law repeal.]

Chapter 57. An act to give effect to the award rendered by the Tribunal of Arbitration, at Paris, under the treaty between the United States and Great Britain concluded at Washington, February 29, 1892, for the purpose of submitting to arbitration certain questions concerning the preservation of the fur seal.

Chapter 72. An act to protect the birds and animals in Yellowstone National Park and punish crimes in said park.

Chapter 91. An act supplementary to an act approved April 6, 1894, for the execution of the award rendered at Paris, August 15, 1893, by the Tribunal of Arbitration constituted under the treaty between the United States and Great Britain concluded at Washington, February 29, 1892, in relation to the preservation of the fur seal.

Chapter 101. An act to authorize the New York and New Jersey Bridge Company to construct and maintain a bridge across the Hudson River between New York City and the State of New Jersey.

Chapter 118. An act making Labor Day a public holiday.

Chapter 131. An act to define and establish the units of electrical measure.

Chapter 136. An act to enable the people of Utah to form a constitution and State government, and to be admitted into the Union on an equal footing with the original States.

Chapter 179. An act to regulate enlistments in the Army of the United States [Reducing the term of enlistment from five to three years.]

Chapter 236. An act to require railroad companies operating railroads in the Territories over a right of way granted by the Government to establish stations and depots at all town sites on the lines of said roads established by the Interior Department.

Chapter 349. An act to reduce taxation, to provide revenue for the Government and for other purposes. [The Tariff bill.]

Joint Resolution No. 12. Providing for the appointment of a commission to the Antwerp International Exposition.

During the session about 8,000 bills were introduced in the House of Representatives and referred to various committees. The committees acted upon about 1,500 of these. Among the important bills of the session which failed or were not acted upon and went over to the third session were the Bland sealnorage bill, which was vetoed by the President; the bridge light and fog signal, anti-option and bankruptcy bills, the bills for the admission to Statehood of Arizona and New Mexico, for the better control and safety of National banks, for the election of Senators by a direct vote of the people, and for reporting, marking, and removing derelicts in the Atlantic Ocean. Among other bills and joint resolutions which went over were the bill to provide for the issue of circulating notes to National banks, reported from the Finance Committee; a concurrent resolution providing for a joint committee of the two Houses to consider questions of finance; a resolution providing for a committee to inquire if any Senator is or has been a stockholder of or directly or indirectly interested in any National bank; a resolution relative to the independence of the co-ordinate departments of the Government, and a resolution declaring that the Secretary of the Treasury has no lawful authority for issuing or selling bonds.

Jury Duty in the City of New York.

To be qualified to serve, a person must be not less than 21 nor more than 70 years of age, and he must be a male citizen of the United States, and a resident of this city and county; and he is a resident within the meaning of the jury law if he dwells or lodges here the greater part of the time between the first day of October and the last day of June. He must be the owner, in his own right, of real or personal property of the value of \$250; or the husband of a woman who is the owner, in her own right, of real or personal property of that value. He must also be in the possession of his natural faculties, and not be infirm or decrepit; intelligent; of good character, and able to read and write the English language understandingly.

THE FOLLOWING PERSONS ARE ENTITLED TO EXEMPTION.

A Clergyman, Minister of any religion officiating as such, and not following any other calling. A practicing Physician, Surgeon, or Surgeon-Dentist not following any other calling, and a licensed Pharmacist or Pharmacist while actually engaged in his profession as a means of livelihood. An Attorney or Counsellor-at-Law regularly engaged in the practice of law as a means of livelihood. A Professor or Teacher in a college, academy, or public school, not following any other calling. Editor, Editorial Writer, or Reporter of a daily newspaper regularly employed as such, and not following any other vocation. The holder of an office under the United States, or the State, or City, or County of New York, whose official duties, at the time, prevent his attendance as a juror. A Consul of a foreign nation. A Captain, Engineer, or other officer actually employed upon a vessel making regular trips; a licensed Pilot, actually following that calling. A Superintendent, Conductor, or Engineer employed by a Railroad Company other than a street railroad company, or a Telegraph Operator, employed by a Telegraph Company who is actually doing duty in an office, or along the railroad or telegraph line of the company by which he is employed. Honorably discharged Firemen. Active and honorably discharged Militiamen and active members of the Old Guard. Inspectors and Poll Clerks, or a person who is physically incapable. A duly licensed Engineer of Steam Boiler actually employed as such. Grand, Sheriff's, and Civil Court Jurors.

State Legislation in 1894.

THE following summary of important legislation effected by State Legislatures in 1894 is compiled from the address of President T. M. Cooley, before the American Bar Association in August, 1894:

CONVICT-MADE GOODS.

IN Kentucky all goods, wares, or merchandise manufactured by convicts in other States and brought into the State for the purposes of sale are required to be marked, branded, or labeled as convict-made goods. In New York several acts were passed, the general purpose of which was to restrict convict-made goods coming in competition with the results of free labor. In that State, and also in Ohio, provision was made requiring those selling therein goods made by convicts in other States to be licensed and to submit to important regulations. In Massachusetts an act was passed limiting to seventy-five the number of convicts who may be employed in the manufacture of reed or rattan goods. In New York the law for employing convicts upon the public highways was somewhat amended, and in Iowa provision was made for furnishing from one of its prisons stone broken by prison labor, to be used on the highways.

WORKERS IN FACTORIES AND MINES.

Laws were passed in Rhode Island and in New Jersey to increase the security against personal injury and loss of life by fire, or other casualty, to women and others employed in factories and to persons employed in mines. An act passed in Maryland for the protection of workmen on buildings makes careful provision for an inspection of scaffolding, ropes, blocks, etc., used in the construction, repairing, or painting of buildings. In Rhode Island a strong and carefully-drawn statute was passed to prevent cruelty to children by parents or others having the custody of them. This is mentioned here because the cruelty is often connected with factory working. No child under twelve years of age is allowed to be employed in any factory, manufacturing, or mercantile establishment.

A LABORER'S DAY.

Among the few laws of general importance passed at the special session in Colorado was one providing that "in all work hereafter undertaken in behalf of the State, or any county, township, or school district, municipality, or incorporated town, it shall be unlawful for any board, officer, agent, or any contractor or sub-contractor thereof, to employ any mechanic, workman, or laborer in the prosecution of any work for more than eight hours a day." Exception is made for cases of emergency, but overwork for any one day is to be allowed as so much on the time of the next day, and in no one week of seven days shall there be permitted more than forty-eight hours of labor. Violation of the law is made a misdemeanor. A law to the same effect in Utah was made somewhat more specific this year. In New York a similar law was so amended as to provide that it "shall apply to all mechanics, workmen, and laborers now or hereafter employed by the State or any municipal corporation therein, through its agents or officers, or in the employ of persons contracting with the State or such corporation for performance of public works. And all such mechanics, workmen, and laborers so employed shall receive not less than the prevailing rate of wages in the respective trades or callings in which such mechanics, workmen, and laborers are employed in said locality. And in all such employment none but citizens of the United States shall be employed." In Massachusetts nine hours are now to constitute a day's work by laborers for the Commonwealth or any municipal corporation, or for any contractor for a public work. Provision is made against oppressive overwork in other cases. In Florida transportation companies are forbidden to employ a person more than thirteen hours consecutively, unless in case of accident.

EMPLOYER AND EMPLOYÉ.

In Massachusetts a very important act has been passed regulating the relation of employé in many particulars, in most of which the protection of the laborer has been had specially in view. Where by contract the laborer is subjected to a penalty for leaving the service without notice, the employer is made subject to a like penalty for discharging without notice. Intimidation by outside parties is provided against, and no employer shall require any one to agree not to become a member of any labor organization as a condition of employment. Care is taken that laborers, if voters, shall have opportunity to attend elections and not be coerced in voting. Laborers shall not be made to agree to surrender any legal claim that may arise in their favor to recover damages for injuries while in service. What shall constitute a laborer's day in certain employments is specified. The cases of minors under eighteen and of women are provided for specially and in detail. Employment of these classes in any manufactory between the hours of ten at night and six in the morning is expressly forbidden. No child under fourteen shall be employed in any manner before the hour of six in the morning or after that hour in the evening. These are only a few of the numerous provisions made in the interest of the laborer. No more important law was passed during the year in any State. In Florida railroad companies are forbidden to blacklist employes. Persons and corporations are forbidden to combine against employes to prevent the employment by any of their number of such as have been discharged by another.

LABOR BY PAUPERS.

In Ohio an act was passed authorizing the recipients of public charity in certain classes of institutions to be employed at manual labor on public parks, highways, etc., in return therefor. In Maryland charitable institutions which receive needy persons for food or lodging may now require them to perform labor in return, and if they accept assistance on those terms, and then fail or refuse to perform the labor, they may be proceeded against as vagrants.

EDUCATION.

New York made thorough revision of its laws upon this subject. Public education of children between the ages of eight and sixteen is made compulsory. New Jersey, Kentucky, and Georgia also, to a considerable extent, revised their laws. In New Jersey furnishing of free school books and all necessary supplies to scholars attending public schools is required. The space in the text book devoted to the consideration of the nature and effects of alcoholic drinks and narcotics is required to be sufficient for a full and adequate treatment of the subject, and it is made compulsory to teach the injurious effects of alcohol on the human system. Industrial education may be added, and the day before the customary National holidays is to be devoted to teaching patriotism. In Iowa school books are furnished free to indigent scholars. School boards are made elective in Florida for the first time. One of the most important laws for the protection of higher education was that passed in New York to prevent hazing in colleges. It makes all persons who shall take part in the hazing of students guilty of a misdemeanor punishable by fine or imprisonment. Whenever any tattooing or permanent disfigurement of the body, limbs, or features of any person or persons is caused wholly by the hazing, through the use of nitrate of silver, or any like substance, it shall be held to be a crime of the degree of mayhem, and may be punished by imprisonment for not less than three nor more than fifteen years. In Louisiana an act was passed "to prohibit the Board of School Directors of the several parishes of this State from combining the public schools thereof with any private or parochial schools or other institutions of

STATE LEGISLATION IN 1894—Continued.

learning under the control or management of any church, religious order, or association, or any religious sect or denomination, and to prohibit them from employing as professors or teachers in the public schools of this State any preacher, minister of the Gospel, priest, or other minister of religion, member of any monastic or other religious order, who is in the actual service of any church or religious order of any sect or denomination whatever, as a teacher or minister of religion." Virginia has empowered the City Council of any city to adopt any reasonable ordinance necessary to prevent any improper interference with or annoyance of the scholars attending or boarding at any female school in such city. Virginia has also made provision for State summer normal schools "to familiarize the teachers in the public schools of this State with more advanced methods of teaching, and to furnish such additional academic training as will tend to promote the usefulness of the public schools."

HUSBAND AND WIFE.

In Kentucky the laws regarding the property rights of married women were thoroughly revised, and the purpose of the revision seems to have been to make the property rights of husband and wife as nearly equal as possible, and to give to each a similar control and power of disposal, with the exception that the wife cannot convey real estate unless the husband unites with her in the conveyance. In Virginia husband and wife are made competent witnesses for or against each other in all civil causes, except in proceedings by creditors to avoid or impeach conveyances or transfers from the one or the other on the ground of fraud or want of consideration. This law does not apply to proceedings for divorce. Communications made by one to the other during marriage are privileged, not only while the marriage shall continue, but after the relation shall have ceased. In Massachusetts the marriage of any male under eighteen years of age and of any female under fifteen is provided against. But the judge of probate may allow it after a hearing, on consent of the father, or, if there be no father living, then of the mother, and if no parent be living, then of a legal guardian. In the general law of marriage some changes are made in Massachusetts, for the most part relating to the notice of intention to marry. Georgia has undertaken to guard against one class of fraudulent divorces by providing that no court in the State shall grant a divorce of any character to any person who has not been a *bona fide* resident of the State twelve months before filing application therefor. In New York it is provided that in case of divorce the legitimacy of any child of the marriage, born or begotten before the commencement of the action, is not to be affected by the judgment. Some other changes having the wife's interests in view are made in the law of divorce. In Massachusetts, when a person having a wife or minor child shall absent himself without making proper provision for support or a receiver of his estate may be appointed by the probate court on petition of such wife or child. In Florida a married woman owning real estate in her own right, whose husband has been adjudged insane, and who has been insane for a year or more, may sell, mortgage, or convey such real estate without the consent, signature, or joinder of the husband. In New Jersey, on the death of husband or wife having real estate owned in fee, but not leaving heirs, such real estate is now made to pass in fee to the survivor.

PARTNERSHIPS.

In Ohio a partnership transacting business under a fictitious name, or a designation not showing the names of the persons interested as partners, must file with the clerk of the court of common pleas of the county in which its principal office or place of business is situated a certificate stating names in full of all members and their places of residence, and must publish the same in a newspaper in the county. The certificate must be signed by the partners and acknowledged as is required in cases of conveyance of lands. There must be a new certificate with new publication whenever a change in partnership takes place. A similar provision to this last is made in New York.

MOB VIOLENCE.

In an attempt to prevent mob violence, and to prescribe proper punishment for the same, an act was passed in Georgia conferring upon peace officers large powers for arresting persons engaged in the same, and for holding them in custody to be dealt with as the law directs. The act makes all persons engaged in mob violence guilty of felony, and if a death results from such violence, indictable for the crime of murder. The peace officer who fails to attempt in good faith to suppress an assembly of persons collected for the purpose of mob violence, or to summon a posse for the necessary assistance, is made guilty of misdemeanor. Any person failing to respond when summoned to assist in suppressing any mob violence which is being committed or about to be committed is also made guilty of misdemeanor. The persons summoned may be required to bring with them such firearms or other weapons as are necessary to be used in the suppression of such mob violence, and the officer and his posse may, if the exigency of the case requires, in order to prevent human life being taken by mob violence, take the life of any person or persons attempting to commit it. But life is not to be taken unless it be necessary to save the life or lives of the person or persons being mobbed, or to protect the lives of the arresting officer or his posse.

POOL SELLING.

The first legislation of the year in New Jersey was to repeal an act concerning the maintaining of race courses in the State, and licensing and regulating the same. This was followed by another annulling all licenses theretofore granted, and by still another repealing the act which had made betting and bookmaking upon horse races legal. Telegraph companies, telephone companies, express companies, and other corporations engaged in business as common carriers were then prohibited from carrying any message that was to further or promote the interests of unlawful pursuits, or in any way enable any person or persons to carry on any business or practice declared illegal by the State laws. Violation of this last act was made punishable by a fine of a thousand dollars. It aimed to check pool selling in New York and elsewhere on New Jersey races. Rhode Island revised its laws against gambling and pool selling, but by one section of the new act provided that "every incorporated agricultural society owning a race track is permitted to run or trot horses for purses upon its own track, for the purpose of improving the breed of horses, whether for the improvement of the thoroughbred or the trotting horse," the privilege being confined to the period between the fifteenth of May and the fifteenth of November. Virginia revised its law against bookmaking and pool selling on races and made it very stringent, but with exceptions for those made on grounds of agricultural associations, county or city fairs, and driving clubs duly chartered.

DAIRY PRODUCTS.

Laws were passed during the year in Iowa, Utah, and Ohio, the purpose of which was to preclude the putting upon the market of simulated dairy products, unless the same were properly labelled, so that the purchaser would distinctly understand what he was buying.

UNIFORMITY IN LEGISLATION.

In the list of States and Territories which have heretofore provided by law for the appointment of commissioners to consider and ascertain the best means for bringing about uniformity of legislation in all—namely, Alabama, Delaware, Georgia, Kentucky, Maryland, Minnesota, Mississippi, New Jersey,

STATE LEGISLATION IN 1894—Continued.

New Mexico, New York, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, South Dakota, Tennessee, Washington, and Wisconsin—may now be added Virginia and South Carolina, such provision having been made by them within the year. Massachusetts passed an act "to establish a law uniform with the laws of other States, for a uniform standard of weights and measures." Also an act "to establish a law uniform with the laws of other States for the acknowledgment and execution of written instruments."

CORPORATIONS

Several statutes for the regulation of transportation companies were passed in Florida. They must not demand pay for freight on goods carried until they are ready for delivery at the place of destination. They must notify consignees immediately on receipt of goods. Other provisions are made to ensure impartiality of service. The specific performance of contracts of railroad companies for the construction of depots, side tracks, and warehouses may be enforced. The companies must build side tracks, switches, etc., where their roads connect. In Massachusetts the issue of bonds by railroad and street railway companies is now required to have the approval of the State Board of Railroad Commissioners. In the same State a general law now regulates the increase of capital stock of such companies, and also of gas light, electric light, telegraph, telephone, aqueduct, and water companies. If a foreign corporation which owns or controls a majority of the capital stock of a domestic street railway, gas light, or electric light corporation shall issue stock or evidence of indebtedness based upon or secured by the property of such domestic corporation, without being authorized by law, the Supreme Judicial Court may dissolve such domestic corporation.

BANKING.

A general law for the voluntary incorporation of persons to carry on the business of banking was passed in Georgia. In New York days of grace are abolished. In Louisiana bank officers are authorized to transfer balances in the bank in favor of one who has deceased to his representatives. Virginia has made the receipt of money as a deposit by any banker, broker, or officer of any trust or savings institution, or of any bank, with actual knowledge that such banker, broker, or institution or bank is insolvent, the crime of embezzlement.

LEGAL PROCEDURE.

In Georgia an act has been passed requiring the plaintiff in civil actions to set forth his cause of action in orderly and distinct paragraphs, numbered consecutively. It also requires that the defendant shall severally and distinctly answer each paragraph, and not file a mere general denial, as has been the practice. All the affirmations not denied are to be taken as *prima facie* true, unless the defendant states that he can neither admit nor deny because of the want of sufficient information. In Ohio, in jury trials, the court when requested must now instruct the jury, if they find a general verdict, to find specially upon particular questions of fact to be stated in writing, their finding to be in writing also. In Maryland special findings of facts in jury trials are now provided for. Very important changes are made in the attachment laws of Colorado, and some also in those of New Jersey. In Iowa an attempt was made to get rid of the professional juror. The names of all residents of the town or city in which court is held who are liable to jury duty, and not on the regular panel, are placed in a separate box, and from these talesmen are drawn, instead of the jury being completed by the officer from hangers-on in the court-room. A modification of the law looking to the same end was also made in New York. Ohio has also the same purpose in view in providing for a jury commissioner and amending the prior law as to the drawing of jurors. Careful regulations as to drawing jurors were this year made in Maryland and for city courts in Massachusetts, the last being specially aimed at checking evasions of jury duty. In Maryland a probated will is now subject to caveat only within three years from probate. In Maryland the attachment law is so changed as to admit of the issue of the writ in certain cases before the debt falls due.

LIBELLOUS INFORMATION.

New York has undertaken to check what has become a serious evil, by providing that "any person who wilfully states, delivers, or transmits, by any means whatever, to any manager, editor, publisher, reporter, or other employe of a publisher of any newspaper, magazine, publication, periodical, or serial, any statement concerning any person or corporation which, if published therein, would be a libel, is guilty of a misdemeanor." Georgia at the same time protects the publishers of newspapers from libel suits in one class of cases, where the common law might inflict upon them damages, by enacting that "a fair and honest report of the proceedings of legislative or judicial bodies, or court proceedings, or a truthful report of information received from any arresting officer or police authorities, shall be deemed privileged communication, and in any action brought for newspaper libel the rule of the law as to privileged communications shall apply."

RAILROADS.

A railroad commission is provided for in Louisiana, with power over rates. Equal but separate accommodations must be provided for white and black passengers.

PRACTICE OF MEDICINE.

Several laws during the year were passed for the purpose of regulating the medical practice, and excluding therefrom mere pretenders, who were without the proper training, and could give no evidence of their fitness to be trusted with the health and lives of others. In Virginia the subject received special attention, and a general law to regulate the practice of medicine and surgery in the State was passed. Others were passed in New Jersey, Ohio, Maryland, Kentucky, and Utah, and in each jurisdiction only classes of persons designated, and who furnish evidence of proper training, are now suffered to practice. In Massachusetts a general law now requires the registration of practicing physicians and surgeons. In Maryland the practice of veterinary medicine is now regulated. In Louisiana women may now be licensed to practise medicine and pharmacy. The privilege is extended to the practice of law also. In Maryland, to guard against blindness in children, the attendance of a qualified physician is made imperative when at any time within two weeks after the birth of an infant certain diseased conditions of the eyes appear.

TAXATION.

Among the most important acts passed within the year were those in Ohio and New Jersey, imposing a collateral inheritance tax. In Ohio a law for the taxing of cigarettes and the business of dealing in them was passed. The provisions are very stringent. Also a law for the taxing of sleeping-car companies doing business or owning cars operated in the State. The tax is to be one per cent of the estimated value of the capital stock representing capital and property of such company, owned or used in Ohio, after deducting the value of its real estate in Ohio as assessed. Kentucky has changed her law for the taxation of peddlers. Persons who, under cover of *bona fide* merchants, come into or take up a temporary residence in any county, city, or town of the commonwealth for the purpose of disposing of goods, etc., otherwise than as provided by law, are classed as peddlers.

Party Platforms in 1894.

ACTION OF STATE CONVENTIONS ON THE TARIFF ISSUE.

DEMOCRATIC CONVENTIONS.

Alabama.—We earnestly urge upon our Senators and Representatives in Congress the speedy reform of the tariff and the speedy repeal of the 10 per cent tax on the issue of State banks.

Arkansas.—We insist upon a strict compliance with the repeated declarations of the party in favor of a tariff for revenue only, to the end that the protection favored by the Republican party and crystallized in the infamous discriminations of the McKinley Tariff bill, shall be annulled and a fair competition in the markets of the world shall be opened to the producers of all classes in the United States, and fair exchange for our surplus products thereby secured.

California.—We congratulate the Democratic party and the people of the United States upon the fact that, notwithstanding the opposition of the Republican party, a substantial measure of tariff reform has been enacted.

Connecticut.—We congratulate our fellow-citizens on the recent revision of the revenue laws by which many of the raw materials used by our manufacturers and mechanics are entirely relieved of taxation and unreasonable duties upon others reduced. The revival of all business following immediately upon the passage of the law is the best evidence of the wisdom of its provisions. We believe the free coal and iron bills now pending in the United States Senate would be beneficial to the interests of the whole country if promptly passed. We demand the prompt passage of a law which will abolish the differential duties on refined sugar now maintained in the Senate by the Republican and Sugar Trust combination.

Delaware.—We commend and endorse the President of the United States, and the great majority of the Democratic members of the House of Representatives and of the Senate of the United States, for their patient, able, determined, and statesmanlike efforts to secure the complete enforcement of the principles of the Chicago platform, and relieve the country from the business depression and suffering, brought on by iniquitous Republican legislation culminating in the McKinley bill; and for their practical statesmanship in finally repealing that bill, notwithstanding apparently insurmountable obstacles, thereby checking and reversing the ruinous tariff policy of the Republican party; and for passing a Tariff bill freeing from import taxes many of the necessities and comforts of life, and securing great reduction of duties on others; we condemn the small number of Senators, who, elected to the United States Senate as Democrats, professing a belief in Democratic principles and adherence to Democratic faith, refused to obey the demands of the people, unmistakably expressed in the election of 1892, deserted their party, and, with the Republican Senators, succeeded in retaining, to oppress the people and deprive them of the full measure of their rights, some of the provisions of the unjust and fallacious tariff principles enacted into law by the Republican party.

Florida.—The principles on which the great Democratic victory of 1892 was won should not be sacrificed at the instance of a few Democratic Senators. We approve the course of the Democratic House of Representatives of the United States in its efforts to relieve the people of all unjust taxation and burdens. We condemn the course of the Democratic Senators of the United States who are resisting the just demands of the immediate representatives of the people.

Illinois.—We demand that Congress shall carry out the will of the people of the United States as expressed in the last Presidential election by passing an efficient bill to reform tariff taxation so that the country shall enjoy the beneficent results of that action without further delay.

Indiana.—We reaffirm our opposition to the vicious system of class legislation, mis-called protection, and pledge ourselves to continue to battle against it until every species of extortion and robbery fostered by the McKinley act shall be obliterated from our revenue system and the people enjoy all the blessings of commercial liberty. The protective system has built up the great monopolies and trusts which control absolutely so many industries and have done so much to debauch the politics of the country and corrupt the legislative department of the Government. We denounce tariff protection of every kind as a fraud and a robbery of the great majority of the American people for the benefit of the few. We maintain that no tariff taxes should be levied except for the purpose of revenue only, and that such taxes should be limited to the necessities of the Government, when honestly and economically administered. We denounce the McKinley Tariff Law enacted by the Fifty-first Congress as the culminating atrocity of class legislation. We approve the efforts of President Cleveland and his administration and of the Democratic House of Representatives and of the large majority of the Democratic Senators, and particularly our distinguished Senators from Indiana, the Hon. Daniel W. Voorhees and the Hon. David Turpie, and our entire Democratic delegation in Congress, to redeem the pledges made to the country by the last Democratic National Convention, and to execute the will of the American people, as expressed so emphatically at the ballot-box in November, 1892. We condemn the Republican party for its persistent efforts to prevent the execution of this unmistakable popular verdict, and we especially condemn a small coterie of Senators, who, masquerading as Democrats, by threats to defeat all tariff legislation, have temporarily prevented the Democratic party from carrying out all of its pledges to the people for tariff reform, as announced in the Democratic National platform of 1892.

Iowa.—We reaffirm the platform of the National Democratic Convention of 1892, and demand of our representatives in Congress that they carry out the same in good faith, by giving us a Tariff law that will lay the duties on imports for revenue alone and thereby destroy trusts, combines, and organizations that have been robbing the people and depleting the Treasury of the nation, and that will revert a policy that has destroyed our commerce with the world at large, driven our ships from the high seas, that has filled our country to overflowing with the pauper labor of Europe, that has bred anarchy, confusion, unrest, and disloyalty throughout the land, made war between capital and labor, that has sowed the seed of war and rebellion among the people, that has brought ruin to the business interests of the country and want to millions of our people who seek to earn an honest living by industry; again we say to our Congress, redeem the pledges made to the people and for all time make an end of paternal and class legislation.

Maine.—We deplore the condition to which the country has been brought by a long course of class legislation, persisted in by the Republican party, at the dictation of favored interests. It has enabled the few comparatively to gather into their hands the wealth of the country, and thereby to

control its industries and to dictate terms to those dependent on those industries. It confers on some special privileges at the expense of others. It tends to divide our people into two classes, the very rich and the very poor, making a nation of millionaires and tramps. It denies to American skill and enterprise opportunity to compete for supremacy in the markets of the world. It has destroyed our commerce, injured our agriculture, depopulated our farms, glutted our markets, closed our workshops, and deprived many of our people of the means of support.

Massachusetts.—We have for years advocated a thorough reform of the tariff. The House, or Wilson, bill was an honest effort to carry out the Democratic policy. Its defeat is much to be regretted. We hold those Democratic Senators who, by their inaction or resistance, prevented its passage, to be traitors to their party, and we demand their retirement from party leadership. We also demand that United States Senators be elected by direct vote of the people. We recognize, however, that the new tariffs, in spite of imperfections, a great improvement in almost every schedule over the monstrous act of spoliation known as the McKinley tariff, and we hail its passage as the beginning of the end of an unconstitutional system of duties for protection only. We believe it to be the immediate duty of the Democratic party to place every commodity which can fairly be described as raw material upon the free list; to abolish all duties which tend to create and maintain monopolies and trusts, and to reduce all duties which are still prohibitory in effect.

Michigan.—We denounce as undemocratic, and opposed to the Constitution of the United States, the system of taxation upon consumption, as advocated by the Republican party, by which the money of the poor is wrested from them to enrich private individuals and corporations, thereby benefiting one class at the expense of another. We, therefore, reaffirm the principles upon tariff taxation that were adopted by the Democratic National Convention at Chicago in 1892, and repudiate any departure therefrom.

Minnesota.—We are in entire sympathy with the efforts of the Democratic party to overthrow the oppressive Republican protective tariff system. We are proud of the splendid battle waged and won against the combined forces of monopolies and trusts created by Republican legislation.

Missouri.—We denounce the McKinley act as the culminative outrage of tariff taxation, and we unequivocally disapprove of the action of every Democratic Senator and Representative in Congress who opposes or delays, directly or indirectly, under any pretext, the passage of a bill decreasing the import duties imposed by that law.

Nebraska.—While the Wilson Tariff bill does not embody the full measure of tariff reform, we regard its passage as a step in the right direction, and we heartily endorse its provisions as securing cheaper and freer raw material and lower taxes.—*Independent Democrats.*

Believing that "all men are created equal," and that all are alike entitled to the consideration of government, we denounce as unjust and unjustifiable the protective tariff system, which, through the instrumentality of class legislation, robs the many for the benefit of the few. We demand a tariff for revenue only, and point to the Wilson bill as it passed the House of Representatives as a reasonable fulfillment of the promises made by the Democratic party in the campaign of 1892. While we do not condone the acts of those Democratic Senators who modified the Wilson bill in the Senate, we accept the bill as it finally passed as the best measure attainable under the circumstances, and as a great improvement over the McKinley law.—*Regular Democrats.*

New Hampshire.—A tariff law has been passed which will bring relief and prosperity to the country. Already its beneficial effects are seen in a revival of business, and when it shall have been perfected in accordance with the recommendations of President Cleveland the people will be relieved of the oppressive burdens of taxation imposed upon them by the McKinley law.

New York.—By the repeal of the McKinley Tariff law the inordinate taxation of the many for the benefit of the few has been notably diminished, and, in the place of inequitable and monstrous customs duties, which have starved some industries and overed others, the tariff schedules have been adjusted so that, while affording ample safeguards for American labor, they reduce the price to the people of necessities of life and encourage the promotion of industry by cheapening the cost of many raw materials used in manufactures; and that, by reduction in expenditures wherever possible, and by provision for additional revenues, the legitimate demands upon the Federal Treasury will no longer exceed the Government's income and necessitate an increase in the public debt. We concur with President Cleveland that the new Tariff law does not embody the full measure of tariff reform, but with him also we endorse its provisions for cheaper and free raw materials and lower taxes as a substantial recognition of Democratic principles, and we bespeak for the law an impartial trial, confident that its successful operation will convince the people of the wisdom of Democratic policy and induce them to demand its proper extension. While favoring, therefore, such wise modification and readjustment of particular schedules, by the enactment of separate bills, as future conditions and the fulfillment of Democratic pledges may require, we deprecate, pending a fair trial of the law by actual operation, any further general tariff revision, which, under present conditions, would be likely to retard improvement in business and thereby prolong the evils brought upon the country by Republican folly.—*Regular Democracy.*

We stand for tariff reform and the unshackling of American industry. Commercial crisis and industrial stagnation, resulting from the Sherman law and the McKinley bill, have made way for already reviving prosperity under the new tariff. Facts tell, and the people will sweep away such other taxes as fence us in from the markets of the world. We honor the Democratic House for its fight for the Wilson bill; we condemn the traitors to Democracy, agents of the trusts, in the Senate, and favor the election of Senators by the people. We ask the House to insist at the next session on free coal, free ores, and the repeal of differential duties benefiting the Sugar Trust.—*Democratic Reform.*

North Carolina.—We emphatically approve the tariff doctrine enunciated by the Chicago platform.

North Dakota.—We are in favor of tariff for revenue only and urge the prompt enactment of a reform Tariff bill.

Ohio.—We adhere to the declaration of the Democratic party in its National platform that protection is a fraud, and, while we recognize the benefits of the reduction of duties on imports just made by Congress, we favor such further reduction as can be made, having in view the revenues necessary to be raised for the support of the Government, to the end that the injustice of purely protective duties be abolished. We congratulate the country upon the repeal of the McKinley tariff and the enactment of a Tariff law in its stead, under the operation of which trade and business are reviving, and the country again becoming prosperous.

Pennsylvania.—We again endorse and approve the declarations of the Democratic National platform of 1892, upon which a Democratic President and Congress were elected, and we desire and demand that the Tariff laws be revised in accordance with that authoritative declaration of party principles.

Rhode Island.—We reiterate the demand for free raw materials for our manufactures and removal of all legislative obstructions to the freest development of our industries. We deny that

apprehensions of the results of reforming the tariff have had any relation to the business crisis through which our country, in common with the rest of the world, has been passing; the universality of the evil and its rapid disappearance in the face of impending realization of the apprehensions are in themselves a contradiction of the charge.

South Carolina.—Believing in the doctrine of equal rights to all and special privileges to none, we demand: That our National legislation shall be so framed in the future as not to build up one industry at the expense of another. We further demand a removal of the existing heavy tariff tax from the necessities of life that the poor of our land must have. —*Tillmanites.*

Texas.—We demand of Congress the passage of such tariff legislation as may be in strict accordance with the principles announced in our last National platform, and denounce all attempts to secure special protection or privileges for any particular class or classes as unwise, unpatriotic, and undemocratic.

Vermont.—We denounce and hold the Republican party responsible for the present depressed conditions of the country, and do not allow their cowardly attempt at shifting their responsibility, as it is directly traced to the effects of the McKinley Tariff act, which fostered extravagant and reckless financial business schemes to the present disastrous results. The inconvenience that may result to a favored few by the reversal of the Republican policy should not outweigh the great permanent and universal benefits of a reformed tariff.

Wisconsin.—The present financial distress, under which the country has suffered and is still suffering, is the logical and necessary consequence of Republican class legislation and mismanagement. The new Tariff law affords the country substantial relief, and is a broad stride in the direction of accomplishing the results that the Democratic party has so long contended for.

REPUBLICAN CONVENTIONS.

Arkansas.—We recognize the tariff legislation of the Republican party and the policy upon which such legislation was founded as being the ablest expression of patriotic principle relating to that subject ever enacted by an American Congress, and denounce any attempt to repeal or amend it which does not recognize protection to American labor and industries.

California.—We favor the protection of American industry and American labor, and demand the continuance of the tariff system which under the administration of the Republican party, brought prosperity to the country, good wages to the laborer, happiness to the people, and glory to the nation. We denounce the Democratic attempt to imitate the English free-trade system, and hold it responsible for the widespread depression which has resulted in throwing hundreds of thousands of American workmen out of employment, stopping the wheels of many factories, scattering ruin and desolation throughout the land, frightening capital, and starving labor. We oppose the passage of the so-called Wilson bill, with all its amendments, as being a sectional attempt to injure the producers, manufacturers, and laborers of the nation, and a corrupt surrender to trusts, which will result in raising the price of the necessities of life, while at the same time it will constantly increase the deficiency in the National revenue, which deficiency will be met by such odious war measures as an income tax and increased internal duties.

Connecticut.—We declare anew our hearty adhesion to the time-honored principle of judicious tariff protection for American industries, especially the great manufacturing and agricultural interests, and American wages—a principle announced in every Republican party platform, embodied in Republican legislation, and vindicated by thirty years of unprecedented prosperity—and we invite the business men, manufacturers, mechanics, wage-earners, and farmers of Connecticut, to pass judgment by their ballots upon a Democratic Tariff bill conceived in sectionalism and brought forth in scandal, resting upon no discoverable principle; as unscientific as it is unpatriotic; swarming with crudities, inequalities, and flagrant discriminations; borrowing its most striking and obnoxious feature from the Populists, and justly denounced as a monument of "party perfidy and party dishonor."

Delaware.—We reaffirm our belief in the American doctrine of protection to home industries. While we believe that all articles which cannot be produced in the United States—luxuries excepted—should be admitted free of duty, we hold that duties should be levied on all other imports, and we favor the speedy enactment and enforcement of stringent laws for the protection of American institutions and American labor from the evils of unrestricted immigration.

Illinois.—We earnestly maintain the right and justice of the American doctrine of protection to American industries. In raising the necessary revenue to maintain the Government we are in favor of such duties on competing imports as will best tend to the development of the resources of our own country, of the labor of our own people performed at wages which put the comforts of life within easy reach, and secure good prices for the products alike of our farms, our mines, and our workshops; and we believe that articles that cannot be successfully produced in this country, except luxuries, should be placed upon the free list. We further believe that without labor there is no such thing as raw material of any practical or marketable value, and no tangible thing of value that it does not require labor to produce or utilize, and hence the importation of so-called raw material free of duty is an interference with the system of protection to American labor, and should only be permitted when the raw material is unobtainable in our own country. We denounce as unwise and un-American the provisions of the so-called Wilson Tariff bill, modified in the Senate by the injection of weak and inconsistent attempts to protect special interests, as now pending in Congress, and we charge the Democratic party with the sole responsibility for the effort to destroy our tariff system, a system which has proved the greatest boon to the great mass of American citizens.

Indiana.—We believe in the Republican doctrine of protection and reciprocity, which furnishes a home market for the products of our factories and our farms, and protects the American laborer against the competition of the pauper labor of Europe. We denounce the unwise and unpatriotic action of the Democratic party in attempting to eliminate the reciprocity principle from our tariff system, thereby closing a large foreign market to the products of American farmers and depressing agricultural interests. We denounce the present attempt of a Democratic Congress to overthrow and destroy the American industrial system, a course that with the general fear of a violent readjustment of the country's business to a free trade basis has increased the National debt, has plunged the country into the most disastrous business depression of its history, has closed large numbers of banks and factories throughout the country, has thrown an unprecedented number of American citizens out of employment, has compelled thousands of able-bodied and industrious men to humiliate themselves by asking for charity, and has filled our broad land with free soup-houses and food markets.

Iowa.—We again declare for a system of protective duties so adjusted that every American resource can be developed by American labor receiving American wages, and we insist upon a tariff that will accomplish these ends. We have but to mention the disastrous results which have followed the mere menace of free trade as conclusive evidence of the wisdom of the Republican policy in the past upon this subject.

Kansas.—We adhere to the Republican doctrine of protection, and believe that tariff laws should protect the products of the farm as well as of the factory.

Louisiana.—We believe in the protection of all American industries to the end that American labor and American enterprise shall not be crushed out by the products of the poorly paid labor of Europe and the coolie and pauper labor of the islands of the world. The people of Louisiana never asked for a bounty on sugar. It was granted by Congress against our protest, but after it was enacted into a law which declared that it should last until 1905, we accepted it as a solemn pledge of the Government of the United States, which we did not believe any Congress controlled by any party would repudiate. In accordance with that belief and relying upon the honor of our Government, we expended enormous sums of money, mortgaged our property for immense loans in order to meet the expectations of the country, and increase the production of sugar, which, in point of fact, we have doubled in three years under the McKinley act. That indebtedness is still unpaid, and the Wilson bill has made it impossible for us to meet our obligations. Bankruptcy stares us in the face; we declare that no honest Government can afford to break its faith with its own people or ruin its own citizens. — *Sugar-Planter Republicans.*

Maine.—We favor a tariff for the protection of American labor against the underpaid and pauper labor of foreign countries.

Massachusetts.—The American market for American labor.

Michigan.—We reaffirm our adherence and increased devotion to the American doctrine of protection. We believe that the present unhappy industrial condition of our country is in great part due to the threats and purpose of the Democratic party to destroy the American system of protection. We believe that all articles which cannot be produced in the United States except luxuries should be admitted free of duty, and that on all imports coming into competition with the products of American labor there should be duties levied equal to the difference between wages abroad and at home. We believe that the doctrine of reciprocity as advocated by that matchless statesman, James G. Blaine, should under our protective system be the policy of our Government and applied in our trade relations with other nations.

Minnesota.—We favor a protective tariff under which, upon imports competing with the products of American labor, duties are levied equal to the differences between the wages and labor at home and abroad. And as to imports, other than luxuries, not so competing, we believe that the same should be admitted free of duty, so far as the requirements of the Government may permit. But the principles of reciprocity should be so incorporated in our tariff laws as to give new and enlarged markets for the products of this country.

Missouri.—We again declare for a system of protective duties, adjusted so that every American resource can be developed by American labor, receiving American wages, and we insist upon a tariff that will accomplish these ends. We have but to mention the disastrous results that have followed the mere menace of free trade as conclusive evidence of the wisdom of the Republican policy in the past upon this subject.

Nebraska.—We demand the restoration of the American policy of protection.

New Hampshire.—We emphatically protest against any further change in the tariff laws until it can be made by sincere friends of protection.

New York.—We denounce Northern Democratic Congressmen for permitting Southern members to protect the chief products of their section, while removing or largely reducing protective duties on the products of the North, thus permitting the South by legal enactment in time of peace to destroy our prosperity and accomplish what it failed to do by illegal enactment in time of war. And we especially denounce the Democratic Representatives from this, the greatest manufacturing State in the Union, whose annual manufacturing product exceeds that of the entire South by \$600,000,000, for their treachery and cowardice in aiding the passage of a sectional tariff bill that has crippled the industries and reduced the wages of workmen, and that levies a tax on incomes, which is a tax on prosperity. We ask all who favor a discontinuance of tariff agitation, or who believe in the restoration of Republican protection, to elect Republican members of the House of Representatives in every district, so that our industrial interests may be properly represented in the councils of the nation, and not, as at present, left utterly unrepresented in the leading committees, upon which the framing of tariff and financial legislation largely depends. On behalf of the farmers of New York, we protest against free wool, which means the destruction of our sheep husbandry, and which has brought the price of wool to the lowest figure recorded. We denounce the Federal administration for surrendering an annual revenue of \$8,000,000 on wool and imposing a burden nearly ten times greater by levying a tax on sugar, the commonest household necessity. We protest against the removal of the protective barrier to the importation of Canadian agricultural products. The farm products of New York deserve protection equally with the rice of South Carolina and the sugar of Louisiana. We denounce the administration for striking out the agricultural schedule of the McKinley bill and substituting an agricultural free list fraught with ruin to the farmers.

North Dakota.—We earnestly, emphatically oppose the free trade policy and the single gold standard of Great Britain. On the contrary, we demand equal protection for all home industries, North, South, East, and West, so as to maintain the American standard of wages. To this end we favor a tariff on foreign goods competing with domestic goods equal to the difference between foreign and American wages. With the exception of articles of luxury, goods which, by reason of climate or other conditions, cannot be profitably produced in this country should be admitted free. By adherence to the Republican principle of reciprocity new and larger markets for our farm products can and ought to be secured.

Ohio.—We recognize the Tariff act of 1890, known as the McKinley act, as the ablest expression of the patriotic principles of protection yet enacted, and condemn and denounce any attempt to repeal or amend it which does not have for its object better protection to American labor and American interests than is secured by it. We denounce the unjust and inequitable tariff measure known as the Wilson bill, and the Senate substitutes therefor and amendments proposed thereto, as unpatriotic, favorable to Trusts, and sectional in their provisions, and as subversive of the prosperity and happiness of the people of the United States. * * * We denounce the attempt of Congress to destroy the principle of reciprocity. * * * We indorse the sentiment of the National Grange, *i. e.*, "That all tariff laws shall protect the products of the farm as well as the products of the factory." * * * We demand such protection for sheep husbandry as will secure fair prices for wool, and soon thereby increase American flocks sufficiently to supply all wool and mutton needed for consumption in the United States.

Pennsylvania.—We denounce the Democratic assault upon the American protective system, because its effect already has been to reduce to idleness 2,000,000 of workmen, and values to an amount greater than the National debt created for the suppression of the rebellion; because it enlarges the free list only upon products which employ the greatest number of American workmen; because it strikes with equal cruelty the farmer, the miner, the lumberman, the iron, the glass, and the textile

worker; because it transfers work from our own mills, mines, and workshops to foreign countries; because it is sectional, and aimed directly at Northern industries, and fosters the plantation system and destroys farms; because it is vicious in its changes from specific to ad valorem duties; in its reduction of the revenues of government by many million dollars, and it resorts to war taxes and increased internal and direct taxes to make up the deficiency it needlessly creates. We commend and approve the efforts of our Senators and members of Congress to delay and defeat the passage of legislation hostile to any American industry.

Rhode Island.—The protection system must be preserved. It has created and stimulated our diversified industries; it has opened the broadest avenues to labor and capital; it has made America the leading nation of the world in mining, in agriculture, and in manufacturing; it has placed the American laborer far above the wage earners of any other country, and it has achieved for us a success in material development the most illustrious of modern or ancient times. We denounce as unwise and unpatriotic the proposed tariff legislation of the Democratic party, and the contemplated repeal of the McKinley Tariff law.

Tennessee.—We declare for a system of protective duties, adjusted so that every American resource can be developed by American labor, receiving American wages, and we insist upon a tariff that will accomplish this end, and hereby reaffirm our devotion to the doctrines of the Republican party and its policies as set forth in the National platform of 1892.

Texas.—We reaffirm the American doctrine of protection, and we favor that form of protection to manufacturers and producers in every branch of industry which shall equalize the difference between the compensation paid to American labor and the earnings of labor.

Wisconsin.—The present condition of the country resulting from the change in its industrial policy inaugurated by the Democratic party, the hundreds of workshops and factories closed down, the thousands of men out of employment, are the best witnesses which can be brought to testify to the wisdom of the policy of protection to home industries which has always been sustained and fostered by the Republican party.

Wyoming.—We reaffirm allegiance to the Republican party and devotion to its cardinal principles, protection and reciprocity, as enunciated in the McKinley bill.

PEOPLE'S PARTY CONVENTIONS.

Conventions of the People's party, as a rule, avoided reference in their platforms to the tariff issue, holding that the real panacea for the ills of the country is a reorganization of the financial system in accordance with Populist theories. Two State conventions of the party, however, in referring to the tariff enunciated opposite views. The Alabama (Kolbite and People's party) convention demanded "a tariff for revenue, and that the revenue necessary to meet the expenses of the Government be raised, as far as possible, by a tariff on importations." The Texas convention declared that "the doctrine of a tariff for revenue is wrong in principle, and we condemn the policy of taxing free raw material, while manufactured goods are protected."

PROHIBITIONIST CONVENTIONS.

The State conventions of this party, when they expressed views upon the tariff issue, almost invariably favored the appointment of a permanent non-partisan tariff commission of business men, "for gradual readjustment as the changing conditions of trade and revenue may require," to quote from the platform of the Michigan convention.

ACTION OF STATE CONVENTIONS ON THE CURRENCY QUESTION.

DEMOCRATIC CONVENTIONS.

Alabama.—While there are differences of opinion among us in matters of detail, we all believe in the free coinage of silver whenever it can be done consistently with the maintenance of a sound and safe currency.

Arkansas.—We still consider the act of 1873, whereby silver was demonetized, as the greatest legislative crime of the century, and demand the free and unlimited coinage of both silver and gold at a ratio of 16 to 1 as it then existed. We believe the constitutional power to borrow money should be exercised by Congress only in the event of great emergencies when the power to levy and collect taxes commensurate with the requirements of the occasion cannot be enforced without manifest oppression of the people. Therefore we are opposed to the issue of bonds in time of peace.

California.—We favor the retirement of all gold coins and paper currency below the denomination of \$10 in order to restore silver to its full use as a circulating medium. We also favor the reopening of the mints of the United States to the coinage of both gold and silver without discrimination on such basis as will maintain their parity, thus giving both metals such recognition as they enjoyed prior to the Republican Demonetization act of 1873.

Connecticut.—We congratulate the country upon the successful efforts of President Cleveland to restore the currency of the country to a better condition than it has enjoyed for more than thirty years.

Delaware.—In accord with the National Democratic platform of 1892, we declare that "we hold to the use of both gold and silver as the standard money of the country, and to the coinage of both gold and silver without discriminating against either metal, or charge for mintage, but the dollar unit of coinage of both metals must be of equal intrinsic and exchangeable value, or be adjusted by such safeguards of legislation as shall ensure the maintenance of the parity of the two metals and the equal power of every dollar at all times in the markets and in the payment of debts; and we demand that all paper currency shall be kept at par with and redeemable in such coin."

Florida.—We recognize with feelings of pride the unswerving integrity and patriotism of President Cleveland, his executive ability, his wisdom in maintaining a sound and stable currency.

Georgia.—We demand the immediate passage of such legislation as will restore silver to its constitutional position as a money metal, and will secure at once the free and unlimited coinage of gold and silver on a parity and give to every dollar in circulation, whether coin or paper, the same debt-paying and purchasing power.

Illinois.—We again declare our loyalty to that time-honored principle of the Democratic party which favors honest money, the gold and silver coinage provided by the Constitution of the United States, and a currency convertible in such coinage without loss to the holder. We insist that justice to all citizens requires a strict adherence to this Democratic principle, and we demand that the Government shall spare no effort to bring about a proper ratio between the values of gold and silver so that parity may be maintained between the two metals and all mints thrown open to free coinage.

We declare that this has for years been a cardinal doctrine of the Democratic party, and we denounce the Republican party for its constant and persistent efforts to demonetize silver and thus increase all public and private debts.

Indiana.—We endorse the repeal of the purchasing clause of that cowardly Republican makeshift, the Sherman Silver act of 1890. We reaffirm our belief that both gold and silver should be used as the money standard of the country, and that both should be coined without discriminating against either metal and without charge for mintage. We believe it absolutely necessary to the welfare and prosperity of the great producing masses that silver should be restored to the place it occupied in the currency systems of the world a quarter of a century ago, and we hail with delight the many signs of a revolution in public opinion in the great commercial nations in favor of a restoration of the bi-metallic system. We pledge our hearty efforts to secure the adoption of every measure for the complete restoration of silver to its proper place in our monetary system, either through international agreement or by such safeguards of legislation as shall ensure the maintenance of the parity of the two metals, and the equal power of every dollar at all times in the markets and in payment of debt; and we demand that all paper currency shall be kept at par and redeemable in such coin.

Iowa.—With the National Democratic convention of 1892 we hold to the use of both gold and silver as the standard money of the country and the coinage of both gold and silver without discriminating against either metal or charge for mintage, but the dollar unit of coinage of both metals must be of equal intrinsic and exchangeable value, and we demand that all paper currency shall be kept at par with and redeemable in such coin. And we favor such legislation as will faithfully carry out these pledges to the people.

Massachusetts.—We hold that the currency troubles which, during last twenty-five years, have brought industrial stress upon this country, are evils for which the Republican party is directly responsible. In 1870 a Republican President, with the assistance of a Republican Congress, packed the United States Supreme Court to reverse the decision that the making of greenbacks a legal tender was unconstitutional, and thus opened the way for unlimited inflation. One of the results of the false ideas thus inculcated was the Bland-Allison act of 1878, which compelled the purchase of silver bullion to the amount of \$2,000,000 a month. The evil done by this law was greatly increased in 1890, when, in pursuance of a recommendation of a Republican Secretary of the Treasury, a Republican Congress passed, and a Republican President signed, the Sherman act, compelling the purchase of silver bullion to the amount of 4,500,000 ounces per month. These various measures have all been in direct violation of the constitutional functions of the Government, according to the historic principles of the Democratic party. On the other hand, the only financial measure during this generation for which, as the party in power, the Democratic party is responsible, has been the repeal of the Sherman act, as the first step towards a healthier financial condition. We reaffirm our allegiance to the great financial principles which guided Jefferson, Jackson, and Secretary Walker; that it is the sole function of the Federal Government in monetary matters to provide a standard of value and to coin metallic money, every dollar of which shall be of equal intrinsic value; that nothing but this coined money shall be a legal tender, and that the Government shall not carry on a banking business. We demand that the untaxed notes of State or National banks shall be the only paper money, and that the Government shall, with the development of a banking system, adequate to the demands of trade, retire as rapidly as possible all its legal tender paper money.

Michigan.—We declare in favor of the free and unlimited coinage of silver at a ratio that will permit the debtors to pay their debts upon the same basis in which they were contracted. We demand that henceforth the issuing of all circulating medium be made under the acts of Congress, through the National Treasury, in such amounts as the business wants of the country may require, and it shall be full legal tender.

Minnesota.—We are in favor of the free coinage of silver whenever it can be accomplished consistently with the maintenance of a sound and safe currency.

Missouri.—Whereas the Constitution of the United States provides that Congress shall have power to coin money, regulate the value thereof, and of foreign coins; and also provides that no State shall coin money or make anything but gold and silver coin a tender in payment of debts; hence we declare it to be a duty enjoined upon Congress to coin both gold and silver money for the use of the people of the States; that Congress has no rightful power to refuse the coinage of either metal. We therefore demand the free bi-metallic coinage of both gold and silver and the restoration of the bi-metallic standard as it existed under our laws for over eighty years prior to the demonetization of the standard silver dollar in 1873, and should it become necessary in order to maintain the two metals in circulation to readjust the ratio, it should be determined whether gold has risen or silver has fallen, or whether there should be a change of the gold dollar or of the silver dollar, or of both, to the end that whatever ratio is adopted the rights of both creditor and debtor shall be preserved alike, having in view the demands of the people for an adequate circulating medium. We declare that we are not in favor of gold mono-metallism or silver mono-metallism, but that both should be coined at such ratio as will maintain the two metals in circulation. We insist upon the Democratic doctrine of Jackson and Benton that all money issued by the authority of Congress shall be issued and its value maintained by the Government. That we are opposed to farming out to National banks the right to issue circulating notes. That we are opposed to any further increase of the interest-bearing debt of the Government. — *Adopted by a vote of 423 to 109 after a substitute by Governor Francis was voted down.*

Nebraska.—We endorse the principles of faith as set forth in the National Democratic platform adopted at Chicago in 1892, including the money plank, and we accept the construction placed upon that plank by Grover Cleveland as a sound interpretation, and insist that every dollar issued or coined by the Government shall be as good as every other dollar. — *Independent Democrats.*

We endorse the language used by Hon. John G. Carlisle in 1878, when he denounced the "conspiracy" to destroy silver money as "the most gigantic crime of this or any other age." and we agree with him that "the consummation of such a scheme would ultimately entail more misery upon the human race than all the wars, pestilences, and famines that ever occurred in the history of the world." We are not willing to be parties to such a crime, and in order to undo the wrong already done and to prevent the further appreciation of money, we favor the immediate restoration of the free and unlimited coinage of gold and silver at the present ratio of 16 to 1, without waiting for the aid or consent of any other nation on earth. We regard the right to issue money as an attribute of sovereignty and believe that all money needed to supplement the gold and silver coinage of the Constitution, and to make the dollar so stable in its purchasing power that it will defraud neither debtor nor creditor, should be issued by the General Government as the greenbacks were issued; that such money should be redeemable in coin, the Government to exercise the option by redeeming in gold or silver, whichever is most convenient for the Government. We believe that all money issued by the Government, whether gold, silver, or paper, should be made a full legal tender for all debts, public and private, and that no citizen should be permitted to demonetize by contract that which the Government makes money by law. — *Regular Democrats, adopted after voting down a minority report by a vote of 392 to 159.*

New Hampshire.—We congratulate the party and the National administration upon the substantial redemption of their pledges to the country upon which the last National election was won. The "Sherman Silver law," an insidious cause of the recent financial panic, has been repealed.

New York.—We therefore rejoice that, by the repeal of the Sherman law for the purchase and storage of silver bullion, all fear of a depreciated currency has been allayed and faith has been restored in the ability of the Government to maintain a constant parity between its gold and silver coinage. — *Regular Democracy.*

North Carolina.—We hold it is the duty of the law-making department of the Government, now in the hands of the Democracy, to take immediate steps to restore by legislation the equal privileges of silver with gold at the mints, by free and unlimited coinage of both gold and silver at a ratio of 16 to 1, such being the ratio of coinage which heretofore has held in the United States.

North Dakota.—We demand the free bi-metallic coinage of both gold and silver, and the restoration of the bi-metallic standard as it existed for over eighty years prior to the demonetization of the standard silver dollar in 1873, and should it become necessary, in order to maintain the two metals in circulation, to readjust the ratio, it should be determined whether gold has risen or silver has fallen, and whether there should be a change of a gold or silver dollar, or both, to the end that whatever ratio is adopted, the rights of both creditor and debtor should be preserved alike. Having in view the demands of the people for an adequate circulating medium, we declare that we are not in favor of gold mono-metallism or silver mono-metallism, but that both should be coined in such a ratio as will maintain the two metals in circulation.

Ohio.—We dissent from the President's views, construction, and treatment of the silver question, and, therefore, believe that silver should be restored to the position it occupied as money prior to its demonetization by the Republican party, and to that end we favor the unlimited free coinage of silver at the legal ratio of 16 to 1 and with equal legal tender power. — *Adopted after defeating a minority resolution by a vote of 468.4 to 319.6.*

Pennsylvania.—We declare that the consistent, courageous, and inflexible determination of a Democratic President to maintain the credit of the Government terminated a financial panic, restored confidence, and composed disturbed values. We are opposed to the reckless inflation of the currency to \$40 per capita demanded by the Republican State Conventions of 1893 and 1894; and, while we favor the circulation of constitutional money, gold, and silver at a parity of value, we are unalterably opposed to any debasement of the currency or to the depreciation of any dollar issued by the Government to the people.

South Carolina.—We demand that the Government shall establish sub-treasuries or depositories in the several States, which shall issue money direct to the people, at a low rate of interest, not to exceed two per cent per annum, on unperishable farm products, and also upon cultivated land, the quantity of land and the amount of money considered. We demand that the amount of the circulative medium be speedily increased to not less than \$50 per capita. We demand that Congress pass such laws as will effectually prevent the dealing in futures of all agricultural and mechanical productions, providing such stringent system of procedure in trials as will secure the prompt conviction and imposing such penalties as shall secure the most perfect compliance with the law. We condemn the Silver bill recently passed by Congress, and demand in lieu thereof the free and unlimited coinage of silver at the ratio of 16 to 1. — *Tillmanites.*

Texas.—We hold to the use of both gold and silver as the standard money of the country, and the equal coinage of both metals without discrimination against either metal or charge for mintage; but the dollar unit of coinage of both metals must be of equal intrinsic and exchangeable value or be adjusted through international agreement or by such safeguards of legislation as shall ensure the maintenance of parity of the two metals and the equal power of every dollar at all times in the markets and in payment of debts, and we demand that all paper currency shall be kept at par with and redeemable in such coin. We insist upon this policy as especially necessary for the protection of farmers and laboring classes, the first and most defenceless victims of unstable money and a fluctuating currency.

Vermont.—We recognize the fact that the progress of civilization has made the large nations of the world dependent upon each other financially, and we demand a currency that shall be of its face value in every part of the globe. We believe in gold and silver as a circulating medium, and that they shall be made of equal value, as demanded in the National Democratic platform of 1892.

Wisconsin.—By the repeal of the Republican measure known as the Sherman Silver law the money of the country is restored to a sound basis, and no proposed legislation should be entertained which does not provide that every dollar issued by the Government should be of equal intrinsic and interchangeable value.

REPUBLICAN CONVENTIONS.

Arkansas.—The American people from tradition and interest favor bi-metallism, and the Republican party demands the use of both gold and silver as standard money, with such restrictions and under such provisions to be determined by legislation as will secure and maintain the parity of values of the metals, so that the purchasing and debt-paying power of a dollar, whether of silver, gold, or paper, shall be at all times equal.

California.—We favor the free and unlimited coinage of silver at the ratio of 16 to 1, and the making of silver, as well as gold, a legal tender in payment of all debts, both public and private, and we pledge our Congressional nominees to the support of the principles contained in this resolution.

Colorado.—The Republican party of Colorado demands the free and unlimited coinage of silver and gold at the ratio of 16 to 1, and is opposed to making the policy of the United States await, or depend upon, the action of any other country. We believe that permanent prosperity will not return to this country until silver shall be restored to its full use and highest position. We denounce the "People's party" as the most insidious foe to the restoration of the free and unlimited coinage of silver in that its platform demands an extensive issue of paper money, not based upon or redeemable in either gold or silver. We believe that free coinage will only come from the hands of the Republican party.

Connecticut.—The Republican party, now as always the party of honest money, and opposed to any debasement of the people's currency, holds that American silver as well as American gold should be used as standard money under such international agreements as will ensure the maintenance of a parity of values, so that the purchasing and debt-paying power of every dollar issued by the Government, whether of gold, silver, or paper, shall be at all times the same.

Delaware.—We favor bi-metallism and demand the use of both gold and silver as standard money at such ratio and under such conditions as shall be fixed by international agreement. We believe that the commercial welfare of the world is seriously prejudiced by the dislocation of the parity of value between silver and gold and that full prosperity will not be re-established until silver is restored to its proper place as a money metal of equal debt-paying power with gold in the currency of the nations, and we urge such a policy upon the part of the United States as will finally bring about this most desirable end.

Illinois.—We favor bi-metallism, and believe in the use of gold and silver as money metals upon a parity of values, with complete interconvertibility, under such legislative provisions as shall make the purchasing or debt-paying power of any dollar coined or issued by the United States the absolute equivalent of that of any other dollar so coined or issued.

Indiana.—We believe in a currency composed of gold, silver, and paper, readily convertible at a fixed standard of value and entirely under National control, and we favor the imposition of increased tariff duties upon the imports from all countries which oppose the coinage of silver upon a basis to be determined by an international congress for such purpose. We denounce the avowed purpose of the Democratic party to restore the era of "wild-cat" money.

Iowa.—We adhere to the declaration of the National Republican party in 1892 upon its monetary policy. We reaffirm our belief that the interests of the country, its farmers, and workmen demand that every dollar, paper or coin, issued by the Government shall be as good as any other dollar. We favor the largest possible use of silver as money that is consistent with the permanent maintenance of equal values of all dollars in circulation. We do not desire mono-metallism either of gold or silver, and we pledge ourselves to continue to work for bi-metallism to be brought about by all fit means within the power of the Government.

Kansas.—The American people favor bi-metallism and the Republican party demands the use of both silver and gold as standard money with such restrictions and under such provisions, to be determined by legislation, as will secure the maintenance of the parity of the values of the two metals, and that the purchasing and debt-paying power of the dollar, whether of gold, silver, or paper, should be at all times equal. The interests of the producers of the country, its farmers and its workmen, demand that the mints be opened to the coinage of silver of the mines of the United States, and that Congress should enact a law levying a tax on importations of foreign silver sufficient to fully protect the products of our own mines.

Maine.—We advocate a financial policy not in favor of mono-metallism, either of gold or silver, as the basis of a financial system, but international bi-metallism to be secured by strenuous efforts of the National power. Now, and in the future, all dollars should be of equal value, to the end that a suitable currency, abundant for all wants, shall secure to all the people the full results of their labor.

Massachusetts.—The platform declared for "Every dollar paid by the Government, both the gold and silver dollars of the Constitution, and their paper representatives, honest and unchanging in value and equal to every other.

Michigan.—We believe in the use of gold and silver as money metals, to be maintained in circulation on a perfect equality and interconvertibility. We recognize the so-called silver question as one of the paramount political issues of the day, and believe that the people of this State and country can and do look to the Republican party—the party of ability and progress—as the only party that can give a wise and adequate solution of this problem. We, therefore, pledge the Republican party of Michigan to use every effort in its power to restore silver to its proper position in the United States as a money metal. We pledge this in the belief that permanent prosperity will not be assured nor justice be done until silver takes its time-honored place side by side with gold as one of the two great money metals of the world.

Minnesota.—The Republican party believes in the use of both gold and silver as money, maintaining the substantial parity of value of every dollar in circulation with that of every other dollar. It believes in bi-metallism and that the restoration of silver as ultimate money to the currency of the world is absolutely necessary for business prosperity, proper rates of wages, and the welfare of the people. Holding these views, we believe it should be the policy of the United States to do everything in its power to promote the restoration of silver to the world's currency.

Missouri.—We declare that the interests of all the people demand that every dollar, paper or coin, issued by the Government shall be as good as any other dollar. We favor the largest possible coinage of silver that is consistent with the permanent maintenance of equal purchasing and debt-paying power of all dollars in circulation. We do not want mono-metallism of either gold or silver, and we pledge ourselves to continue to work for bi-metallism, to be brought about by all means within the power of the Government.

Nebraska.—The Republican party of Nebraska has always been the consistent friend and aggressive champion of honest money, and it now takes no step backward. While we favor bi-metallism, and demand the use of both gold and silver standard money, we insist that the parity of the value of the two metals be maintained, so that every dollar, paper or coin, issued by the Government shall be as good as any other.

New Hampshire.—The Republicans condemn a Democratic fiscal policy which has created distrust abroad and apprehension at home, dissipated the gold reserve, emptied the Treasury, compelled a new issue of bonds, and, in its abject helplessness, has no measure of relief to propose except the "coinage of a vacuum."

New York.—We favor an honest dollar, and oppose any effort, whether by the removal of the tax on State bank issues or the free coinage of silver, to lower our currency standard, and we favor an international agreement which shall result in the use of both gold and silver as a circulating medium.

North Dakota.—We are opposed to the paper fiat money doctrine of the Populist party, and believe in a metallic basis for our currency, consisting of both gold and silver; the Republican party of North Dakota demands the use of both these metals as a standard money. We also demand that the mints be opened for the coinage of silver mined in the United States, with such restrictions and under such provisions, to be determined by legislation, as will maintain the parity of values of the two metals. The purchasing and debt-paying power of each dollar must always be kept equal to that of every other dollar. Congress should levy a tax on all silver sufficient to protect fully the products of our own mines.

Ohio.—We favor bi-metallism. Silver, as well as gold, is one of the great products of the United States. Its coinage and use as a circulating medium should be steadily maintained and constantly encouraged by the National Government; and we advocate such a policy as will, by discriminating legislation or otherwise, most speedily restore to silver its rightful place as a money metal. We denounce the avowed purpose of the Democratic leaders to restore the era of "wild-cat" and "red-dog" money by repealing the prohibitory ten-per-cent tax on State bank issues. All money, of whatever kind, should be under National and not State control.

Pennsylvania.—We favor the expansion of the circulating medium of the country until the same shall amount to \$40 per capita of our population, and approve the proposition to issue to National banks notes to the par value of the amount of bonds deposited to secure their circulation. We declare that the obligations of the Government should be discharged in money approved and current in all civilized nations, to the end that a largely increased reserve of gold should be gradually accumulated and maintained. We declare our belief to be that no legislation can make our currency meet the needs of the American people unless it conforms to the following utterances of our last National convention (quoting the financial plank of the National platform).

Rhode Island.—We believe that every dollar should be of equal purchasing power, and that the money of the greatest commercial nation of the world should not be inferior to that of other commercial nations. We favor the system of National banks, and are unalterably opposed to the Democratic policy of the re-establishment of State banks.

Tennessee.—The American people, from tradition and interest, favor bi-metalism, and the Republican party demands the use of both gold and silver as standard money, with such restrictions and under such provisions, to be determined by legislation, as will secure the maintenance of the parity of values of the two metals, so that the purchasing and debt-paying power of the dollar, whether silver, gold, or paper, shall be at all times equal, and we are in favor of a circulating medium of volume sufficient to meet the demands of business and commerce. We are opposed to returning to the wild-cat State banking system, as advocated by the Democratic party, and as the same existed in Tennessee before the war.

Texas.—We are in favor of sound money, gold, silver, and currency, its volume as large as practicable, so coined and issued that every dollar shall be equal in value the one to the other.

Wisconsin.—The Republican party is in favor of honest money. We are unalterably opposed to any scheme that will give to this country a debased or depreciated currency. We favor the use of silver as a currency to the extent only that it can be circulated on a parity of gold.

Wyoming.—We favor the free and unlimited coinage of both gold and silver at a ratio of 16 to 1, with full legal tender functions accorded to each in payment of all public and private debts.

PEOPLE'S PARTY CONVENTIONS.

Conventions of the People's party in all cases reaffirmed the principles of the National platform adopted at Omaha in 1892, which demanded "the free and unlimited coinage of silver at the ratio of 16 to 1, without waiting for the co-operation of any other government."

The Alabama (Kolbite, Populist, and Republican) convention demanded "the expansion of the circulating medium to \$50 per capita." The California convention demanded "the unconditional repeal of the National Bank act, and that Congress shall issue Treasury notes, legal tender for all debts, public and private." The Illinois convention demanded "the issuance by the General Government of legal tender notes in sufficient volume to meet the requirements of the business of our country."

The Arkansas convention denounced the Democracy for "the passage of the infamous bill unconditionally repealing the purchasing clause of the Silver act of 1890 at the dictation of Grover Cleveland, John Sherman, and Wall street, thereby contracting the volume of our currency many million dollars per annum, causing labor to go without employment, farms to go untilled, and suffering and distress entailed upon millions of American citizens."

The Kansas convention was "unalterably opposed to the issue of Government interest-bearing bonds" and demanded instead "the issue of full legal tender Treasury notes, and the payment of the same, together with silver money to meet the needs of the Government." The Texas convention demanded "the abolition of private banks of issue of every character, whether State or National," and denounced "the issue of gold bonds in time of peace to meet current expenses of Government."

Other conventions of the People's party expressed sentiments similar to those above quoted.

PROHIBITIONIST CONVENTIONS.

Prohibition State conventions, when they touched at all upon the currency question, reflected, as a rule, the prevailing views of their section of the country. The Michigan convention favored the free and unlimited coinage of gold and silver at a ratio of 16 to 1, supplemented by full legal tender greenback and fractional currency to maintain a circulation of \$50 per capita. The Minnesota convention demanded "the remonetization of silver." The New York convention declared that "the currency should be issued by the Federal Government alone, and should not be delegated to private individuals or corporations. Every dollar, whether of gold, silver, or paper, should be legal tender for the payment of all debts." The Tennessee convention was for a National currency that "should be issued directly to the people through Government banks," and favored the issue of "legal tender not less than \$40 per capita."

OTHER NATIONAL ISSUES.

While the two leading parties differed so widely in their treatment of one of the two great issues of the time, the tariff, and so variously as to the other, the currency, influenced by prevailing local sentiment, they were in accord in most instances upon other questions of a general nature. Both Democrats and Republicans expressed strong sympathy with the laboring man, and many of them favored the settlement of disputes between labor and capital by some system of official arbitration.

In the matter of pensions for Union soldiers of the civil war, conventions of both parties, where they made allusion to the matter (as all Republican and Northern Democratic conventions did), favored liberal pensions, but in several Democratic platforms the indiscriminate bestowal of the Government bounty on all comers, filling the rolls with the names of thousands of persons having no valid claims on the Government, was vigorously denounced.

Democratic platforms, without exception, commended the patriotism, ability, and integrity of purpose of President Cleveland, while some dissented from his position on the silver question. On the other hand, the President's political course was generally arraigned in Republican platforms.

Democratic platforms, in many instances, denounced the introduction of religious intolerance in politics by the American Protective Association. Republican platforms were, as a rule, silent upon this issue. Sympathy with France in the loss of its President by assassination was expressed by both parties, and an equal number of platforms on both sides favored the adoption of a constitutional amendment fixing the choice of United States Senators by popular vote in their respective States.

Most Democratic platforms and some Republican platforms discountenanced sumptuary laws. Most Republican and some Democratic platforms called for an untrammelled ballot and an honest count.

The course of the Federal Administration in the Hawaiian matter was condemned in most Republican platforms and approved in some Democratic platforms. The subject was not mentioned in a number.

POPULISTS AND PROHIBITIONISTS.

The platforms of the minor parties recommended their special panaceas as the cure of all the ills of the body politic. With the prevention of the liquor traffic, in the opinion of the Prohibitionists, all other questions would adjust themselves equitably, and prosperity and contentment would reign throughout the land. Both Prohibitionists and Populists were favorably disposed towards woman suffrage.

IN THE SECOND SESSION OF THE FIFTY-THIRD CONGRESS.

WHAT was popularly known as "The Wilson bill," being House bill 4,864, entitled "A bill to reduce taxation and to provide revenue for the Government and for other purposes," was reported from the Committee on Ways and Means to the House of Representatives by Mr. Wilson, Chairman, December 19, 1893.

The bill was committed to the Committee of the Whole early in January, and reported back to the House January 27, 1894.

The income tax provision of the bill was adopted by a vote of yeas, 182 (172 Democrats, 10 Populists); nays, 48 (45 Democrats and 3 Republicans). Not voting, 112 (107 Republicans, 5 Democrats).

THE HOUSE VOTE ON THE PASSAGE OF THE BILL.

The bill after twenty-three days debate was passed by the House of Representatives February 1 by the following vote. Democrats in italics, Republicans in Roman, Populists in SMALL CAPS:

NOT VOTING.—Messrs. Brattan, Graham, Hopkins of Pa., Houk of Tenn., Milliken, Sipe, Stevens, Sweet—8.

The pairs announced were: Messrs. Brattan with Houk of Tenn.; Sipe with Milliken, Graham with Hopkins, who was ill; Mr. Sweet was taken ill, and compelled to leave the hall.

THE BILL IN THE SENATE.

On March 20 Mr. Voorhees reported the bill in the Senate from the Committee on Finance, with amendments.

The bill as variously amended by the Senate finally passed that body July 3, by the following vote. Democrats in italics, Republicans in Roman, Populists in SMALL CAPS:

YEAS—Messrs. ALLEN, Bate, Berry, Blackburn, Blanchard, Caffery, Call, Cockrill, Coke, Daniel, Faulkner, George, Gibson, Gorman, Gray, Harris, Hunton, Irby, Jarvis, Jones of Ark., KYLE, Lindsay, McLaurin, Martin, Mills, Mitchell of Wis., Morgan, Murphy, Palmer, Pasco, Ranson, Roach, Smith, Turpie, Vest, Vilas, Voorhees, Walsh, White of Cal.—39.

NAYS—Messrs. Aldrich, Allison, Carey, Chandler, Cullom, Davis, Dixon, Dolph, Dubois, Frye, Gallagher, Hale, Hansbrough, Hawley, Higgins, Hill, Jones of Nev., Lodge, McMillan, Manderson, Mitchell of Ore., Patton, PEPPER, Perkins of Cal., Platt, Power, Proctor, Quay, Sherman, Shoup, Squire, STEWART, Teller, Washburn—34.

The pairs were: Messrs. Brice, Butler, Camden, Gordon, McPherson, and Pugh, in favor of the bill, with Messrs. Cameron, Hoar, Morrill, Pettigrew, Wilson, and Wolcott, against the bill.

THE BILL IN CONFERENCE.

A conference with the House on the amendments was asked, and Messrs. Voorhees, Harris, Vest, Jones of Ark., Sherman, Allison, and Aldrich were appointed conferees on the part of the Senate.

The amendments of the Senate were non-concurred in, in gross; the conference asked by the Sen-rows, and Payne were appointed conferees on the part of the House.

After numerous conferences from July 8 to August 11, the Senate having refused to recede, a caucus of the Democratic members of the House of Representatives was held August 13, and by a vote of 130 to 21 it was agreed to concur in the Senate amendments, thus passing the Senate Tariff bill—and then to pass for the Senate's consideration four separate bills placing sugar, coal, iron, and barbed wire on the free list.

The bill as it came from the Senate was finally passed by the House by a vote of yeas 182, nays 106 (not voting, 61). The yeas were composed of 174 Democrats and 8 Populists, the nays of 96 Republicans and the following Democrats: Messrs. Bartlett, Cockran, Covert, Davey, Dunphy, Everett, Gorman, Hendrix, Johnson of Ohio, Meyer, Price, Tarsney and Warner.

The four separate bills placing sugar, coal, iron, and barbed wire on the free list were passed by the House, and in the Senate were referred to the Committee on Finance, where they were resting at the time Congress adjourned.

The Tariff bill became a law without the approval of the President August 27, 1894.

United States Customs Duties.

A TABLE OF LEADING ARTICLES IMPORTED, GIVING THE RATE OF TAXATION AT ENTRY BY THE TARIFF ACT OF 1894 (AS FINALLY PASSED AND IN FORCE WITHOUT THE EXECUTIVE APPROVAL), COMPARED WITH THE MCKINLEY TARIFF OF 1890 AND THE TARIFF OF 1883.

THE articles covered by the Tariff acts number many thousands. The following table embraces about 300 selected articles, being mainly those in most general use in the United States. N. e. s. indicates "When not elsewhere specified."

There are drawbacks for roasted coffee shipped as stores, and for tobacco and snuff manufactured in the United Kingdom. The receipts from customs in the United Kingdom, year ending March 31, 1894, were £19,964,319, or about \$96,000,000. The total revenue of the Government from all sources was £91,133,409, so that the receipts from customs were about 20 per cent. The other sources of revenue were: From excise, £25,343,861; from stamps, £12,783,633; from income and property taxes, £17,786,011; from post-office, £10,344,000; from telegraphs, £3,554,000. The remainder from land tax, house duty, crown lands, and miscellaneous. Itemized, the receipts from customs were: From tobacco, £10,119,952; from tea, £5,483,094; from rum, £1,978,161; from brandy, £1,364,058; from other spirits, £826,446; from currants, £120,797; from coffee, £165,985; from raisins, £189,160.

Income Tax Provisions

AS CONTAINED IN THE REVENUE LAW OF 1894.

SECTION 27. That from and after the first day of January, 1895, and until the first day of January, 1900, there shall be assessed, levied, collected, and paid annually upon the gains, profits, and income received in the preceding calendar year by every citizen of the United States, whether residing at home or abroad, and every person residing therein, whether said gains, profits, or income be derived from any kind of property, rents, interest, dividends, or salaries, or from any profession, trade, employment, or vocation carried on in the United States or elsewhere, or from any other source whatever, a tax of two per centum on the amount so derived over and above \$4,000, and a like tax shall be levied, collected, and paid annually upon the gains, profits, and income from all property owned and of every business, trade, or profession carried on in the United States by persons residing without the United States. And the tax herein provided for shall be assessed by the Commissioner of Internal Revenue and collected and paid upon the gains, profits, and income for the year ending the thirty-first day of December next preceding the time for levying, collecting, and paying said tax.

SEC. 28. That in estimating the gains, profits, and income of any person there shall be included all income derived from interest upon notes, bonds, and other securities, except such bonds of the United States the principal and interest of which are by the law of their issuance exempt from all Federal taxation; profits realized within the year from sales of real estate purchased within two years previous to the close of the year for which income is estimated; interest received or accrued upon all notes, bonds, mortgages, or other forms of indebtedness bearing interest, whether paid or not, if good and collectible, less the interest which has become due from said person or which has been paid by him during the year; the amount of all premium on bonds, notes, and coupons; the amount of sales of live stock, sugar, cotton, wool, butter, cheese, pork, beef, mutton, or other meats, hay, and grain or other vegetable or other productions, being the growth or produce of the estate of such person, less the amount expended in the purchase or production of said stock or produce, and not including any part thereof consumed directly by the family; money and the value of all personal property acquired by gift or inheritance; all other gains, profits, and income derived from any source whatever, except that portion of the salary, compensation, or pay received for services in the civil, military, naval, or other service of the United States, including Senators, Representatives, and Delegates in Congress, from which the tax has been deducted, and except that portion of any salary upon which the employer is required by law to withhold and does withhold the tax and pays the same to the officer authorized to receive it.

In computing incomes the necessary expenses actually incurred in carrying on any business, occupation, or profession shall be deducted and also all interest due or paid within the year by such person on existing indebtedness. And all National, State, county, school, and municipal taxes, not including those assessed against local benefits, paid within the year shall be deducted from the gains, profits, or income of the person who has actually paid the same, whether such person be owner, tenant, or mortgagor; also losses actually sustained during the year, incurred in trade or arising from fires, storms, or shipwreck, and not compensated for by insurance or otherwise, and debts ascertained to be worthless, but excluding all estimated depreciation of values and losses within the year on sales of real estate purchased within two years previous to the year for which income is estimated; *Provided*, That no deduction shall be made for any amount paid out for new buildings, permanent improvements, or betterments, made to increase the value of any property or estate.

Provided further, That only one deduction of \$4,000 shall be made from the aggregate income of all the members of any family, composed of one or both parents, and one or more minor children, or husband and wife; that guardians shall be allowed to make a deduction in favor of each and every ward, except that in case where two or more wards are comprised in one family, and have joint property interests, the aggregate deduction in their favor shall not exceed \$4,000; *And provided further*, That in cases where the salary or other compensation paid to any person in the employment or service of the United States shall not exceed the rate of \$4,000 per annum, or shall be by fees, or uncertain or irregular in the amount or in the time during which the same shall have accrued or been earned, such salary or other compensation shall be included in estimating the annual gains, profits, or income of the person to whom the same shall have been paid, and shall include that portion of any income or salary upon which a tax has not been paid by the employer, where the employer is required by law to pay on the excess over \$4,000; *Provided, also*, That in computing the income of any person, corporation, company, or association there shall not be included the amount received from any corporation, company, or association as dividends upon the stock of such corporation, company, or association if the tax of two per centum has been paid upon its net profits by said corporation, company, or association as required by this act.

SEC. 32. That there shall be assessed, levied, and collected, except as herein otherwise provided, a tax of two per centum annually on the net profits or income above actual operating and business expenses, including expenses for materials purchased for manufacture or bought for resale, losses, and interest on bonded and other indebtedness of all banks, banking institutions, trust companies, saving institutions, fire, marine, life, and other insurance companies, railroad, canal, turnpike, canal navigation, slack water, telephone, telegraph, express, electric light, gas, water, street railway companies, and all other corporations, companies, or associations doing business for profit in the United States, no matter how created and organized, but not including partnerships. * * * The net profits or income of all corporations, companies, or associations shall include the amounts paid to shareholders, or carried to the account of any fund, or used for construction, enlargement of plant, or any other expenditure or investment paid from the net annual profits made or acquired by said corporations, companies, or associations.

The remainder of the section provides that the provisions of the law shall not apply to States, counties, or municipalities, nor to corporations or associations conducted solely for charitable, religious, or educational purposes, nor to securities held by any fiduciary for such purposes, nor to saving banks having no stockholders, no members save depositors, and no capital except deposits, nor to insurance companies on the mutual plan, nor to that part of the business of any stock insurance company conducted on the mutual plan.

Section 33 provides for the two per centum taxation of that part of the salaries of all United States employes, including members of Congress, in excess of \$4,000 per annum. Another section makes it unlawful for any official employed in the collection of the income tax to make known in any manner not provided by law any information regarding the income of corporations or persons taxed, severe penalties in fines and imprisonment being prescribed for a violation of this provision.

The New State Constitution of New York. 93

SUMMARY OF AMENDMENTS SUBMITTED BY THE CONSTITUTIONAL CONVENTION TO THE PEOPLE AND ADOPTED AT THE GENERAL ELECTION OF NOVEMBER 6, 1894.

The following is a summary of the amendments to the Constitution of the State of New York adopted by the convention to revise the Constitution (met at Albany May 8, and adjourned *sine die* September 29, 1894), and ratified by the people at the general election held November 6, 1894:

- ARTICLE I.—SECTION 7.** Provides that general laws may give the right of drainage across agricultural lands. **SEC. 9.** Prohibits pool selling, bookmaking, or any other kind of gambling hereafter within this State. **SEC. 18.** Provides that the right of action now existing to recover damages for injuries resulting in death shall never be abrogated, and the amount recoverable shall not be subject to any statutory limitation.
- ART. II.—SEC. 2.** Provides that the Legislature shall enact laws excluding from the right of suffrage all persons convicted of bribery or any other infamous crime. **SEC. 3.** Provides that for the purpose of voting no person shall be deemed to have gained or lost a residence by reason of his being kept in an institution wholly or partly supported by private charity. **SEC. 4.** Provides that registration shall be completed at least ten days before each election, but shall not be required for town and village elections except by express provision of law. In cities and villages having 5,000 inhabitants or more, voters shall be registered upon personal application only; but voters not residing in such cities or villages shall not be required to apply in person for registration at the first meeting of the officers having charge of the registry of voters. **SEC. 5.** Provides for a secret ballot. **SEC. 6.** Provides for equal representation of the two leading parties on all election boards, but the section does not apply to town meetings or village elections.
- ART. III.—SEC. 1.** Provides that the senate elected in 1895 and afterwards shall consist of 50 members, who shall hold office for three years, and the Assembly of 150 members, who shall hold office for one year. **SEC. 2.** Provides for the redistricting of the State into senatorial and assembly districts, under the provisions of the preceding section. **SEC. 10.** Provides that the Senate shall choose a temporary presiding officer in case of the impeachment of the Lieutenant-Governor or when he refuses to act as President or acts as Governor. **SEC. 15.** Provides as follows: No bill shall be passed or become a law unless it shall have been printed and upon the desks of the members, in its final form, at least three calendar legislative days prior to its final passage, unless the Governor, or the Acting Governor, shall have certified to the necessity of its immediate passage, under his hand and the seal of the State; nor shall any bill be passed or become a law, except by the assent of a majority of the members elected to each branch of the Legislature; and upon the last reading of a bill, no amendment thereof shall be allowed, and the question of its final passage shall be taken immediately thereafter, and the yeas and nays entered on the journal. **SEC. 22.** Provides that no provision shall be embraced in the annual appropriation bill unless it relates specifically to some particular appropriation in the bill and is limited in its operation to it. **SEC. 23.** Provides that the Legislature shall by law provide for the employment of prisoners in State prisons, reformatories, etc., but after January 1, 1897, no prisoner shall be allowed to work at any occupation whereby his work shall be farmed out or sold to any individual or association.
- ART. IV.—SEC. 1.** Provides that the Governor and Lieutenant-Governor shall be chosen for two years, those elected Nov. 6, 1894, serving until December 31, 1896, instead of three years.
- ART. V.—SEC. 2.** Provides that the terms of Secretary of State and other elective State executive officers shall be three years from January 1, 1896, and two years from January 1, 1899, and thereafter. **SEC. 9.** Provides that appointments and promotions in the civil service of the State shall be made according to merit and fitness, ascertained by examinations, preference being given to army and navy veterans.
- ART. VI.—**Is wholly devoted to the reorganization of the judiciary of the State. It provides for twelve additional Justices of the Supreme Court to be chosen by the people—three in the city of New York, three in the Second Judicial District, which includes Brooklyn, and one each in the other present judicial districts. The number of judicial districts shall be reduced from eight to four by the Legislature. An appellate division of the Supreme Court is created to take the place of the General Term, the Superior Court and Court of Common Pleas of New York, City Court of Brooklyn, and Superior Court of Buffalo are abolished on January 1, 1896, and the judges of these courts become Supreme Court judges for the remainder of their terms.
- ART. VII.—SEC. 6.** Forbids the auditing or payment by the State of any claim which as between citizens of the State would be barred by lapse of time. **SEC. 7.** Provides that the forest lands belonging to the State shall forever be kept as wild forest lands, and shall not be sold, leased, or exchanged or taken by any corporation, nor shall the timber thereon ever be sold or destroyed. **SEC. 10.** Provides for the improvement of the canals in such manner as the Legislature may provide, and authorizes a debt for that purpose.
- ART. VIII.—SEC. 10.** Provides that no county or city shall incur a debt exceeding ten per cent of the assessed valuation of its real estate subject to taxation. All certificates of indebtedness, revenue bonds, and water bonds, or similar debts shall be included in ascertaining the power of the city to become otherwise indebted. **SECS. 11 to 15.** Provide for a State board of charities, a State commission on lunacy, and a State commission on prisons, to have supervision over their respective institutions, and prescribe their duties.
- ART. X.—SEC. 1.** Provides for the election of county officers for three years, except those in New York and Kings, whose terms shall be two or four years, as the Legislature may direct. Sheriffs are made ineligible for re-election for the next term following.
- ART. XI.—SECS. 1 to 6.** Provide for a State militia which shall never be less than 10,000 strong.
- ART. XII.—SEC. 1.** Provides that special laws passed for cities by the Legislature shall be submitted to the mayors of cities of the first class (having 250,000 inhabitants and more), and mayors and councils of other cities, which may accept or reject them: but in case of acceptance said bills shall still be subject to the action of the Governor, and in case of rejection may nevertheless be passed again by the Legislature, subject to the action of the Governor. Provision is made for public hearings on bills transmitted to the authorities of cities. **SEC. 2.** Provides that all municipal officers shall be elected on Tuesdays after the first Mondays in November of odd numbered years, thus separating them from the elections of Federal and State officials in even numbered years.
- ART. XIII.—SEC. 5.** Prohibits public officers from demanding or accepting free passes or any discrimination in rates from transportation, telegraph, or telephone companies.
- ART. XIV.—SEC. 2.** Provides for a revision of the Constitution every twenty years.

The Constitution also prescribes a period of 90 days instead of 10 days before a newly naturalized citizen can vote; permits the use of receiving and registering ballot machines; authorizes the sale of the Onondaga Salt Springs, and abolishes the office of coroner by omitting the mention thereof.

Recommendations of the Labor Commission

APPOINTED BY THE PRESIDENT TO INQUIRE INTO THE CHICAGO RAILWAY STRIKE OF 1894.

THE Commission appointed July 26, 1894, was composed of Carroll D. Wright, Commissioner of Labor; John D. Kernan, of New York, and Nicholas E. Worthington, of Illinois. After reporting on the causes and results of the strike, the Commission made the following recommendations:

I.—(1) That there be a permanent United States strike commission of three members, with duties and powers of investigation and recommendation as to disputes between railroads and their employes similar to those vested in the Interstate Commerce Commission as to rates, etc. *a* That, as in the Interstate Commerce act, power be given to the United States courts to compel railroads to obey the decisions of the Commission, after summary hearing unattended by technicalities, and that no delays in obeying the decisions of the Commission be allowed pending appeals. *b* That whenever the parties to a controversy in a matter within the jurisdiction of the Commission are one or more railroads upon one side and one or more National trade unions, incorporated under chapter 567 of the United States Statutes of 1885-86, or under State statutes, upon the other, each side shall have the right to select a representative, who shall be appointed by the President to serve as a temporary member of the Commission in hearing, adjusting, and determining that particular controversy. (This provision would make it for the interest of labor organizations to incorporate under the law and to make the Commission a practical board of conciliation. It would also tend to create confidence in the Commission, and to give to that body in every hearing the benefit of practical knowledge of the situation upon both sides.) *c* That during the pendency of a proceeding before the Commission inaugurated by National trade unions, or by an incorporation of employes, it shall not be lawful for the railroads to discharge employes belonging thereto except for inefficiency, violation of law, or neglect of duty; nor for such unions or incorporations during such pendency to order, unite in, aid, or abet strikes or boycotts against the railroads complained of; nor, for a period of six months after a decision, for such railroads to discharge any such employes in whose places others shall be employed, except for the causes aforesaid; nor for any such employes, during a like period, to quit the service without giving thirty days' written notice of intention to do so, nor for any such union or incorporation to order, counsel, or advise otherwise. (2) That chapter 567 of the United States Statutes of 1885-86 be amended so as to require National trade unions to provide in their articles of incorporation and in their constitutions, rules, and by-laws that a member shall cease to be such and forfeit all rights and privileges conferred on him by law as such by participating in or by instigating force or violence against persons or property during strikes or boycotts, or by seeking to prevent others from working through violence, threats, or intimidations; also, that members shall be no more personally liable for corporate acts than are stockholders in corporations. (3) The Commission does not feel warranted, with the study it has been able to give to the subject, to recommend positively the establishment of a license system by which all the higher employes or others of railroads engaged in interstate commerce should be licensed after due and proper examination, but it would recommend, and most urgently, that this subject be carefully and fully considered by the proper committee of Congress. Many railroad employes and some railroad officials examined and many others who have filed their suggestions in writing with the Commission are in favor of some such system. It involves too many complications, however, for the Commission to decide upon the exact plan, if any, which should be adopted.

II.—(1) The Commission would suggest the consideration by the States of the adoption of some system of conciliation and arbitration like that, for instance, in use in the Commonwealth of Massachusetts. That system might be re-enforced by additional provisions giving the board of arbitration more power to investigate all strikes, whether requested so to do or not, and the question might be considered as to giving labor organizations a standing before the law, as heretofore suggested for National trade unions. (2) Contracts requiring men to agree not to join labor organizations or to leave them, as conditions of employment, should be made illegal, as is already done in some of our States.

III.—(1) The Commission urges employers to recognize labor organizations; that such organizations be dealt with through representatives, with special reference to conciliation and arbitration when difficulties are threatened or arise. It is satisfied that employers should come in closer touch with labor and should recognize that, while the interests of labor and capital are not identical, they are reciprocal. (2) The Commission is satisfied that if employers everywhere will endeavor to act in concert with labor; that if when wages can be raised under economic conditions they be raised voluntarily, and that if when there are reductions reasons be given for the reduction, much friction can be avoided. It is also satisfied that if employers will consider employes as thoroughly essential to industrial success as capital, and thus take labor into consultation at proper times, much of the severity of strikes can be tempered and their number reduced.

Labor Legislation.

ANTI-BOYCOTTING AND ANTI-BLACKLISTING LAWS.

THE States having laws prohibiting *boycotting* in terms are Illinois and Wisconsin.

The States having laws prohibiting *blacklisting* in terms are Colorado, Florida, Georgia, Illinois, Indiana, Iowa, Missouri, Montana, North Dakota, Virginia, and Wisconsin.

The following States have laws which may be fairly construed as prohibiting *boycotting*: Alabama, Connecticut, Georgia, Indiana, Maine, Michigan, Minnesota, Missouri, Montana, New Hampshire, New York, North Dakota, Oregon, Rhode Island, South Dakota, Texas, and Vermont.

The following States have laws which may be fairly construed as prohibiting *blacklisting*: Maine, Michigan, Minnesota, New Hampshire, New York, Oregon, Rhode Island, South Dakota, Texas, and Vermont.

In New York it is a misdemeanor for any employer to exact an agreement, either written or verbal, from an employe not to join or become a member of any labor organization, as a condition of employment.

THE WORLD ALMANAC is indebted to Commissioner Wright, of the U. S. Department of Labor, for the summary of eight hours, anti-boycotting, and anti-blacklisting laws, and the table on page 95.

LABOR LEGISLATION—Continued.

EIGHT-HOUR LAWS.

- Alabama.**—Eight hours of labor constitute a day's work for a woman or a child under eighteen (18) years of age in a mechanical or manufacturing business.
- California.**—Eight hours of labor constitute a day's work, unless it is otherwise expressly stipulated by the parties to a contract. A stipulation that eight hours of labor constitute a day's work must be made a part of all contracts to which the State or any municipal corporation therein is a party. But in the case of drivers, conductors, and grip-men of street-cars for the carriage of passengers, a day's work consists of twelve hours. It is a misdemeanor for any person having a minor child under his control, either as ward or apprentice, to require such child to labor more than eight hours in any one day, except in vincticultural or horticultural pursuits, or in domestic or household occupations.
- Colorado.**—Eight hours constitute a day's work for all workmen employed by the State, or any county, township, school district, municipality, or incorporated town.
- Connecticut.**—Eight hours of labor constitute a lawful day's work unless otherwise agreed.
- District of Columbia.**—Eight hours constitute a day's work for all laborers or mechanics employed by or in behalf of the District of Columbia.
- Idaho.**—Eight hours' actual work constitute a lawful day's work on all State and municipal works.
- Illinois.**—Eight hours are a legal day's work in all mechanical employments, except on farms, and when otherwise agreed; does not apply to service by the day, week, or month, or prevent contracts for longer hours.
- Indiana.**—Eight hours of labor constitute a legal day's work for all classes of mechanics, workmen, and laborers, excepting those engaged in agricultural and domestic labor. Overwork by agreement and for extra compensation is permitted.
- Kansas.**—Eight hours constitute a day's work for all laborers, mechanics, or other persons employed by or on behalf of the State or any county, city, township, or other municipality.
- Nebraska.**—Eight hours constitute a legal day's work for all classes of mechanics, servants, and laborers, except those engaged in farm or domestic labor.
- New Mexico.**—Eight hours of labor actually performed upon a mining claim constitute a day's work, the value of the same being fixed at four dollars.
- New Jersey.**—Eight hours constitute a day's labor on any day whereon any general or municipal election shall be held.
- New York.**—Eight hours constitute a day's work for mechanics, workmen, and laborers, except in farm or domestic labor, but overwork for extra pay is permitted. The law applies to those employed by the State or municipality, or by persons contracting for State work.
- Ohio.**—Eight hours shall constitute a day's work in all engagements to labor in any mechanical, manufacturing, or mining business, unless otherwise expressly stipulated in the contract. But in case of conductors, engineers, firemen, or trainmen of railroads, a day's work consists of ten hours.
- Pennsylvania.**—Eight hours, between rising and setting of sun, constitute a day's work in the absence of an agreement for longer time. The law does not apply to farm labor or to service by the year, month, etc.; but in case of employes of street railroads a day's work consists of twelve hours.
- Utah.**—Eight hours constitute a day's work upon all public works.
- Wisconsin.**—In all engagements to labor in any manufacturing or mechanical business, where there is no express contract to the contrary, a day's work shall consist of eight hours; but the law does not apply to contracts for labor by the week, month, or year. In all manufactories, workshops, or other places used for mechanical or manufacturing purposes, the time of labor of children under the age of eighteen, and of women employed therein, shall not exceed eight hours in the day.
- Wyoming.**—Eight hours' actual work constitute a legal day's work in all mines and public works.
- United States.**—Eight hours shall constitute a day's work for all laborers, workmen, and mechanics who may be employed by or on behalf of the United States.

*This tabular history of labor strikes in the United States was prepared for THE WORLD ALMANAC for 1895 by John Paul Boeck.

(a) The rule required tardy employés to answer certain obnoxious questions and pay a fine for tardiness.

(b) From 1831 to 1843 there were fifteen strikes for various causes, of which five were successful.

(c) The demand was for an increase of wages from \$5 per ton to \$6 per ton.

(d) From 1844 to 1848 there were several strikes in Philadelphia for higher wages which were successful.

(e) The shoemakers lost \$200,000 in wages.

(f) From 1850 to 1860 there were a number of strikes, generally unsuccessful, throughout the country.

(g) In 1868 and 1869 there were seventeen strikes in the country for various causes.

(h) From 1871 to 1875 union cigarmakers struck in various localities.

(i) From 1873 to 1875 there were indecisive strikes by cotton and wool workers and miners.

(j) This great railroad strike, the greatest in destructiveness on record, began at Martinsburg, W. Va., on the Baltimore and Ohio Railroad, and spread over the Eastern and Middle States. Its centre was at and around Pittsburgh.

(k) The New York Central Railroad employes did not go out. The company divided \$100,000 (over) among them.

LABOR STRIKES IN THE UNITED STATES—Continued.

(l) The rioting at Pittsburgh was accompanied by the destruction of much property, both railroad and private, by burning. The State militia was called out and fired on the rioters, killing many persons. The losses in property and wages were enormous.

(m) The Pennsylvania Railroad alone lost \$5,000,000.

(n) From 1880 to 1886 there were 762 minor strikes.

(o) General Manager Talmage, of the Wabash Railroad, died from nervous strain.

(p) The strike began at Marshall, Tex., on the Texas and Pacific Railroad.

(q) General Manager Hoxie died soon after the failure of the strike. The losses on both sides were very great, that in employes' wages alone being estimated at \$15,000,000.

(r) Labor Commissioner Wright reported that in the six years ending December 31, 1886, there had been in the entire United States 10,407 successful strikes—46.59 per cent of the whole number—of which 42.44 per cent had been for increase of wages, 19.45 for reduction of hours of labor, 7.75 against reduction of wages, and 7.53 against increase of hours. During this period, by strikes and lockouts, employes lost a total wage of \$59,948,880. In 1886 there were about 1,900 strikes, in which the successful strikers lost \$2,400,000 in wages and the unsuccessful \$13,500,000.

(s) The glassworkers lost \$495,204 in wages. The United States labor report for 1887 said that between 1796 and 1880 there were 1,490 important strikes, while from 1881 to 1886 there were 3,902, in which 1,323,203 men were involved and millions of wages were lost.

(t) A review of a thousand strikes between January 1, 1887, and April 1, 1888, shows that of 884 strikes 247 were successful, while 115 were compromised on terms favorable to the workmen.

(u) Knights of Labor took the places which had been vacated by the striking Brotherhood men. The losses to employes were about \$1,000,000, to the railroad about \$5,000,000.

(v) Losses to strikers, \$300,000; employes, \$1,400,000.

(w) The year 1891 was one remarkably free from strikes.

(x) The Carnegie Works strike at Homestead, Pa. Pinkerton men who defended the property and strikers were killed in the riots. The strike leader, Hugh O'Donnell, was arrested.

(y) The losses were estimated at \$1,000,000.

(z) The strikers were eventually joined by all union workmen in the city. Losses to the employes were estimated at \$500,000; to the street railways, \$750,000. The city of New Orleans is estimated to have lost \$5,000,000 by the strike.

(aa) The principal incident of this strike was the famous injunction decision of Judges Taft and Ricks.

(bb) The losses by this great strike were estimated at about \$13,000,000 to employes and over \$12,000,000 to employers.

(cc) This strike began by the Pullman car-works employes June 24. They returned to work at the old wages September 27. The American Railway Union, Eugene V. Debs, President, called out its members throughout the Western States in a sympathetic strike which caused much rioting in Chicago and its neighborhood, and in California. The President of the United States issued proclamations calling for the restoration of order. United States troops and State militia were sent to affected points and some rioting strikers were killed. The losses in property and wages amounted to many millions of dollars.

(dd) Employed by sweaters.

(ee) Working hours were in general reduced from eighteen per day to ten per day. The cause of the working people aroused general sympathy.

(ff) Cloakmakers, shirtmakers, tailors, embroiderers, buttonhole makers and carpenters.

The Railroad Strike of July, 1894.

PRESIDENT CLEVELAND'S FIRST PROCLAMATION.

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA—A PROCLAMATION:

Whereas, By reason of unlawful obstructions, combinations and assemblages of persons it has become impracticable, in the judgment of the President, to enforce, by the ordinary course of judicial proceedings, the laws of the United States within the State of Illinois, and especially in the City of Chicago, within said State; and

Whereas, For the purpose of enforcing the faithful execution of the laws of the United States and protecting its property, and removing obstructions to the United States mails in the State and city aforesaid, the President has employed a part of the military forces of the United States;

Now, therefore, I, Grover Cleveland, President of the United States, do hereby admonish all good citizens and all persons who may be or may come within the city and State aforesaid against aiding, countenancing, encouraging or taking any part in such unlawful obstructions, combinations and assemblages; and I hereby warn all persons engaged in, or any way concerned with, such unlawful obstructions, combinations and assemblages to disperse and retire peaceably to their respective abodes on or before 12 o'clock noon on the ninth day of July instant.

Those who disregard this warning and persist in taking part with a riotous mob in forcibly resisting and obstructing the execution of the laws of the United States or interfering with the functions of the Government, destroying or attempting to destroy the property belonging to the United States or under its protection, cannot be regarded otherwise than as public enemies.

Troops employed against such a riotous mob will act with all the moderation and forbearance consistent with the accomplishment of the desired end; but the stern necessities that confront them will not with certainty permit discrimination between guilty participants and those who are mingled with them from curiosity and without criminal intent. The only safe course, therefore, for those not actually unlawfully participating is to abide at their homes, or at least not to be found in the neighborhood of riotous assemblages.

While there will be no hesitation or vacillation in the decisive treatment of the guilty, this warning is especially intended to protect and save the innocent.

In testimony whereof I have hereunto set my hand and caused the seal of the United States to be hereto affixed.

Done at the city of Washington, this eighth day of July, in the year of our Lord one thousand eight hundred and ninety-four, and of the independence of the United States of America the one hundred and nineteenth.

By the President,
(Signed)

(Signed) GROVER CLEVELAND.

W. Q. GRESHAM, Secretary of State.

THE RAILROAD STRIKE OF JULY, 1894—Continued.

PRESIDENT CLEVELAND'S SECOND PROCLAMATION.

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA—A PROCLAMATION:

Whereas, By reason of unlawful obstructions, combinations and assemblages of persons it has become impracticable, in the judgment of the President, to enforce by the ordinary course of judicial proceedings the laws of the United States at certain points and places within the States of North Dakota, Montana, Idaho, Washington, Wyoming, Colorado and California, and the Territories of Utah and New Mexico, and especially along the lines of such railways traversing said States and Territories as are military roads and post-routes and are engaged in interstate commerce and in carrying United States mails; and

Whereas, For the purpose of enforcing the faithful execution of the laws of the United States and protecting property belonging to the United States or under its protection, or of preventing obstructions of the United States mails and of commerce between States and Territories, and of securing to the United States the right guaranteed by law to the use of such roads for postal, military, naval and other government service, the President has employed a part of the military forces of the United States;

Now, therefore, I, Grover Cleveland, President of the United States, do hereby command all persons engaged in or in any way connected with such unlawful obstructions, combinations and assemblages to disperse and retire peaceably to their respective abodes on or before 3 o'clock in the afternoon on the tenth day of July instant.

In witness I have hereunto set my hand and caused the seal of the United States to be hereto affixed.

Done at the city of Washington, this ninth day of July, in the year of our Lord one thousand eight hundred and ninety-four, and of the independence of the United States the one hundred and nineteenth.

(Signed) GROVER CLEVELAND.

By the President,

(Signed) W. Q. GRESHAM, Secretary of State.

ORDER OF MAJOR-GENERAL MILES TO THE ARMY.

TO ALL UNITED STATES TROOPS SERVING IN THE DEPARTMENT OF THE MISSOURI:

The acts of violence committed during the past few days in obstructing mail trains and post-roads, the blocking of interstate commerce, the open defiance and violation of the injunction of the United States Court, the assault upon the Federal forces in the lawful discharge of their duties, the destruction, pillage and looting of the inland commerce property belonging to citizens of different States, and other acts of rebellion and lawlessness have been of such a serious character that the duties of the military authorities are now clearly defined.

The proclamation of the President, the Commander-in-Chief of the land and naval forces and the State militia when called into service, is understood by the military to be in the interests of humanity and to avoid the useless waste of life, if possible. It is an Executive order for all law-abiding citizens to separate themselves from the law-breakers and those in actual hostility to the action of the United States Court and the laws of the United States. This does not change the relation of the Federal officials with those of the local authority, as it is expected that the State and municipal governments will maintain peace and good order within the territory of their jurisdiction. Should they fail or be overpowered the military forces will assist them, but not to the extent of leaving unprotected property belonging to or under the protection of the United States.

The officer in the immediate command of the troops must be the judge as to what use to make of the forces of his command in executing his orders, and in case serious action be required and there be time he will communicate with his next superior for his instructions. The earnest efforts of the law-abiding citizens have done much to improve the condition of affairs during the last few days, and I earnestly request all law-abiding citizens to do whatever is possible to assist in maintaining the civil Government and the authority of the Municipal, State and Federal Governments in preserving peace and good order.

By command of Major-General MILES.

P. J. MARTIN, Assistant Adjutant-General.

CHICAGO, ILL., July 9, 1894.

ACTION OF THE UNITED STATES SENATE ON THE PRESIDENT'S PROCLAMATIONS.

The following resolution, offered by Senator Daniel, of Virginia, was passed July 11, 1894, without a division:

Resolved, That the Senate indorses the prompt and rigorous measures adopted by the President of the United States and the members of his Administration to repulse and repress by military force the interference of lawless men with the due process of the laws of the United States, and with the transportation of the mails of the United States, and with the commerce among the States. It is within the plain constitutional authority of the Congress of the United States "to regulate commerce with foreign nations and among the several States and with the Indian tribes," "to establish post-offices and post-roads," and to ordain and to establish inferior courts, and the judicial power extends to all cases in law and equity arising under the Constitution and laws of the United States. It is the duty of the President under the Constitution to "take care that the laws be faithfully executed," and to this end it is provided that he shall be "Commander-in-Chief of the army and navy of the United States and of the militia of the several States when called into the actual service of the United States."

It is treason against the United States for a citizen to levy war against them or to adhere to their enemies, giving them aid and comfort.

Those who combine to use force to assault or resist the constituted authorities of the United States, civil or military, should be warned of the magnitude of their offense, and those who earn honest bread by honest toil can do nothing more detrimental to their interests than to show them any sort of maintenance in their lawless course.

The action of the President and his Administration has the full sympathy and support of the law-abiding masses of the people of the United States, and he will be supported by all departments of the Government and by the power and resources of the entire nation.

ACTION OF THE UNITED STATES HOUSE OF REPRESENTATIVES ON THE PRESIDENT'S PROCLAMATIONS.

The following resolution, offered by Mr. McCreary, of Kentucky, July 16, 1894, was passed without a division:

Resolved, That the House of Representatives indorses the prompt and vigorous efforts of the President and his Administration to suppress lawlessness, restore order and prevent improper interference with the enforcement of the laws of the United States and with the transportation of the mails of the United States, and with interstate commerce, and pledges the President hearty support; and deems the success that has already attended his efforts cause for public and general congratulation.

Proposed Election of U. S. Senators by the People.

THE United States House of Representatives, July 20, 1894, adopted the following joint resolution, proposing an amendment to the Constitution, providing for the election of Senators by the people of the States, by a vote of yeas 144, nays 51 (not voting 158). The Senate took no action.

Resolved, etc. (two-thirds of each House concurring therein). That in lieu of the first paragraph of section three of Article one of the Constitution of the United States, and in lieu of so much of paragraph two of the same section as relates to the filling of vacancies, and in lieu of all of paragraph one of section four of said Article one, in so far as the same relates to any authority in Congress to make or alter regulations as to the times or manner of holding elections for Senators, the following be proposed as an amendment to the Constitution, which shall be valid to all intents and purposes as part of the Constitution when ratified by the Legislatures of three-fourths of the States:

The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof, at large, for six years; and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State Legislatures. The times, places and manner of holding elections for Senators shall be as prescribed in each State by the Legislature thereof.

When vacancies happen in the representation of any State in the Senate the Executive authority of such State shall issue writs of election to fill such vacancies: *Provided*, That the Legislature of any State may empower the Executive thereof to make temporary appointments until the people fill the vacancies by election as the Legislature may direct.

This amendment shall not be so construed as to affect the election or term of any Senator chosen before it becomes valid as part of the Constitution.

The Chinese Treaty.

TEXT OF THE TREATY BETWEEN THE UNITED STATES AND CHINA, PROVIDING FOR THE EXCLUSION OF CHINESE IMMIGRANTS FOR TEN YEARS.

THE following is the text of the Convention between the United States and China excluding Chinese immigrant laborers from the United States for a period of ten years, which was concluded between the representatives of the two countries March 17, 1894, and ratified by the Senate of the United States August 13, 1894, by a vote of 47 yeas to 20 nays.

Whereas, On the 17th day of November, A. D. 1880, and of Kwanghsü, the sixth year, tenth moon, fifteenth day, a Treaty was concluded between the United States and China for the purpose of regulating, limiting or suspending the coming of Chinese laborers to, and their residence in, the United States; and,

Whereas, The Government of China, in view of the antagonism and much deprecated and serious disorders to which the presence of Chinese laborers has given rise in certain parts of the United States, desires to prohibit the emigration of such laborers from China to the United States; and,

Whereas, The two governments desire to cooperate in prohibiting such emigration, and to strengthen in other ways the bonds of friendship between the two countries; and,

Whereas, The two governments are desirous of adopting reciprocal measures for the better protection of the citizens or subjects of each within the jurisdiction of the other;

Now, therefore, The President of the United States has appointed Walter Q. Gresham, Secretary of State of the United States, as his Plenipotentiary, and His Imperial Majesty, the Emperor of China, has appointed Yang Yu, Officer of the second rank, Sub-Director of the Court of Sacrificial Worship, and Envoy Extraordinary and Minister Plenipotentiary to the United States of America, as his Plenipotentiary; and the said Plenipotentiaries having exhibited their respective Full Powers, found to be in due and good form, have agreed upon the following articles:

ARTICLE I. The High Contracting Parties agree that for a period of ten years, beginning with the date of the exchange of the ratifications of this Convention, the coming, except under the conditions hereinafter specified, of Chinese laborers to the United States shall be absolutely prohibited.

ARTICLE II. The preceding article shall not apply to the return to the United States of any registered Chinese laborer who has a lawful wife, child or parent in the United States, or property therein of the value of one thousand dollars, or debts of like amount due him and pending settlement. Nevertheless every such Chinese laborer shall, before leaving the United States, deposit as a condition of his return, with the collector of customs of the district from which he departs, a full description in writing of his family, or property, or debts, as aforesaid, and shall be furnished by said collector with such certificate of his right to return under this Treaty as the laws of the United States may now or hereafter prescribe and not inconsistent with the provisions of this Treaty, and should the written description aforesaid be proved to be false, the right of return thereunder, or of continued residence after return, shall in each case be forfeited. And such right of return to the United States shall be exercised within one year from the date of leaving the United States, but such right of return to the United States may be extended for an additional period, not to exceed one year, in cases where, by reason of sickness or other cause of disability beyond his control, such Chinese laborer shall be rendered unable sooner to return, which facts shall be fully reported to the Chinese Consul at the port of departure, and by him certified, to the satisfaction of the collector of the port at which such Chinese subject shall land in the United States. And no such Chinese laborer shall be permitted to enter the United States by land or sea without producing to the proper officer of the customs the return certificate herein required.

ARTICLE III. The provisions of this Convention shall not affect the right at present enjoyed of Chinese subjects, being officials, teachers, students, merchants or travelers for curiosity or pleasure, but not laborers, of coming to the United States and residing therein. To entitle such Chinese subjects as are above described to admission into the United States, they may produce a certificate from their Government or the Government where they last resided, vis'd by the diplomatic or consular representative of the United States in the country or port whence they depart.

It is also agreed that Chinese laborers shall confine to enjoy the privilege of transit across the territory of the United States in the course of their journey to or from other countries, subject to such regulations by the Government of the United States as may be necessary to prevent said privilege of transit from being abused.

ARTICLE IV. In pursuance of Article III. of the Immigration Treaty between the United States and China, signed at Peking on the 17th day of November, 1880 (the 15th day of the tenth moon of Kwanghsü, sixth year), it is hereby understood and agreed that Chinese laborers or Chinese of any other class, either permanently or temporarily residing in the United States, shall have for the protection of their persons and property all rights that are given by the laws of the United States to citi-

zens of the most favored nation, excepting the right to become naturalized citizens. And the Government of the United States reaffirms its obligations, as stated in said Article III., to exert all its power to secure protection to the person and property of all Chinese subjects in the United States.

ARTICLE V. The Government of the United States, having by an act of the Congress, approved May 5, 1892, as amended by an act approved November 3, 1893, required all Chinese laborers lawfully within the limits of the United States before the passage of the first named act, to be registered as in said act provided, with a view of affording them better protection, the Chinese Government will not object to the enforcement of such act and reciprocally the Government of the United States recognizes the right of the Government of China to enact and enforce similar laws or regulations for the registration, free of charge, of all laborers, skilled or unskilled (not merchants as defined by said act of Congress), citizens of the United States in China whether residing within or without the treaty courts.

And the Government of the United States agrees that within twelve months of the date of the exchange of the ratifications of this Convention and annually thereafter it will furnish to the Government of China registers or reports showing the full name, age, occupation and number or place of residence of all other citizens of the United States, including missionaries, residing both within and without the treaty courts of China, not including, however, diplomatic and other officers of the United States residing or travelling in China upon official business, together with their body and household servants.

ARTICLE VI. This Convention shall remain in force for a period of ten years, beginning with the date of the exchange of ratification, and if six months before the expiration of the said period of ten years neither government shall have formally given notice of its final termination to the other, it shall remain in full force for another period of ten years.

In faith whereof, we, the respective plenipotentiaries, have signed this Convention and have hereunto affixed our seal.

Done, in duplicate, at Washington, 17th day of March, A. D. 1894.

The text of the Chinese Exclusion act, approved May 5, 1892 (the Geary law), was printed in full in THE WORLD ALMANAC for 1894, page 106.
The number of Chinese who registered under the act was 105,312. For details see population tables.

Inspection of Immigrants.

THE House of Representatives passed the following bill providing for the inspection of immigrants by United States consuls, July 20, 1894, without division. The Senate has not yet acted upon it.

Be it enacted, etc., That no alien immigrant shall be admitted within the United States unless he or she shall exhibit to the United States inspectors of arriving immigrants at the place of admission a certificate of the United States consul or other authorized representative of the United States at the place nearest where said immigrant last resided, setting forth that the said consul or other United States representative has made an investigation concerning said immigrant, and that said immigrant does not belong to the class or classes of alien immigrants excluded from admission into the United States under the provisions of the act of Congress approved March 3, 1891, entitled "An act in amendment to the various acts relative to immigration and the importation of aliens under contract or agreement to perform labor, its amendments or supplements," or by any law of the United States that now exists or may hereafter be passed. Said immigrant shall, in addition, conform to all present requirements of law.

It shall be the duty of United States consuls and United States representatives in other countries to investigate and grant or withhold certificates as shall be disclosed on investigation under the directions and instructions of the State Department, according to the laws of the United States as aforesaid.

SEC. 2. That this act shall take effect from and after the 1st day of January, A. D. 1895.

State Taxation of National Bank and U. S. Treasury Notes.

THE House of Representatives, July 6, 1894, passed the following bill authorizing the taxation of United States Treasury notes and National bank notes, by States and Territories, by a vote of yeas 173, nays 41 (not voting 138).

Be it enacted, etc., That all circulating notes of National banking associations and all United States legal-tender notes and all other notes and certificates of the United States payable on demand and circulating as currency shall be subject to taxation under the laws of any State or Territory: *Provided*, That any such taxation shall be exercised in the same manner and at the same rate that any such State or Territory shall tax other property, money or currency circulating as money within its jurisdiction.

SEC. 2. That the provisions of this act shall not be deemed or held to change existing laws in respect of the taxation of National banking associations.

The Senate, August 4, amended the bill so as to include "gold, silver or other coin," on hand or deposit, and passed it without a division.

Passport Regulations.

PASSPORTS are issued only to citizens of the United States, upon application, supported by proof of citizenship. Citizenship is acquired by birth, by naturalization, and by annexation of territory. An alien woman who marries a citizen of the United States thereby becomes a citizen. Minor children resident in the United States become citizens by the naturalization of their father.

When the applicant is a native citizen of the United States he must transmit his own affidavit of this fact, stating his age and place of birth, with the certificate of one other citizen of the United States to whom he is personally known, stating that the declaration made by the applicant is true. The affidavit must be attested by a notary public, under his signature and seal of office. When there is no notary in the place the affidavit may be made before a justice of the peace or other officer authorized to administer oaths; but if he has no seal, his official act must be authenticated by certificate of a court of record. A person born abroad who claims that his father was a native citizen of the United States must state in his affidavit that his father was born in the United States, has resided therein, and was a citizen of the same at the time of the applicant's birth. This affidavit must be supported by that of one other citizen acquainted with the facts.

NATURALIZED CITIZENS.

If the applicant be a naturalized citizen, his certificate of naturalization must be transmitted for inspection (it will be returned with the passport), and he must state in his affidavit that he is the identical person described in the certificate presented. Passports cannot be issued to aliens who have only declared their intention to become citizens. Military service does not of itself confer citizenship. A person of alien birth, who has been honorably discharged from military service in the United States, but who has not been naturalized, should not transmit his discharge paper in application for a passport, but should apply to the proper court for admission to citizenship, and transmit the certificate of naturalization so obtained. The signature to the application and oath of allegiance should conform in orthography to the applicant's name as written in the naturalization paper, which the department follows.

Every applicant is required to state his occupation and the place of his permanent legal residence, and to declare that he goes abroad for temporary sojourn and intends to return to the United States with the purpose of residing and performing the duties of citizenship therein.

The wife or widow of a naturalized citizen must transmit the naturalization certificate of the husband, stating in her affidavit that she is the wife or widow of the person described therein. The children of a naturalized citizen, claiming citizenship through the father, must transmit the certificate of naturalization of the father, stating in their affidavits that they are children of the person described therein, and were minors at the time of such naturalization.

The oath of allegiance to the United States will be required in all cases.

APPLICATION.

The application should be accompanied by a description of the person, stating the following particulars, viz: Age: — years. Stature: — feet, — inches (English measure). Forehead: —. Eyes: —. Nose: —. Mouth: —. Chin: —. Hair: —. Complexion: —. Face: —.

If the applicant is to be accompanied by his wife, minor children or servants, it will be sufficient to state the names and ages of such persons and their relationship to the applicant, when a single passport for the whole will suffice. For any other person in the party a separate passport will be required. A woman's passport may include her minor children and servants.

FEE REQUIRED.

By act of Congress approved March 23, 1888, a fee of one dollar is required to be collected for every citizen's passport. That amount in currency, postal money-order, or postal-note, should accompany each application. Orders should be payable to the Disbursing Clerk of the Department of State. Drafts or checks are inconvenient and undesirable.

A passport is good for two years from its date, and no longer.

Citizens of the United States desiring to obtain passports while in a foreign country must apply to the chief diplomatic representative of the United States in that country, or, in the absence of a diplomatic representative, then to the consul-general, if there be one, or, in the absence of both the officers last named, to a consul. Passports cannot be lawfully issued by State authorities, or by judicial or municipal functionaries of the United States. (Revised Statutes, section 4, 075.) To persons wishing to obtain passports for themselves blank forms of application will be furnished by this department on request, stating whether the applicant be a native or a naturalized citizen, or claims citizenship through the naturalization of husband or parent. Forms are not furnished, except as samples, to those who make a business of procuring passports.

Communications should be addressed to the Department of State, indorsed "Passport Division," and each communication should give the post-office address of the person to whom the answer is to be directed. Professional titles will not be inserted in passports.

Executive Mansion Rules.

The Cabinet will meet Tuesdays and Fridays at 11 o'clock A. M.

Mondays will be reserved by the President for the transaction of public business requiring his uninterrupted attention. The President will receive Senators and Representatives in Congress from 10 to 12 o'clock on other days except Cabinet days, when he will receive them from 10 to 11 o'clock. Persons not Senators and Representatives, having business with the President, will be received from 12 to 1 o'clock every day, except Mondays and Cabinet days.

Those having no business, but who desire to pay their respects, will be received by the President in the East Room at 1 o'clock P. M. on Mondays, Wednesdays and Saturdays.

The President intends to devote the hours designated for the reception of Senators and Representatives exclusively to that purpose and he requests their co-operation in avoiding encroachments upon the time set apart for their benefit. By direction of the President.

HENRY T. THURBER,
Private Secretary to the President.

United States Civil Service Rules.

(Revised for this issue of THE WORLD ALMANAC by the Secretary of the Civil Service Commission.)

THE purpose of the Civil Service Act, as declared in its title, is "to regulate and improve the civil service of the United States." It provides for the appointment of three Commissioners, a Chief Examiner, a Secretary, and other employes, and makes it the duty of the Commission to aid the President as he may request in preparing suitable rules for carrying the act into effect; to make regulations for and control the examinations provided for, and supervise and control the records of the same; and to make investigations and report upon all matters touching the enforcement and effect of the rules and regulations. The address of the Commission is Washington, D. C. The president of the Commission is John R. Procter; the secretary is John T. Doyle.

The service classified under the act, and to which it and the rules apply, embraces the Executive Departments at Washington, the Department of Labor, the Fish Commission, and the Civil Service Commission, the observers in the Weather Service, the customs districts in each of which there are fifty or more employes, eleven in number; all free-delivery post-offices, now six hundred and ten in number; the Railway Mail Service, and the Indian School Service, including altogether about forty-three thousand places, or about one-fourth in point of numbers and one-half in importance and in salaries of the entire civil service.

The Classified Departmental Service embraces all places in the Departments at Washington, excepting messengers, laborers, workmen and watchmen (not including any person designated as a skilled laborer or workman), and no person so employed can, without examination under the rules, be assigned to clerical duty, and also excepting those appointed by the President, by and with the advice and consent of the Senate. The Classified Customs Service at the eleven ports embraces the places giving \$900 a year, and all those giving a larger salary where the appointee is not subject to confirmation by the Senate. The Classified Postal Service embraces all places above the grade of a laborer except the postmaster. The Classified Railway Mail Service embraces all employes of the Railway Mail Service. The Classified Indian Service embraces all physicians, school superintendents and assistant superintendents, school-teachers and matrons in the Indian Service. Certain of the places within the Classified Service are excepted from examination by the civil service rules, and may be filled in the discretion of the appointing officers without examination; a few other places may be so filled, but the great mass of the places are filled by competitive examination.

For places in the Classified Service where technical qualifications are needed special examinations are held. In the Departmental Service they are held for the State Department, the Pension, Patent and Signal offices, Geological and Coast Surveys and other offices.

APPLICATIONS.

Applicants for examination must be citizens of the United States of the proper age. No person habitually using intoxicating liquors can be appointed. No discrimination is made on account of sex, color or political or religious opinions. The limitations of age are: For the Departmental Service, not under twenty years; in the Customs Service, not under twenty-one years, except clerks or messengers, who must not be under twenty years; in the Postal Service, not under eighteen years, except carriers, who must not be under twenty-one or over forty, and in the Railway Mail Service not under eighteen or over thirty-five years. The age limitations do not apply to any person honorably discharged from the military or naval service of the United States by reason of disability resulting from wounds or sickness incurred in the line of duty. Such persons are preferred in appointments under §1, 754, R. S., and certified to appointing officers before all others of higher grade.

Every one seeking to be examined must first file an application blank. The blank for the Departmental, Railway Mail, or Indian School Service should be requested directly of the Civil Service Commission, at Washington. The blank for the Customs or Postal Service must be requested in writing by the persons desiring examination of the Customs or Postal Board of Examiners at the office where service is sought. These papers should be returned to the officers from whom they emanated.

EXAMINATIONS.

The applicants to enter the services designated are examined as to their relative capacity and fitness. The ordinary clerical examinations are used only in the Customs and Departmental Services for clerkships of \$1,000 and upward requiring no peculiar information or skill. They are limited to the following subjects: First, orthography, penmanship and copying; second, arithmetic—fundamental rules, fractions, and percentage; third, interest and discount, elements of bookkeeping and accounts; fourth, elements of the English language, letter-writing, and the proper construction of sentences. For places in which a lower degree of education suffices, as for employes in post-offices, and those below the grade of clerks in custom houses and in the Departments at Washington, the Commission limits the examination to less than these four subjects, omitting the third and parts of the fourth subject. No one is certified for appointment whose standing in the examination is less than 70 per centum of complete proficiency, except that applicants claiming military or naval preference under §1, 754, R. S., need obtain but 65.

The law also prescribes competitive examinations to test the fitness of persons in the service for promotion therein. The Commission gives a certificate to the person examined stating whether he passed or failed to pass.

APPOINTMENTS.

When there is a vacancy to be filled, the appointing officer applies to the Commission or proper examining board, and it reports to him the names of the three persons of the sex called for graded highest on the proper register of those in his branch of the service and remaining eligible, and from the three a selection must be made. In the Departmental Service appointments are apportioned among the States on the basis of population.

Every appointment is made for a probationary period of six months, at the end of which time, if the conduct and capacity of the person appointed have been found satisfactory, the appointment is made absolute. There is a constant demand for men stenographers and typewriters. The number of women applying for clerical places is greatly in excess of the needs of the service.

The following are excepted from examination for appointment: Confidential clerks of heads of departments or offices, cashiers of collectors and postmasters, superintendents of money-order divisions in post-offices, custodians of money for whose fidelity another officer is under bond, disbursing officers who give bonds, persons in the secret service, deputy collectors and superintendents and chiefs of divisions of bureaus and a few others.

Qualifications for Voting in Each State of the Union.

(Communicated to THE WORLD ALMANAC and corrected to date by the Attorneys-General of the respective States.)
 In all the States except Wyoming the right to vote at general elections is restricted to males of 21 years of age and upward. Women are entitled to vote at school elections in several States. They are entitled by local law to full suffrage in the States of Colorado and Wyoming. (See article entitled "Woman Suffrage.")

For laws requiring Registration of Voters, see next page.

*Australian ballot law or a modification of it in force. †Indian must have severed tribal relations two years next preceding election. ‡Or if, having previously been a qualified elector or native, he shall have removed and returned, then 6 months. § One year's residence in the United States prior to election required. (a) Actual residence in the precinct or district required. (b) If residing in State 1 year, a *bona fide* resident in precinct at time of registration may vote for State and county officers without previous residence in precinct, but 3 months' residence in the precinct is required to vote for representative in the Legislature. (c) Women can vote in school elections.

Requirements Regarding the Registration of Voters.

(Continuation of "Qualifications for Voting," on preceding pages.)

The registration of voters is required in the States of Alabama, California, Colorado, Connecticut, Florida, Idaho, Illinois, Louisiana, Maryland, Massachusetts, Michigan, Minnesota, Montana, Mississippi, Nevada, New Hampshire, New Jersey, North Carolina, Ohio, Pennsylvania, South Carolina, Vermont, Virginia, and Wyoming and the Territories of Arizona, New Mexico and Utah.

In Georgia registration is required in some counties by local law.

In Kentucky registration is required in cities, in Kansas in cities of the first and second class, in Iowa and Nebraska in cities of and over 2,500 inhabitants, in North Dakota in cities of over 3,000 inhabitants, in Ohio in cities of not less than 9,000 inhabitants, in Maine in all cities and in towns having 500 or more voters, in South Dakota in cities and towns having over 1,000 voters and in counties where registration has been adopted by popular vote, and in Tennessee in all counties having 50,000 inhabitants and over.

In Missouri it is required in cities of 100,000 inhabitants, and in Wisconsin in cities having 3,000 inhabitants and over. In New York it is required in all cities and in all incorporated villages of over 7,000 inhabitants. In Rhode Island non-taxpayers are required to register yearly before December 31. In Texas cities of 10,000 or over may require registration.

The registration of voters is not required in the State of Oregon. It is prohibited in Arkansas and West Virginia by constitutional provision.

Woman Suffrage.

The legislatures of Connecticut and New York in their sessions of 1893 passed laws permitting women to vote for school officers. The privilege was used to a limited extent in both States, but in the November election a Supreme Court Judge in New York decided that the act of that State was unconstitutional. Notwithstanding this the Attorney-General of the State advised all election officers to treat the law as constitutional until the question could be adjudicated by the highest tribunal. The Iowa and Ohio legislatures in 1894 granted suffrage in school elections to women.

In the New York State Convention in 1894 to revise the Constitution a woman suffrage amendment was defeated by a vote of 97 to 58.

The Michigan Legislature of 1893 adopted a law authorizing women to vote at municipal elections. In October the Supreme Court of the State declared the law unconstitutional.

In Wyoming women have full suffrage and vote for all officers, including Presidential electors. The woman suffrage law was adopted in 1870.

In the State election in Colorado in 1893 the people voted in favor of general woman suffrage. In Kansas women exercise the suffrage largely in municipal elections. In November, 1894, the people voted upon a constitutional amendment providing for woman suffrage.

Women formerly voted in the Territory of Washington, and until they were excluded by a decision of the Territorial Supreme Court. In adopting a State Constitution the question of allowing women to use the ballot was submitted to a separate vote of the electors and was defeated. Women voted in the Territory of Utah until excluded by the Edmunds law.

But in some form, mainly as to taxation or the selection of school officers, woman suffrage exists in a limited way in Arizona, Colorado, Delaware, Idaho, Illinois, Indiana, Iowa, Kentucky, Massachusetts, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, North Dakota, Ohio, Oklahoma, Oregon, South Dakota, Texas, Vermont, Washington and Wisconsin.

In many European countries, in Australia and New Zealand, in Cape Colony, in Canada, and in parts of India women vote on various terms for municipal or school officers.

The Ballot Reform Movement.

The following is a list of the States and Territories which have adopted new ballot laws, based more or less on the Australian system:

1888—Kentucky (applying only to Louisville), Massachusetts,
1889—Connecticut, Indiana, Michigan, Minnesota, Missouri, Montana, Rhode Island, Tennessee, Wisconsin.

1890—Maryland (applying to Baltimore), New Jersey, New York, Oklahoma, Vermont, Washington, Wyoming.

1891—Arkansas, California, Delaware, Idaho, Illinois, Maine, Nebraska, New Hampshire, North Dakota, Ohio, Pennsylvania, South Dakota, Oregon, West Virginia, Colorado.

1892—Iowa, Maryland (whole State), Mississippi.

1893—Alabama, Kansas, Kentucky, Nevada, Texas, and in Florida for the city of Jacksonville.

1894—Virginia.

The only States in which some form of reformed balloting does not yet exist are: Georgia, Louisiana, North Carolina, South Carolina.

FORM OF BALLOT.

The distinctive feature of the ballot practice in New South Wales is that the names of all the candidates being on one ticket, the names of persons for whom the voter does not wish to vote must be crossed off, a blue lead pencil being provided for the purpose by the authorities, while there are clearly printed on the ticket, in red ink, directions as to how many candidates must be voted for.

Under the New York and New Jersey laws each party ticket is printed on a separate ballot. For straight voting, therefore, no marking is required. For the benefit mainly of the illiterate or blind, as claimed, the paster ballot is permitted in New York.

In all the other States which have adopted the reform system of voting, the single or "blanket" ballot is used. All the names in nomination are printed on one sheet, the voter's choice to be indicated by marking. There are two methods used of grouping the names of the candidates. The Australian plan arranges the titles of the offices alphabetically, the names of the candidates, and usually their party connection being attached.

The States which follow this plan with more or less variation in the form, but preserving the feature of alphabetical arrangement of titles of offices to be voted for, are California, Kentucky, Massachusetts, Minnesota, Montana, Nebraska, New Hampshire, Oregon, Rhode Island, Tennessee, Vermont, Virginia, Washington and Wyoming.

The other form groups all names and offices by parties. The voter of a straight ticket marks a cross in the circle at the head of his ticket. The voter who scatters marks squares opposite the names of all the candidates on the tickets.

The States and Territories which use this plan, with or without immaterial variations, are Delaware, Illinois, Indiana, Kansas, Maine, Maryland, Missouri, Ohio, Wisconsin and Oklahoma.

Naturalization Laws of the United States.

The conditions under and the manner in which an alien may be admitted to become a citizen of the United States are prescribed by Sections 2,165-74 of the Revised Statutes of the United States.

DECLARATION OF INTENTIONS.

The alien must declare upon oath before a circuit or district court of the United States or a district or supreme court of the Territories, or a court of record of any of the States having common law jurisdiction and a seal and clerk, two years at least prior to his admission, that it is, *bona fide*, his intention to become a citizen of the United States, and to renounce forever all allegiance and fidelity to any foreign prince or State, and particularly to the one of which he may be at the time a citizen or subject.

OATH ON APPLICATION FOR ADMISSION.

He must at the time of his application to be admitted declare on oath, before some one of the courts above specified, "that he will support the Constitution of the United States, and that he absolutely and entirely renounces and abjures all allegiance and fidelity to every foreign prince, potentate, State, or sovereignty, and particularly, by name, to the prince, potentate, State, or sovereignty of which he was before a citizen or subject," which proceedings must be recorded by the clerk of the court.

CONDITIONS FOR CITIZENSHIP.

If it shall appear to the satisfaction of the court to which the alien has applied that he has made a declaration to become a citizen two years before applying for final papers, and has resided continuously within the United States for at least five years, and within the State or Territory where such court is at the time held one year at least; and that during that time "he has behaved as a man of good moral character, attached to the principles of the Constitution of the United States, and well disposed to the good order and happiness of the same," he will be admitted to citizenship.

TITLES OF NOBILITY.

If the applicant has borne any hereditary title or order of nobility he must make an express renunciation of the same at the time of his application.

SOLDIERS.

Any alien of the age of twenty-one years and upward who has been in the armies of the United States, and has been honorably discharged therefrom, may become a citizen on his petition, without any previous declaration of intention, provided that he has resided in the United States at least one year previous to his application, and is of good moral character. (It is judicially decided that residence of one year in a particular State is not requisite.)

MINORS.

Any alien under the age of twenty-one years who has resided in the United States three years next preceding his arriving at that age, and who has continued to reside therein to the time he may make application to be admitted a citizen thereof, may, after he arrives at the age of twenty-one years, and after he has resided five years within the United States, including the three years of his minority, be admitted a citizen; but he must make a declaration on oath and prove to the satisfaction of the court that for two years next preceding it has been his *bona fide* intention to become a citizen.

CHILDREN OF NATURALIZED CITIZENS.

The children of persons who have been duly naturalized, being under the age of twenty-one years at the time of the naturalization of their parents, shall, if dwelling in the United States, be considered as citizens thereof.

CITIZENS' CHILDREN WHO ARE BORN ABROAD.

The children of persons who now are or have been citizens of the United States are, though born out of the limits and jurisdiction of the United States, considered as citizens thereof.

CHINESE.

The naturalization of Chinamen is expressly prohibited by Section 14, Chapter 126, Laws of 1882.

PROTECTION ABROAD TO NATURALIZED CITIZENS.

Section 2,000 of the Revised Statutes of the United States declares that "all naturalized citizens of the United States while in foreign countries are entitled to and shall receive from this Government the same protection of persons and property which is accorded to native-born citizens."

THE RIGHT OF SUFFRAGE.

The right to vote comes from the State, and is a State gift. Naturalization is a Federal right and is a gift of the Union, not of any one State. In nearly one-half of the Union aliens (who have declared intentions) vote and have the right to vote equally with naturalized or native-born citizens. In the other half only actual citizens may vote. (See Table of Qualifications for Voting in each State, on another page.) The Federal naturalization laws apply to the whole Union alike, and provide that no alien may be naturalized until after five years' residence. Even after five years' residence and due naturalization he is not entitled to vote unless the laws of the State confer the privilege upon him, and he may vote in several States six months after landing, if he has declared his intention, under United States law, to become a citizen.

National Republican League of the United States.

President—William W. Tracy. Treasurer—Edward B. Harper, New York. Secretary—Andrew B. Humphrey, Illinois.

The National Republican League of the United States was organized in Chickering Hall, New York City, December 15-17, 1887, by delegates from about 350 Republican clubs of the United States, assembled in national convention, pursuant to a call issued by the Republican Club of New York City. It is composed of the Republican clubs of the United States, organized by States and united in a national organization. Its purpose is "Organization and Education." It aims to enlist recruits for the Republican party, particularly the younger men and the "first voters." National conventions have since been held at Baltimore, Md., February 28, 1889; Nashville, Tenn., March 4, 1890; Cincinnati, O., April 23, 1891; Buffalo, N. Y., September 16, 1892; Louisville, Ky., May 10, 1893; Denver, Colo., June 26, 1894. The eighth annual convention will be held in Cleveland, O., June 19, 1895.

NATIONAL EXECUTIVE COMMITTEE.

National Secretary, Henry Kuhn, Labor Lyceum, 64 East Fourth Street, New York City. Recording Secretary, Alexander Jonas. Treasurer, August Waldinger. Frederick E. Martin, William Reed, Paul Flaeschel, Henry Stahl and George Lieburg.

John Wanters, Boston, Mass., is Secretary of the Grievance Committee.

The party is organized in local organizations known as "sections," such sections existing in twenty-seven States of the Union. Any ten persons in any city or town of the United States may form a section, providing they acknowledge the Platform and Constitution of the Socialist Labor Party and do not belong to any other political party. In places where no section exists, or where none can be formed, any person complying with the aforesaid provisions may become a member-at-large upon application to the National Executive Committee. Sections are not permitted to charge initiation fees. All questions of importance arising within the party are decided by general vote. At each meeting of the section a chairman is elected, and the same rule holds good with all standing committees.

National League for the Protection of American Institutions.

THIS absolutely non-partisan and unsectarian organization was incorporated December 24, 1889. The general secretary has prepared the following statement of the objects of the organization, which are: "To secure constitutional and legislative safeguards for the protection of the common school system and other American institutions, to promote public instruction in harmony with such institutions, and to prevent all sectarian or denominational appropriations of public funds."

As a means of securing the foregoing objects, the following proposed *XVI. Amendment to the Constitution of the United States* has been introduced in both houses of Congress: "No State shall pass any law respecting an establishment of religion, or prohibiting the free exercise thereof, or use its property or credit, or any money raised by taxation, or authorize either to be used, for the purpose of founding, maintaining, or aiding, by appropriation, payment for services, expenses, or otherwise, any church, religious denomination, or religious society, or any institution, society, or undertaking which is wholly or in part under sectarian or ecclesiastical control."

During its five years of judicious, educational and aggressive work the League has secured the withdrawal from the receipt of Government appropriations for the support of denominational educational among the Indians of the Protestant Episcopal, Presbyterian, Methodist Episcopal and Congregational churches, and the Orthodox Friends. It has also received the endorsement of the proposed *XVI. Amendment* by these Churches and by the Baptists, United Presbyterians, Methodist Protestants and the Methodist Episcopal Church, South. It has secured action on the part of the United States Senate, which promises a speedy settlement of the important question of sectarian appropriations for Indian education. The Constitutions of twenty-four States now contain provisions against a division of the Common School Fund and against sectarian appropriations. In the Constitutional Convention of New York State, a notable advance was secured in the assertion of the principles advocated by the League. The various American patriotic orders, representing over 4,000,000 voters, have given the proposed *XVI. Amendment* hearty endorsement, and have adopted the League's platform of principles. The offices of the League are at 1 Madison avenue, New York City, where all communications should be addressed to the General Secretary.

The officers are: *President*, William H. Parsons; *Vice-President*, Dorman B. Eaton; *General Secretary*, James M. King; *Treasurer*, William Fellows Morgan; *Law Committee*, William Allen Butler, Dorman B. Eaton, Cephas Brainerd, Henry E. Howland, and Wheeler H. Peckham.

National Municipal League.

OFFICERS.

President, James C. Carter, New York; *First Vice-President*, Charles Richardson, Philadelphia. *Second Vice-President*, Samuel B. Capen, Boston; *Secretary*, Clinton R. Woodruff, 514 Walnut street, Philadelphia; *Treasurer*, R. Fulton Cutting, New York. *Executive Committee*—Chairman, Charles J. Bonaparte, Baltimore; Matthew Hale, Albany; Herbert Welsh, Philadelphia; Joseph A. Miller, Providence; Louis D. Brandeis, Boston; William G. Low, Brooklyn; Dudley Tibbits, Troy, and the officers.

PRINCIPLES.

The objects of the National Municipal League are as follows:

First—To multiply the numbers, harmonize the methods and combine the forces of all who realize that it is only by united action and organization that good citizens can secure the adoption of good laws and the selection of men of trained ability and proved integrity for all municipal positions, or prevent the success of incompetent or corrupt candidates for public office.

Second—To promote the thorough investigation and discussion of the conditions and details of civic administration, and of the methods for selecting and appointing officials in American cities, and of laws and ordinances relating to such subjects.

Third—To provide for such meetings and conferences and for the preparation and circulation of such addresses and other literature as may seem likely to advance the cause of good city government.

The League is composed of associations formed in cities of the United States, and having as an object the improvement of municipal government. It has no connection with State or National parties or issues, and confines itself strictly to municipal affairs. Any association belonging to the League may withdraw at any time.

The Board of Delegates have power to decide upon the qualifications of its members, to appoint all necessary officers and employes, and to raise funds for all proper expenses; but there are no dues or assessments, and no association is liable for any sums except such as it may, from time to time, voluntarily agree to contribute.

AFFILIATED ASSOCIATIONS.

American Bar Association.

THIS association of leading lawyers of the United States was organized in 1878. The present officers are as follows: *President*—James C. Carter, New York City. *Secretary*—John Hinkley, 215 North Charles Street, Baltimore. *Treasurer*—Franci Rawle, Philadelphia. *Executive Committee*—President, Secretary and Treasurer, *ex officio*; Thoma M. Cooley, Ann Arbor, Mich.; George A. Mercer, Savannah; Alfred Hemenway, Boston, and Bradle G. Schley, Milwaukee. Each State is represented by one Vice-President. The present membership is about 1,200.

OFFICERS AND PLATFORM OF THE AMERICAN PROTECTIVE ASSOCIATION.

OFFICERS OF THE SUPREME COUNCIL.

Past Supreme President and Founder—H. F. Bowers, Clinton, Ia.

Supreme President—W. J. H. Traynor, Detroit. | Supreme Treasurer—H. M. Stack, So. Superior, Wis.
Sup. Vice-President—Adam Fawcett, Columbus, O. | Supreme Secretary—C. T. Beatty, E. Saginaw, Mich.

The above were elected at the annual convention held at Des Moines, Ia., May 4, 1894. The next annual meeting will be held at Milwaukee, Wis., in May, 1895.

The founder of the A. P. A. is H. F. Bowers, of Clinton, Ia., and the association was organized at that place, March 13, 1887. It is a secret order, its members being bound by oath not to reveal its proceedings. It claims (according to the report of the Supreme Secretary at the annual meeting in May, 1894) a membership of nearly 2,000,000 throughout the States and Territories, and in Canada, of which about a half million are members recently added.

PLATFORM OF THE A. P. A.

The following official declaration of principles was made at the annual meeting at Des Moines, in May, 1894:

Loyalty to true Americanism, which knows neither birthplace, race, creed, nor party, is the first requisite for membership in the American Protective Association.

The American Protective Association is not a political party and does not control the political affiliation of its members, but it teaches them to be intensely active in the discharge of their political duties in or out of party lines, because it believes that all problems confronting our people will be best solved by a conscientious discharge of the duties of citizenship by every individual.

While tolerant of all creeds, it holds that subjection to and support of any ecclesiastical power not created and controlled by American citizens and which claims equal if not greater sovereignty than the Government of the United States of America is irreconcilable with American citizenship. It is, therefore, opposed to the holding of offices in National, State or municipal government by any subject or supporter of such ecclesiastical power.

We uphold the Constitution of the United States and no portion of it more than its guaranty of religions liberty, but we hold the religious liberty to be guaranteed to the individual and not to mean that under its protection any un-American ecclesiastical power can claim absolute control over the education of children growing up under the Stars and Stripes. We consider the non-sectarian public school the bulwark of American institutions, the best place for the education of American children. To keep them such we protest against the employment of subjects of any un-American ecclesiastical power as officers or teachers of our public schools.

We condemn the support out of the public Treasury by direct appropriation, or by contract, of any sectarian school, reformatory or other institution not owned and controlled by public authority.

Believing that exemption from taxation is equal to a grant of public funds, we demand that no real or personal property be exempt from taxation the title to which is not vested in the National or State governments or in any of their subdivisions.

We protest against the enlistment in the United States army, navy, or the militia of any State of any person not an actual citizen of the United States.

We demand for the protection of our citizen laborers the prohibition of the importation of pauper labor and the restriction of all immigration to persons who can show their ability and honest intention to become self-supporting American citizens.

We demand the change of naturalization laws by a repeal of the act authorizing the naturalization of minors without a previous declaration of intention, and by providing that no alien shall be naturalized or permitted to vote in any State in the Union who cannot speak the language of the land, and who cannot prove seven years' continuous residence in this country from the date of his declaration of intention.

We protest against the gross negligence and laxity with which the judiciary of our land administers the present naturalization laws and against the practice of naturalizing aliens at the expense of candidates and committees as the most prolific cause of the present prostitution of American citizenship to the basest uses.

We demand that all hospitals, asylums, reformatories or other institutions in which people are under restraint be at all times subject to public inspection, whether they be owned or by private corporations or individuals.

We demand that all National or State legislation affecting financial, commercial, or industrial interests be general in character and in no instance in favor of any one section of the country or of any one class of people.

OATH TAKEN BY A NEW MEMBER.

The following has been published as the oath taken by a member upon being admitted to the association:

I do most solemnly promise and swear that I will not allow any one a member of the Roman Catholic Church to become a member of this order, I knowing him to be such; that I will use my influence to promote the interests of all Protestants, everywhere in the world; that I will not employ a Roman Catholic in any capacity, if I can procure the services of a Protestant; that I will not aid in building or in maintaining, by my resources, any Roman Catholic church or institution of their sect or creed whatsoever, but will do all in my power to retard and break down the power of the Pope; that I will not enter into any controversy with a Roman Catholic upon the subject of this order, nor will I enter into any agreement with a Roman Catholic to strike or create a disturbance whereby the Roman Catholic employes may undermine and substitute the Protestant; that in all grievances I will seek only Protestants and counsel with them, to the exclusion of all Roman Catholics, and will not make known to them anything of any nature matured at such conferences; that I will not countenance the nomination in any caucus or convention of a Roman Catholic for any office in the gift of the people, and that I will not vote for nor counsel others to vote for a Roman Catholic, but will vote only for a Protestant; that I will endeavor at all times to place the political positions of this Government in the hands of Protestants. (Repeat.) To all of which I do most solemnly promise and swear, so help me God. Amen.

Patriotic Order Sons of America.

OFFICERS OF THE NATIONAL CAMP.

National President—James A. Kilton, Denver, Col. National Vice-President—Isham Sedgwick, Richmond, Ind. National Master of Forms—M. S. Evans, North Topeka, Kan. National Secretary—Frederick E. Stees, 524 North Sixth Street, Philadelphia, Pa. National Treasurer—John H. Hoñer, Lebanon, Pa.

This order was organized in Philadelphia in 1847, and had extended through several Eastern and Southern States when the Civil War broke out. After the restoration of peace the order was reorganized, and is now established in nearly every State and Territory, with a membership of about 100,000.

The order has for its object "the inculcation of pure American principles and reverence for American institutions; the cultivation of fraternal affection among American freemen; the opposition to foreign interference with State interests in the United States of America, and to any form of organized disregard of American laws and customs; the preservation of the Constitution of the United States, and the advancement of our free public school system. Its immediate benefits are home benevolence, the care of its sick, the burial of its dead, the protection of and assistance to all connected with it who may be in need."

It is non-sectarian and non-political, and in the choice of church and party every member is free to exercise his individual right; but his duty is to insist that the acts of that church and party shall always be so directed as to promote our country's welfare and protect its institutions.

To be a member, a person must have been born on the soil or within the jurisdiction of the United States, and "must believe in the existence of a Supreme Being as the Creator and Preserver of the Universe." Its motto is, "God, our Country, and our Order."

The Single Tax.

THE following has been adopted as the official statement of the single tax principle by the advocates thereof, Henry George, Chairman:

We assert as our fundamental principle the self-evident truth enunciated in the Declaration of American Independence, that all men are created equal and are endowed by their Creator with certain inalienable rights.

We hold that all men are equally entitled to the use and enjoyment of what God has created and of what is gained by the general growth and improvement of the community of which they are a part. Therefore, no one should be permitted to hold natural opportunities without a fair return to all for any special privilege thus accorded to him, and that that value which the growth and improvement of the community attaches to land should be taken for the use of the community; that each is entitled to all that his labor produces; therefore, no tax should be levied on the products of labor.

To carry out these principles, we are in favor of raising all public revenues for National, State, county, and municipal purposes by a single tax upon land values, irrespective of improvements, and all the obligations of all forms of direct and indirect taxation.

Since in all our States we now levy some tax on the value of land, the single tax can be instituted by the simple and easy way of abolishing, one after another, all other taxes now levied and commensurately increasing the tax on land values until we draw upon that one source for all expenses of government, the revenue being divided between local governments, State government, and the federal government, as the revenue from direct tax is now divided between the local and State governments, or by a direct assessment being made by the general government upon the States and paid by them from revenues collected in this manner.

The single tax would:

1st. Take the weight of taxation off the agricultural districts where land has little or no value irrespective of Improvements and put it on towns and cities where bare land rises to a value of millions of dollars per acre.

2d. Dispense with a multiplicity of taxes and a horde of tax-gatherers, simplify government and greatly reduce its cost.

3d. Do away with the fraud, corruption and gross inequality inseparable from our present methods of taxation, which allow the rich to escape while they grind the poor.

4th. Give us with all the world as perfect freedom of trade as now exists between the States of our Union, thus enabling our people to share through free exchanges in all the advantages which nature has given to other countries, or which the peculiar skill of other peoples has enabled them to attain. It would destroy the trusts, monopolies and corruptions which are the outgrowth of the tariff.

5th. It would, on the other hand, by taking for public use that value which attaches to land by reason of the growth and improvement of the community, make the holding of land unprofitable to the mere owner and profitable only to the user. It would thus make it impossible for speculators and monopolists to hold natural opportunities unused or only half used, and would throw open to labor the illimitable field of employment which the earth offers to man. It would thus solve the labor problem, do away with involuntary poverty, raise wages in all occupations to the full earnings of labor, make overproduction impossible until all human wants are satisfied, render labor-saving inventions a blessing to all, and cause such an enormous production and such an equitable distribution of wealth as would give to all comfort, leisure and participation in the advantages of an advancing civilization.

With respect to monopolies other than monopoly of land, we hold that when free competition becomes impossible, as in telegraphs, railroads, water and gas supplies, etc., such business becomes a proper social function which should be controlled and managed by and for the whole people concerned through their proper government, local, State or national, as may be.

* The House of Representatives, July 28, 1894, passed a bill admitting New Mexico to the Union as a State. In the Senate no action was taken, but it is expected that the bill will be taken up at the next session.

† The House of Representatives, December 13, 1893, passed a bill admitting Utah. The Senate passed the bill July 10, 1894.

‡ The House of Representatives, December 15, 1893, passed a bill admitting Arizona, by a vote of yeas, 187; nays, 62 (not voting, 104). In the Senate the bill was referred to the Committee on Territories, which is expected to report at the next session.

§ The Indian Territory has as yet no organized Territorial government.

The Admission of Utah.

The following is the text of the conditions provided in the bill for the admission of Utah as a State of the Union, passed by the House of Representatives, December 13, 1893, and the Senate, July 10, 1894.

After providing for a convention of delegates to adopt a state constitution and the submission of the constitution to the people for ratification in November, 1895, the bill further provided :

First.—That the perfect toleration of religious sentiment shall be secured, and that no inhabitant of said State shall ever be molested in person or property on account of his or her mode of religious worship ; provided that polygamous or plural marriages are forever prohibited.

Second.—That the people inhabiting said proposed State do agree and declare that they forever disclaim all right and title to the unappropriated public lands lying within the boundaries thereof, and to all lands lying within said limits owned or held by any Indian or Indian tribes ; and that until the title thereof shall have been extinguished by the United States the same shall be and remain subject to the disposition of the United States, and said Indian lands shall remain under the absolute jurisdiction and control of the Congress of the United States ; that the lands belonging to citizens of the United States residing without the said State shall never be taxed at a higher rate than the lands belonging to the residents thereof ; that no taxes shall be imposed by the State on lands or property therein belonging to, or which may hereafter be purchased by the United States or reserved for its use ; but nothing herein, or in the ordinance herein provided for, shall preclude the said State from taxing, as other lands are taxed, any lands owned or held by any Indian who has severed his tribal relations, and has obtained from the United States or from any person a title thereto by patent or other grant, save or except such lands as have been or may be granted to any Indian or Indians under any act of Congress containing a provision exempting the lands thus granted from taxation ; but said ordinance shall provide that all such lands shall be exempt from taxation by said State so long and to such extent as such act of Congress may prescribe.

Third.—That the debts and liabilities of said Territory, under authority of the Legislative Assembly thereof, shall be assumed and paid by such State.

Fourth.—That provision shall be made for the establishment and maintenance of a system of public schools, which shall be open to all the children of said State and free from sectarian control.

Presidential Elections.

FROM 1789 TO 1892.

AGGREGATE POPULAR VOTE AND ELECTORAL VOTE FOR CANDIDATES FOR PRESIDENT AND VICE-PRESIDENT AT EACH ELECTION.

NOTE.—There is, properly speaking, no popular vote for President and Vice-President; the people vote for electors, and those chosen in each State meet therein and vote for the candidates for President and Vice-President. The record of any popular vote for Electors prior to 1824 is so meagre and imperfect that a compilation would be useless. In most of the States, for more than a quarter century following the establishment of the Government, the State Legislatures "appointed" the Presidential electors, and the people therefore voted only indirectly for them, their choice being expressed by their votes for members of the Legislature. In this tabulation only the aggregate electoral votes for candidates for President and Vice-President in the first nine quadrennial elections appear.

ELECTORAL VOTES.

1789. Previous to 1804, each elector voted for two candidates for President. The one who received the largest number of votes was declared President, and the one who received the next largest number of votes was declared Vice-President. The electoral votes for the first President of the United States were: George Washington, 69; John Adams, of Massachusetts, 34; John Jay, of New York, 9; R. H. Harrison, of Maryland, 6; John Rutledge, of South Carolina, 6; John Hancock, of Massachusetts, 4; George Clinton, of New York, 3; Samuel Huntington, of Connecticut, 2; John Milton, of Georgia, 2; James Armstrong, of Georgia; Benjamin Lincoln, of Massachusetts, and Edward Telfair, of Georgia, 1 vote each. Vacancies (votes not cast), 4. George Washington was chosen President and John Adams Vice-President.

1792. George Washington, Federalist, received 132 votes; John Adams, Federalist, 77; George Clinton, of New York, Republican (a), 50; Thomas Jefferson, of Virginia, Republican, 4; Aaron Burr, of New York, Republican, 1 vote. Vacancies, 3. George Washington was chosen President and John Adams Vice-President.

1796. John Adams, Federalist, 71; Thomas Jefferson, Republican, 68; Thomas Pinckney, of South Carolina, Federalist, 59; Aaron Burr, of New York, Republican, 30; Samuel Adams, of Massachusetts, Republican, 15; Oliver Ellsworth, of Connecticut, Independent, 11; George Clinton, of New York, Republican, 7; John Jay, of New York, Federalist, 5; James Iredell, of North Carolina, Federalist, 3; George Washington, of Virginia; John Henry, of Maryland, and S. Johnson, of North Carolina, all Federalists, 2 votes each; Charles Cotesworth Pinckney, of South Carolina, Federalist, 1 vote. John Adams was chosen President and Thomas Jefferson Vice-President.

1800. Thomas Jefferson, Republican, 73; Aaron Burr, Republican, 73; John Adams, Federalist, 65; Charles C. Pinckney, Federalist, 64; John Jay, Federalist, 1 vote. There being a tie vote for Jefferson and Burr, the choice devolved upon the House of Representatives. Jefferson received the votes of ten States, which, being the largest vote cast for a candidate, elected him President. Burr received the votes of four States, which, being the next largest vote, elected him Vice-President. There were 2 blank votes.

1804. The Constitution of the United States having been amended, the electors at this election voted for a President and a Vice-President, instead of for two candidates for President. The result was as follows: For President, Thomas Jefferson, Republican, 162; Charles C. Pinckney, Federalist, 14. For Vice-President, George Clinton, Republican, 162; Rufus King, of New York, Federalist, 14. Jefferson was chosen President and Clinton Vice-President.

1808. For President, James Madison, of Virginia, Republican, 122; Charles C. Pinckney, of South Carolina, Federalist, 47; George Clinton, of New York, Republican, 6. For Vice-President, George Clinton, Republican, 113; Rufus King, of New York, Federalist, 47; John Langdon, of New Hampshire, 9; James Madison, 3; James Monroe, 3. Vacancy, 1. Madison was chosen President and Clinton Vice-President.

1812. For President, James Madison, Republican, 128; De Witt Clinton, of New York, Federalist, 89. For Vice-President, Elbridge Gerry, of Massachusetts, Republican, 131; Jared Ingersoll, of Pennsylvania, Federalist, 86. Vacancy, 1. Madison was chosen President and Gerry Vice-President.

1816. For President, James Monroe, of Virginia, Republican, 183; Rufus King, of New York, Federalist, 34. For Vice-President, Daniel D. Tompkins, of New York, Republican, 183; John Eager Howard, of Maryland, Federalist, 22; James Ross, of Pennsylvania, 5; John Marshall, of Virginia, 4; Robert G. Harper, of Maryland, 3; Vacancies, 4. Monroe was chosen President and Tompkins Vice-President.

1820. For President, James Monroe, of Virginia, Republican, 231; John Q. Adams, of Massachusetts, Republican, 1. For Vice-President, Daniel D. Tompkins, Republican, 218; Richard Stockton, of New Jersey, 8; Daniel Rodney, of Delaware, 4; Robert G. Harper, of Maryland, and Richard Rush, of Pennsylvania, 1 vote each. Vacancies, 3. James Monroe was chosen President and Daniel D. Tompkins Vice-President.

* The candidates starred were elected. (a) The first Republican Party is claimed by the present Democratic Party as its progenitor. (b) No candidates having a majority of the electoral vote, the House of Representatives elected Adams. (c) Candidate of the Anti-Masonic Party. (d) There being no choice, the Senate elected Johnson. (e) Eleven Southern States, being within the belligerent territory, did not vote. (f) Three Southern States disfranchised. (g) Horace Greeley died after election, and Democratic electors scattered their vote. (h) There being a dispute over the electoral votes of Florida, Louisiana, Oregon and South Carolina, they were referred by Congress to an electoral commission composed of eight Republicans and seven Democrats, which, by a strict party vote, awarded 185 electoral votes to Hayes and 184 to Tilden. (i) Free Democrat.

* Jackson called himself a South Carolinian and his biographer, Kendall, recorded his birthplace in Lancaster County, S. C., but Parton has published documentary evidence to show that Jackson was born in Union County, N. C., less than a quarter mile from the South Carolina line. † The Democratic party of to-day claims lineal descent from the first Republican party and President Jefferson as its founder. ‡ Political parties were disorganized at the time of the election of John Quincy Adams. He claimed to be a Republican, but his doctrines were decidedly Federalistic. The opposition to his administration took the name of Democrats and elected Jackson President.

More details of the lives of the Presidents were given in THE WORLD ALMANAC for 1894, pages 118-119.

The Presidential Succession.

THE Presidential succession is fixed by chapter 4 of the acts of the Forty-ninth Congress, first session. In case of the removal, death, resignation or inability of both the President and Vice-President, then the Secretary of State shall act as President until the disability of the President or Vice-President is removed or a President is elected. If there be no Secretary of State, then the Secretary of the Treasury will act; and the remainder of the order of succession is: The Secretary of War, Attorney-General, Postmaster-General, Secretary of the Navy and Secretary of the Interior. The acting President must, upon taking office, convene Congress, if not at the time in session, in extraordinary session, giving twenty days' notice. This act applies only to such cabinet officers as shall have been appointed by the advice and consent of the Senate and are eligible under the Constitution to the Presidency.

Two vacancies are to be filled.

Society of Colonial Wars.

OFFICERS OF THE GENERAL SOCIETY.

Governor-General, Frederick J. de Peyster, New York; *Deputy Governors-General*, Charles H. Murray, for New York; James Millin, for Pennsylvania; Gen. Joseph L. Brent, for Maryland; Gen. William F. Draper, for Massachusetts; Rear-Admiral Francis A. Roe, U. S. N., for the District of Columbia; *Secretary-General*, Howland Pell, 4 Warren Street, New York; *Deputy Secretary-General*, Edward Trenchard, 56 Wall Street, New York; *Treasurer-General*, Satterlee Swartwout, Stamford, Ct.; *Deputy Treasurer-General*, S. Victor Constant, New York; *Registrar-General*, George Norbury Mackenzie, Baltimore; *Historian-General*, Dr. Francis E. Abbot, Cambridge, Mass.; *Chaplain-General*, Rev. C. Ellis Stevens, LL. D., D. C. L., Philadelphia; *Surgeon-General*, Samuel Clagett Chew, M. D., Baltimore.

The Society of Colonial Wars was instituted in 1892 to "perpetuate the memory of these events and of the men who, in military, naval, and civil positions of high trust and responsibility, by their acts or counsel assisted in the establishment, defence, and preservation of the American Colonies, and were in truth the founders of this nation. With this end in view it seeks to collect and preserve manuscripts, rolls, and records; to provide suitable commemorations or memorials relating to the American Colonial period, and to inspire in its members the paternal and patriotic spirit of their forefathers, and in the community respect and reverence for those whose public services made our freedom and unity possible." Eligibility is confined to an adult male descendant of an ancestor who fought in battle under Colonial authority, from the settlement of Jamestown, Va., in 1607, to the battle of Lexington, in 1775, or who served as Governor, Deputy-Governor, Lieutenant-Governor, Member of the Council, or as a military, naval, or marine officer in the service of the Colonies, or under the banner of Great Britain, or was conspicuous in military, official, or legislative life during that period. The New York Society was the original society, and State societies have also been organized in Pennsylvania, Maryland, Massachusetts, New Jersey, New Hampshire, Connecticut, and the District of Columbia.

Naval Order of the United States.

THE Naval Order of the United States was originated in Massachusetts by three gentlemen interested in the naval arm of service, who met on July 4, 1890, at Boston, and established a temporary organization which was made permanent on November 10 of the same year and incorporated November, 1894. The original title, that of "Naval Commandery of the United States of America," was changed in June, 1893, to "Naval Legion of the United States," the society organized under the previous name having disbanded. In October, 1893, the Legion ratified the constitution adopted by the General Commandery and became the Massachusetts Commandery of the Naval Order of the United States. Dr. Charles C. Philbrook, of Boston, was elected Commander at the first meeting in November, 1890, and served until November, 1893, when he was succeeded by Lieutenant William M. Paul, of Boston. The General Commandery was established June 19, 1893, at a congress held in Faneuil Hall, Boston, when was adopted a constitution, with a preamble which stated that: *Whereas*, Many of the principal battles and famous victories of the several wars in which the United States have participated were fought and achieved by the naval forces; *Whereas*, It is well, and fitting that the illustrious deeds of the great naval commanders, their companion officers in arms, and their subordinates in the wars of the United States should be forever honored and respected; *Therefore*, Entertaining the most exalted admiration for the undying achievements of the navy, we, the survivors and descendants of participants of those memorable conflicts, have joined ourselves together and have instituted the "Naval Order of the United States," that we may transmit to our latest posterity their glorious names and memories, and to encourage research and publication of data pertaining to naval art and science, and to establish a library in which to preserve all documents, rolls, books, portraits, and relics relating to the navy and its heroes at all times.

The companions of the Order consist of three classes: 1. Commissioned officers, midshipmen, and naval cadets in actual service in the United States Navy, Marine Corps, Revenue, or Privateer services during the wars or in face of the enemy in any engagement in which the navy of the United States has participated, and who resigned or were discharged with honor, or who are still in the service and who at no time have borne arms against the United States, or in case of their decease then their eldest lineal male descendants.

2. Lineal male descendants of commissioned officers, midshipmen, and naval cadets who served as aforesaid.

3. Enlisted men who have received the United States Naval medal for bravery in the face of the enemy.

The officers of the Naval Order, elected at the "first triennial congress," June 19, 1893, are: *General Commander*, John Codman Soley, U. S. N., Boston, Mass.; *Vice-General Commanders*, John Lorimer Worden, U. S. N., Washington, D. C.; Francis Asbury Roe, U. S. N., Washington, D. C.; Henry Clay Taylor, U. S. N., Washington, D. C.; *General Recorder*, Frank William Nichols, U. S. N., Boston, Mass.; *General Treasurer*, Thomas Amory De Blois, M. D., late U. S. N., Boston, Mass.; *General Registrar*, Charles Calhoun Philbrook, late U. S. M. C., Boston, Mass.; *General Historian*, Theodoros Bailey M. Mason, U. S. N., Washington, D. C.; *Assistant General Recorder*, C. Frederick Bacon Philbrook, Boston, Mass.; *Assistant General Treasurer*, William Lithgow Willey, Boston, Mass.; *Assistant General Registrar*, Franklin Thomason Beatty, M. D., Boston, Mass.; *Assistant General Historian*, Arthur Wellington Clark, M. D., Boston, Mass.; *General Chaplain*, Rev. Minot Judson Savage, Boston, Mass.; *General Council*, Horatio Bernard Lowry, U. S. M. C., Washington, D. C.; William Henry Harris, U. S. N., Navy Yard, Boston, Mass.; John Fairfield Merry, U. S. N., U. S. S. "Enterprise," Com. Jacob William Miller, late U. S. N., New York, N. Y.; Theodore Strong Thompson, U. S. N., Navy Yard, Boston, Mass.; Francis Henry Harrington, U. S. M. C., Navy Yard, Boston, Mass.; Francis Burke Allen, late U. S. N., Hartford, Ct.; Thomas Loring Churchill, late U. S. N., Boston, Mass.; Richard Kent Gatley, late U. S. N., Portland, Me.

The second triennial congress of the Order will be held on October 4, 1895, at Boston, Mass. There are at present commanderies in Massachusetts, Pennsylvania, New York, New Jersey, District of Columbia, and New Hampshire.

Society of the Cincinnati.

GENERAL OFFICERS.

<i>Vice-President-General and Acting President-General</i>	Hon. Robert Milligan McLane, Md.
<i>Secretary-General</i>	Hon. Asa Bird Gardiner, LL. D., R. I.
<i>Treasurer-General</i>	Mr. John Schuyler, C. E., N. Y.
<i>Assistant Secretary-General</i>	Mr. Thomas Pinckney Lowndes, S. C.
<i>Assistant Treasurer-General</i>	Mr. Henry Thayer Drowne, R. I.

The historic and patriotic Order of the Cincinnati was founded by the American and French officers at the cantonments of the continental army on the Hudson at the close of hostilities in the War of the Revolution for American Independence in May, 1783.

In forming the society it was declared that, "To perpetuate, therefore, as well the remembrance of this vast event as the mutual friendships which have been formed under the pressure of common danger, and, in many instances, cemented by the blood of the parties, the officers of the American army do hereby, in the most solemn manner, associate, constitute, and combine themselves into one Society of Friends, to endure as long as they shall endure, or any of their eldest male posterity, and in failure thereof the collateral branches who may be judged worthy of becoming its supporters and members."

For convenience, thirteen State societies were formed, and one in France, under the direct patronage of Louis XVI. Upon the roll of original members appeared the names of all the great historic military and naval characters of the Revolution, and upon the roll of honorary members elected for their own lives only, appeared many of the signers of the Declaration of Independence.

THE RIGHT TO MEMBERSHIP.

All continental officers who had served with honor and resigned after three years' service as officers, or who had been rendered supernumerary and honorably discharged, in one of the several reductions of the American army, or who had continued to the end of the war, and all French officers who had served in the co-operating army under Count d'Estaing, or auxiliary army under Count de Rochambeau, and held or attained the rank of colonel for such services, or who had commanded a French fleet or ship of war on the American coast, were entitled to become original members, and upon doing so were required to contribute a month's pay.

STATE SOCIETIES.

Several State societies became dormant because the members had to emigrate to the lands given them for their services, west of the Alleghanies, and with broken health and ruined fortunes begin life anew in failure of Congress to keep its promises as to half pay.

There now remain eight State societies—viz., those of Massachusetts, Rhode Island, Connecticut (revived 1893), New York, New Jersey, Pennsylvania, Maryland, and South Carolina, and the one in France, which was dispersed at the Reign of Terror in 1793, is now being re-established under the acting presidency of M. Le Marquis de Rochambeau.

Membership descends to the eldest lineal male descendant, if judged worthy, and, in failure of direct male descent, to male descendants through intervening female descendants.

The general society is composed of the general officers and five delegates from each State society, and meets triennially. In 1854 it ruled that proper descendants of Revolutionary officers who were entitled to original membership, but who never could avail themselves of it, are qualified for hereditary membership, if found worthy, on due application.

THE society of the "Sons of the Revolution" was organized in New York in 1875 by John H. Austin Stevens, in conjunction with other patriotic gentlemen of Revolutionary ancestry. The New York society was instituted February 22, 1876; reorganized December 3, 1883, and incorporated May 3, 1884, to "keep alive among ourselves and our descendants the patriotic spirit of the men who, in military, naval, or civil service, by their acts or counsel, achieved American independence; to collect and secure for preservation the manuscript rolls, records, and other documents relating to the war of the Revolution, and to promote intercourse and good feeling among its members now and hereafter." Eligibility to membership is confined to male descendants, above the age of twenty-one years, from an ancestor who as either a military, naval, or marine officer, soldier, sailor, or marine, or official in the service of any one of the thirteen original colonies or States, or of the National Government, representing or composed of those colonies or States, assisted in establishing American independence during the war of the Revolution between the 19th day of April, 1775, when hostilities commenced, and the 19th day of April, 1783, when they were ordered to cease.

The general society of the "Sons of the Revolution" was organized by delegates from the then existing State societies in 1890. There are now twenty-one State societies, and others are in process of organization in Montana, Tennessee, Wisconsin, Texas, Virginia, Kentucky, and Vermont, making twenty-eight in all. Communications on the matter of the organization of societies in other States by proper descendants of men of the Revolution can be addressed to John Hone, chairman of the organization committee, 62 New Street, New York City.

Society of Tammany, or Columbian Order.

Grand Sachem, Thomas F. Gilroy; *Sachems*, Hugh J. Grant, Richard Croker, John J. Gorman, Henry D. Purroy, William H. Clark, John McQuade, Charles Welde, Bernard F. Martin, George B. McClellan, W. Bourke Cockran, Charles E. Simmons, Thomas L. Feitner, J. Sergeant Cram; *Secretary*, John B. McGoldrick; *Treasurer*, Peter F. Meyer; *Saganore*, William H. Dobbs; *Wiskinkie*, Daniel M. Donegan.

This organization was formed in 1786, being the effect of a popular movement in New York, having primarily in view a counterweight to the so-called "aristocratic" Society of the Cincinnati. It was essentially anti-Federalist or Democratic in its character, and its chief founder was William Mooney, an upholsterer and a native-born American of Irish extraction. It took its first title from a noted ancient wise and friendly chief of the Delaware tribe of Indians, named Tammany, who had, for the want of a better subject, been canonized by the soldiers of the Revolution as the American patron saint. The first meeting was held May 12, 1789. The act of incorporation was passed in 1805. The Grand Sachem and thirteen Sachems were designed to typify the President and the Governors of the thirteen original States. William Mooney was the first Grand Sachem. The society is nominally a charitable and social organization, and is distinct from the general committee of the Tammany Democracy, which is a political organization.

The National society of "Sons of the American Revolution" was organized in New York April 30, 1889, and chartered in Connecticut in 1890. Its purposes are the same as those of the older organization, the "Sons of the Revolution." State societies exist in twenty-seven States and the District of Columbia. A California society of descendants of Revolutionary patriots, entitled "Sons of Revolutionary Sires," organized July 4, 1876, having reorganized and changed its name in 1889, has been admitted to membership. There are two organizations of a New York society of "Sons of the American Revolution," one, a local patriotic society, having its principal office in Queens County, chartered by the State of New York September 26, 1889, and having no connection with the general society; the other subsequently formed and located in the city of New York, with Hon. Chauncey M. Depew as President. A formal movement by this society and the "Sons of the Revolution" toward a union was attempted in 1892, but was not successful. But as the motives of the two societies are the same, it is the general belief that they will eventually become one organization. The following is a list of the State societies organized, their membership, presidents, and secretaries, as reported in the National Year Book of the society recently published:

Aztec Club of 1847.

OFFICERS.

President, General John Porter Hatch, U. S. A., New York City; *Vice-President and Treasurer*, Colonel De Lancey Floyd-Jones, U. S. A., New York City; *Secretary*, General Horatio Gates Gibson, U. S. A., Washington, D. C.; *Assistant Secretary*, Mark Burckle Hatch, Washington, D. C.

This society, originally composed of officers of the United States armies who served in the war with Mexico, was formed in the City of Mexico in 1847, "with a view to cherish the memories and keep alive the traditions that cluster about the names of those officers who took part in the Mexican War." Membership is confined to officers of the Army, Navy, and Marine Corps who served in the war or their blood relatives. Each primary member may nominate as his successor his son or a blood relative, who during the life of the primary member is known as associate-member, and on the death of the former is entitled, as his representative, to full membership. The headquarters of the organization are in Washington, D. C. The address of the Assistant Secretary is Mark B. Hatch, Treasury Department. There are 235 members.

Medal of Honor Legion.

The Legion is composed of officers and enlisted men of the Union Army who, during the Civil War, were awarded Medals of Honor for special acts of bravery and devotion. Five hundred of these medals are worn by veterans of the army, and two hundred by naval veterans. The fifth annual convention was held at the Holland House, New York City, October 22, 1894. The following were the officers elected: *Commander*, General C. H. T. Collis, New York City; *Senior Vice-Commander*, Colonel Robert Q. Orr, Philadelphia; *Junior Vice-Commander*, Cornelius Cronin, New York; *Chaplain*, L. P. Norton, Homer, N. Y.; *Adjutant*, John D. Terry. The membership of the Legion is now 202.

Societies of the War of 1812.

SOCIETY OF THE WAR OF 1812 IN THE STATE OF NEW YORK.

INSTITUTED as a military society by the veterans of the War of 1812, on January 3, 1826, in the city of New York, and incorporated under the laws of the State of New York by the surviving veteran members, January 8, 1827.

The officers are: *President*, Rev. Morgan Dix, D. D., D. C. L.; *Vice-President*, Hon. Asa Bird Gardiner, LL. D.; *Secretary*, Henry Chauncey, Jr.; *Treasurer*, Governor Mather Smith, M. D. The Board of Directors includes the officers and Lieutenant Michael Moore, U. S. A. (retired), and Colonel Thomas Morgan Sturtevant, both of the War of 1812, and Hon. James M. Varnum, James Mortimer Montgomery, and David Banks. The office of the Secretary is No. 51 Wall Street, New York City.

The original members comprise those who actually served in the military or naval forces of the United States during the War of 1812, or on vessels other than merchant ships which sailed under commissions of letters of marque and reprisal from the United States in that war.

Eligibility to hereditary membership is confined to descendants of commissioned officers who actually served in the War of 1812, and descendants of former members of the society in the State of New York, and of other military societies of 1812.

The purposes of the order are to inspire among the members and among the American people the patriotic spirit of the men who, during the War of 1812, defended their country against hostile encroachments on its rights and interests and caused its sovereignty and independence to be respected; to inculcate and maintain the great principles of the laws of nations for which they contended; to collect and preserve the manuscript rolls, records, and other documents relating to that war, and to commemorate the land and naval victories of the American arms in that war; to undertake and assist in the erection of proper memorials thereof; to perpetuate the mutual friendships formed in that war under the pressure of common danger, and to promote fellowship among the members of every degree.

SOCIETIES OF THE WAR OF 1812 IN OTHER STATES.

In 1857 an association was formed in Philadelphia by veterans of the war, which was known and designated "The Pennsylvania Association of the Defenders of the Country in the War of 1812." It was inactive for a number of years until 1890, when the name of the association was changed to "The Society of the War of 1812," and on November 19, 1892, it was incorporated under the laws of Pennsylvania. The present officers are: *President*, John Cadwalader, Philadelphia, Pa.; *Vice-Presidents*, Rear-Admiral Roe, U. S. N.; Colonel M. I. Ludington, U. S. A.; John Biddle Porter; *Registrar*, A. Jackson Reilly; *Secretary*, Peter Stuart Hay.

In April, 1894, a national society was formed by representatives of the Pennsylvania Society and other persons, descendants of American soldiers and sailors who participated in the War of 1812, and under its jurisdiction State societies have been organized in Maryland, Connecticut, and Massachusetts.

These societies admit to membership the proper descendants of all military and naval participants in the war on the American side. Eligibility to membership in the New York society, with which those societies are not at present in affiliation, is restricted to descendants of commissioned officers. The officers of the general society, elected to serve for two years, are: *President-General*, John Cadwalader, of Pennsylvania; *Vice-Presidents-General*, Colonel John Biddle Porter, of Pennsylvania; Commander Felix McCurley, of Maryland; George Bliss Sanford, U. S. A., of Connecticut; Captain William L. Willey, of Massachusetts; *Secretary-General*, Captain Henry H. Bellas, U. S. A., of Pennsylvania; *Assistant Secretary-General*, Charles F. B. Philbrook, of Massachusetts; *Treasurer-General*, Reynold W. Wilcox, M. D., of New York; *Registrar-General*, Albert K. Hadel, of Maryland; *Surgeon-General*, General Charles Sutherland, U. S. A.; *Judge-Advocate-General*, Charles H. Murray, of New York; *Chaplain-General*, Rev. Alexander Hamilton, of Connecticut.

Association for Preservation of Virginia Antiquities.

This association of Virginia women was organized in 1888 for the purpose indicated by its name, under the presidency of Mrs. Fitz Hugh Lee. The association now has six branches in different parts of Virginia. Its badge bears on one side a representation of the three ships, "Susan Constant," "God Speed," and "Discovery," which bore the first colonists to Jamestown, and around them the inscription *Dei Gratia Virginia Conditæ, 1807*," and on the other side "A. P. V. A., 1888." The present officers of the society are: *President*, Mrs. Joseph Bryan; *Vice-Presidents*, Mrs. Joseph Anderson, Mrs. E. B. Addison, Mrs. E. M. Ball, Mrs. J. S. Wellford, Mrs. C. W. Coleman, Mrs. J. L. M. Curry, Miss Mary Galk, Mrs. Tazewell; *Corresponding Secretary*, Mrs. G. W. Bagley; *Recording Secretary*, Mrs. James Lyons; *Treasurer*, Mrs. John Lightfoot. In addition to these there is a directory board composed of twenty-six ladies, and an advisory board of nineteen gentlemen.

This pioneer society, with a worthy and patriotic object, should be emulated in other States.

Military Societies of the United States.

By the joint resolution of Congress, approved September, 1890, the societies of the Cincinnati, the War of 1812, the Aztec Club of 1847, and the several societies formed by soldiers and sailors of the United States who were engaged in the Civil War of 1861-65, are officially recognized as "military societies of the United States." The following United States Army order contains the text of the joint resolution:

GENERAL ORDER NO. 133 OF 1890.—The following joint resolution is, by direction of the acting Secretary of War, republished for the information and government of all concerned:

1.—Joint resolution granting permission to officers and enlisted men of the army and navy of the United States to wear the badges adopted by military societies of men who served in the War of the Revolution, the War of 1812, the Mexican War, and the War of the Rebellion.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the distinctive badges adopted by military societies of men who served in the armies and navies of the United States in the War of the Revolution, the War of 1812, the Mexican War, and the War of the Rebellion, respectively, may be worn upon all occasions of ceremony by officers and enlisted men of the army and navy of the United States who are members of said organizations in their own right. Approved, September 25, 1890.

In compliance with the above joint resolution, the uniform regulations of the army are modified as follows: The phrase "occasions of ceremony," in the resolution, will include all musters, reviews, inspections, parades, and other occasions on which officers and men are required to appear in full-dress uniform. The badges are to be worn on the left breast of the coat, the tops of the ribbons forming a horizontal line, the outer end of which shall be from two to four inches (according to the height of the wearer) below the upper line of the shoulder. The ribbons are to be suspended from a bar of metal passed through their upper ends and attached to the coat.

NOTIFICATION.

The Board of Managers of the National Home for Disabled Volunteer Soldiers informs the disabled soldiers and sailors of the United States that Homes have been established, at the places above named, for all such as are unable to earn a living by labor. All the ordinary comforts of a home are provided—chapels for religious services; halls for concerts, lectures, etc.; hospitals, with experienced surgeons and nurses; libraries and reading rooms; amusement halls; post and telegraph offices; stores, etc. Good behavior insures kind treatment.

Soldiers and sailors are especially informed that the Home is neither a hospital nor almshouse, but a home, where subsistence, quarters, clothing, religious instruction, employment when possible, and amusements are provided by the Government of the United States. The provision is not a charity, but is a reward to the brave and deserving, and IS THEIR RIGHT, to be forfeited only by bad conduct at the Home or conviction of heinous crimes. A soldier or sailor desiring admission may apply by letter to either of the managers, whereupon a blank application will be sent to him, and if he be found duly qualified, transportation will be furnished, or he can apply personally or by letter at the branch nearest to his place of residence.

REQUIREMENTS FOR ADMISSION.

1. An honorable discharge from the United States service.
2. Disability which prevents the applicant from earning his living by labor.
3. Applicants for admission will be required to stipulate and agree to abide by all the rules and regulations made by the Board of Managers, or by its order; to perform all duties required of them, and to obey all the lawful orders of the officers of the Home. Attention is called to the fact, that by the law establishing the Home the members are made subject to the Rules and Articles of War, and will be governed thereby in the same manner as if they were in the army of the United States.
4. A soldier or sailor must forward with his application for admission his Discharge Paper, and when he is a pensioner, his Pension Certificate, and if he has been a member of a State Home, his discharge from that Home, before his application will be considered; which papers will be retained at the branch to which the applicant is admitted, to be kept there for him, and returned to him when he is discharged. This rule is adopted to prevent the loss of such papers and certificates, and to hinder fraudulent practices; and no application will be considered unless these papers are sent with it. If the original discharge does not exist, a copy of discharge, certified by the War or Navy Department, or by the Adjutant-General of the State, must accompany the application.

Soldiers or sailors whose pensions exceed \$16 a month are not eligible to the Home unless the reasons are peculiar, and are explained to the manager and are satisfactory to him. Those who have been members of State Homes must have been discharged from those Homes at least six months before they can be admitted to a branch of the National Home, except by a vote of the Board of Managers. Applicants are requested to conform strictly to the above requirements.

UNITED STATES HOME FOR REGULAR ARMY SOLDIERS.

The United States Soldiers' Home in the District of Columbia receives and maintains discharged soldiers of the regular army. All soldiers who have served twenty years as enlisted men in the army (including volunteer service, if any), and all soldiers of less than twenty years' service who have incurred such disability, by wounds, disease, or injuries in the line of duty while in the regular army, as unfits them for further service, are entitled to the benefits of the Home.

A pensioner who enters the Home may assign his pension, or any part of it, to his child, wife, or parent, by filing written notice with the agent who pays him. If not so assigned, it is drawn by the treasurer of the Home and held in trust for the pensioner, to whom it is paid in such sums as the commissioners deem proper while he is an inmate of the Home, the balance being paid in full when he takes his discharge and leaves the Home. Inmates are subject to the Rules and Articles of War, the same as soldiers in the army. They are comfortably lodged, fed, and clothed, and receive medical attendance and medicine, all without cost to them. There are 1,250 men now receiving the benefits of the Home.

The Board of Commissioners consists of "the General-in-Chief commanding the army, the Surgeon-General, the Commissary-General, the Adjutant-General, the Quartermaster-General, the Judge-Advocate-General, and the Governor of the Home."

Applications for admission to the Home may be addressed to the "Board of Commissioners, Soldiers' Home, War Department, Washington City, D. C.," and must give date of enlistment and date of discharge, with letter of company and number of regiment for each and every term of service, and rate of pension, if any, and must be accompanied by a medical certificate showing nature and degree of disability, if any exists.

United Confederate Veterans.

OFFICERS.

General Commanding, John B. Gordon, Atlanta, Ga.; Lieutenant-General, William H. Jackson, Tennessee; Lieutenant-General, Trans-Mississippi Department, W. L. Cabell, Dallas, Texas; Lieutenant-General, Army of Northern Virginia, Fitz Hugh Lee, Virginia; Lieutenant-General, Army of Tennessee, Stephen D. Lee, Starkeville, Tenn.; Adjutant-General and Chief of Staff, Major-General George Moorman, New Orleans, La.; Quartermaster-General, Major-General J. F. Shipp, Chattanooga, Tenn.; Inspector-General, Major-General Robert F. Hoke, North Carolina; Judge Advocate-Generals, Major-General Matthew C. Butler, South Carolina, and Major-General William B. Bate, Tennessee; Commissary-General, Major-General Joseph Wheeler, Alabama; Surgeon-General, Joseph Jones, M. D., Louisiana; Chaplain, Rev. Thomas B. Markham, New Orleans, La.

This association was organized at New Orleans June 10, 1889. Its avowed purpose is strictly social, literary, historical, and benevolent. Its constitution says that it "will endeavor to unite in a general federation all associations of Confederate veterans, soldiers, and sailors now in existence or hereafter to be formed; to gather authentic data for an impartial history of the war between the States; to preserve relics or mementoes of the same; to cherish the ties of friendship that should exist among men who have shared common dangers, common sufferings, and privations; to care for the disabled and extend a helping hand to the needy; to protect the widows and the orphans, and to make and preserve a record of the resources of every member, and, as far as possible, of those of our comrades who have preceded us in eternity." State organizations are authorized, and are called Divisions. The present headquarters of the association are at New Orleans, La. Number of members, according to last report, about 40,000. The last reunion of the veterans was at Birmingham, Ala., in April, 1894. The next reunion will be at Houston, Texas, at a time to be fixed.

The National Association of Naval Veterans was organized by delegates from the various associations of naval veterans throughout the Union at a meeting held in the city of New York, in January, 1887. The object of the national association, as declared by the constitution, is "to cherish the memory and associations of the war of the late rebellion, perpetuate the glorious name and deeds of our navy, to strengthen the ties of fraternal fellowship and sympathy, to advance the best interests of this association, and to extend all possible relief to the widows and orphans of members; to foster the cultivation of naval science; to encourage the building of an efficient navy and national defenses; to enforce unqualified allegiance to the general government; to protect the rights and liberties of American citizenship, and to maintain national honor, dignity, union, and independence."

Any officer, appointed or enlisted man who has served in the United States Navy, United States Marine Corps, United States Revenue Marine Service during any portion of the time between April 12, 1861, and August 25, 1865, who has not borne arms against the United States, or been convicted of any infamous crime, and who has been honorably discharged or resigned by an honorable acceptance of resignation, is eligible to membership in this association. There are 37 local associations working under the national charter, a paid membership of over 7,500, and about 3,000 contributing members. The headquarters are at Hartford, Ct.

AUXILIARY TO THE GRAND ARMY OF THE REPUBLIC.

National President, Emma R. Wallace, Chicago, Ill.; *National Secretary*, Jennie Bross, Chicago, Ill.; *National Treasurer*, Armilla A. Cheney, Detroit, Mich.; *Executive Board*, Sarah E. Phillips, Chairman, Syracuse, N. Y.; Lodusky J. Taylor, LeSueur, Minn.; Celia A. Kinyon, Providence, R. I.; Fannie E. Minot, Concord, N. H.; Louise Barnum Robbins, Adrian, Mich.

This organization was created by the mothers, wives, daughters, and sisters of Union soldiers of the Civil War of 1861-65, for the purpose of aiding and assisting the Grand Army of the Republic, and to "perpetuate the memory of their heroic dead," to "extend needful aid to the widows and orphans," to "cherish and emulate the deeds of our army nurses," and to "inculcate lessons of patriotism and love of country among our children and in the communities in which we live." The organization is composed of departments, which are subdivided into corps. The total membership of the order June 30, 1894, was 139,081. The annual amount expended in relief during the fiscal year was \$170,584; the amount since organization in 1883, \$1,013,560. The next annual convention of the corps will be held at Louisville, Ky., in September, 1895.

Sons of Veterans, U. S. A.

Commander-in-Chief, William E. Bundy, Cincinnati, Ohio; *Senior Vice-Commander-in-Chief*, Theodore A. Barton, Providence, R. I.; *Junior Vice-Commander-in-Chief*, Lewis A. Patton, Milwaukee, Wis.; *Council-in-Chief*, William D. Spear, Yonkers, N. Y.; Charles K. Darling, Boston, Mass.; Elwood T. Carr, Radnor, Pa.

Camp No. 1, Sons of Veterans, U. S. A., was organized in the city of Pittsburgh, Pa., November 12, 1881. The organization is composed of lineal descendants, over 18 years of age, of honorably discharged soldiers, sailors, or marines who served in the late Civil War. There are now two thousand Camps, with a membership of one hundred thousand distributed among twenty-nine Divisions, corresponding to States, the general society constituting the Commandery-in-Chief. Each Camp has its own officers, the head officer being the Captain. The principal officer of the Division is the Commander. The fourteenth annual encampment of the Commandery-in-Chief will be held at Knoxville, Tenn., in September, 1895.

Union Veteran Legion.

National Commander, James Tanner, Washington, D. C.; *Senior Vice National Commander*, John J. Callahan, Buffalo, N. Y.; *Junior Vice National Commander*, John P. Donahue, Wilmington, Del.; *Adjutant-General*, M. B. C. Wright, Washington, D. C.; *Assistant Adjutant-General*, Charles E. Troutman, Washington, D. C.; *Surgeon-General*, M. S. Crane, Newark, N. J.; *Quartermaster-General*, W. Potter Kremer, New York City; *Inspector-General*, Harry White, Indiana, Pa.; *Judge-Advocate-General*, Jacob F. Slagle, Pittsburgh, Pa.; *Chaplain-in-Chief*, Rev. John A. Danks, Glenfield, Pa.; *Chief Mustering Officer*, James F. Smyth, Williamsport, Pa.; *National Executive Committee*, John M. Paver, Indianapolis, Ind.; Edward Donnelly, Jersey City, N. J.; W. S. Norcross, Lewiston, Me.; George Albee, New Haven, Conn.; Alex. S. Oliver, Sandusky, Ohio; *Standard Bearer*, Charles E. Hooks, Washington, D. C.

The Union Veteran Legion was organized at Pittsburgh, Pa., March, 1884, and the National organization was perfected November 17, 1886. Encampments are now organized in 18 States and the District of Columbia, numbering 104 encampments. The membership is over 10,000. To become a member, the applicant must have been an officer, soldier, sailor, or marine of the Union army, navy, or marine corps during the late Civil War, who volunteered prior to July 1, 1863, for a term of three years, and was honorably discharged for any cause, after a service of at least two continuous years; or was, at any time, discharged by reason of wounds received in the line of duty; also those who volunteered for a term of two years prior to July 22, 1861, and served their full term of enlistment, unless discharged for wounds received in the line of duty; but no drafted person, nor substitute, nor any one who has at any time borne arms against the United States is eligible. A statement by the adjutant-general of the Legion says: "It is believed that those who entered the service prior to July, 1863, had but one object in view, and that was the preservation of the Union. There were no bounties prior to that date, nor were there any fears of a draft; consequently, those who shouldered a musket or wielded a sabre felt that it was a sacred duty to offer their lives in defence of their country's honor." An article of the rules provides that "No officer or comrad of the Union Veteran Legion shall in any manner use this organization for partisan purposes, and no discussion of partisan questions shall be permitted at any of its meetings."

Union Veterans' Union.

Commander-in-Chief, George J. Oaks, Rochester, N. Y.; *Deputy Commander-in-Chief*, David W. Wardrop, Boston, Mass.; *Second Deputy Commander-in-Chief*, Louis F. Ellis, Lima, Ohio; *Surgeon-General*, S. S. Bond, Washington, D. C.; *Chaplain-in-Chief*, Green Clay Smith, Washington, D. C.; *Adjutant-General*, George H. Washburn, Rochester, N. The title of "Founder-General" has been conferred on Mrs. Flora Adams Darling, to whom the society owes its creation. There is an Advisory Board, composed of the following gentlemen: Right Rev. Bishop Perry of Iowa; Hon. Charles W. Dayton; Hon. Ashbel P. Fitch, Justice George L. Ingraham, Judge C. H. Truax, Dr. Gustavus S. Franklin, William Lee, and Louis J. Allen.

A New York society of "Daughters of the Revolution" was organized August 20, 1890. The general society was organized in the city of New York September 9, 1891. Chapters exist in a large number of States and others are being rapidly formed. Eligibility to membership is restricted to "women who are lineal descendants of an ancestor who was a military or naval or marine officer, soldier, sailor, or marine in actual service under the authority of any of the thirteen colonies or States, or of the Continental Congress, and remained always loyal to such authority, or descendants of one who signed the Declaration of Independence, or of one who as a member of the Continental Congress or of the Congress of any of the colonies or States, or as an official appointed by or under the authority of any such representative bodies, actually assisted in the establishment of American independence by service rendered during the War of the Revolution, becoming thereby liable to conviction of treason against the Government of Great Britain, but remaining always loyal to the authority of the colonies or States." The office of the society is No. 64 Madison Avenue, New York.

McGee; *Historian-General*, Mrs. Henry F. Blount; *Chaplain-General*, Mrs. E. T. Bullock.

The society was organized in the city of Washington, D. C., October 11, 1890. The headquarters are in Washington. Its present membership is reported by the Secretary-General to be about 7,000. State chapters exist in thirty-six States, presided over by regents.

Any woman may be eligible for membership who is of the age of eighteen years, and who is descended from an ancestor who, "with unflinching loyalty, rendered material aid to the cause of independence as a recognized patriot, as soldier or sailor, or as a civil officer in one of the several colonies or States, or of the United Colonies or States," provided that the applicant shall be acceptable to the society. Every application for membership must be endorsed by at least one member of the National Society, and is then submitted to the Registrars-General, who report on the question of eligibility to the Board of Management, and upon its approval the applicant is enrolled as a member.

MOUNT VERNON LADIES' ASSOCIATION.

The Washington estate at Mount Vernon, Va., is under the care and direction of the Mount Vernon Ladies' Association of the Union. The founder of the association, in 1854, was Miss Ann Pamela Cunningham, of South Carolina. She was the first Regent, and was succeeded in 1873 in that position by Mrs. MacAllister Laughton. She died in 1891, and the present Regent is Mrs. Justine Van Rensselaer Townsend, of New York (a great-granddaughter of General Philip Schuyler, and great-great-granddaughter of Philip Livingston, the signer of the Declaration of Independence). There are Vice-Regents for twenty-nine States.

The advisory committee is composed of Mr. Justice Field, of the Supreme Court; T. N. McCarter, I. L. D., of New Jersey, and two gentlemen to be elected at the next annual meeting to fill the places of George W. Childs and J. C. Welling, deceased. The resident Superintendent at Mount Vernon is Harrison H. Dodge.

Postal Information.

(Revised December, 1894, at the New York Post-Office, for THE WORLD ALMANAC.)

DOMESTIC RATES OF POSTAGE.

ALL mailable matter for transmission by the United States mails within the United States is divided into four classes, under the following regulations :

FIRST-CLASS MATTER.

This class includes letters, postal cards, and anything sealed or otherwise closed against inspection, or anything containing writing not allowed as an accompaniment to printed matter under class three.

Rates of letter postage to any part of the United States, *two cents per ounce or fraction thereof.*

Rates on local or drop letters at free delivery offices, two cents per ounce or fraction thereof. At offices where there is no free delivery by carriers, one cent per ounce or fraction thereof.

Rates on **postal cards**, one cent. Nothing must be added or attached to a postal card, except that a printed address slip may be pasted on the address or message side. The addition of anything else subjects the card to letter postage. A card containing any offensive dun or any scurrilous or indecent communication will not be forwarded. Nothing but the address must be placed on the face, or stamped side. Cards that have been spoiled in printing or otherwise will not be redeemed.

Rates on specially delivered letters, ten cents on each letter in *addition* to the regular postage. This entitles the letter to immediate delivery by special messenger. Special delivery stamps are sold at post-offices, and must be affixed to such letters. An ordinary ten-cent stamp affixed to a letter will *not* entitle it to special delivery. The delivery, at carrier offices, extends to the limits of the carrier routes. At non-carrier offices it extends to one mile from the post-office. Postmasters are not obliged to deliver beyond these limits, and letters addressed to places beyond must await delivery in the usual way, notwithstanding the special delivery stamp.

Prepayment by stamps invariably required. Postage on all letters should be *fully* prepaid, but if prepaid one full rate and no more, they will be forwarded, and the amount of deficient postage collected on delivery; if wholly unpaid, or prepaid with less than one full rate and deposited at a post-office, the addressee will be notified to remit postage; and if he fails to do so, they will be sent to the Dead Letter Office; but they will be returned to the sender if he is located at the place of mailing, and if his address be printed or written upon them.

Letter rates are charged on all productions by the typewriter or manifold process.

Letters (but no other class of mail matter) will be returned to the sender free, if a request to that effect is printed or written on the envelope. There is no limit of weight for first-class matter.

Prepaid letters will be reforwarded from one post-office to another upon the written request of the person addressed, without additional charge for postage. The direction on forwarded letters may be changed as many times as may be necessary to reach the person addressed.

SECOND-CLASS MATTER.

This class includes all newspapers, periodicals, or matter exclusively in print and regularly issued at stated intervals as frequently as four times a year, from a known office of publication or news agency, to actual subscribers or news agents, and transient newspapers and publications of this character mailed by persons other than publishers. Also periodical publications of benevolent and fraternal societies, etc. This applies to all reports and the like made by officers of societies organized under the lodge system and having a membership of a thousand persons, and of the bulletins and proceedings of strictly professional, literary, historical, and scientific associations and institutions, trade-unions, etc., provided only that these be published not less often than four times a year, and that they be printed on and be bound in paper. Publishers who wish to avail themselves of the privileges of the act are required to make formal application to the department through the postmaster at the place of publication, producing satisfactory evidence that the organizations represented come within the purview of the law, and that the object of the publications is to further the objects and purposes of the organizations.

Rates of postage to publishers, *one cent a pound or fractional part thereof*, prepaid by special stamps. Publications designed primarily for advertising or free circulation, or not having a legitimate list of subscribers, are excluded from the pound rate, and pay third-class rates.

Publications sent to actual subscribers in the county where published are free, unless mailed for local delivery at a letter-carrier office.

Rates of postage on transient newspapers, magazines or periodicals, *one cent for each four ounces or fraction thereof.* It should be observed that the rate is one cent for each four ounces, not one cent for each paper. Second-class matter will be entitled to special delivery when special delivery ten-cent stamps are affixed in addition to the regular postage.

Transient second-class matter must be so wrapped as to enable the postmaster to inspect it. The sender's name and address may be written in them, but any other writing subjects the matter to letter postage. The name and address of the sender may also be written on the wrapper.

THIRD-CLASS MATTER.

Mail matter of the third class includes printed books, pamphlets, engravings, circulars (in print or by the hectograph, electric-pen or similar process), and other matter wholly in print, proof-sheets, corrected proof-sheets, and manuscript copy accompanying the same.

The rate on matter of this class is *one cent for each two ounces or fraction thereof.*

Manuscript unaccompanied by proof-sheets must pay letter rates.

Third-class matter must admit of easy inspection, otherwise it will be charged letter rates on delivery. It must be fully prepaid, or it will not be forwarded. Its wrapper must bear no writing or printing except the name and address of the sender, and a return request.

The limit of weight is four pounds, except single books in separate packages, on which the weight is not limited. It is entitled, like matter of the other classes, to special delivery when special delivery stamps are affixed in addition to the regular postage.

The name and address of the sender, preceded by the word "from," may be written upon the package, and a simple manuscript dedication may appear in a book or other third-class matter.

FOURTH-CLASS MATTER.

Fourth-class matter is all mailable matter not included in the three preceding classes which is so prepared for mailing as to be easily withdrawn from the wrapper and examined. It embraces merchandise and samples of every description, and coin or specie.

Rate of postage, *one cent for each ounce or fraction thereof* (except seeds, roots, bulbs, cuttings, cions and plants, the rate on which is *one cent for each two ounces or fraction thereof*). This matter must be fully prepaid, or it will not be forwarded. The affixing of special delivery ten-cent stamps in addition to the regular postage entitles fourth-class matter to special delivery. (See remarks under "first-class matter.")

Articles of this class that are liable to injure or deface the mails, such as glass, sugar, needles, nails, pens, etc., must be first wrapped in a bag, box, or open envelope and then secured in another outside tube or box, made of metal or hard wood, without sharp corners or edges, and having a sliding clasp or screw lid, thus securing the articles in a double package. The public should bear in mind that the first object of the department is to transport the mails safely, and every other interest is made subordinate.

Such articles as poisons, explosives, or inflammable articles, live animals, insects, or substances exhaling a bad odor will not be forwarded in any case.

The regulations respecting the mailing of liquids are as follows: Liquids, not ardent, vinous, spirituous or malt, and not liable to explosion, spontaneous combustion, or ignition by shock or jar, and not inflammable (such as kerosene, naphtha or turpentine), may be admitted to the mails for transportation within the United States. When contained in glass bottles or phials, such bottles or phials must be strong enough to stand the shock of handling in the mails, and must be enclosed in a wooden or papier-maché block or tube not less than three-sixteenths of an inch thick in the thinnest part, strong enough to support the weight of mails piled in bags and rest rough handling; and there must be provided, between the bottle and its wooden case, a cushion of cork-crums, cotton, felt, asbestos, or some other absorbent, sufficient to protect the glass from shock in handling; the block or tube to be impervious to liquids, including oils, and to be closed by a tightly fitting screw-lid of wood or metal, with a rubber or other pad so adjusted as to make the block or tube water-tight and to prevent the leakage of the contents, in case of breaking of the glass. When enclosed in a tin cylinder, metal case, or tube, such cylinder, case, or tube should have a screw-lid with a rubber or cork cushion inside in order to make the same water-tight, and should be securely fastened in a wooden or papier-maché block (open only at one end), and not less in thickness and strength than above prescribed. It would be well always to consult the postmaster in reference to the proposed mailing of liquids. The limit of admissible liquids and oils is not exceeding four ounces, liquid measure.

Limit of weight of fourth-class matter (excepting liquids), four pounds.

The name and address of the sender, preceded by the word "from," also the names and number (quantity) of the articles enclosed, may be written on the wrapper of fourth-class matter without additional postage charge. A request to the delivering postmaster may also be written asking him to return the package if not delivered.

REGISTRATION.

All kinds of postal matter, *except second-class matter*, can be registered at the rate of *eight cents for each package* in addition to the regular rates of postage, to be fully prepaid by stamps. Each package must bear the name and address of the sender, and a receipt will be returned from the person to whom addressed. Mail matter can be registered at all post-offices in the United States.

The Post-Office Department or its revenue is not by law liable for the loss of any registered mail matter.

DOMESTIC MONEY ORDERS.

Domestic money orders are issued by money-order post-offices for any amount up to \$100, at the following rates:

For sums not exceeding \$2.50, 3 cents; over \$2.50 to \$5, 5 cents; over \$5 to \$10, 8 cents; over \$10 to \$20, 10 cents; over \$20 to \$30, 12 cents; over \$30 to \$40, 15 cents; over \$40 to \$50, 18 cents; over \$50 to \$60, 20 cents; over \$60 to \$75, 25 cents; over \$75 to \$100, 30 cents.

POSTAL NOTES are no longer issued.

STAMPED ENVELOPES.

Embossed stamped envelopes and newspaper wrappers of several denominations, sizes and colors are kept on sale at post-offices, singly or in quantities, at a small advance on the postage rate. Stamps cut from stamped envelopes are valueless; but postmasters are authorized to give good stamps for stamped envelopes or newspaper wrappers that may be spoiled in directing, if presented in whole condition and with satisfactory evidence.

All matter concerning lotteries, gift concerts, or schemes devised to defraud the public, or for the purpose of obtaining money under false pretenses, is denied transmission in the mails.

Applications for the establishment of post-offices should be addressed to the First Assistant Postmaster-General, accompanied by a statement of the necessity therefor. Instructions will then be given and blanks furnished to enable the petitioners to provide the department with the necessary information.

The franking privilege was abolished July 1, 1873, but the following mail matter may be sent free by legislative saving clauses, viz.:

1. All public documents printed by order of Congress, the Congressional Record and speeches contained therein, franked by Members of Congress, or the Secretary of the Senate, or Clerk of the House.

2. Seeds transmitted by the Secretary of Agriculture, or by any Member of Congress, prepared from that Department.

3. All periodicals sent to subscribers within the county where printed.

4. Letters and packages relating exclusively to the business of the Government of the United States, mailed only by officers of the same, publications required to be mailed to the Librarian of Congress by the Copyright law, and letters and parcels mailed by the Smithsonian Institution. All these must be covered by specially printed "penalty" envelopes or labels.

All communications to Government officers and to Members of Congress are required to be prepaid by stamps.

SUGGESTIONS TO THE PUBLIC.

(From the United States Official Postal-Guide.)

Mail all letters, etc., as early as practicable, especially when sent in large numbers, as is frequently the case with newspapers and circulars.

All mail matter at large post-offices is necessarily handled in great haste and should therefore in all cases be so PLAINLY addressed as to leave NO ROOM FOR DOUBT AND NO EXCUSE FOR ERROR on the part of postal employes. Names of States should be written in full (or their abbreviations very distinctly written) in order to prevent errors which arise from the similarity of such abbreviations as Cal., Col.; Pa., Va., Vt.; Me., Mo., Md.; Ia., Ind.; N. H., N. M., N. Y., N. J., N. C., D. C.; Miss., Minn., Mass.; Nev., Neb.; Penn., Tenn., etc., when hastily or carelessly written. This is especially necessary in addressing mail matter to places of which the names are borne by several post-offices in different States.

Avoid as much as possible using envelopes made of flimsy paper, especially where more than one sheet of paper, or any other article than paper, is enclosed. Being often handled, and even in the mail-bags subject to pressure, such envelopes not infrequently split open, giving cause of complaint.

Never send money or any other article of value through the mail except either by means of a money-order or in a registered letter. Any person who sends money or jewelry in an unregistered letter not only runs a risk of losing his property, but exposes to temptation every one through whose hands his letter passes, and may be the means of ultimately bringing some clerk or letter-carrier to ruin.

See that every letter or package bears the full name and post-office address of the writer, in order to secure the return of the letter, if the person to whom it is directed cannot be found. A much larger portion of the undelivered letters could be returned if the names and addresses of the senders were always fully and plainly written or printed inside or on the envelopes. Persons who have large correspondence find it most convenient to use "special request envelopes;" but those who only mail an occasional letter can avoid much trouble by writing a request to "return if not delivered," etc., on the envelope.

When dropping a letter, newspaper, etc., into a street mailing-box, or into the receptacle at a post-office, always see that the packet falls into the box and does not stick in its passage; observe, also, particularly, whether the postage stamps remain securely in their places.

Postage stamps should be placed on the upper right hand corner of the address side of all mail matter.

The street and number (or box number) should form a part of the address of all mail matter directed to cities. In most cities there are many persons, and even firms, bearing the same name. Before depositing any package or other article for mailing, the sender should assure himself that it is wrapped and packed in the manner prescribed by postal regulations; that it does not contain *unmailable* matter nor exceed the limit of size and weight as fixed by law; and that it is fully prepaid and properly addressed. The postage stamps on all mail matter are necessarily cancelled at once, and the value of those affixed to packages that are afterward discovered to be short-paid or otherwise unmailable is therefore liable to be lost to the senders.

Letters cannot be carried out of the mail except in postage-stamped envelopes. There is no objection to a person who is not acting as a common carrier carrying a sealed letter, whether in a stamped envelope or not.

It is forbidden by the regulations of the Post-Office Department for postmasters to give to any person information concerning the mail matter of another, or to disclose the name of a box-holder at a post-office.

Letters addressed to persons temporarily sojourning in a city where the Free Delivery System is in operation should be marked "Transient" or "General Delivery," if not addressed to a street and number or some other designated place of delivery.

Books or other publications printed in violation of United States copyright are unmailable. Any owner of a copyright may prevent the mailing of an infringing publication, domestic or foreign, by notifying the Post-Office Department.

The above rates, rules and suggestions apply to postal matters in the United States.

Foreign Mails.

POSTAGE RATES AND CONDITIONS.

The rates of postage to all foreign countries and colonies (except Canada and Mexico) are as follows:

Letters, per 15 grams ($\frac{1}{2}$ ounce).....	5 cents.
Postal cards, each.....	2 cents.
Newspapers and other printed matter, per 2 ounces.....	1 cent.
Commercial papers (such as legal and insurance papers, deeds, bills of lading, invoices, manuscript for publication, etc.).....	5 cents.
Samples of merchandise, { Packets not in excess of 10 ounces, for each 2 ounces or fraction thereof.....	1 cent.
{ Packets in excess of 10 ounces, for each 2 ounces or fraction thereof.....	2 cents.
Registration fee on letters or other articles.....	1 cent.
Ordinary letters for countries of the Postal Union (except Canada and Mexico) will be forwarded, whether any postage is prepaid on them or not. All other mailable matter must be prepaid at least partially.	8 cents.

CANADA.

Letters, per ounce, prepayment compulsory.....	2 cents.
Postal cards, each.....	1 cent.
Newspapers, per 4 ounces.....	1 cent.
Merchandise, not exceeding 4 pounds, (samples 1c. per 2 oz.), per ounce.....	1 cent.
Commercial papers, same as to other Postal Union countries.....	8 cents.
Registration fee.....	8 cents.

Any article of correspondence may be registered. Packages of merchandise are subject to the regulations of either country to prevent violations of the revenue laws; must not be closed against inspection, and must be so wrapped and enclosed as to be easily examined. No sealed packages other than letters in their usual and ordinary form may be sent by mail to Canada.

MEXICO.

Letters, newspapers and printed matter are now carried between the United States and Mexico at same rates as in the United States. Samples are 1 cent for 2 ounces; limit of weight, $8\frac{3}{4}$ ounces. Merchandise other than samples may only be sent by Parcels Post. No sealed packages other than letters in their usual and ordinary form may be sent by mail to Mexico, nor any package over 4 pounds 6 ounces in weight.

SAMPLES.

General limit of weight, $8\frac{3}{4}$ ounces; but by special agreement between the United States and France, Great Britain, Belgium, Switzerland, the Argentine Republic, Italy, Hawaiian Republic, Egypt and the British Colonies, except India, Canada and the Australian Colonies, Austria and Hungary, packets of samples of merchandise are admissible in the mails between the two countries up to 350 grams (12 ounces) in weight, and the following dimensions apply to all Postal Union countries: 30 centimeters (12 inches) in length, 20 centimeters (8 inches) in width, and 10 centimeters (4 inches) in depth, or if they are in the form of a roll, 12 inches in length and 6 inches in diameter. Merchandise of salable value and goods not in execution of orders, or as gifts, must be paid at full letter rate.

PARCELS POST.

Unsealed packages of mailable merchandise may be sent by Parcels Post to Jamaica (including Turk's Island), Barbadoes, the Bahamas, British Honduras, Mexico, the Hawaiian Republic (Sandwich Islands), the Leeward Islands, the Republic of Colombia, Costa Rica, Salvador, British Guiana, Danish West Indies (St. Thomas, St. Croix, and St. John), and the Windward Islands (St. Lucia, St. Vincent, Grenada, and the Grenadines), and Newfoundland, at the following postage rate: For a parcel not exceeding one pound in weight, 12 cents; for each additional pound or fraction thereof, 12 cents. The maximum weight allowed is eleven pounds—the extreme dimensions allowed for Mexico, Costa Rica, and Colombia being two feet length by four feet girth, and for the other countries not more than three feet six inches in length, nor more than six feet in length and girth combined. Parcels must be wrapped so as to permit their contents to be easily examined by postmasters. Poisonous, explosive, and inflammable substances are excluded. Parcels may be registered for 10 cents each to any of the above places, except Barbadoes.

Rates and conditions to countries not in the Universal Postal Union are now the same as those to Universal Postal Union countries.

GENERAL REGULATIONS RESPECTING FOREIGN MAILS.

Postage can be prepaid upon articles only by means of the postage stamps of the country in which the articles are mailed. Hence articles mailed in one country addressed to another country which bear postage stamps of the country to which they are addressed are treated as if they had no postage stamps attached to them.

Unpaid letters received from the Postal Union are chargeable with 10 cents per 15 grams ($\frac{1}{2}$ ounce). Insufficiently prepaid correspondence of all kinds is chargeable with double the amount of the deficient postage.

Matter to be sent in the mails at less than letter rates must be so wrapped that it can be readily examined at the office of delivery, as well as the mailing office, without destroying the wrapper.

Newspapers and periodicals sent in the mails to foreign countries other than those of the Postal Union should be wrapped singly. Those sent by publishers to regular subscribers in Canada and Mexico are transmissible as in domestic mails, except that packages addressed to Mexico must not exceed 4 pounds 6 ounces in weight.

The United States two-cent postal card should be used for card correspondence with foreign countries (except Canada and Mexico, to which countries the one-cent card is transmissible), but where these cards cannot be obtained, it is allowable to use for this purpose the United States one-cent postal card with a one-cent United States adhesive postage stamp attached thereto.

FOREIGN MAILS—Continued.

Mail matter of all kinds received from any country of the Postal Union is required to be reforwarded at the request of the addressee, from one post-office to another, or to any foreign country embraced in the Postal Union, without additional charge for postage.

All articles prohibited from domestic mails are also excluded from circulation in the mails to and from foreign countries. Postal cards or letters addressed to go around the world will not be reforwarded, being prohibited.

The act of March 3, 1883, imposes a duty of 25 per cent ad valorem on all printed matter not therein otherwise provided for, without regard to mode of importation. Under said act all printed matter, except newspapers and periodicals, and except printed matter other than books imported in the mails for personal use, is subject to the regular duty of 25 per cent ad valorem.

FOREIGN (INTERNATIONAL) MONEY-ORDERS.

There are now in operation postal conventions for the exchange of money-orders between the United States and the following countries, viz.: Switzerland, Great Britain and Ireland, Germany, France, Italy, Canada, and Newfoundland, Jamaica, New South Wales, Victoria, New Zealand, Queensland, the Cape Colony, the Windward Islands, the Leeward Islands, Belgium, Portugal, Tasmania, Hawaii, Sweden, Norway, Japan, Denmark, Netherlands, the Bahamas, Trinidad, and Tobago, British Guiana, Austria, and Hungary.

Upon receiving an international money-order from the issuing postmaster the remitter must send it, at his own cost, to the payee, if the latter resides in Canada, Great Britain, and Ireland, Queensland, Cape Colony, France, and Algeria, New Zealand, New South Wales, Victoria, Tasmania, Hawaii, Jamaica, Leeward and Windward Islands, and Constantinople, Bahamas, Trinidad, and Tobago, and British Guiana.

But the order should be retained by the remitter if the intended beneficiary live in any of the following named countries: Germany, Switzerland, Austria, Hungary, Italy, Belgium, Portugal, Sweden, Norway, Denmark, British India, Egypt, Japan, Hong Kong, in which case it is of no value except as evidence of deposit of the sum therein mentioned. Another and different form of order will be forwarded to the payee by the exchange office in the country of payment.

The rates of commission or fees charged for the issue of all international money-orders are as follows: For sums not exceeding \$10, 10 cents; over \$10 and not exceeding \$20, 20 cents; over \$20 and not exceeding \$30, 30 cents; over \$30 and not exceeding \$40, 40 cents; over \$40 and not exceeding \$50, 50 cents; over \$50 and not exceeding \$60, 60 cents; over \$60 and not exceeding \$70, 70 cents; over \$70 and not exceeding \$80, 80 cents; over \$80 and not exceeding \$90, 90 cents; over \$90 and not exceeding \$100, one dollar.

Metric System of Weights and Measures.

THE METRIC SYSTEM has been adopted by Mexico, Brazil, Chile, Peru, etc., and except Russia and Great Britain, where it is permissive, by all European nations. Various names of the preceding systems are, however, frequently used: In Germany, $\frac{1}{2}$ kilogram = 1 pound; in Switzerland, 3-10 of a metre = 1 foot, etc. If the first letters of the prefixes *deka*, *hecto*, *kilo*, *myria*, from the Greek, and *deci*, *centi*, *milli*, from the Latin, are used in preference to our plain English, 10, 100, etc., it is best to employ capital letters for the multiples and small letters for the subdivisions, to avoid ambiguities in abbreviations: 1 dekametre or 10 metres = 1 Dm.; 1 decimetre or 1-10 of a metre = 1 dm.

The METRE, unit of length, is nearly the ten-millionth part of a quadrant of a meridian, of the distance between Equator and Pole. The International Standard Metre is, practically, nothing else but a length defined by the distance between two lines on a platinum-iridium bar at 0° Centigrade, deposited at the International Bureau of Weights and Measures, Paris, France.

The LITRE, unit of capacity, is derived from the weight of one kilogram pure water at greatest density, a cube whose edge is one-tenth of a metre and, therefore, the one-thousandth part of a metric ton.

The GRAM, unit of weight, is a cube of pure water at greatest density, whose edge is one hundredth of a metre, and, therefore, the one-thousandth part of a kilogram, and the one-millionth part of a metric ton.

One silver dollar weighs 25 grams, 1 dime = $2\frac{1}{2}$ grams, 1 five-cent nickel = 5 grams.

The Metric System was legalized in the United States on July 28, 1866, when Congress enacted as follows:

"The tables in the schedule hereto annexed shall be recognized in the construction of contracts, and in all legal proceedings, as establishing, in terms of the weights and measures now in use in the United States, the equivalents of the weights and measures expressed therein in terms of the metric system, and the tables may lawfully be used for computing, determining, and expressing in customary weights and measures the weights and measures of the metric system."

The following are the tables annexed to the above:

THE METRIC SYSTEM SIMPLIFIED.

The following tables of the metric system of weights and measures have been simplified as much as possible for THE WORLD ALMANAC by Mr. John Wilkes, of Nashville, Tenn., by omitting such denominations as are not in practical, everyday use in the countries where the system is used exclusively.

TABLES OF THE SYSTEM.

Length.—The denominations in practical use are millimetres (mm.), centimetres (cm.), metres (m.), and kilometres (km.).

10 mm. = 1 cm.; 100 cm. = 1 m.; 1,000 m. = 1 km. NOTE.—A decimetre is 10 cm.

Weight.—The denominations in use are grams (g.), kilos* (kg.), and tons (metric tons).

1,000 g. = 1 kg.; 1,000 kg. = 1 metric ton.

Capacity.—The denominations in use are cubic centimetres (c. c.), and litres (l.).

1,000 c. c. = 1 l. NOTE.—A hectolitre is 100 l. (seldom used).

Relation of capacity and weight to length: A cubic decimetre is a litre, and a litre of water weighs a kilo.

APPROXIMATE EQUIVALENTS.

A metre is about a yard; a kilo is about 2 pounds; a litre is about a quart; a centimetre is about $\frac{1}{2}$ inch; a metric ton is about same as a ton; a kilometre is about $\frac{1}{2}$ mile; a cubic centimetre is about a thimbleful; a nickel weighs about 5 grams.

Measures and Weights of Great Britain.

THE measures of length and the weights are nearly, practically, the same as those in use in the United States. The English ton is 2,240 lbs. avoirdupois, the same as the long ton, or shipping ton of the United States. The English hundredweight is 112 lbs. avoirdupois, the same as the long hundredweight of the United States. The metre has been legalized at 39.3709 inches, but the length of 39.370432 inches, as adopted by France, Germany, Belgium and Russia, is frequently used.

The Imperial gallon, the basis of the system of capacity, involves an error of about 1 part in 1,836: 10 lbs. of water = 277.123 cubic inches.

Domestic Weights and Measures.

Apothecaries' Weight: 20 grains = 1 scruple; 3 scruples = 1 dram; 8 drams = 1 ounce; 12 ounces = 1 pound.

Avoirdupois Weight (short ton): 27 11-32 grains = 1 dram; 16 drams = 1 ounce; 16 ounces = 1 pound; 25 pounds = 1 quarter; 4 quarters = 1 cwt.; 20 cwt. = 1 ton.

Avoirdupois Weight (long ton): 27 11-32 grains = 1 dram; 16 drams = 1 ounce; 16 ounces = 1 pound; 112 pounds = 1 cwt.; 20 cwt. = 1 ton.

Troy Weight: 24 grains = 1 pennyweight; 20 pennyweights = 1 ounce; 12 ounces = 1 pound.

Circular Measure: 60 seconds = 1 minute; 60 minutes = 1 degree; 30 degrees = 1 sign; 12 signs = 1 circle.

Cubic Measure: 1,728 cubic inches = 1 cubic foot; 27 cubic feet = 1 cubic yard.

Dry Measure: 2 pints = 1 quart; 8 quarts = 1 peck; 4 pecks = 1 bushel.

Liquid Measure: 4 gills = 1 pint; 2 pints = 1 quart; 4 quarts = 1 gallon; 31½ gallons = 1 barrel; 2 barrels = 1 hogshead.

Long Measure: 12 inches = 1 foot; 3 feet = 1 yard; 5½ yards = 1 rod or pole; 40 rods = 1 furlong; 8 furlongs = 1 statute mile; 3 miles = 1 league.

Mariner's Measure: 6 feet = 1 fathom; 1.0 fathoms = 1 cable length; 7½ cable lengths = 1 mile; 5,280 feet = 1 statute mile; 6,085 feet = 1 nautical mile.

Square Measure: 144 square inches = 1 square foot; 9 square feet = 1 square yard; 30¼ square yards = 1 square rod or perch; 40 square rods = 1 rood; 4 roods = 1 acre; 640 acres = 1 square mile; 36 square miles (6 miles square) = 1 township.

Time Measure: 60 seconds = 1 minute; 60 minutes = 1 hour; 24 hours = 1 day; 7 days = 1 week; 365 days = 1 year; 366 days 1 leap year.

FOREIGN MONEYS.

English Money: 4 farthings = penny (*d*); 12 pence = 1 shilling (*s*); 20 shillings = 1 pound (£).

French Money: 10 centimes = 1 decime; 10 decime = 1 franc.

German Money: 100 pfennig = 1 mark.

Russian Money: 100 copecks = 1 rouble.

Austro-Hungarian Money: 100 kreutzer = 1 florin.

For United States equivalents, see tables of "Value of Foreign coins in U. S. Money."

NOTE.—France, Belgium, Greece, Italy and Switzerland constitute what is known as the "Latin" Union, and their coins are alike in weight and fineness, occasionally differing, however, in name. The same system has been in part adopted by Spain, Servia, Bulgaria, Russia and Roumania, but they have not joined the Union. France and centimes of France, Belgium and Switzerland are respectively designated lire and centesimi in Italy; drachmai and lepta in Greece; dinars and paras in Servia; peseta and centimos in Spain; leys and banis in Roumania; leya and stotinks in Bulgaria. Similarly the Scandinavian countries, Norway, Sweden and Denmark, employ coins of the same weight and fineness, their names being also alike. Most of the South American States possess a standard coin, equal in weight and fineness to the silver 5-franc piece generally termed a "peso." — *Whitaker*.

* Annual statements of the fire insurance companies are rendered to the insurance departments during the month of January; therefore the statistics of condition in 1893 were not ready when this publication went to press.

† The New York law requires a deposit of \$200,000 from foreign companies with the insurance department. This is treated by the department as "deposit capital," and the surplus stated in the next column is "surplus beyond deposit capital" and other liabilities.

* This estimate is of a very general nature, and affords no index to the disposable volume of land remaining nor the amount available for agricultural purposes. It includes Indian and other public reservations, unsurveyed private land claims, as well as surveyed private land claims, in the districts of Arizona, California, Colorado, and New Mexico; the sixteenth and thirty-sixth sections reserved for common schools; unsurveyed lands embraced in railroad, swamp land, and other grants; the great mountain areas; the areas of unsurveyed rivers and lakes, and large areas wholly unproductive and unavailable for ordinary purposes. The area of land in the unsurveyed portion of the public domain suitable for homes and subject to settlement under the laws of the United States is of comparatively small proportions.

Number of acres under contract made prior to June 30, 1893, and not heretofore reported, because accepted since June 30, 1893: California, 251,060 acres; Colorado, 353,489; Idaho, 884,892; Louisiana, 1,698; Minnesota, 365,773; Montana, 581,901; Nevada, 391,699; North Dakota, 805,587; Oregon, 508,543; South Dakota, 1,048,922; Washington, 505,288; Wyoming, 562,366; Alaska, 598; Arizona, 10,030; New Mexico, 206,244; Oklahoma, 348,873; Utah, 107,494.

* This aggregate is exclusive of Ohio, Indiana, and Illinois, in which, if any public land remains, it consists of a few small isolated tracts. It is exclusive of Alaska, containing 577,390 square miles, or 369,529,600 acres. It is also exclusive of military and Indian reservations and lands subject to sale for the benefit of certain Indian tribes, and exclusive of reservoir site and timber reservations and tracts covered by selections, filings, railroad grants and claims as yet unadjudicated, a part of which may in the future be added to the public domain. THE CARPET-BAG DEBTS OF THE SOUTHERN STATES.

The "carpet-bag" debts of the Southern States, under which some of them are still suffering, were created during the reconstruction period, when the South was at the mercy of adventurers from the North and the ranks of the negro population supported and protected by the Federal Government. These burdens on the helpless people aggregated in 1871 some \$291,626,015, distributed among the reconstructed States as follows: Alabama, \$52,701,917; Arkansas, \$19,398,000; Florida, \$15,797,587; Georgia, \$42,560,500; Louisiana, \$40,021,734; North Carolina, \$34,887,464; South Carolina, \$22,480,516; Texas, \$14,930,000; Virginia, \$47,090,866. It must be borne in mind that the debts of the Southern States contracted from 1861 to 1865 were repudiated by the enforcement of the XIVth Amendment to the Constitution of the United States, so that the indebtedness above shown was due almost wholly to "carpet-bag" financing.

* In these amounts there is included debt of Hungary for 1880, \$536,051,184; for 1890, \$837,928,836. Florin reckoned at 50 cents. † Inclusive of floating debt, but exclusive of annuities, whose capitalized value is estimated by good authority to be not less than \$2,000,000,000. ‡ The rupee is reckoned at 50 cents. Its exchange value in 1890 was about 35 cents, making the actual face value of the debt about 30 per cent less than stated.

Of the whole number of post-offices at the close of the fiscal year, June 30, 1893, 3,360 were Presidential offices and 65,043 were fourth-class offices. * Includes mail messenger and special office service

The approximate number of letters and postal cards transmitted annually in the mails of European countries is as follows: Great Britain and Ireland, 1,500,000,000; Germany, 1,200,000,000; France, 700,000,000; Austria-Hungary, 600,000,000; Italy, 250,000,000; Russia, 200,000,000; Belgium, 130,000,000; Spain, 120,000,000; Switzerland, 110,000,000; Netherlands, 100,000,000; Sweden, 100,000,000.

The number of pieces of postal matter of all kinds which pass through the mails of the United States annually is about 3,800,000,000. The annual aggregate number of letters transmitted through the post-offices of the world may be estimated at 8,000,000,000, and of newspapers, 5,000,000,000.

The Life-Saving Service.

THE ocean and lake coasts of the United States are picketed with the stations of the Life-Saving Service attached to the United States Treasury Department. Sumner I. Kimball is general superintendent, with headquarters at Washington, and there is a corps of inspectors, superintendents, station keepers, and crews, extending over the entire coast line, together with a Board on Life-Saving Appliances, composed of experts selected from the Revenue Marine Service, the Army, the Life-Saving Service, and civilians.

At the close of the last fiscal year the life-saving establishment embraced 244 stations, 182 being on the Atlantic coast, 49 on the lakes, 12 on the Pacific coast, and 1 at the falls of the Ohio, Louisville, Ky.

In the following table the statistics of the service for the fiscal year ending June 30, 1893, and since introduction of present system in 1871 to June 30, 1893, are stated separately:

	Year Ending June 30, 1893.	Since Introduction of Life-Saving System in 1871, to June 30, 1893.

Value of Property Lost.....	1,655,570	27,569,122
Number of Persons Involved.....	3,565	56,818
Number of Persons Lost.....	23	656
Number of Shipwrecked Persons Succored at Stations.....	*663	10,563
Number of Days' Succor Afforded.....	1,659	27,647
Number of Vessels Totally Lost on the United States Coasts.....	88

* Including castaways not on board vessels embraced in tables.

In addition to the foregoing, there were 154 casualties to smaller craft, such as sailboats, row-boats, etc., on which there were 327 persons, of whom 321 were saved and 6 lost. In addition to persons saved from vessels, there were 41 others rescued who had fallen from wharves, piers, etc., and who would probably have perished without the aid of the life-saving crews. The cost of the maintenance of the service during the year was \$1,231,893.45.

Patent Office Procedure.

PATENTS are issued in the name of the United States, and under the seal of the Patent Office, to any person who has invented or discovered any new and useful art, machine, manufacture, or composition of matter or any new and useful improvement thereof, not known or used by others in this country, and not patented or described in any printed publication in this or any foreign country, before his invention or discovery thereof, and not in public use or on sale for more than two years prior to his application, unless the same is proved to have been abandoned; and by any person who, by his own industry, genius, efforts and expense has invented and produced any new and original design for a manufacture, bust, statue, alto-relievo, or bas-relief; any new and original design for the printing of woolen, silk, cotton, or other fabrics; any new and original impression, ornament, pattern, print, or picture to be printed, painted, cast, or otherwise placed on or worked into any article of manufacture; or any new, useful, and original shape or configuration of any article of manufacture, the same not having been known nor used by others before his invention or production thereof, nor patented nor described in any printed publication, upon payment of the fees required by law and other due proceedings had.

Every patent contains a grant to the patentee, his heirs or assigns, for the term of seventeen years, of the exclusive right to make, use, and vend the invention or discovery throughout the United States and the Territories, referring to the specification for the particulars thereof.

If it appear that the inventor, at the time of making his application, believed himself to be the first inventor or discoverer, a patent will not be refused on account of the invention or discovery, or any part thereof, having been known or used in any foreign country before his invention or discovery thereof, if it had not been before patented or described in any printed publication.

Joint inventors are entitled to a joint patent; neither can claim one separately. Independent inventors of distinct and independent improvements in the same machine cannot obtain a joint patent for their separate inventions; nor does the fact that one furnishes the capital and another makes the invention entitle them to make application as joint inventors; but in such case they may become joint patentees.

The receipt of letters patent from a foreign government will not prevent the inventor from obtaining a patent in the United States, unless the invention shall have been introduced into public use in the United States more than two years prior to the application. But every patent granted for an invention which has been previously patented by the same inventor in a foreign country will be so limited as to expire at the same time with the foreign patent, or, if there be more than one, at the same time with the one having the shortest unexpired term, but in no case will it be in force more than seventeen years.

APPLICATIONS.

Applications for a patent must be made in writing to the Commissioner of Patents. The applicant must also file in the Patent Office a written description of the same, and of the manner and process of making, constructing, compounding, and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art or science to which it appertains, or with which it is most nearly connected, to make, construct, compound, and use the same; and in case of a machine, he must explain the principle thereof, and the best mode in which he has contemplated applying that principle, so as to distinguish it from other inventions, and particularly point out and distinctly claim the part, improvement, or combination which he claims as his invention or discovery. The specification and claim must be signed by the inventor and attested by two witnesses.

When the nature of the case admits of drawing, the applicant must furnish a drawing of the required size, signed by the inventor or his attorney in fact, and attested by two witnesses, to be filed in the Patent Office. In all cases which admit of representation by model, the applicant, if required by the Commissioner, shall furnish a model of convenient size to exhibit advantageously the several parts of his invention or discovery.

The applicant shall make oath that he verily believes himself to be the original and first inventor or discoverer of the art, machine, manufacture, composition, or improvement for which he solicits a patent, that he does not know and does not believe that the same was ever before known or used, and shall state of what country he is a citizen. Such oath may be made before any person within the United States authorized by law to administer oaths, or, when the applicant resides in a foreign country, before any minister, chargé d'affaires, consul, or commercial agent holding commission under the Government of the United States.

On the filing of such application and the payment of the fees required by law, if, on such examination, it appears that the claimant is justly entitled to a patent under the law, and that the same is sufficiently useful and important, the Commissioner will issue a patent therefor.

Every patent or any interest therein shall be assignable in law by an instrument in writing; and the patentee or his assigns or legal representatives may, in like manner, grant and convey an exclusive right under his patent to the whole or any specified part of the United States.

REISSUES.

A reissue is granted to the original patentee, his legal representatives, or the assignees of the entire interest when, by reason of a defective or insufficient specification, or by reason of the patentee claiming as his invention or discovery more than he had a right to claim as new, the original patent is inoperative or invalid, provided the error has arisen from inadvertence, accident, or mistake, and without any fraudulent or deceptive intention. In the cases of patents issued and assigned prior to July 8, 1870, the applications for reissue may be made by the assignees; but in the cases of patents issued or assigned since that date, the applications must be made and the specifications sworn to by the inventors, if they be living.

CAVEATS.

A caveat, under the patent law, is a notice given to the office of the caveator's claim as inventor, in order to prevent the grant of a patent to another for the same alleged invention upon an application filed during the life of a caveat without notice to the caveator.

Any citizen of the United States who has made a new invention or discovery, and desires further time to mature the same, may, on payment of a fee of ten dollars, file in the Patent Office a caveat setting forth the object and the distinguishing characteristics of the invention, and praying protection of his right until he shall have matured his invention. Such caveat shall be filed in the confidential archives of the office and preserved in secrecy, and shall be operative for the term of one year from the filing thereof.

The caveat must comprise a specification, oath, and, when the nature of the case admits of it, a drawing, and, like the application, must be limited to a single invention or improvement.

PATENT OFFICE PROCEDURE—Continued.

FEES.

Fees must be paid in advance, and are as follows: On filing each original application for a patent, \$15. On issuing each original patent, \$20. In design cases: For three years and six months, \$10; for seven years, \$15; for fourteen years, \$30. On filing each caveat, \$10. On every application for the reissue of a patent, \$30. On filing each disclaimer, \$10. For certified copies of patents and other papers in manuscript, ten cents per hundred words; for certified copies of printed patents, eighty-five cents; for uncertified copies of printed patents, ten cents. For recording every assignment, agreement, power of attorney, or other paper, of three hundred words or under, \$1; of over three hundred and under one thousand words, \$2; of over one thousand words, \$3. For copies of drawings, the reasonable cost of making them.

PATENT OFFICE STATISTICS.

The receipts of the Patent Office during the fiscal year 1893-94 were \$1,183,523, and expenditures, \$1,053,962. Receipts over expenditures, \$129,561.

The following is a statement of the business of the office for the fiscal year ending June 30, 1894:

Number of applications for patents.....	35,952	Number of patents granted, including reissues and designs.....	22,546
Number of applications for design patents.....	1,050	Number of trade marks registered.....	1,656
Number of applications for reissue patents.....	108	Number of labels registered.....	None

It will be seen that it is possible that the widow of a Revolutionary soldier may be drawing a pension in the year 1916. For a similar reason the widow of a veteran of the late Civil War may be living in 2002.

Notwithstanding wider fluctuations it will be seen there has been a much greater increase in the average annual consumption of coffee per capita than of tea. In the coffee trade this is attributed largely to the improved methods of preparing coffee for retailing, the new processes of roasting, etc., by which coffee is supplied to the consumer in more attractive and convenient form; while in the tea trade this is scarcely regarded as a sufficient explanation. That tea drinking is more of a matter of national taste and habit than a result of climatic conditions or relative cheapness and nearness to the sources of supply, is indicated by the comparative consumption of tea and coffee in the principal countries of Europe.—

 "Fineness," the term used in treating of bullion mints, coinage and money, indicates the proportion of pure metal contained in a piece of gold or silver. Fineness is expressed in thousandths, that is, pure metal is 1,000. United States coin is 900-1000 fine, or decimally, .900 fine. Fineness is estimated by jewelers and workers in the precious metals by "carats," pure metal being 24 carats. Thus, 22 carats, the British standard for gold coins, is 22-24 carats, or decimally, .91666 fine.
 "Mint Mark" means the letter or mark on the coin designating the mint at which it was struck, as "S," for San Francisco; "C. C.," for Carson City; "O," for New Orleans. The coins struck at the parent mint in Philadelphia bear no mint mark. — Evans's "History of the United States Mint."

From an examination of the above table it will be seen that of the 60,000,000 ounces of silver produced in the United States during the calendar year 1893, about 27,600,000 ounces were extracted from milling ores—that is, silver ores proper, while 24,700,000 ounces came from lead ores, and 7,600,000 ounces from copper ores.

It would appear, therefore, that less than one-half of the silver product of the United States is derived from mines producing silver ores proper, and that considerably more than one-half of the entire silver output of the United States is an incidental product from the smelting of lead and copper ores, although this incidental product is frequently more valuable than the other metals contained.

Building and Loan Associations

IN THE UNITED STATES.

(Statistics compiled by the United States Commissioner of Labor.)

The following is a summary of the Statistics of Building and Loan Associations in the United States, compiled by Carroll D. Wright, United States Commissioner of Labor, the report having been made for 1893-94. These associations are known by various names, but the principle underlying them is the same. In some of the States they are called "building and loan associations," in others "coöperative banks," in others "building and saving associations," etc. The report comprehends every State in the Union except Vermont, in which there is only one association. The distribution of these associations, by States, is shown as follows:

One of the most interesting facts shown by the report relates to the age of the associations. While building and loan associations had their birth in the decade of years from 1840 to 1850, with, perhaps, here and there one prior to the first date named, the report shows that the average age of all the associations is but 6.2 years, the local associations having an average age of 6.3 years, and the nationals an average of only 2.5. Of the locals 2,394 are under 5 years of age, 2,163 are 5 years or under 10 years of age, and 589 are 10 years or under 15 years of age, making a total of 5,146 associations out of the whole number under 15 years of age. There are but 433 over 15 years of age. These figures certainly show that the building and loan associations of the country are entirely modern institutions and have reached their great proportions during the last ten or fifteen years. This, in connection with the fact that they have net assets of over \$450,000,000, have made total profits of more than \$80,000,000, have helped to secure probably over 400,000 homes, and are semi-banking institutions conducted by ordinary men not trained as bankers, but yet have met with remarkably few losses, shows conclusively the strong hold which building and loan associations have taken upon the public.—Commissioner Wright.

Of the whole number of immigrants in the fiscal year ending June 30, 1894, 253,586 came through the customs district of New York; 13,425 through Baltimore; 17,558 through Boston; 19,861 through Philadelphia, and 5,743 through San Francisco.

The reported occupations of immigrants who arrived during the year ending June 30, 1894, were as follows: Laborers, 59,575; farmers, 16,452; servants, 28,763; carpenters, 2,934; miners, 2,505; clerks, 2,222; tailors, 3,184; shoemakers, 2,284; blacksmiths, 1,554. The total number of professional immigrants was 1,738; of skilled laborers, 33,926; of miscellaneous, 116,187.

* Immigrants from the British North American possessions and Mexico are not included since July 1, 1885.

* Not given in 1890. † Reports discontinued after 1885. ‡ Includes Central and South America for 1889.

As the reports for British North American Provinces and for Mexico have been discontinued since 1885 by the Treasury Department, the figures here represented only cover five years of the decade. An estimate based upon the immigration of the years from 1881 to 1885, inclusive, would give 785,604 to British North America for the decade from 1881 to 1890, and 3,826 to Mexico, making the aggregate for America 817,563, instead of 422,848.

Mullhall estimates the number of individuals who emigrated from Europe in 73 years, 1816 to 1888, at 27,205,000. Of these, 15,000,000 came to the United States.

(r) Of 300 pounds for natural cement, and 400 pounds for artificial Portland. (s) Of 280 pounds net. The reduced price in 1893 is due to omitting cost of packages. (t) Including metallic paints, ocher, umber, venetian red, sienna, ground soapstone, ground slate, and mineral glass. (x) Included in asphaltum. (y) Including building-sand, glass-sand, limestone used as flux in lead-smelting, limestone in glass-making, iron ore used as flux in lead-smelting, tin ore, iridosmine, nitrate of soda, carbonate of soda, sulphate of soda, bauxite, and alumin clays used by paper manufacturers.

For the ten years' (1880 to 1889) product reported by U. S. Census see THE WORLD ALMANAC for 1894.

(Corrected for this year's ALMANAC by the Chief of the Forestry Division, Department of Agriculture).

FOREST AREA.

TOTAL forest area in the United States is estimated at round 495,000,000 acres, or 26 per cent of total area, of which about 40 per cent is in farms, while the area of land in farms unimproved or waste not in forest may be estimated at about 75,000,000 acres. Alaska and Indian reservations are not included.

The present annual requirements for consumption of forest products in the United States are, approximately, over 24,000,000,000 cubic feet, made up of the following items: Lumber market and manufactures, 5,000,000,000 cubic feet; railroad construction, 600,000,000 cubic feet; charcoal, 250,000,000 cubic feet; fences, 500,000,000 cubic feet; fuel, 18,000,000,000 cubic feet; mining timber, 150,000,000 cubic feet.

At the present rate of cutting, the remainder of forest land in the United States cannot long meet the enormous demands on its resources. Of the two most important timbers for building purposes, the merchantable White Pine of the Northwest and of New England is practically gone, very little remaining, and there remains of the merchantable Long-leaf Pine of the South only about 1,500,000,000 cubic feet. The valuable Ash will probably be the first to be exhausted. Walnut and Tulip trees are also on the wane.

Forest fires are estimated to destroy values of about \$12,000,000 annually, but during the year 1894 that amount appears to have been lost in Minnesota and Wisconsin alone.

FOREST PRESERVATION.

For the preservation of the forests, the State of New York instituted a Forest Commissioner in 1885, with extensive powers, and a new commission, with new powers, was legislated in 1893. The State of California has also created a Forest Commission (which after several years' work was abolished in 1893 on account of political incompetency), and Colorado, North Dakota, Pennsylvania, and New Hampshire have Forest Commissions. Ohio has a Forestry Bureau, Maine a Forest Commissioner, and in New Jersey the Geological Survey is specially charged with the forestry interests.

A national organization known as the American Forestry Association (formerly Congress), composed of delegates from all the States, meets annually. The twelfth annual meeting was held at Washington, D. C., December, 1893. J. D. W. French, Boston, Mass., is Corresponding Secretary. Local or State Associations have been formed in Colorado, Ohio, New York, Pennsylvania, Kentucky, Minnesota, Texas, South Carolina, North Dakota, Wisconsin, and New Jersey.

By act of March 3, 1891, the President is authorized to make public forest reservations. Seventeen such, comprising 17,500,000 acres, have been established in Colorado, New Mexico, California, Arizona, Wyoming, Oregon, Washington, and others are under consideration. A bill to provide a systematic forest administration for these is before Congress.

ARBOR DAY.

The individual States have striven to encourage tree-planting by appointing a certain day in the year, to be known as Arbor Day, for the voluntary planting of trees by the people, and latterly the interest has been widened by inducing the pupils of the public schools to take part in the observance. The credit of inaugurating Arbor Day belongs to the Nebraska State Board of Agriculture, which in 1874 recommended the second Wednesday of April in each year as a day dedicated to the work of planting trees. The following States and Territories have since then, by legislative enactment or otherwise, established an annual Arbor Day: Alabama, Arizona, California, Colorado, Connecticut, Florida, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Montana, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, West Virginia, Wisconsin, Wyoming—44 in all; in twenty-one States, by act of legislature; in six States, as legal holidays; in five as holidays for schools. (See Legal Holidays.)

These estimates are by Mulhall. The following estimate of the area of the principal coal-fields of the world is from the same source:

AREA OF THE WORLD'S COAL-FIELDS.

IN SQUARE MILES.

China and Japan, 200,000; United States, 194,000; India, 35,000; Russia, 27,000; Great Britain, 9,000; Germany, 3,600; France, 1,800; Belgium, Spain and other countries, 1,400. Total, 471,800.

The coal-fields of China, Japan, Great Britain, Germany, Russia, and India contain apparently 303,000,000 tons, which is enough for 700 years at present rate of consumption. If to the above be added the coal-fields in the United States, Canada, and other countries, the supply will be found ample for 1,000 years. Improved machinery has greatly increased the yield per miner, and thus produced a fall in price to the advantage of all industries.

The above statement is made by Henry R. Merton & Co., of London.

The copper production of the United States in 1893, in pounds, was distributed as follows: Arizona, 43,717,425; California, 2,825,773; Colorado, 7,121,257; Michigan, 113,462,129; Montana, 150,092,711; New Mexico, 273,515; Utah, 1,312,171; East and South, 415,025; all others and undistributed, 3,365,494; total, 322,585,500.

The tin production of the world in 1891, or approximate years, was estimated by the *American Manufacturer* at 69,963 tons of 2,240 pounds, of which 310 tons were produced in the United States, 60 per cent of it being metallic tin.

The world's production of lead in 1888, according to Mulhall, was 457,000 tons, of which 35 per cent was produced in the United States.

* No report for 1893, but that of 1892 was; Acres, 6,613; pounds, 2,976,000; value, \$312,464.

The number of cigarettes manufactured in the United States in 1890-91 was, according to the Internal Revenue returns, 2,877,799,440. The value of leaf tobacco exported from the United States, year ending June 30, 1893, was \$22,202,704; of cigars, \$63,993; of cigarettes, \$1,151,487; of all products of tobacco, \$26,942,454.

The product of tobacco in Europe is nearly equal in quantity to the average production of the United States. Neumann-Spallart has usually made it about 500,000,000 pounds. Austria-Hungary produces about one-third of it, Russia one-tenth, Germany nearly as much, France about 35,000,000 pounds, and the other countries a small quantity. Europe can easily produce all the tobacco required, but two reasons are prominent for importation of tobacco from this country. It is very cheap, and it is very desirable for mixing with and fortifying European leaf.

Service in all Continental armies is compulsory on all able-bodied males between certain ages. The length of service and the age vary in different countries. Thus in France every Frenchman upon reaching the age of 20 is liable to military service till he reaches the age of 40. In Germany every male is liable on reaching the age of 17, and continues so till he reaches 45. Military service is of two kinds—active military service and occasional liability to military service. Each year a certain number of males reach the age of liability, and are enrolled for service. From their numbers are excused all who are morally and physically unfit, and then a certain number are transferred to non-combatant corps. All who actually serve throughout the entire year constitute the peace establishment. At the end of five years, their actual service having ceased, they are graduated soldiers, and are transferred to the first reserve; and after a few years' service in that to another reserve. All the graduated soldiers who are under the extreme age of 30 or 32 constitute the active army—that is, they are the ones who, on breaking out of war, with the peace army, form the first great war army, and all the graduated soldiers between ages of 32 and 45 constitute the reserves to this army, and form second armies. Then all those over the age of 40 or 45 form the last reserves, whose business it is to stay at home and garrison the depots, make the provisions and supplies, ammunition, etc., for the war armies. They are never called out except in case of invasion.

The "vehicles" in the tables mean the wagons used for transporting guns and ammunition, clothing and food supplies, the ambulances, etc., necessary for an army in the field. By the "train" is meant the pontoon outfits, bridge-building outfits, etc., which accompany the engineer troops and are under their charge.

* Adopted for the army.

† Weight of bullet, 220 grains; of powder, 30 grains.

RIFLES USED BY THE PRINCIPAL POWERS OF THE WORLD—Continued.

The new United States Army magazine rifle is thus described: "Its weight is 8¾ pounds, and it is exceedingly pleasing in appearance. The barrel is 30 inches long, rifled with four grooves, each three times the width of the lands, and making one turn in 10 feet. For the triangular bayonet of our last and preceding wars, a knife bayonet has been substituted having a blade 12 inches long. It can be readily attached to the gun or detached to dig up earth or cut brush. The calibre is .30 inch. The bullet weighs 220 grains and is fired with 30 grains of smokeless powder, giving a velocity of 2,000 feet per second and a trajectory so flat that at 600 yards it does not rise above the height of a man. It is superior to any in service anywhere."

Shortly after the Naval Board convened to determine upon a gun for our Navy it decided on a calibre of .236 inch, but with a velocity of 2,400 feet per second. This Naval Board has since practically adopted a type of gun with the above calibre, which is to be made at the Naval Arsenal in Washington. The Army rifle has been manufactured and issued the past year to two infantry regiments, and will be issued to entire army before the close of 1895. More or less opposition manifested itself the past year by people who did not understand the power of the new gun. In actual tests it surpassed what it had been deemed capable of. At ordinary range, its point-blank firing was wonderfully great—over 600 yards—that is, there will be no need for the use of sights up to that distance, so flat is the trajectory. Again, friends of the old Springfield predicted that the new weapon would be disappointing in its destructive power. The prediction has been disproved by experiments made by the German Medical Staff with this weapon. They found that notwithstanding its small size, the wounds inflicted by this bullet are highly destructive, owing to the enormous speed of rotation, which causes the tissues to be torn away within a radius of four inches. Up to 600 yards a bullet in abdomen or neck is death, and from 600 to 1,600 yards is, in most cases, fatal. The Army Board was at first disposed to criticise the Naval Board on account of the small calibre it adopted, but in view of these medical reports it concedes that the calibre should never be greater than .236 inch, and may be smaller. The power of the new Navy rifle is best shown by stating its point-blank range—725 yards; that is, up to two-fifths of a mile a man need never adjust or look at his sights.

SMOKELESS POWDER.

It is only within a few years that the question of adoption of magazine firearms was taken up, until now every country has chosen some type of the magazine gun with which to equip its armies. The change of calibre accompanying the gun was necessarily followed by a change of ammunition. Since the range of field guns had been so vastly increased, it was necessary to increase the range of the small arms, and as owing to the rapidity of fire but little time was allowed the soldier to aim, it was necessary that the trajectory of the new gun should be very flat. These two conditions seemed to impose a very quick and strong burning powder, but in such case the gun would have to be made very strong, and therefore the weight increased in order to withstand it. Therefore it came about that the slow burning powder was adopted. This burning slowly at first, the bullet was started, and the combustion, increasing rapidly, reached its maximum power at the muzzle when the gun was best able to stand it. Then another difficulty arose. It was seen that with the old powders and guns the smoke was often so thick that the soldier could scarce breathe at times. With these new guns firing so rapidly, he would not only be nearly smothered, but his vision of the enemy entirely obscured. Hence arose the necessity of the so-called smokeless powders. These are not absolutely smokeless, but there is so little vapor or smoke arising from their use that at firing ranges it cannot be seen. The table below gives the comparative strength of all the principal smokeless powders and high explosives, except cordite, which has been recently adopted by the English War Department, and on experiments gave most excellent results. It would come in point of strength immediately after Emmensite.

One fact connected with high explosives has been most clearly established. It is that the new powders in which nitro-glycerine is the principal component can be made equally as stable and transformed into as safe a condition as gun-cotton. Furthermore all such powders are the ones that have given the best ballistic results, and whose stability during storage and effects on gun barrels have been much better than in the case of gunpowder.

The Chinese-Japanese War.

To Americans the war in the East has been especially interesting for more than one reason. In the past five years various military authorities, among them no less a person than Britain's leading general, Lord Wolseley, have predicted the fearful results of a war with a country overflowing with human beings like China, when such characteristics as their teachableness, indifference to death, etc., should cause them to awaken to a true knowledge of their power. Yet we have seen a little nation like Japan with 39,000,000 people against the more than ten times that number of China, conquering in every struggle with her gigantic opponent. For years the Chinese have spent millions in building forts, guns, arsenals, ships of war and munitions, etc., but their one great trouble has been their overweening confidence in themselves and their traditions. They have believed that the Chinese were equal to the task of properly teaching their own people the greatest of all sciences, that of modern war, and hence they despised the example of their Japanese neighbors, who had for years many officers of German, French and American nationality as their guides, paying them to teach the art of which civilized peoples alone are masters. The Japanese are not only good soldiers, but they have been made so by their own officers, who have learned their lesson in foreign armies. It stands to the credit of the United States that the majority of the leading Japanese naval officers have been educated at Annapolis. There is, however, in Japan's triumph, a partial menace to the United States that her people will do well to heed. Japan has become by this struggle the dominant nation in Eastern waters, and it may be taken for granted that a people so persevering, so energetic and adaptable will not let go one iota of whatever advantage they gain. They will seek to maintain and show their power in whatever questions may arise regarding the islands of the Pacific, and the Hawaiian Islands will perhaps bring to us very soon the fact that we have opposite to us a power that is ready in the knowledge of her strength to oppose us wherever it conflicts with her interests. — *W. R. Hamilton.*

The fastest time on record was made by the Empire State express on the New York Central and Hudson River Railroad, May 11, 1893, in a run of one mile from Crittenden west, which was made in thirty-two seconds, being equivalent to 112 $\frac{1}{2}$ miles an hour. This was done with locomotive 999 (afterwards exhibited at the World's Fair, at Chicago), the engineer being Charles Hogan.

The fastest time on record for a distance of over 440 miles was made by the King of Pythias special, Jacksonville, Fla., to Washington, D. C., August 26 and 27, 1894, via the Plant system, Atlantic Coast Line, Richmond, Fredericksburg and Potomac railroad, 780.9 miles. Total time, 15 hours 49 minutes, with thirty-four stops, consuming 1 hour 10 minutes. Average speed, including stops, 49.37 miles per hour; excluding stops, 53.29 miles per hour. The train was made up of four cars (one baggage, one coach, and two sleepers), 242,300 pounds.

The fastest long distance run less than 440 miles was on the New York Central Railroad, September 14, 1891, from New York City to East Buffalo, 439 $\frac{1}{2}$ miles, in 425 minutes 14 seconds, actual time, or 439 $\frac{1}{2}$ minutes, including three stops. Average speed, including stops, 61.56 miles an hour.

The Jarrett and Palmer special theatrical train, Jersey City to San Francisco, June, 1886, made the fastest time between the two oceans—3 days 7 hours 39 minutes and 16 seconds.

The fastest regular trains in the United States, for a short distance, are believed to be those between Washington and Baltimore, on the Baltimore and Ohio Railroad, 40 miles in 45 minutes, a speed of 53.33 miles an hour. The run from Washington to New York, 225.3 miles, is made in 5 hours. Deducting 12 minutes for the Jersey City Ferry and 10 minutes for the Canton Ferry, the rate of speed is 48.6 miles per hour. The "Congressional Limited," on the Pennsylvania Railroad, makes the run in 5 hours 5 minutes, but the distance is 227 miles.

The quickest run between New York and Washington was made on the Pennsylvania Railroad, November 28, 1891, by a special train, in 4 hours 11 minutes, making the running time, exclusive of stops, 56 $\frac{1}{2}$ miles an hour. This beat the time of the "Aunt Jack" train, made by the Madison Square Theatre Company, March 10, 1890, which was 4 hours 18 minutes, each way, going and returning.

Interstate Commerce Commission.

This commission, appointed under "an act to regulate commerce," approved February 4, 1887, has authority to inquire into the management of the business of all common carriers who are subject to the provisions of the act. These are all which are "engaged in the transportation of passengers or property wholly by railroad, or partly by railroad and partly by water when both are used, under a common control, management, or arrangement, for a continuous carriage or shipment from one State or Territory of the United States, or the District of Columbia, to any other State or Territory of the United States, or the District of Columbia, or from any place in the United States to an adjacent foreign country, or from any place in the United States through a foreign country to any other place in the United States, and also in the transportation in like manner of property shipped from any place in the United States to a foreign country and carried from such place to a port of transshipment, or shipped from a foreign country to any place in the United States and carried to such place from a port of entry either in the United States or an adjacent foreign country." It has jurisdiction generally over rates on interstate traffic, to pass upon their reasonableness or justice, to decide questions of unjust discrimination and of undue preference, to prescribe the publicity to be given to joint tariffs, and to institute and carry on proceedings for the enforcement of the provisions of the law. It is also empowered in special cases to authorize any such common carrier to charge less for a longer distance than for a shorter over the same line, and to prescribe the extent to which the carrier may be relieved from the "long and short haul clause" of said act.

TRAFFIC ON NEW YORK CANALS.

The total tonnage carried on all the canals in 1894 was 3,882,560, which was a loss of 449,403 tons over the traffic of 1893. The Erie Canal lost 91,582 tons, while the Champlain Canal fell off 298,686 tons.

The total tonnage on the canals was: Products of the forest, 872,601 tons; products of agriculture, 1,412,142 tons; manufactures, 87,241 tons; merchandise, 352,741 tons; other articles, 1,157,835 tons. Total tonnage, 3,882,560.

The freight carried by the various canals was: Erie Canal, 3,144,144 tons; Champlain Canal, 550,279 tons; Oswego Canal, 98,843 tons; Black River Canal, 56,024 tons; Cayuga and Seneca Canal, 33,270 tons.

During the season of canal navigation in 1894 the whole number of bushels of grain received at port of New York was 85,194,369, of which the canals carried 42,608,700 bushels, equal to 50.01 per cent of the total amount.

SUEZ CANAL.

The Suez Canal is ninety-two miles long and cost \$102,750,000. Three thousand three hundred and forty-one ships, of 7,659,000 tons, passed through the Suez Canal in 1893, yielding \$13,124,000 in dues. Three thousand three hundred and fifty-nine vessels passed through in 1892. According to the report of the Company the passengers numbered 186,495 and yielded \$359,752 while sundry accessories yielded \$74,112, making a total of \$13,557,864. Three thousand and eighty-two of the ships, or 92 2/3 per cent, passed through by night. The average duration of transit was 20 hours 44 minutes. As to the nationality of the vessels, the English were 2,405, German 272, French 190, Dutch 178, Austro-Hungarian 71, Italian 67, Norwegian 50, Ottoman 34, Spanish 29, Russian 24, Portuguese 10, Egyptian 5, American 3, Belgian 1, Brazilian 1, Japanese 1.

England carried 75.11 per cent; Germany, 7.26; France, 6.02; Holland, 4.27; Austria, 2.18; Italy, 1.58; Norway, 1.16; Spain, 0.92 per cent of the gross traffic.

MANCHESTER SHIP CANAL.

On May 21, 1894, this Canal was formally declared open to commerce by Queen Victoria, although the canal was practically completed and open to trade on January 1 preceding. Its minimum measurement in depth is 26 feet, in width 120 feet, capable of admitting vessels of 6,000 tons to Manchester docks, over forty miles from the sea. The canal proper, extending from the Cheshire shore of the Mersey to the city of Manchester, is 35 1/2 miles in length. In its bottom width it is nearly twice as wide as the Suez Canal, the average width at water level being 172 feet. The cost is placed at \$75,000,000.

Game Laws.

NEW YORK.

THESE are the regulations of the new game law of May 5, 1892, as amended 1894. Changes are liable to occur during year.

Deer.—Open season in Kings, Queens, and Suffolk Counties and Long Island Sound from November 10 to 16; elsewhere from August 16 to October 31; but absolutely prohibited in Ulster, Greene, and Delaware Counties till August 16, 1897, and in Sullivan County, except during the month of October. Taking alive for breeding in State deer parks permitted at any time anywhere. Only two can be killed or taken alive by anybody each season. Fawns must never be killed or caught. No traps, salt licks, or other devices can be made or used. Dogs can be used in Sullivan County during October only; in Kings, Queens, and Suffolk Counties and Long Island Sound from November 10 to 16; elsewhere from September 11 to October 10, but never in St. Lawrence, Delaware, Greene or Ulster Counties. Any one may shoot dogs so used at other times. Wild deer or venison shall not be possessed or sold between November 15 and August 15, and possession thereof between November 1 and November 15 is forbidden and shall be deemed a violation of the law unless it be proved by the possessor or seller that such deer or venison was killed within the lawful period for killing or out of the State. Only one carcass killed in New York may be transported when accompanied by owner. Crusting or the shooting or capturing of yarded deer forbidden.

Moose, Caribou, and Antelope shall not be hunted, killed, possessed, or sold during the close season for the possession of deer or venison, after the same have been killed.

Black and Gray Squirrels, Hares, and Rabbits shall not be killed or possessed between January 1 and September 1 except in Cattaraugus County, and except that in the counties of St. Lawrence, Franklin, Essex, Clinton, Lewis, Warren, Hamilton, Herkimer, Jefferson, Monroe, Chemung, Richmond, Fulton, Seneca, Ontario, Wayne, and Oneida rabbits may be killed and possessed between August 15 and March 15. The use of ferrets in the hunting of rabbits is prohibited in the counties of Onondaga and Orange. Open season in Kings, Queens, and Suffolk Counties, L. I., and Long Island Sound from November 1 to December 31.

Web-footed Wild Fowl.—Except wild geese and brant. Open season in Kings, Queens, and Suffolk Counties and Long Island Sound from October 1 to April 30; elsewhere from September 1 to April 30. Hours limited to from dawn to sunset.

Quail.—Open season from November 1 to December 31; but on Robbins Island, while belonging to the Robbins Island Club, from October 15 to January 31. Killing or possession forbidden for five years in Genesee, Wyoming, Orleans, Livingston, Monroe, Cayuga, Seneca, Wayne, Tompkins, Tioga, Onondaga, Ontario, Steuben, Otsego, and Cortland Counties. Can be sold from November 1 to January 31 and possessed from November 1 to December 31. Cannot be snared, trapped, or netted.

Partridge or Grouse and Woodcock.—Open season in Kings, Queens, and Suffolk Counties and Long Island Sound from November 1 to December 31. (Woodcock can be killed in these counties from August 1 to December 31.) Elsewhere from August 15 to December 31. Can be sold in above counties from November 1 to January 31; elsewhere from August 15 to January 31, and possessed in above counties from November 1 to December 31; elsewhere from August 15 to December 31. Transportation allowed only when with owner. No partridge or grouse can be snared, trapped, or netted.

Wild Birds.—Must never be killed, except English sparrow, crane, hawk, crow, raven, crow-blackbird, common blackbird, or kingfisher.

Bass.—Black and Oswego; open season from June 1 to December 31, but in Lake George from August 1 to December 31, and in Black Lake, St. Lawrence County, from May 6 to December 31. Black bass must be eight inches long.

Muskallonge.—Open season from June 1 to December 31.

Pike.—Open season always, save in Susquehanna and tributaries from November 1 to May 30.

Salmon.—Open season from March 1 to August 15. Must be eighteen inches long.

Salmon Trout and Land-locked Salmon.—Open season in Kings, Queens, and Suffolk Counties and Long Island Sound from April 1 to September 30; elsewhere in inland waters, May 1 to September 30. Salmon trout can be sold if not caught during closed season, and be possessed from May 1 to September 30. Must not be molested while spawning. Transportation allowed only when with owner.

Shad and Herring.—Open season in Rondout Creek and Hudson and Delaware Rivers from March 15 to June 15 (netting then permitted, save from sunset Saturdays to sunrise Mondays). Nets forbidden north of dam at Troy. Open season elsewhere always.

Trout.—Open season in Kings, Queens, and Suffolk Counties and Long Island Sound from April 1 to August 31, and in Lake George from May 1 to August 31; elsewhere from April 15 to August 31. Must be six inches long. Must not be molested while spawning. Transportation allowed only when with owner.

Shooting on Sunday, fishing within fifty rods of State fisheries and fishways, drawing off water to catch fish, pollution of waters, and stocking of the Adirondack waters with any fish, except of the salmon and trout families, fishing through the ice in waters inhabited by trout, salmon trout, or land-locked salmon, prohibited. Salmon, black bass, trout, salmon trout, pike, and perch, caught in nets, in fishing for other fish in the Hudson River, must be cast back.

Of the 82,329 prisoners (confined in penitentiaries, county jails, and juvenile reformatories) in the United States in 1890, there were 57,310 of purely white blood, 24,277 negroes, 407 Chinese, 13 Japanese, and 322 Indians.

Of the 114,620 parents of the white prisoners 45,732 were native, 60,153 were foreign born, and the birthplaces of 8,735 were reported as unknown.

Omitting the unknown, the percentage of prisoners of the native element was 43.19 and of the foreign element 56.81.

As to nationalities of the 60,153 foreign parents of American prisoners 29,184 were Irish, 9,987 German, 5,997 English, 4,064 English Canadian, 1,996 Scotch, 1,483 Mexican, 1,209 Italian, and 1,036 French. Other nationalities were below 1,000.

Of the 73,045 paupers in almshouses there were 66,578 whites, 6,418 negroes, 13 Chinese, and 36 Indians.

Of the 133,156 parents of the white paupers 45,215 were native, 63,587 were foreign born, and 24,354 unknown as to birthplace. Omitting the unknown, as in the case of prisoners, 41.56 per cent of the paupers were of native and 58.44 per cent of foreign extraction.

As to nationalities of 63,587 foreign parents of American paupers 32,421 were Irish, 15,629 German, 4,688 English, 2,012 English Canadians, 1,392 Scotch, and 1,368 Swedish. Other nationalities were below 1,000.

* Statistics of pauperism apply only to inmates of almshouses. Outdoor paupers are not considered and there is no way of ascertaining their number in the United States, but it is comparatively small compared with that of European countries.

PAUPERISM IN FOREIGN COUNTRIES.

1890. Registered public paupers in England and Wales, 780,451; Ireland, 107,129; France, 290,000; Germany, 320,000; Russia, 350,000; Austria, 290,000; Italy, 270,000.

HOMICIDE IN THE UNITED STATES.

The census bulletin presenting statistics of homicide in the United States in 1890 was prepared by Frederick H. Wines, special agent on pauperism and crime. The following is the summing up of the results of his investigations:

Of 82,329 prisoners in the United States June 1, 1890, the number charged with homicide was 7,386, or 8.97 per cent.

Omitting 35 who were charged with double crimes, 6,958 of them (or 94.65 per cent) were men, and 393 (or 5.35 per cent) were women.

As to color, 4,425 were white, 2,730 negroes, 94 Chinese, 1 Japanese, and 92 Indians.

As to the nativity of the 4,425 whites, 3,157 were born in the United States, 1,213 were foreign born, and the birthplace of 55 is unknown.

A careful and accurate inquiry into the parentage of those born in the United States results in the mathematical conclusion that 56.14 per cent of homicides committed by white men and women is chargeable to the native white element of the population, and 43.86 per cent to the foreign element. On the same scale of 4,614 to 3,605, the negro contribution to homicide is represented by 5,478.

The percentage of those who can both read and write is 61.73; of those who can read only, 4.84; of those who can do neither, 33.43. Of the negroes, more than one-half can neither read nor write; of the Indians, nearly two-thirds. The percentage of illiteracy among the foreign born is nearly or quite three times as great as that among the native whites.

The number who have received a higher education is 253, or 3.44 per cent.

The number employed at the time of their arrest was 5,659; unemployed, 1,225; unknown, 467.

The habits of 973, in respect of use of intoxicating liquors, are not stated. The remaining 6,378 are classed as follows: Total abstainers, 1,282; occasional or moderate drinkers, 3,829; drunkards, 1,267.

As to their physical condition, 6,149 were in good health, 600 ill, 283 insane, 24 blind, 14 deaf and dumb, 18 idiots, and 263 crippled.

CAPITAL PUNISHMENT.

The only States in which the death penalty is forbidden by law are Rhode Island, Maine, Michigan, and Wisconsin. In Rhode Island, the only alternative is imprisonment for life. The death penalty is inflicted in all the States for murder, except the four above named; in Louisiana, for rape, assault with intent to kill, administering poison, arson, and burglary; in Delaware and North Carolina, for rape, arson, and burglary; in Alabama, for rape, arson, and robbery; in Georgia, for rape, mayhem, and arson; in Missouri, for perjury and rape; in Virginia, West Virginia, South Carolina, and Mississippi, for rape and arson; in Florida, Kentucky, Tennessee, Texas, and Arkansas, for rape; in Montana, for rape of dwelling by night; in Maryland, for any variety of arson.

The figures in the first column represent manslaughter of all kinds when perpetrated by an individual, whether by premeditation or passion, or by an insane person, or in self-defense, rioting, duels, and resisting arrest by officers of the law. The number of homicides in the partially reported year 1894 is swollen by the deaths of rioters and others in the strike disturbances of July. The percentage of executions to killings in the nine years included in the table is 2.20. The percentage of killings to total deaths from all causes, same period (estimated), is 0.52, or about 52 per 10,000.

² To October 17, 1894.

The table above was compiled from a record kept and printed annually by the *Chicago Tribune*.

ITALY takes the lead of European nations, with an average annual crop of murders of 2,470, a ratio per 10,000 deaths of 29.4; Spain follows, with a ratio of 23.8, and 1,200 murders; Austria, ratio of 8.8, and 600 murders; France, ratio of 8.0, and 662 murders; England, ratio of 7.1, and 377 murders. The figures, however, represent actual murders, not homicides from all causes, as do those in the United States table.

In England, in the reign of Henry VIII., there were 71,400 persons hanged or beheaded; in one year 300 beggars were executed for soliciting alms. In 1820 no less than 46 persons were hanged in England for forging Bank of England notes, some of which were afterward asserted to be good. Capital punishment was abolished in Italy in 1875, and murders increased 42 per cent. — *Compiled from Muhlall.*

Suicides.

IN European cities the number of suicides per 100,000 inhabitants is as follows: Paris, 42; Lyons, 29; St. Petersburg, 7; Moscow, 11; Berlin, 36; Vienna, 28; London, 23; Rome, 8; Milan, 6; Madrid, 3; Genoa, 31; Brussels, 15; Amsterdam, 14; Lisbon, 2; Christiania, 25; Stockholm, 27; Constantinople, 12; Geneva, 11; Dresden, 51. Madrid and Lisbon show the lowest, Dresden the highest figure.

The average annual suicide rate in countries of the world per 100,000 persons living is given by Barker as follows: Saxony, 31.1; Denmark, 25.8; Schleswig-Holstein, 24.0; Austria, 21.2; Switzerland, 20.2; France, 15.7; German Empire, 14.3; Hanover, 14.0; Queensland, 13.5; Prussia, 13.3; Victoria, 11.5; New South Wales, 9.3; Bavaria, 9.1; New Zealand, 9.0; South Australia, 8.9; Sweden, 8.1; Norway, 7.5; Belgium, 6.9; England and Wales, 6.9; Tasmania, 5.3; Hungary, 5.2; Scotland, 4.0; Italy, 3.7; Netherlands, 3.6; United States, 3.5; Russia, 2.9; Ireland, 1.7; Spain, 1.4.

The causes of suicide in European countries are reported as follows: Of 100 suicides: Madness, delirium, 18 per cent; alcoholism, 11; vice, crime, 19; different diseases, 2; moral sufferings, 6; family matters, 4; poverty, want, 4; loss of intellect, 14; consequence of crimes, 3; unknown reasons, 19.

The number of suicides in the United States, six years, 1882-87, was 8,226. Insanity was the principal cause, shooting the favorite method; 5,386 acts of suicide were committed in the day, and 2,419 in the night. Summer was the favorite season, June the favorite month, and the 11th the favorite day of the month. The month in which the largest number of suicides occur is July.

Prison Association of New York.

OFFICERS.

President, Charlton T. Lewis; Vice-Presidents, Rt. Rev. F. D. Huntington, W. P. Letchworth, Charles Dudley Warner, Rev. Wendell Prime, D. D.; Corresponding Secretary, William M. F. Round, 135 East 15th Street; Recording Secretary, Eugene Smith; Treasurer, Cornelius B. Gold, 15 Wall Street, New York.

The work of the Prison Association of New York is as follows:

1st. To improve our prison system, so that, by better discipline in penal institutions, criminals may be reformed, and thus society protected against their depredations.

2d. To improve the condition of our county jails; many of them are to-day an offence to humanity and a stigma upon Christian civilization.

3d. To assist ex-convicts who are struggling to reform, and yet who find the forces of society opposed to them and the ranks of labor closed to them.

4th. To succor those who are unjustly arrested, and though themselves ignorant of the law's ways, are unable to secure legal counsel.

5th. To counsel and otherwise assist families who are, by the criminal course of some supporting member, left to the bitter struggle of poverty and the added burden of disgrace.

6th. To provide wholesome reading matter for prisoners and to secure proper spiritual and moral instruction in the penal institutions where it does not exist already.

Subscriptions to membership and donations of money are solicited. The payment of \$500 constitutes a life patron and \$100 an honorary life member. Annual membership by payment of \$5 entitles to all publications of the society and participation in its regular meetings.

Barrenness, Illegitimacy, and Childbirth.

BARRENESS.—One woman in 20, one man in 30 are barren—that is, 4 per cent of population. It is found that one marriage in 20 is barren, say, 5 per cent. Among the nobility of England 21 per cent have no children, owing to intermarriage of cousins, no less than 4½ per cent of the present nobility being married to cousins. — *Muhlall.*

Dr. S. D. Van Meter, of Denver, doubts the accuracy of the theory that consanguinity in marriage is a cause of barrenness, and attributes it to a physical cause.

CHILD BIRTH, DEATHS IN.—The average for 20 years in England and Wales has been 32 per 10,000 births—that is, 1½ per cent of all mothers die sooner or later in childbirth. — *Muhlall.*

ILLEGITIMACY.—Of each 1,000 births, the number illegitimate, according to statistics published in London, 1892, were: Russia, 27; Ireland, 28; Holland, 33; England and Wales, 46; Switzerland, 47; Italy, 73; Norway, 74; Scotland, 79; Prussia, 80; France, 84; Hungary, 85; Belgium, 88; Denmark, 93; Sweden, 101; Saxony, 125; Bavaria, 141; Austria, 147. No accurate statistics for the United States exist. The lowest rate in Europe is that of Connaught, in Western Ireland, 7 per 1,000. — *Dr. Albert Lefingwell, Summit, N. J.*

HUMAN CREMATION.

THERE are twenty-three cremation societies or incorporated companies in the United States. At the crematory at Fresh Pond, Long Island, N. Y., the price of incineration is \$35. Children under 10 years, \$25. This does not include transportation or undertaker's services. No special preparation of the body or clothing is necessary. The body is always incinerated in the clothing as received. The coffin in which the body is carried to the crematory is never allowed to be removed from the building, but is burned after the incineration. In every instance of death from contagious disease the coffin will be burned with the body, and no exposure of the body will be permitted. Incineration may be as private as the friends of the deceased desire. On the day following the incineration the ashes will be deliverable at the office of the company, in a receptacle provided by it, free of cost.

The total number of deaths in the United States in 1893 was about 900,000; the number of persons cremated that year, 592. As crematories have been in existence in the United States since 1876 these statistics indicate that the movement favoring the burning of the dead is not making much progress.

The above table is on the authority of Mulhall, as are also the following statements:

CANCER.—Mental worry, says Dr. Herbert Snow, of the Cancer Hospital, is the chief exciting cause of cancer. In 1888 in England the number of deaths from cancer was 17,506, of which 6,284 subjects were males and 11,222 females.

GOITRE.—There are 420,000 goitrous people in France and two per cent of conscripts are rejected for this cause.

LEPROSY.—There are 131,618 lepers in India, 98,982 being males and 32,636 females. No other country in the world approaches India in this respect.

PHTHISIS OR CONSUMPTION.—Among 100 people of each trade the ratios of those suffering from it were: Needle-makers, 70; file-makers, 63; lithographers, 48; tobacco-nists, 37; watch-makers, 37; stone-cutters, 36; glass-workers, 35; hair-dressers, 32; weavers, 25; painters, 25; printers, 22; shoe-makers, 19; glaziers, 18; hat-makers, 16; carpenters, 14; masons, 13; millers, 11; brewers, 11; tanners, 9; bakers, 7; butchers, 7; charcoal burners, 2; miners, 1.

PLAGUES.—There were 196 destructive plagues in Europe from 1500 to 1840, but the most terrible recorded was that commonly known as the Black Death, which came from Persia into Europe in 1346. It was preceded by myriads of locusts, which filled the wells and poisoned the water of the countries east of the Caspian Sea. At Bagdad, 500,000 people died in 90 days; at Cairo the mortality reached 10,000 in 24 hours. In Europe it lasted four years, and was supposed to have carried off 24,000,000 persons, more than 30,000 towns and villages being depopulated. So late as 1350 ships were met at sea with all on board dead. Among the cities which suffered were: London, 100,000 deaths; Florence, 100,000; Valencia, 100,000; Venice, 70,000; Naples, 60,000; Paris, 50,000; Genoa and Vienna, 40,000 each.

DEATHS UNDER ANÆSTHETICS.

At the last Surgical Congress at Berlin the following statistics, made up from observations of sixty-two operators, who anesthetized 109,196 persons, with thirty-nine fatal results, showed one death to 2,800 narcoses. The following were the anesthetics used:

Chloroform, 94,123 narcoses; 36 deaths. Ether, 9,431 narcoses; no deaths. Ether and chloroform, 2,881 narcoses; 1 death. Ether and alcohol, 1,381 narcoses; no deaths. Bromoform with ethyl bromide, 2,151 narcoses; 1 death. Pental, 210 narcoses; 1 death.

In 2,813 cases the narcoses lasted over an hour; in an operation for utero-vaginal fistula, four and a half hours; in a case of tetanus, nine hours. In twenty-five cases, of which post-mortem examinations were made, cardiac diseases were found. The author urged careful examination of the heart before administering chloroform. This statement is by the "Railway Age."

HYDROPHOBIA.

STATISTICS for 1893 of the Pasteur Institute showed that 1,648 persons were treated for hydrophobia and that only six of them died of that disease. Of the number mentioned there were 1,470 French people and 178 foreigners. Among the foreigners were 43 Spaniards, 35 Greeks, 23 English, 22 Belgians, 18 Egyptians, 14 British subjects from India, 9 Swiss, 9 Dutch and 6 Portuguese. Since M. Pasteur began to practise his inoculations against hydrophobia 14,430 persons have been treated by his method and 72 have died of the disease.

The statistics for 1865 and 1875 are from M. de Foville's work, "France Economique." Those for 1885 from Mulhall. The most important fact to be learned from them is the steady decrease of the birth rate in France.

In "Statistique Humaine de la France," M. J. Bertillon presents the following table, showing that the French are the least prolific and the Germans the most prolific people of Europe:

Number of children born alive annually per 1,000 women of 15 to 50 years: France, 102; Ireland, 114; Belgium, 127; England, 136; Netherlands, 137; Spain, 141; Prussia, 150; Bavaria, 156.

Help in Case of Accidents.

Drowning. 1. Loosen clothing, if any. 2. Empty lungs of water by laying body on its stomach, and lifting it by the middle so that the head hangs down. Jerk the body a few times. 3. Pull tongue forward, using handkerchief, or pin with string, if necessary. 4. Imitate motion of respiration by alternately compressing and expanding the lower ribs, about twenty times a minute. Alternately raising and lowering the arms from the sides up above the head will stimulate the action of the lungs. Let it be done gently but persistently. 5. Apply warmth and friction to extremities. 6. By holding tongue forward, closing the nostrils, and pressing the "Adam's apple" back (so as to close entrance to stomach), direct inflation may be tried. Take a deep breath and breathe it forcibly into the mouth of patient, compress the chest to expel the air, and repeat the operation. 7. DON'T GIVE UP! People have been saved after HOURS of patient, vigorous effort. 8. When breathing begins, get patient into a warm bed, give warm drinks, or spirits in teaspoonfuls, fresh air, and quiet.

Burns and Scalds. Cover with cooking soda and lay wet cloths over it. Whites of eggs and olive oil. Olive oil or linseed oil, plain, or mixed with chalk or whiting. Sweet or olive oil and lime-water.

Lightning. Dash cold water over a person struck.

Sunstroke. Loosen clothing. Get patient into shade and apply ice-cold water to head. Keep head in elevated position.

Mad Dog or Snake Bite. Tie cord tight above wound. Suck the wound and cauterize with caustic or white-hot iron at once, or cut out adjoining parts with a sharp knife. Give stimulants, as whiskey, brandy, etc.

Stings of Venomous Insects, etc. Apply weak ammonia, oil, salt water, or iodine.

Fainting. Place flat on back; allow fresh air, and sprinkle with water. Place head lower than rest of body.

Tests of Death. Hold mirror to mouth. If living, moisture will gather. Push pin into flesh. If dead the hole will remain, if alive it will close up. Place fingers in front of a strong light. If alive, they will appear red; if dead, black or dark.

Cinders in the Eye. Roll soft paper up like a lamplighter, and wet the tip to remove, or use a medicine dropper to draw it out. Rub the other eye.

Fire in One's Clothing. *Don't run*—especially not downstairs or out-of-doors. Roll on carpet, or wrap in woolen rug or blanket. Keep the head down, so as not to inhale flame.

Fire in a Building. Crawl on the floor. The clearest air is the lowest in the room. Cover head with woolen wrap, wet if possible. Cut holes for the eyes. *Don't get excited.*

Fire from Kerosene. *Don't use water,* it will spread the flames. Dirt, sand, or flour is the best extinguisher, or smother with woolen rug, table-cloth, or carpet.

Suffocation from Inhaling Illuminating Gas. Get into the fresh air as soon as possible and lie down. Keep warm. Take ammonia—twenty drops to a tumbler of water, at frequent intervals; also, two to four drops tincture of nux vomica every hour or two for five or six hours.

Antidotes for Poisons.

First. Send for a physician.

Second. INDUCE VOMITING, by tickling throat with feather or finger. Drink hot water or strong mustard and water. Swallow sweet oil or whites of eggs.

Acids are antidotes for alkalis; and vice versa.

SPECIAL POISONS AND ANTIDOTES.

Acids, Muriatic, oxalic, acetic, sulphuric (oil of vitriol), **nitric** (aqua-fortis). *Soap-suds, magnesia, lime-water.*

Prussic acid. *Ammonia in water. Dash water in face.*

Carbolic acid. *Flour and water, mucilaginous drinks.*

Alkalis. Such as potash, lye, hartshorn, ammonia. *Vinegar or lemon juice in water.*

Arsenic, rat poison, Paris green. *Milk, raw eggs, sweet oil. Lime-water, flour and water.*

Bug poison, lead, saltpetre, corrosive sublimate, sugar of lead, blue vitrol. *Whites of eggs or milk in large doses.*

Chloroform, chloral, ether. *Dash cold water on head and chest. Artificial respiration. Piece of ice in rectum. No chemical antidote*

Carbonate of soda, copperas, cobalt. *Soap-suds and mucilaginous drinks.*

Iodine, antimony, tartar emetic. *Starch and water. Astringent infusions. Strong tea, tannin.*

Mercury and its salts. *Whites of eggs, milk, mucilages.*

Nitrate of silver, lunar caustic. *Salt and water.*

Opium, morphine, laudanum, paregoric, soothing powders or syrups. *Strong coffee, hot bath. Keep awake and moving at any cost.*

Strychnine, tincture of nux vomica. *Mustard and water, sulphate of zinc. Absolute quiet. Plug the ears.*

United States Hay Fever Association.

OFFICERS.

President—Hon. David Wills, Gettysburg, Pa. Vice-Presidents—Hon. Frank B. Fay, Chelsea, Mass.; Col. M. Richards Muckle, Philadelphia, Pa.; F. W. Devoe, New York City; Rev. James McCosh, D. D., Princeton, N. J.; Hon. W. B. Hanna, Philadelphia, Pa.; Hon. John Van Voorhis, Rochester, N. Y.; Hon. E. W. Brown, Baltimore, Md.; H. H. De Leon, Charleston, S. C.; George W. Olney, New York City; Dr. S. S. Bishop, Chicago, Ill.; Hon. O. W. Horton, Chicago, Ill.; Dr. S. E. Sheldon, Topeka, Kan.; Dr. Henry M. Field, Pasadena, Cal. Secretary and Treasurer—Rev. John Peacock, D. D., Holmesburg (Philadelphia), Pa.

The United States Hay Fever Association was organized at Bethlehem, N. H., in 1874, by hay-fever refugees at that and neighboring places of exemption in the White Mountains, Henry Ward Beecher being one of the number. The purposes of the organization are the investigation of the causes of and of reported remedies for the malady. Membership can be acquired by the payment of an annual fee of one dollar, sent to the Secretary, which entitles the member to all privileges and publications of the Society. The annual convention is held at Bethlehem in the latter part of August, with sessions in September, all of which partake of the nature of experience meetings.

No cure for hay fever has been discovered; indeed, it was a saying of Mr. Beecher that the only possible cure for hay fever was "six feet of gravel." There are certainly spots on earth where many of these "peculiar people" may enjoy entire or partial exemption during the season. Among the most notable of these are parts of the White Mountains and the Adirondacks; Mackinaw, Mich.; South Florida, Southern California, the ocean generally, Europe (for Americans) and America (for Europeans). The wise hay-feverite, on the approach of his fatal date, does not dally with nostrums, but takes to his heels.

Statistics of Fecundity.

HUMAN.

In "Statistique Humaine de la France," M. J. Bertillon presents the following table, showing that the French are the least prolific and the Germans the most prolific people of Europe. Number of children born alive annually per 1,000 women of 15 to 50 years: France, 102; Ireland, 114; Belgium, 127; England, 136; Netherlands, 137; Spain, 141; Prussia, 150; Bavaria, 156. Aristotle mentions a woman who had 5 children at a birth four times successively; Menage one who had 21 children in seven years. The Empress Catherine received a Russian woman in 1757 (Mrs. James Kyrloff) who had had 57 children, all of whom were then living, having been born thus: 16 in four confinements, 21 in seven confinements, 20 in ten confinements, or in all 57 children in 21 confinements. This woman's husband married again, and his second wife had 15 children in 7 confinements. Fedor Vassileff, of Moscow (1782), had 83 children living when pensioned by the Czar. He had 69 children by his first wife at 27 births. Lucas Saez, who was living in Spain in 1883, then had 197 descendants. Mrs. George Hirsch, of Dallas, Tex., is reported, November, 1888, as having been confined of 6 children, 4 boys and 2 girls. (The above was compiled from Mulhall.) Marie Juneau, of Guayaquil, Ecuador, in 1892, was delivered of 7 children at one birth. In 1818 in Mercer County, Pa., ten children were born of one mother within 12 months—five at each of two births. The mother died about a year after the second birth, but meantime gave birth to twins, thus producing 12 children in 20 months. She was 37 years old at her death. A Mr. Browning, of Huntington, W. Va., was reported, in 1892, to be the father of 67 children by 6 wives, and John Kingsley, of Lost Creek, Carter County, Tenn., had his sixty-first child by his sixth wife, 50 of his children then being alive. The following statement appeared in the Louisville Courier-Journal November 29, 1893: "In the Hustonville neighborhood near Lawrenceburg, Ky., there resides a married couple, Samuel and Angelina Jeffries, aged 76 years each, whose lives are worthy of note, inasmuch as they have so strictly obeyed the scriptural injunction to 'multiply and replenish the earth.' Mr. Jeffries furnishes the following marvellous record: 'We were married six years before a child was born, but 15 years from that day my wife was the proud mother of 19 children, 7 pairs of twins. Within 11 months 4 children were born (two sets of twins), making 4 at one time not walking. There were 14 of us in my father's family—10 brothers, including myself, and 4 sisters. The 10 brothers had 34 pairs of twins, but the sisters none. Two of these brothers were twins who went to Missouri and married twin sisters, and each had 7 pairs of twins born to them.'"

ANIMAL.

The elephant, camel, and horse very seldom produce more than one at a time, the lion 1, oftener 2 or 3, sometimes 5 or more. The fecundity of the domestic rabbit is marvellous. It begins to breed at six months, and has seven litters a year, each of from 4 to 12, or upwards. It is calculated that the descendants of a single pair of rabbits, if allowed full scope, would in four years amount to one and a half millions. The rabbit introduced into Australia has now overrun that continent to such excess as to demand special legislation for its suppression.

The first English sparrow was brought to the United States in 1850, but it was not until 1870 that the species can be said to have firmly established itself. After that it had possession of the country. Its fecundity is amazing. In the latitude of New York and southward it hatches, as a rule, five or six broods in a season, with from four to six young in a brood. Assuming the average annual product of a pair to be twenty-four young, of which half are females and half males, and assuming further, for the sake of computation, that all live, together with their offspring, it will be seen that in ten years the progeny of a single pair would be 275,716,983,698. This will appear in detail from the following:

This Provincial Grand Lodge has jurisdiction over the whole United States, and was instituted in 1878 with the late Bro. Albert Pike as Provincial Grand Master. It has no subordinate bodies, and the membership is 282. It holds its charter from the Grand Lodge of the Royal Order of Scotland, at Edinburgh. The office of the Provincial Grand Master is at Portland, Me.; of the Provincial Grand Secretary at Washington, D. C.

COLORED MASONIC BODIES.

John H. Deyo, Grand Master of the Most Worshipful Grand Lodge of the Most Ancient and Honorable Fraternity of Free and Accepted Masons of the State of New York, has prepared the following information about the organizations of colored Masons in the United States:

There are thirty-one grand lodges in as many different States of the United States and one in Canada. The Prince Hall Grand Lodge, of Massachusetts, is the oldest lodge, having been organized in the year 1808. It was the outgrowth of African Lodge, No. 459, the warrant for which was granted to Prince Hall and fifteen other colored Masons September 24, 1784. The one hundredth anniversary of this event was celebrated at Boston on Monday, September 24, 1884, and was attended by a large concourse of colored Masons from all parts of the United States. The Grand Lodge of Missouri has jurisdiction over the largest number of Masons, there being nearly 5,000 names on its membership roll.

Prince Hall and his associates were made Masons in a lodge of emergency, composed of army officers, during the Revolutionary War, and were subsequently granted the warrant above mentioned.

The Grand Lodge of New York, organized in 1848, has jurisdiction over forty-two lodges, located in different parts of the State. The total membership is about 2,000. There is a relief association, known as the Hiram Masonic Relief Association of the State of New York, controlled and managed by the officers of the Grand Lodge. John H. Deyo, Albany, is Grand Master.

Nobles of the Mystic Shrine.

The Order of Nobles of the Mystic Shrine is not a regular Masonic body, but its membership is composed strictly of Masons who have reached the 32d degree, A. A. S. Rite (18th degree in England), or Knights Templars in good standing. There are 67 temples in the United States, and a total membership of about 30,000.

The following are the imperial officers for the United States for 1895: *Imperial Potentate*, William B. Melish, Cincinnati, O.; *Imperial Deputy Potentate*, Wayland Trask, Brooklyn, N. Y.; *Imperial Chief Rabbi*, John T. Brush, Indianapolis, Ind.; *Imperial Assistant Rabbi*, Cyrus W. Eaton, Cedar Rapids, Ia.; *Imperial High Priest and Prophet*, A. B. McGalley, Denver, Colo.; *Imperial Oriental Guide*, Ethelbert F. Allen, Kansas City, Mo.; *Imperial Treasurer*, William S. Brown, Pittsburgh, Pa.; *Imperial Recorder*, Benjamin W. Howell, Boston, Mass.; *Imperial First Ceremonial Master*, Thomas J. Bishop, Greenwich Heights, N. Y.; *Imperial Second Ceremonial Master*, Thaddeus B. Beecher, Bridgeport, Conn.; *Imperial Marshal*, William H. S. Wright, St. Paul, Minn.; *Imperial Captain of Guard*, John T. Atwood, Leavenworth, Kan.; *Imperial Outer Guard*, Horace K. Blanchard, Providence, R. I. The next annual session will be held September 2, 1895, the location to be selected by a special committee, of which the Imperial Potentate is chairman.

The following statement of the origin and purposes of the order is from an official source: The Order of the Nobles of the Mystic Shrine was instituted by the Mohammedan Kalif Alee, the cousin-german and son-in-law of the Prophet Mohammed, in the year of the Hegira 25 (A. D. 656), at Mekkah, in Arabia, as an Inquisition, or Vigilance Committee, to dispense justice and execute punishment upon criminals who escape their just deserts through the tardiness of the courts, and also to promote religious toleration among cultured men of all nations. The ostensible object is to increase the faith and fidelity of all true believers in Allah. The secret and real purpose can only be made known to those who have encircled the Mystic Shrine. Its membership in all countries includes Christians, Israelites, Moslems, and men in high positions of learning and of power. The order in America does not advocate Mohammedanism as a sect, but inculcates the same respect to Deity here as in Arabia and elsewhere.

There are twenty-four Vicegerent Snarks for as many States and Territories.

This order, founded in 1891 by nine travelling lumbermen, detained at Kansas City on account of a railroad wreck, has extended over the Union. Its declared object is the promotion of the "health, happiness, and long life of its members." Membership is rigidly restricted to the following classes of persons and these alone: Lumbermen, newspaper men, general officers and general and assistant freight, passenger, purchasing, and claim agents, commercial traveling, soliciting, and contracting freight and passenger agents of railroads; train masters, train dispatchers, and train conductors of railroads; persons engaged in the manufacture or sale of saw-mill or planing-mill machinery, or mechanical supplies and appliances for saw and planing mill machinery. The membership is limited to 9,999. The symbol of the order is a black cat with back and tail up, chosen because of its traditional nine lives. Brethren are known as kittens. Hoo Hoo day is the ninth day of the ninth month of the year. The annual meeting begins the ninth minute after 9 p. m. on that day. The initiation fee is \$9.99, and the annual dues are 99 cents. There is a ritual and aid is extended to distressed members or their families.

General Federation of Women's Clubs.

OFFICERS.

President—Mrs. Ellen M. Henrotin, Illinois. *Corresponding Sec'y*—Mrs. P. M. Moore, Missouri.
Vice-President—Mrs. M. E. Mumford, Pennsylvania. *Treasurer*—Mrs. Sarah B. Cooper, California.
Recording Secretary—Mrs. C. E. Barnes, Kentucky. *Auditor*—Mrs. F. P. Palmer, Rhode Island.

The Advisory Board is composed of Mrs. Charlotte Emerson Brown, New Jersey; Mrs. Julia Ward Howe, Massachusetts; Mrs. Jennie C. Croly, New York; Mrs. Virginia J. Berryhill, Iowa; Mrs. Etta H. Osgood, Maine; Mrs. L. E. Blount, District of Columbia; Miss May E. Steele, Ohio; Mrs. Elizabeth L. Saxon, Louisiana, and Mrs. McKinney, Tennessee.

This organization, incorporated in 1892, is composed of over 350 women's clubs, having a membership of 50,000 women in the United States and foreign countries. The purpose of the Federation is declared in its articles of incorporation to be "to bring into communication with one another the various women's clubs throughout the world, that they may compare methods of work and become mutually helpful. Constitutions of clubs applying for membership should show that no sectarianism or political test is required, and, while the distinctively humanitarian movements may be recognized, their chief purpose is not philanthropic or technical, but social, literary, artistic, or scientific culture." Meetings of the Federation are held biennially, the last meeting having been at Philadelphia in May, 1894, attended by 325 delegates from thirty-seven States. Three foreign clubs are members of the Federation—the Pioneer Club of London, Woman's Club of Bombay, and Educational Club of Ceylon.

From organization to date of the last financial report there has been contributed to the fund, in various ways, about \$450,000, and during that time there has been expended for relief, burials, medicines, hospital charges, etc., about \$220,000. The amount of the Fund June 6, 1893, was \$230,325. The number of annual members of the Fund at that date was 882, and of life members 75. There are 22 honorary members, including President Cleveland, Rev. Dr. Houghton, Chauncey M. Depew, Robert J. Ingersoll, and Ignace Paderewski.

Nationalism.

The following statement of the principles of "Nationalism," public interest in which has been awakened by Mr. Bellamy's novel of "Looking Backward," is from the pen of Edward S. Huntington, Secretary of the Boston Nationalist Club:

The Nationalists, seeing the inevitable evolutionary inclinations towards association and combination in all business enterprises, as illustrated in the huge Trusts and syndicates of our present age, believe in the wisdom of forming, eventually, one grand industrial association for the benefit of the whole people. The Nationalists advocate the gradual assumption by the municipal, State and National governments of all public duties now performed by private corporations. They demand that the load of oppression by monopolies shall be lifted from the shoulders of our American citizens.

Nationalism offers for public consideration the following measures of reform: 1. The governmental control of all telegraphs, telephones, and express companies. 2. The nationalization of all railroads. 3. The public ownership of all coal mines, oil, and gas wells now in operation or hereafter discovered. 4. The municipal control of all lighting, heating, and street-car service, or such other town or city duties as are now discharged by private companies.

It is understood, of course, that all these monopolies and large industries which come into National, State or municipal control shall be carried on for use and not for profit. The hours of labor will be more reasonable, and a more humane treatment of all workers established.

In the change of industries from private to public control, the Nationalists aim at no confiscation. The holders of valuable securities in any property taken by the public shall either receive fair dividends on such investments, or they shall be reimbursed outright at a fair estimate of the real value of such possessions.

One of the chief reforms insisted upon by the Nationalists is that children shall be given an education till the age of 17 years, and this education shall be compulsory. They propose that the present limit of the school age (14 years) shall be raised, year by year, as rapidly as public sentiment will allow, and in cases of poverty partial State support shall be given to such children while attending school; child labor in factories and mines shall be absolutely prohibited by the most stringent laws.

Statistics of the Press.

ROWELL'S reports for 1894 the number of newspapers published in the United States and Canada as 20,169. Of these, 862 were Canadian publications. The following was the frequency of issue: Weekly, 14,662; monthly, 2,639; daily, 1,942; semi-monthly, 311; semi-weekly, 246; quarterly, 199; bi-weekly, 68; bi-monthly, 70; tri-weekly, 32—total, 20,169.

The following table exhibits the number of papers printed in the several States and Canada in 1894:

Alabama	207	Indian Territory	38	Nebraska	639	South Carolina	125
Alaska	5	Indiana	753	Nevada	28	South Dakota	261
Arizona	39	Iowa	978	Newfoundland	5	Tennessee	275
Arkansas	231	Kansas	732	New Hampshire	117	Texas	656
California	637	Kentucky	289	New Jersey	367	Utah	64
Canada	862	Louisiana	172	New Mexico	57	Vermont	80
Colorado	289	Maine	192	New York	2,001	Virginia	270
Connecticut	206	Maryland	197	North Carolina	208	Washington	227
Delaware	40	Massachusetts	664	North Dakota	135	West Virginia	166
Dis. of Columbia	65	Michigan	727	Ohio	1,108	Wisconsin	551
Florida	131	Minnesota	549	Oklahoma	90	Wyoming	37
Georgia	303	Mississippi	170	Oregon	185		
Idaho	52	Missouri	907	Pennsylvania	1,408	Total	20,169
Illinois	1,520	Montana	84	Rhode Island	70		

To ascertain the total number of papers issued in a whole year, the number of each sort put forth in a single issue is multiplied by the number of issues in the year, and the result is as follows: 6,653,250 daily x 312, 2,075,814,000; 23,228,750 weekly x 52, 1,207,895,000; 9,245,750 monthly x 12, 110,940,000; 389,250 semi-weekly x 104, 40,482,000; 1,367,250 semi-monthly x 24, 32,814,000; 41,000 tri-weekly x 156, 6,396,000; 215,750 bi-weekly x 26, 5,609,500; 323,750 quarterly x 4, 1,295,000; 59,250 bi-monthly x 6, 355,500—total yearly issue of American and Canadian papers, 3,481,610,000.

The total number of newspapers published in the world at present is estimated at about 50,000, distributed as follows: United States and Canada, 20,169; Germany, 6,000; Great Britain, 8,000; France, 4,300; Japan, 2,000; Italy, 1,500; Austria-Hungary, 1,200; Asia, exclusive of Japan, 1,000; Spain, 850; Russia, 800; Australia, 800; Greece, 600; Switzerland, 450; Holland, 300; Belgium, 300; all others, 1,000. Of these more than half are printed in the English language.

THE INTERNATIONAL LEAGUE OF PRESS CLUBS.

The officers of the League elected at the last annual meeting, held at Atlanta, Ga., May 1-3, 1894, are as follows: *President*, Clark Howell, of Atlanta; *Vice-Presidents*, Murat Halstead, of Brooklyn; Mrs. Loulie M. Gordon, of Atlanta; John A. Hennessy, of New York; A. S. Cunningham, of Baltimore; William V. Alexander, of Boston; L. N. Mezargee, of Philadelphia; *Treasurer*, J. S. McCartney, of Philadelphia; *Secretary*, Harry D. Wright, of Buffalo. The next annual meeting of the League will be held at Philadelphia, in May, 1895.

National League for Good Roads.

ORGANIZED 1892. *President*, Senator Charles F. Manderson, Nebraska; *Secretary*, General Roy Stone, 45 Broadway, New York; *General Western Secretary*, S. Thornton K. Prime, Dwight, Ill.; *Treasurer*, William H. Rhawn, Philadelphia; *Executive Committee*, E. H. Thayer, Iowa; Philip D. Armour, Chicago; Clem Studebaker, Indiana; Samuel W. Allerton, Illinois; Chauncey B. Ripley, New Jersey; Alex. J. Cassatt, Pennsylvania; W. Seward Webb, New York; George Peabody Wetmore, Rhode Island; Charles L. Burdett, Connecticut. The purposes of the League are "to awaken general interest in the improvement of public roads, determine the best methods of building and maintaining them, secure the legislation, State or National, that may be necessary for their establishment and support, and conduct or foster such publications as may serve these purposes."

League of American Wheelmen.

OFFICERS.

President—Charles H. Luscomb, N. Y. | *Secretary*—Abbot Bassett, Chicago, Ill.
First Vice-President—A. C. Willson, Md. | *Treasurer*—W. M. Brewster, Mo.
Second Vice-President—Geo. A. Perkins, Mass.

The League headquarters are at 46 Van Buren Street, Room 1004, where the Secretary is in attendance, and from which the League Bulletin is published.

Any amateur (white) wheelman of good character, eighteen years of age or over, with the indorsement of two League members, is eligible to membership.

American Academy of Medicine.

OFFICERS.

President—J. McFadden Gaston, Ga. | *Vice-President*—Helen C. Putnam, R. I.
Vice-President—Rufus F. Lincoln, N. Y. | " V. C. Vaughan, Mich.
 " W. H. Smith, N. H. |

The object of the Academy is: 1st. To bring those who are Alumni of Classical, Scientific, and Medical Schools into closer relations with each other. 2d. To encourage young men to pursue regular courses of study in Classical and Scientific institutions before entering upon the study of medicine. 3d. To extend the bounds of medical science, to elevate the profession, to relieve human suffering, and to prevent disease.

The membership consists of Fellows and Honorary Members. The Fellows must be Alumni of respectable institutions of learning. Honorary Members consist of gentlemen in the medical profession, at home and abroad, who have made important contributions to medical science.

The total membership is 710. The next annual meeting will be held in Baltimore, Md., May 4, 1895.

Typewriting and Shorthand.

RECORDS OF SPEED IN BOTH.

HENRY MILL, an Englishman, nearly two hundred years ago invented and obtained a patent for "an artificial machine or method for impressing or transcribing of letters, singly or progressively, one after another, as in writing, whereby all writings whatsoever may be engrossed on the paper or parchment so neat and exact as not to be distinguished from print." Although this did not become a practicable writing machine, it was the first to embody an idea which after many years and many efforts has culminated in the present efficient typewriter. In 1829 William A. Burt, of Michigan, the inventor of the solar compass, carried the idea of a writing machine still farther, and in 1833 he was followed by a Frenchman, M. Prossin, of Marseilles. Charles Thurber, of Worcester, Mass., in 1843, Oliver T. Eddy, of Baltimore, in 1850, and John Jones, in 1852, patented instruments of which no practical use was made. In 1856 A. E. Beach, of the *Scientific American*, produced a typewriter which was in advance of anything hitherto known, and contained many of the ideas that exist in the machines of to-day. It remained for John Pratt, of Alabama, to patent, in 1867, an instrument which, being described in the *Scientific American*, proved a direct incentive to the production of the well-known Remington of the present time. This first appeared in a very crude shape, but gradual improvements were made, and success brought into the field a host of competitors, whose names are familiar to the business community in all the commercial countries of the world.

GREATEST SPEED OF OPERATORS.

The comparative speed attainable upon these different machines is a matter of much controversy, and the speed possible in actual work or for practical purposes probably cannot be stated with any degree of accuracy. As high a speed as 204 words has been attained on some of the leading machines in a single minute test, the operator writing from a memorized sentence. A continuous speed of 100 words per minute would probably be, however, the most that any one of these instruments and its operator would be capable of attaining in actual work. This also presupposes writing from dictation, so that the eyes of the operator may be confined entirely to the keyboard of the machine. Among the leading typewriters may be mentioned *Remington*, *Densmore* and *Bar-Lock*.

SPEED IN SHORTHAND WORK.

The rate at which shorthand can be written is also a question much in dispute, and one which has not yet been satisfactorily settled. Single minute tests have been had with faultless transcriptions reaching as high as 407 words in one minute, but for writing from new matter from continuous dictation, 252 words per minute for five minutes is the highest authenticated speed known. When, however, it is considered that the average public speaker will not utter more than from 150 to a possible 175 words per minute, it will be seen that this speed is altogether unnecessary for general work. The occasion of writing at the rate named above—252 words per minute for five consecutive minutes from new matter (the matter being unknown to the writer)—was at an official meeting at Lake George, N. Y., in 1888, when for the purpose of proving his system faster and more legible (with the same rate of speed) than any other system extant, a shorthand author offered cash prizes to the amount of \$500 to writers of any and all systems of shorthand to compete. The first prize upon this occasion was awarded to Isaac S. Dement, of Chicago (now known as "the champion shorthand writer of the world"), for writing 252 words per minute for five consecutive minutes.

Copyright Law of the United States.

DIRECTIONS FOR SECURING COPYRIGHT UNDER THE REVISED ACTS OF CONGRESS, INCLUDING THE PROVISIONS FOR FOREIGN COPYRIGHT, BY ACT OF MARCH 3, 1891.

SECTION 4,952 of the Revised Statutes of the United States, in force December 1, 1873, as amended by the act of June 18, 1874, as amended by the act of March 3, 1891, provides that the author, inventor, designer or proprietor of any book, map, chart, dramatic or musical composition, engraving, cut, print, or photograph or negative thereof, or of a painting, drawing, chromo, statuary and of models or designs intended to be perfected as works of the fine arts, and the executors, administrators, or assigns of any such person, shall, upon complying with the provisions of this chapter, have the sole liberty of printing, reprinting, publishing, completing, copying, executing, finishing and vending the same; and, in the case of a dramatic composition, of publicly performing or representing it, or causing it to be performed or represented by others. And authors or their assigns shall have exclusive right to dramatize or translate any of their works for which copyright shall have been obtained under the laws of the United States.

PRINTED TITLE REQUIRED.

A printed copy of the title of the book, map, chart, dramatic or musical composition, engraving, cut, print, photograph, or chromo, or a description of the painting, drawing, statue, statuary, or model or design for a work of the fine arts, for which copyright is desired, must be delivered to the Librarian of Congress, or deposited in the mail, within the United States, prepaid, addressed "LIBRARIAN OF CONGRESS, WASHINGTON, D. C." This must be done on or before day of publication in this or any foreign country.

The printed title required may be a copy of the title-page of such publications as have title-pages. In other cases, the title must be printed expressly for copyright entry, with name of claimant of copyright. The style of type is immaterial, and the print of a typewriter will be accepted. But a separate title is required for each entry, and each title must be printed on paper as large as commercial note. The title of a periodical must include the date and number; and each number of a periodical requires a separate entry of copyright.

FEES.

The legal fee for recording each copyright claim is 50 cents, and for a copy of this record (or certificate of copyright under the seal of the office) an additional fee of 50 cents is required, making \$1, if certificate is wanted, which will be mailed as soon as reached in the records. In the case of publications which are the production of persons not citizens or residents of the United States, the fee for recording title is \$1, and 50 cents additional for a copy of the record. Certificates covering more than one entry in one certificate are not issued.

Not later than the day of publication in this country or abroad, two complete copies of the best edition of each book or other article must be delivered, or deposited in the mail within the United States, addressed "LIBRARIAN OF CONGRESS, WASHINGTON, D. C." to perfect the copyright.

The freight or postage must be prepaid, or the publications enclosed in parcels covered by printed penalty-labels, furnished by the Librarian, in which case they will come FREE by mail (*not express*), without limit of weight, according to rulings of the Post-Office Department. Books must be printed from type set or plates made in the United States; photographs from negatives made in the United States; chromos and lithographs from drawings of stone or transfers therefrom made in the United States. Without the deposit of copies above required, the copyright is void, and penalty of \$25 is incurred. No copy is required to be deposited elsewhere.

The law requires one copy of each new edition wherein any substantial changes are made to be deposited with the Librarian of Congress.

NOTICE OF COPYRIGHT.

No copyright is valid unless notice is given by inserting in every copy published, on the title-page or the page following, if it be a book; or if a map, chart, musical composition, print, cut, engraving, photograph, painting, drawing, chromo, statue, statuary, or model or design intended to be perfected as a work of the fine arts, by inscribing upon some portion thereof, or on the substance on which the same is mounted, the following words, viz.: "Entered according to act of Congress, in the year _____, by _____, in the office of the Librarian of Congress, at Washington," at the option of the person entering the copyright, the words: "Copyright, 18____, by _____."

The law imposes a penalty of \$100 upon any person who has not obtained copyright who shall insert the notice, "Entered according to act of Congress," or "Copyright," etc., or words of the same import, in or upon any book or other article.

TRANSLATIONS.

The copyright law secures to authors and their assigns the exclusive right to translate or to dramatize any of their works; no notice is required to enforce this right.

DURATION OF COPYRIGHT.

The original term of copyright runs for twenty-eight years. Within six months before the end of that time, the author or designer, or his widow or children, may secure a renewal for the further term of fourteen years, making forty-two in all.

RENEWALS.

Application for renewal must be accompanied by printed title and fee; and by explicit statement of ownership, in the case of the author, or of relationship, in the case of his heirs, and must state definitely the date and place of entry of the original copyright. Within two months from date of renewal the record thereof must be advertised in an American newspaper for four weeks.

TIME OF PUBLICATION.

The time of publication is not limited by any law or regulation, but the courts have held that it should take place "within a reasonable time." A copyright may be secured for a projected as well as for a completed work. But the law provides for no caveat or notice of interference—only for actual entry of title.

ASSIGNMENTS.

Copyrights are assignable by any instrument of writing. Such assignment, to be valid, is to be recorded in the office of the Librarian of Congress within sixty days from execution. The fee for this record and certificate is \$1, and for a certified copy of any record of assignment \$1.

A copy of the record (or duplicate certificate) of any copyright entry will be furnished, under seal of the office, at the rate of 50 cents each.

COPYRIGHT LAW OF THE UNITED STATES—*Continued*.

SERIALS OR SEPARATE PUBLICATIONS.

In the case of books published in more than one volume, or of periodicals published in numbers, or of engravings, photographs, or other articles published with variations, a copyright must be entered for each volume or part of a book, or number of a periodical, or variety, as to style, title, or inscription, of any other article. To complete the copyright on a book published serially in a periodical, two copies of each serial part, as well as of the complete work (if published separately), should be deposited.

WORKS OF ART.

To secure copyright for a painting, statue, or model or design intended to be perfected as a work of the fine arts, a definite title and description must accompany the application for copyright, and a mounted photograph of the same, as large as "cabinet size," mailed to the Librarian of Congress not later than the day of publication of the work or design. The fine arts, for copyright purposes, include only painting and sculpture, and articles of merely ornamental and decorative art should be sent to the Patent Office, as subjects for Design Patents.

TRADE-MARKS.

Copyrights cannot be granted upon trade-marks, nor upon names of companies or articles, libraries nor upon an idea or device, nor upon prints or labels intended to be used for any article of manufacture. If protection for such names or labels is desired, application must be made to the Patent Office, where they are registered, if admitted, at a fee of \$6 for labels and \$25 for trade-marks.

FOREIGN AUTHORS.

The provisions as to copyright entry in the United States by foreign authors, etc., by act of Congress approved March 3, 1891 (which took effect July 1, 1891), are the same as the foregoing, except as to productions of persons not citizens or residents, which must cover return postages, and are \$1 for entry, or \$1.50 for entry and certificate of entry (equivalent to 4s. 5d. or 6s. 7d.). All publications must be delivered to the Librarian at Washington free of charge. The free penalty-labels cannot be used outside of the United States.

The rights of citizens or subjects of a foreign nation to copyright in the United States extends by Presidential proclamations to Great Britain, France, Belgium, Switzerland, Germany, Italy, Denmark, and Portugal.

Every applicant for a copyright should state distinctly the full name and residence of the claimant, and whether the right is claimed as author, designer, or proprietor. No affidavit or witness to the application is required.

CONDITIONS AS TO COPYRIGHT FOR AMERICAN CITIZENS IN FOREIGN COUNTRIES.

International copyright arrangements between the United States and foreign countries now include Great Britain and her possessions, France, Germany, Italy, Belgium, Portugal, Denmark, and Switzerland.

For an American citizen to secure copyright in Great Britain three conditions are necessary:

First.—The title should be entered at Stationers' Hall, London, the fee for which is 5 shillings sterling, and 5 shillings additional if a certified copy of entry is required.

Second.—The work must be published in Great Britain or in her dominions simultaneously with its publication in the United States.

Third.—Five copies of the publication are required—one for the British Museum and four on demand of the Company of Stationers for four other libraries.

Copyright may be secured in France by a foreigner by depositing two copies of the publication at the Ministry of the Interior at Paris. No fee nor entry of title required.

To secure copyright in Belgium a foreigner may register his work at the Department of Agriculture, Industry and Public Works at Brussels.

In Switzerland, register of title at the Department of Commerce and Industry at Berne is optional, not obligatory; fee two francs. If registered, deposit of one copy is required.

The Librarian of Congress cannot take charge of any copyright entries or arrangements with other countries.

INFRINGEMENT OF COPYRIGHT.

The Librarian of Congress makes the following statement to inquire as to remedies for infringement of copyright:

No question concerning the validity of a copyright can be determined under our laws by any other authority than a United States court.

This office has no discretion or authority to refuse any application for a copyright coming within the provisions of the law, and all questions as to priority or infringement are purely judicial questions, with which the Librarian has nothing to do. A certificate of copyright is *prima facie* evidence of an exclusive title, and is highly valuable as the foundation of a legal claim to the property involved in the publication.

As no claim to exclusive property in the contents of a printed book or other article can be enforced under the common law, Congress has very properly provided the guarantees of such property which are embodied in the "Act to revise, consolidate, and amend the statutes relating to patents and copyrights," approved July 8, 1870. If you obtain a copyright under the provisions of this act, you can claim damages from any person infringing your rights by printing or selling the same article; but upon all questions as to what constitutes an infringement, or what measures of damages can be recovered, all parties are left to their proper remedy in the courts of the United States.

American Library Association Council.

The members elected by the Library Association and ten additional by the council, each member serving five years. The council is composed of Melvil Dewey, Director of the New York State Library; W. C. Lane, Boston Athenaeum Library; Caroline M. Hewins, Hartford Public Library; Justin Winsor, Harvard University; C. A. Cutter, Boston Athenaeum; Hannah P. Janes, Osterhout Library, Wilkesbarre, Pa.; W. I. Fletcher, Amherst College Library; Ellen M. Coe, New York Free Circulating Library; Frederick M. Crunden, St. Louis Public Library; J. N. Larned, Buffalo Library; S. S. Green, Worcester Public Library; R. B. Bowker, Vice-President of the Brooklyn Library; W. E. Foster, Providence Public Library; Charles C. Soule, Trustee of the Brookline (Mass.) Public Library; A. R. Spofford, Librarian of Congress; Theresa H. West, Milwaukee Public Library; Caroline H. Garland, Dover Public Library; W. H. Brett, Cleveland Public Library; Mary Salome Cutler, New York State Library; James L. Whitney, Boston Public Library. The officers are: H. M. Uteley, Detroit, President; Ellen M. Coe, New York; John C. Dana, Denver; Mary S. Cutler, Albany, Vice-Presidents; Frank P. Hill, Newark, Secretary; George Watson Cole, Jersey City, Treasurer.

The Hundred Greatest Novels.

A LIST which appeared first in THE WORLD ALMANAC for 1890 is again presented in compliance with the requests of numerous users of the ALMANAC. The advent, however, of new writers and the production of new books by older ones, since the list was printed, have suggested a few changes.

It is not supposed that any two novel readers, whether critics of high degree or only omnivorous devourers of all sorts and conditions of imaginative literature, will agree upon the same one hundred novels as best entitled to stand at the head of fiction. The list has been prepared for THE WORLD ALMANAC by an eminent literary authority, with the full consciousness that nobody else will accept it in its entirety. Every reader of THE WORLD ALMANAC, therefore, is at liberty during the present year to send in to the editor of the ALMANAC his veto of any work in our selection and to nominate a candidate for its place. This new canvass of the great novel-reading world's opinion of THE WORLD ALMANAC's selection of the hundred greatest novels will be duly preserved, collated, and reported in THE WORLD ALMANAC for 1896. The greatest novel, it is assumed, is that which combines intrinsic merit with wide popularity, but the first must, of course, be the predominating element.

Sir John Lubbock's Hundred Books

"BEST WORTH READING."

SIR JOHN LUBBOCK, the eminent English publicist, scientist, and philosopher, in his popular work, "The Pleasures of Life," named one hundred books "which have been most frequently recommended as best worth reading." Works by living authors were not included. The list has been widely criticised and many lists by other writers have been published, but the author in the last edition of his work decides to stand by his original list, with two changes only. This is it:

1. The Bible.
2. The Meditations of Marcus Aurelius.
3. The Teachings of Epictetus.
4. Aristotle's Ethics.
5. Analects of Confucius.
6. St. Hilaire's *Le Bouddha et sa Religion*.

98. George Eliot's *Adam Bede*.
99. Kingsley's *Westward Ho*.
100. Scott's *Novels*.

* Epitomized in Talboys Wheeler's *History of India*.

NOTE.—In the compilation of this list Sir John Lubbock originally introduced it with these remarks: "I have abstained, for obvious reasons, from mentioning works by living authors, though from many of them—Tennyson, Ruskin, and others—I have myself derived the keenest enjoyment, and I have omitted works on science, with one or two exceptions, because the subject is so progressive. I feel that the attempt is over bold and I must beg for indulgence, while hoping for criticism. Indeed, one object which I have had in view is to stimulate others more competent far than I am, to give us the advantage of their opinions. Moreover, I must repeat that I suggest these works rather as those which, as far as I have seen, have been most frequently recommended than as suggestions of my own, though I have slipped in a few of my own special favorites. In any such selection much weight should, I think, be attached to the general verdict of mankind. There is a 'struggle for existence' and a 'survival of the fittest' among books as well as among animals and plants."

American Library Association.

President, H. M. Utley, Detroit Public Library; *Vice-Presidents*, J. C. Dana, Denver Public Library; Mary S. Cutler, N. Y. State Library, Albany; Ellen M. Coe, New York Free Circulating Library; *Secretary*, Frank P. Hill, Newark Free Public Library; *Recorder*, Henry J. Carr, Scranton Public Library; *Treasurer*, Geo. Watson Cole, Jersey City Free Public Library.

The A. L. A. was organized in 1876 and incorporated in 1879. Its present membership is some 600 in number, composed of leading librarians and libraries in all portions of the country, including various other individuals interested in its particular work. This national body organized at the Centennial in 1876 has already accomplished a great and steadily growing educational work. It has come to be not merely a union of professional librarians, but includes a large number who appreciate that the greatest educational problem before the country is the development of public libraries as a supplement to the public schools, and who recognize in this association the organized forces now shaping the modern library movement in America.

The seventeenth general meeting of the A. L. A. is to be held at Denver, Colo., in August, 1895.

American Geographical Society.

President, Charles P. Daly, LL. D.; *Vice-Presidents*, Gen. Egbert L. Viele, Rev. C. C. Tiffany, D. D.; *Foreign Corresponding Secretary*, Professor W. Libbey, Jr.; *Domestic Corresponding Secretary*, James Muhlenberg Bailey; *Recording Secretary*, Elial F. Hall; *Treasurer*, Walter R. T. Jones; *Councillors*, Francis M. Bacon, Isaac Bernheimer, D. O. Mills, W. H. H. Moore, Orlando B. Potter, Levi Holbrook, Morris K. Jesup, Gustav E. Kissel, Henry Parish, Chandler Robbins, John A. Hadden, William G. Hamilton, Henry Holt, Clarence King, William Renssen.

The objects of the society are to encourage geographical exploration and discovery; to investigate and disseminate new geographical information by discussion, lectures and publications; to establish in the chief maritime city of the country, for the benefit of commerce, navigation and the great industrial and material interests of the United States, a place where the means will be afforded of obtaining accurate information for public use of every part of the globe. The society has a geographical library of 25,000 volumes, and a large and very valuable collection of maps, charts and atlases relating to every part of the world. It publishes a bulletin and an annual journal, and co-operates and interchanges information with 200 domestic and foreign geographical and other scientific societies. The offices of the society are at No. 11 West Twenty-ninth Street, New York City. The society was organized in 1852, and has a membership of 1,500.

American Naturalists Society.

THE following are officers of this learned society: *President*, C. S. Minot, of the Harvard Medical School; *Vice-Presidents*, William H. Dall, of the National Museum, Washington, D. C., and William Libbey, of Princeton; *Secretary*, W. A. Getchell, of Yale University; *Treasurer*, Edward G. Gardner, of Boston; *Committee at Large*, H. F. Osborne, of Columbia, and C. W. Stiles, of the United States Department of Agriculture, Washington.

American Philological Association.

The following officers were elected at the annual convention held at Williamstown, Mass., July 12, 1894: *President*, John H. Wright, of Harvard; *Vice-Presidents*, Profs. Perrin, of Yale, and Minton Warren, of Johns Hopkins; *Secretary and Treasurer*, H. W. Smyth, of Bryn Mawr; *Executive Committee*, the above officers, *ex officio*, Prof. Gildersleeve, of Johns Hopkins; W. N. Godwin, of Harvard; Miss Abby Leach, of Vassar; Prof. March, of Lafayette, and Prof. Wheeler, of Cornell. The next annual meeting will be held at Adelbert College, Cleveland, July 9, 1895.

Spelling Reform.

THE American Philological Association has recommended the following "Rules for New Spellings," and a resolution has been introduced in Congress instructing the Public Printer to conform to them in all printing for the Government:

1. Drop **VE** at the end of words like dialogue, catalogue, etc., where the preceding vowel is short. Thus spell demagog, epillog, synagog, etc.
2. Drop final **E** in such words as definite, infinite, favorite, etc., where the preceding vowel is short. Thus spell opposit, preterit, hypocrit, requisit, etc.
3. Drop final **TE** in words like quartette, coquette, cigarette, etc. Thus spell cigaret, roset, epaulet, vedet, gazet, etc.
4. Drop final **ME** in words like programme. Thus spell program, oriflam, gran, etc.
5. Change **PH** to **F** in words like phantom, telegraph, phase, etc. Thus spell alfabet, paragraf, filosofy, fonetic, fotograf, etc.
6. Substitute **E** for the diphthongs **Æ** and **Œ** when they have the sound of that letter. Thus spell eolin, esthetic, diarrhea, subpena, esofagus, atheneum, etc.

The Association says: "English spelling is the worst in the world. Millions of dollars are wasted each year in the writing and printing of useless letters. The education of our children is retarded and the progress of our people is hampered by our cumbrous, illogical, misleading orthography. The scholarship of the world is almost a unit in demanding a change."

Shakspeare, who had the richest vocabulary used by any English writer, employed only 16,000 words. Milton could pick out from 8,000, but the average man, a graduate from one of the great universities, rarely has a vocabulary of more than 3,000 or 4,000 words. The ordinary person can get along very comfortably with 500 words, and in the rural districts a knowledge of 200 is sufficient to carry a man through life. This, of course, refers to the needs of conversation. If a man wants to read newspapers and well written books, he must know at least 2,000 words.—*Harpur's Cyclopaedia*.
Definitions to about 200,000 English words appear in the Century Dictionary.

The following table shows the proportional value of each letter in the alphabet in 1,000, as ordinarily used for initial in indexing, obtained from the average of four indices, viz., Trantwine, Molesworth, Hurst, and Ganot:

The Shakspeare Society of New York.

THIS Society was incorporated April 20, 1885. The present officers are as follows: *President*, Appleton Morgan, L.L.D.; *Vice-President*, Thomas R. Price, L.L.D.; *Second Vice-President*, Martin W. Cooke, A.M.; *Recording Secretary*, Albert R. Frey; *Assistant Recording Secretary*, Will O. Bates; *Librarian*, Rush Field, M.D.; *Acting Librarian*, Harrison Gray Fiske; *Treasurer*, James E. Reynolds.

American Authors' Guild.

THIS society was organized as the Association of American Authors in May, 1892, and the present title was adopted in 1894. The officers, elected at the last annual meeting, are:

President—James Grant Wilson.

Vice-Presidents—Julia Ward Howe, Maurice Thompson and Albert Matthews.

Secretary—Craven L. Betts, New York City.

Treasurer—Titus Munson Coan.

Managers—Thomas W. Higginson, Edward Shannon, William H. Beard, Titus Munson Coan, Louise Chandler Moulton, Kate Tennant Woods, Elizabeth Akers Allen, Dr. Newland Maynard.

The Guild is an association of authors for a better knowledge of their interests and the better securing of their rights. Certain reforms are needed; certain abuses require correction; the inexperienced author needs to be informed. Cases that the society is collecting, with a view to publication, will show how much the benefit of combination and of advice was needed. The society was not organized in any spirit of rivalry with any other societies, or of hostility to publishers; but only in the belief that here, as well as in France and England, the time has come for authors to make some organized effort to care for their own interests. What the French and English societies have done it is desired to do here.

Review of Scientific Progress During 1894.

ASTRONOMY.

ASTRONOMICAL researches were prosecuted with unabated vigor during the year. Our knowledge of the solar system was extended by the discovery of three new asteroids—two at the Nice Observatory and one at Bordeaux, France, and also of two comets, one of which appears to be a permanent member of our system, as it moves in an elliptic orbit. Temple's comet was also rediscovered by Finlay, of the Cape of Good Hope, on May 8. The number of asteroids is now (November 1, 1894, when this review closed) 378, and it is tolerably certain that many hundred more will be found by the new photographic process. The number of these minute bodies is no doubt incalculable; they form an immense ring of small bodies, varying in diameter from 247 miles—the approximate diameter of Vesta, the largest—to mere particles of sand. The reflection of the sun's light from this ring of planetary matter contributes to the production of the zodiacal light so conspicuous in tropical latitudes. Assuming the density of the asteroids to be equal to that of Mars—an estimate certainly too high—the combined mass of those now known does not exceed the 1-170th part of the mass of our own moon. Several new variable stars were discovered. A new triple achromatic object glass has been devised by Taylor, of England, which is believed to be a great improvement on that now used, which consists of only two glasses—a double convex of crown glass and a double concave of flint glass. The new objective consists of three lenses of different kinds of glass. The outside lens is of hard baryta light flint, and is double convex; the middle lens is a double concave of a certain new boro-silicate flint, and the back lens is a positive meniscus nearly plane on the outer surface, and is made of light silicate crown glass. An objective constructed in this way will involve more labor and expense, but it is believed that the advantages gained in achromatism will more than compensate for the additional outlay.

Several new observatories were established during the year, and new and improved instruments added to some of the old ones. The Rochester (N. Y.) Observatory has been dismantled, and its fine sixteen-inch refractor, with all the other instruments, has been mounted on Echo Mountain, Los Angeles County, Cal. The new institution is called the Lowe Observatory, is 3,500 feet above the sea, and is under the directorship of that distinguished veteran observer, Prof. Lewis Swift, who made the Rochester Observatory so justly famous. Under the favorable conditions in which Prof. Swift is now placed, he will no doubt ere long render a brilliant account of himself.

Harvard College, foremost in astronomical research as it always has been, has established a branch institution called the Lowell Observatory, at Flagstaff, in Arizona, in latitude 35° N, and longitude 112° , and 7,300 feet above the sea. This is the highest observatory in the northern hemisphere, the next being Denver, Colo., 5,400 feet. It is the most southern in this country, with the exception of Tuscaloosa, Ala., and the new Lowe Observatory, in California. The equipment consists of three telescopes; one an 18-inch objective and 26 feet 4 inches in focal length; one of 12 inches, and one of 6 inches. The chief advantage to be hoped for is in the way of atmospheric conditions; the singularly dry and clear climate of Southern California and Arizona commends itself for astronomical observation. The 40-inch Yerkes telescope is to be used for astro-physical purposes, and is to have three spectroscopic attachments—viz., a star spectroscope, a solar spectroscope, and a spectro-heliograph. The telescope will have a focal length of 64 feet, and will give at the focus an image of the sun $6\frac{1}{2}$ inches in diameter. It will be the largest in the world. A new observatory is erected at Manila, in the Philippine Islands. It has a telescope with a 20-inch objective, the mounting of which was made at Washington, D. C., by Mr. G. N. Saegmüller, and has never been surpassed in point of workmanship, accuracy and facility of adjustment. Mr. Saegmüller has also mounted a 20-inch equatorial, as well as a complete outfit for the Denver (Col.) Observatory. A new mass has been found for Jupiter—viz., 1-1047.35, that of the sun being 1.

CHEMISTRY.

The source of hydrogen peroxide in the atmosphere is now supposed to be due to the action of sunlight on carbonic acid gas, which undergoes decomposition into percarbonic acid and the elements of formaldehyde, the former again breaking up into carbon dioxide and hydrogen peroxide; the latter is always found in rain water and snow, but not in dew or frost.

A new method of preparing phosphorus from the ordinary native phosphate of lime has been devised. It consists in heating together in a suitable apparatus a mixture of phosphate of lime, aluminum, and silica, or common sand, the result of the reaction being silicate of lime, oxide of aluminum, and phosphorus, which last distills over. By this process the whole of the phosphorus can be obtained.

A new gaseous constituent in the atmosphere has been discovered by Lord Rayleigh and Prof. Ramsay, of England. It was for some time observed by these distinguished scientists that the density of nitrogen varied considerably, according to the source whence it was obtained. Supposing this to be due to a variable amount of some other unknown gas, they added to air an excess of oxygen and passed an electric spark through it. The density of the nitrogen gradually increased until it reached 19.8. Again, by removing the oxygen from air and passing the nitrogen over heated magnesium, which was thereby converted into nitride, a residual gas was left having a density of 20.8. It is more inert than even nitrogen, and exists in air to the amount of 1 per cent., and gives a spectrum with a single blue line much more intense than the corresponding blue line in the nitrogen spectrum. A mixture of pure liquefied oxygen and nitrogen forms a clear liquid, while air in a similar state shows a turbidity, which is probably due to the new gas; its elementary character, however, is still in doubt; it may turn out to be only an allotropic form of nitrogen, just as ozone is of oxygen. It is worthy of remark, however, that certain experiments of Cavendish made about a hundred years ago pointed to the presence in the air of some substance other than the gases with which we are already familiar.

GEOLOGY.

A valuable contribution to the geology of the United States has been published in the form of a geologic atlas of an area lying between longitude 110° and 111° W., and latitude 45° and 46° N., and north of the Yellowstone Park, one of the most interesting geological areas of this country. It is a work of a very high order of merit.

MARINE EXPLORATION.

Deep sea soundings have been carried on with more or less success, and it is found that the deepest parts of the oceans are not near their centres, but in all cases near land; thus, 110 miles outside of the Kurile Islands, north of Japan, the deepest soundings have been obtained, 27,930 feet. This depression runs for an unknown distance parallel to the coast of the Kurile group. Again, seventy miles north of Porto Rico is the next deepest depression, of 27,366 feet. This area, however, is comparatively small, as quite shallow soundings are found sixty miles off. Another deep depression has been

REVIEW OF SCIENTIFIC PROGRESS—Continued.

found fifty miles off the coast of Peru, 25,050 feet, and depths of 27,000 feet have been found off the Tonga and Ladrone Islands. The Pacific is the deepest ocean, and occupies a space of 67,000,000 square miles. The mean depth of the Atlantic, or the average of a very great number of soundings, is 13,200 feet.

An instrument called the solarometer has been invented by Lieut. Beehler, an American naval officer, and constructed and improved by Mr. Saegmüller, of Washington, D. C. It is to supersede the compass, which becomes more or less disturbed when near large masses of iron or steel, such as are now employed in the construction of our large naval vessels. Its object appears to be the determination of the azimuth of the sun or a star at any time, and hence the course of the ship. The instrument is now undergoing a trial, and if it proves a success it will be a great boon to navigators.

A very powerful electro-magnet has been invented by an American army officer. It is said to be so powerful that it renders a ship's compass utterly useless at a distance of six or eight miles from shore. Such an instrument can be utilized to protect ports in time of war, the attacking vessels not being able to obtain correct bearings and thus being prevented from entering a harbor with safety.

Arctic expeditions have again been undertaken, but their success so far has been, to some extent at least, destroyed by unforeseen circumstances.

Another expedition was undertaken into Hadramaut, Arabia, that almost inaccessible land, with a view of searching for archaeological remains, but without success. The country was found to be a plateau of considerable elevation, but an arid waste on which a few Arabs eke out a scanty subsistence. It is a country which has no future and nothing to boast of in the past.

We have to mourn the loss to science of four of her most eminent expounders—Helmholtz and Hertz, in Germany; Sir Henry Layard, of England, and Josiah Parsons Cooke, of this country. Each of them has left an imperishable name behind him, and each can well exclaim in the language of Horace:

“Exegi monumentum aere perennius
Regalique situ pyramidum altius.”

American Learned Societies.

NATIONAL ACADEMY OF SCIENCES.

OFFICERS.

President—Professor O. C. Marsh, New Haven, Ct.

Vice-President—General Francis A. Walker, Boston, Mass.

Foreign Secretary—Wolcott Gibbs, Newport, R. I.

Home Secretary—Asaph Hall, U. S. N., Washington, D. C.

Treasurer—Dr. John S. Billings, U. S. A., Washington, D. C.

Council—George J. Brush, New Haven, Ct.; Benjamin A. Gould, Cambridge, Mass.; Thomas C. Mendenhall, Washington, D. C.; Professor Simon Newcomb, Washington, D. C.; Ira Remsen, Baltimore, Md.; Samuel P. Langley, Washington, D. C., and the officers of the National Academy.

The National Academy of Sciences was incorporated by act of Congress March 3, 1863. The charter provides that “the Academy shall, whenever called upon by any department of the Government, investigate, examine, experiment, and report upon any subject of science or art; the actual expense of such investigations, examinations, experiments, and reports to be paid from appropriations which may be made for the purpose.” The Academy is composed at present of 88 members, 2 honorary members, and 24 foreign associates.

AMERICAN ACADEMY OF POLITICAL AND SOCIAL SCIENCE.

OFFICERS.

President, Edmund J. James, Ph. D., University of Pennsylvania; *Vice-Presidents*, Henry C. Lea, Philadelphia; Prof. F. H. Giddings, Columbia College, New York; Prof. William P. Holcomb, Swarthmore College; *Corresponding Secretary*, Roland P. Falkner, Ph. D., Germantown, Pa.; *General Secretary*, John Quincy Adams, Ph. D.; *Recording Secretary*, C. R. Woodruff, LL. B.; *Treasurer*, Stuart Wood, Ph. D., Philadelphia; *Librarian*, Prof. John L. Stewart.

The governing body is the Council, consisting of about eighty members. The membership of the Academy is 3,000, and is divided among every State in the Union and 34 foreign countries. The annual fee is \$5, and fee for life membership, \$100. The annual meeting of the Academy is held in January.

AMERICAN SOCIAL SCIENCE ASSOCIATION.

OFFICERS.

President—F. J. Kingsbury, Waterbury, Ct.

First Vice-President—H. L. Wayland, Philadelphia, Pa.

Vice-Presidents—Francis Wayland, New Haven, Ct.; Daniel C. Gilman, Baltimore, Md.; William T. Harris, Washington, D. C.; Carroll D. Wright, Washington, D. C.; Mrs. John E. Lodge, Boston, Mass.; Lucy Hall-Brown, M. D., Brooklyn, N. Y.; Mrs. Caroline H. Dall, Washington, D. C.; S. W. Dike, D. D., Auburndale, Mass.; Charles A. Peabody, New York; Andrew Dickson White, Ithaca, N. Y.; Grace Peckham, M. L. I., New York; Henry B. Baker, Lansing, Mich.; Dorman B. Eaton, New York; Henry Villard, New York; H. Holbrook Curtis, M. D., New York; R. A. Holland, St. Louis, Mo.; John Eaton, Washington, D. C.

General Secretary—F. B. Sanborn, Concord, Mass.

Treasurer—Anson Phelps Stokes, 45 Cedar Street, New York.

The next meeting of the Association will be held at Saratoga Springs, N. Y., September, 1895.

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.

OFFICERS.

President—E. W. Morley, Cleveland, Ohio.

Vice-Presidents—Mathematics and Astronomy, E. S. Holden, Mount Hamilton, Cal.; Physics, W. LeConte Stevens, Troy, N. Y.; Chemistry, William McMurie, Brooklyn, N. Y.; Mechanical Science and Engineering, William Kent, Passaic, N. J.; Geology and Geography, J. Hotchkiss, Staunton, Va.; Zoology, D. S. Jordan, Palo Alto, Cal.; Botany, J. C. Arthur, La Fayette, Ind.; Anthropology, F. H. Cushing, Washington, D. C.; Economic Science and Statistics, B. E. Fernow, Washington, D. C.

Permanent Secretary—F. W. Putnam, Cambridge (office, Salem), Mass.

General Secretary—James Lewis Howe, Louisville, Ky.

Secretary of the Council—Charles R. Barnes, Morrison, Wis.

Treasurer—R. S. Woodward, New York.

AMERICAN LEARNED SOCIETIES—Continued.

AMERICAN ANTIQUARIAN SOCIETY.

President—Stephen Salisbury, Worcester, Mass. *Vice-Presidents*—George F. Hoar and Edward Everett Hale. *Council*—Samuel A. Green, Boston; P. Emory Aldrich, Worcester; Rev. Dr. Egbert Coffin Smyth, Andover; Samuel Swett Green, Worcester; Edward L. Davis, Worcester; Franklin B. Dexter, New Haven, Conn.; J. Everts Green, Worcester; G. Stanley Hall, Worcester; William B. Weeden, Providence. *Secretary for Domestic Correspondence*—Rev. George F. Ellis, Boston; John D. Washburn, Worcester. *Recording Secretary*—Charles A. Chase, Worcester. *Treasurer*—Nathaniel Paine, Worcester. *Committee on Publication*—Rev. E. E. Hale, Roxbury; Nathaniel Paine, Worcester; Charles A. Chase, Worcester; Charles C. Smith, Boston. *Auditors*—William H. Smith, Worcester; A. George Bullock, Worcester. *Finance Committee*—Stephen Salisbury, Worcester; Edward L. Davis, Worcester; Charles A. Chase, Worcester. *Library Committee*—Stephen Salisbury, Nathaniel Paine. *Librarian*—Edmund Mills Barton, Worcester. The annual meetings are held at Worcester, Mass., in October. The American membership of the Society is restricted to 140.

AMERICAN STATISTICAL ASSOCIATION.

President—Francis A. Walker, Ph. D., LL. D. *Vice-Presidents*—Hamilton A. Hill, A. M.; Hon. Carroll D. Wright, Richmond Mayo-Smith, A. M.; Hon. Horace G. Wadlin, Henry C. Adams, Ph. D. *Corresponding Secretary*—E. R. L. Gould, Ph. D.; Johns Hopkins University, Baltimore. *Treasurer*—John S. Clark, Esq., 646 Washington Street, Boston, Mass. *Secretary and Librarian*—Davis R. Dewey, Ph. D., Institute of Technology, Boston, Mass. *Assistant Secretary*—Gary N. Calkins, Columbia College, New York. *Councillors*—John Ward Dean, A. M.; Samuel W. Abbott, M. D.; S. N. D. North, Esq. *Committee on Publication*—Davis R. Dewey, Ph. D.; Walter C. Wright, Esq.; Roland P. Falkner, Ph. D. *Committee on Finance*—Hamilton A. Hill, A. M.; Lyman Mason, A. M.; George O. Carpenter, Esq. *Committee on Library*—Hon. Julius L. Clarke, Rev. Robert C. Waterston, Rev. Samuel W. Dike, LL. D.

NATIONAL STATISTICAL ASSOCIATION.

President, Amos J. Cummings, New York; *First Vice-President*, William Lawrence, Ohio; *Second Vice-President*, John F. Hanson, Georgia; *Third Vice-President*, George Wilson, New York; *National Secretary*, Charles S. Hill, Washington, D. C. The respective Governors of each State are *ex officio* State Presidents and National Vice-Presidents. The respective Secretaries of State of each State are *ex officio* State Secretaries and Assistant National Secretaries.

Vice-Presidents of Industries and Executive Committee—Sugar, Henry A. Brown, Chairman, Mass.; Cotton, H. G. Hester, Ia.; Wool, Francis E. Warren, Wyo.; Shipping, Charles B. Morton, Augusta, Me.; Agriculture, J. Richards Dodge, D. C.; Insurance, Charles A. Jenney, N. Y.; Manufactures, Charles Fletcher, Providence, R. I.; Iron, James M. Svaak, Philadelphia, Pa.; Chemicals, E. R. Squibb, Brooklyn, N. Y.; Journalism, H. V. Boynton, D. C.; Commerce, J. N. Whitney, D. C.; Education, I. Edwards Clark, D. C.; Finance, William F. MacLennan, D. C.; Metallurgy, Otis T. Mason, D. C.; Invention, James T. DuBois, Pa.; Fisheries, Marshall McDonald, Va.

The object of this Association, originally organized in 1888 as the Census Analytical Association, is to create a system of verification of all statistical data of the United States, including census prepared of National, State, and municipal data, * * * and by the preparation of careful analyses of all official data.

AMERICAN INSTITUTE OF ARCHITECTS.

President, D. H. Burnham, Chicago; *First Vice-President*, George B. Post, New York City; *Second Vice-President*, William S. Eames, St. Louis; *Treasurer*, S. A. Treat, Chicago; *Secretary*, Alfred Stone, Providence, R. I. The Institute has 26 chapters, 475 fellows, and 86 honorary members. The twenty-ninth annual convention will be held in St. Louis in October, 1895.

AMERICAN INSTITUTE OF MINING ENGINEERS.

President, 1894, John Fritz, Bethlehem, Pa.; *Vice-Presidents*, A. J. Bowie, Jr., Robert G. Leckie, E. G. Spilsbury, J. F. Holloway, J. C. Platt, E. V. d'Inwilliers; *Treasurer*, Theodore D. Raud, Philadelphia; *Secretary*, R. W. Raymond, 13 Burling Slip, New York City. Honorary members, 15; total membership (July, 1894), 2,391. The annual meeting is held the third Tuesday of February. Two other regular meetings are held every year.

AMERICAN SOCIETY OF CIVIL ENGINEERS.

President, William P. Craighill; *Vice-Presidents*, Charles Macdonald, E. L. Corthell, Charles C. Martin, Joseph M. Wilson; *Secretary*, F. Collingwood; *Treasurer*, John Bogart; *Directors*, Leffert L. Buck, Sir Casimir S. Gzowski, Desmond Fitz Gerald, Charles L. Strobel, Benjamin M. Harrod, John Thomson, Foster Crowell, Henry G. Prout, William S. Pope, Frederic P. Stearns, John T. Fanning, Olin H. Landreth, Wm. L. Burr, Joseph M. Knap, Bernard R. Green, T. Guilford Smith, Robt. E. Stanton, H. D. Whitcomb; *Assistant Secretary and Librarian*, Charles Warren Hunt; *Auditor*, Thomas B. Lee. The house of the Society is at No. 127 East Twenty-third Street, New York City. Regular meetings are held the first and third Wednesdays of each month (except July and August), at 8 P. M. The Society was instituted in 1852.

AMERICAN SOCIETY OF MECHANICAL ENGINEERS.

President, Eckley B. Coxe, Drifton, Pa.; *Vice-Presidents*, C. E. Billings, Hartford, Ct.; Percival Roberts, Reno, Nev., Pa.; H. J. Small, Sacramento, Cal.; C. W. Hunt, New York; Thomas R. Pickering, Portland, Ct.; Edwin Reynolds, Milwaukee; *Treasurer*, William H. Wiley, 53 East Tenth Street, New York; *Secretary*, F. R. Hutton, 12 West Thirty-first Street, New York. Honorary members, 16; life members, 59; members, 1,335; associate members, 69; juniors, 242; total, 1,721. Two annual meetings, in spring and autumn, the latter in New York City in November. The Society was chartered in 1881.

AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS.

President, Edwin J. Houston; *Vice-Presidents*, Patrick B. Delany, H. Ward Leonard, William Wallace, William A. Anthony, Francis B. Crocker, James Hamblet; *Treasurer*, George M. Phelps, 203 Broadway, New York; *Secretary*, Ralph W. Pope, 12 West Thirty-first Street, New York. The present membership is 898.

American Whist.

THE LAWS OF WHIST ADOPTED BY THE AMERICAN WHIST CONGRESS AS REVISED
AT THE THIRD CONGRESS, CHICAGO, JUNE 20-24, 1893.

THE GAME.

1. A game consists of seven points, each trick above six counting one. The value of the game is determined by deducting the losers' score from seven.

FORMING THE TABLE.

2. Those first in the room have the preference. If, by reason of two or more arriving at the same time, more than four assemble, the preference among the last comers is determined by cutting, a lower cut giving the preference over all cutting higher. A complete table consists of six; the four having the preference play. Partners are determined by cutting; the highest two play against the lowest two; the lowest deals and has the choice of seats and cards.

3. If two players cut intermediat cards of equal value, they cut again; the lower of the new cut plays with the original lowest.

4. If three players cut cards of equal value, they cut again. If the fourth has cut the highest card, the lowest two of the new cut are partners and the lowest deals. If the fourth has cut the lowest card, he deals and the highest two of the new cut are partners.

5. At the end of a game, if there are more than four belonging to the table, a sufficient number of the players retire to admit those awaiting their turn to play. In determining which players remain in, those who have played a less number of consecutive games have the preference over all who have played a greater number; between two or more who have played an equal number, the preference is determined by cutting, a lower cut giving the preference over all cutting higher.

6. To entitle one to enter a table, he must declare his intention to do so before any one of the players has cut for the purpose of commencing a new game or of cutting out.

CUTTING.

7. In cutting, the ace is the lowest card. All must cut from the same pack. If a player exposes more than one card, he must cut again. Drawing cards from the outspread pack may be resorted to in place of cutting.

SHUFFLING.

8. Before every deal the cards must be shuffled. When two packs are used the dealer's partner must collect and shuffle the cards for the ensuing deal and place them at his right hand. In all cases the dealer may shuffle last.

9. A pack must not be shuffled during the play of a hand, nor so as to expose the face of any card.

CUTTING TO THE DEALER.

10. The dealer must present the pack to his right-hand adversary to be cut; the adversary must take a portion from the top of the pack and place it toward the dealer; at least four cards must be left in each packet; the dealer must reunite the packets by placing the one not removed in cutting upon the other.

11. If, in cutting or in reuniting the separate packets, a card is exposed the pack must be reshuffled by the dealer and cut again; if there is any confusion of the cards or doubt as to the place where the pack was separated there must be a new cut.

12. If the dealer reshuffles the pack after it has been properly cut he loses his deal.

DEALING.

13. When the pack has been properly cut and reunited the dealer must distribute the cards, one at a time, to each player in regular rotation, beginning at his left. The last, which is the trump card, must be turned up before the dealer. At the end of the hand, or when the deal is lost, the deal passes to the player next to the dealer on his left and so on to each in turn.

14. There must be a new deal by the same dealer:

I. If any card except the last is faced in the pack.

II. If, during the deal or during the play of the hand, the pack is proved incorrect or imperfect; but any prior score made with that pack shall stand.

15. If, during the deal, a card is exposed the side not in fault may demand a new deal provided neither of that side has touched a card. If a new deal does not take place the exposed card is not liable to be called.

16. Any one dealing out of turn or with his adversaries' pack may be stopped before the trump card is turned, after which the deal is valid and the packs, if changed, so remain.

MISDEALING.

17. It is a misdeal:

I. If the dealer omits to have the pack cut and his adversaries discover the error before the trump card is turned and before looking at any of their cards.

II. If he deals a card incorrectly and fails to correct the error before dealing another.

III. If he counts the cards on the table or in the remainder of the pack.

IV. If, having a perfect pack, he does not deal to each player the proper number of cards and the error is discovered before all have played to the first trick.

V. If he looks at the trump card before the deal is completed.

VI. If he places the trump card face downwards upon his own or any other player's cards.

A misdeal loses the deal, unless, during the deal, either of the adversaries touches a card or in any other manner interrupts the dealer.

THE TRUMP CARD.

18. The dealer must leave the trump card face upwards on the table until it is his turn to play to the first trick; if it is left on the table until after the second trick has been turned and quitted it is liable to be called. After it has been lawfully taken up, it must not be named, and any player naming it is liable to have his highest or his lowest trump called by either adversary. A player may, however, ask what the trump suit is.

IRREGULARITIES IN THE HANDS.

19. If, at any time after all have played to the first trick, the pack being perfect, a player is found

AMERICAN WHIST—Continued.

to have either more or less than his correct number of cards and his adversaries have their right number, the latter, upon the discovery of such surplus or deficiency, may consult and shall have the choice:

- I. To have a new deal; or
- II. To have the hand played out, in which case the surplus or missing card or cards are not taken into account.

If either of the adversaries also has more or less than his correct number, there must be a new deal.

If any player has a surplus card by reason of an omission to play to a trick, his adversaries can exercise the foregoing privilege only after he has played to the trick following the one in which such omission occurred.

CARDS LIABLE TO BE CALLED.

20. The following cards are liable to be called by either adversary:

- I. Every card faced upon the table otherwise than in the regular course of play, but not including a card led out of turn.
 - II. Every card thrown with the one led or played to the current trick. The player must indicate the one led or played.
 - III. Every card so held by a player that his partner sees any portion of its face.
 - IV. All the cards in a hand lowered or shown by a player so that his partner sees more than one card of it.
 - V. Every card named by the player holding it.
21. All cards liable to be called must be placed and left face upwards on the table. A player must lead or play them when they are called, provided he can do so without revoking. The call may be repeated at each trick until the card is played. A player cannot be prevented from leading or playing a card liable to be called; if he can get rid of it in the course of play, no penalty remains.

22. If a player leads a card better than any of his adversaries hold of the suit, and then leads one or more other cards without waiting for his partner to play, the latter may be called upon by either adversary to take the first trick, and the other cards thus improperly played are liable to be called; it makes no difference whether he plays them one after the other, or throws them all on the table together, after the first card is played, the others are liable to be called.

23. A player having a card liable to be called must not play another until the adversaries have stated whether or not they wish to call the card liable to the penalty. If he plays another card without awaiting the decision of the adversaries, such other card also is liable to be called.

LEADING OUT OF TURN.

24. If any player leads out of turn, a suit may be called from him or his partner the first time it is the turn of either of them to lead. The penalty can be enforced only by the adversary on the right of the player from whom a suit can lawfully be called.

If a player so called on to lead a suit has none of it, or if all have played to the false lead, no penalty can be enforced. If all have not played to the trick, the cards erroneously played to such false lead are not liable to be called, and must be taken back.

PLAYING OUT OF TURN.

25. If the third hand plays before the second, the fourth hand also may play before the second.

26. If the third hand has not played, and the fourth hand plays before the second, the latter may be called upon by the third hand to play his highest or lowest card of the suit led, or, if he has none, to trump or not to trump the trick.

ABANDONED HANDS.

27. If all four players throw their cards on the table, face upwards, no further play of that hand is permitted. The result of the hand, as then claimed or admitted, is established, provided that, if a revoke is discovered, the revoke penalty attaches.

REVOKING.

28. A revoke is a renounce in error not corrected in time. A player renounces in error when, holding one or more cards of the suit led, he plays a card of a different suit.

A renounce in error may be corrected by the player making it, before the trick in which it occurs has been turned and quitted, unless either he or his partner, whether in his right turn or otherwise, has led or played to the following trick, or unless his partner has asked whether or not he has any of the suit renounced.

29. If a player corrects his mistake in time to save a revoke, the card improperly played by him is liable to be called; any player or players, who have played after him, may withdraw their cards and substitute others; the cards so withdrawn are not liable to be called.

30. The penalty for revoking is the transfer of two tricks from the revoking side to their adversaries; it can be enforced for as many revokes as occur during the hand. The revoking side cannot win the game in that hand; if both sides revoke, neither can win the game in that hand.

31. The revoking player and his partner may require the hand in which the revoke has been made to be played out, and score all points made by them up to the score of six.

32. At the end of the hand the claimants of a revoke may search all the tricks. If the cards have been mixed, the claim may be urged and proved, if possible; but no proof is necessary, and the revoke is established, if, after it has been claimed, the accused player or his partner mixes the cards before they have been examined to the satisfaction of the adversaries.

33. The revoke can be claimed at any time before the cards have been presented and cut for the following deal, but not thereafter.

MISCELLANEOUS.

34. Any one, during the play of a trick and before the cards have been touched for the purpose of gathering them together, may demand that the players draw their cards.

35. If any one, prior to his partner playing, calls attention in any manner to the trick or to the score, the adversary last to play to the trick may require the offender's partner to play his highest or lowest of the suit led, or, if he has none, to trump or not to trump the trick.

36. If any player says: "I can win the rest," "The rest are ours," "We have the game," or words to that effect, his partner's cards must be laid upon the table and are liable to be called.

37. When a trick has been turned and quitted, it must not again be seen until after the hand has been played. A violation of this law subjects the offender's side to the same penalty as in case of a lead out of turn.

38. If a player is lawfully called upon to play the highest or lowest of a suit, or to trump or not to

trump a trick, or to lead a suit, and unnecessarily fails to comply, he is liable to the same penalty as if he had revoked.

39. In all cases where a penalty has been incurred, the offender must await the decision of the adversaries. If either of them, with or without his partner's consent, demands a penalty, to which they are entitled, such decision is final. If the wrong adversary demands a penalty or a wrong penalty is demanded, none can be enforced.

THE ETIQUETTE OF WHIST,

AS ADOPTED BY THE THIRD AMERICAN WHIST CONGRESS, CHICAGO, JUNE 20-24, 1893.

The following rules belong to the established code of Whist Etiquette. They are formulated with a view to discourage and repress certain improprieties of conduct, therein pointed out, which are not reached by the laws. The courtesy which marks the intercourse of gentlemen will regulate other more obvious cases.

I. No conversation should be indulged in during the play except such as is allowed by the laws of the game.

II. No player should in any manner whatsoever give any intimation as to the state of his hand or of the game, or of approval or disapproval of a play.

III. No player should lead until the preceding trick is turned and quitted.

IV. No player should, after having led a winning card, draw a card from his hand for another lead until his partner has played to the current trick.

V. No player should play a card in any manner so as to call particular attention to it, nor should he demand that the cards be placed in order to attract the attention of his partner.

VI. No player should purposely incur a penalty because he is willing to pay it, nor should he make a second revoke in order to conceal one previously made.

VII. No player should take advantage of information imparted by his partner through a breach of etiquette.

VIII. No player should object to referring a disputed question of fact to a bystander who professes himself uninterested in the result of the game and able to decide the question.

IX. Bystanders should not in any manner call attention to or give any intimation concerning the play or the state of the game, during the play of a hand. They should not look over the hand of a player without his permission; nor should they walk around the table to look at the different hands.

THE LAWS OF DUPLICATE WHIST,

AS ADOPTED BY THE FOURTH AMERICAN WHIST CONGRESS AT PHILADELPHIA, 1894.

Duplicate Whist is governed by the Laws of Whist, except in so far as they are modified by the following Special Laws:

THE GAME AND THE SCORE.

(a) A game or match consists of any agreed number of deals, each of which is played once only by each player.

The contesting teams must be of the same number, but may each consist of any agreed number of pairs, one-half of which, or as near thereto as possible, sit north and south, the other half east and west.

Every trick taken is scored, and the match is determined by a comparison of the aggregate scores won by the competing teams. In case the teams consist of an odd number of pairs each team, in making up such aggregate, adds, as though won by it, the average score of all the pairs seated in the positions opposite to its odd pair.

Each side keeps its own score, and it is the duty of the north and south players at each table to compare the scores there made and see that they correspond. In case they fail to perform this duty the east and west scores are taken as correct and the north and south scores made to correspond thereto.

In a match between two teams the team which wins a majority of all the tricks scores the match as won by that number of tricks which it has taken in excess of one-half the total.

In a match between more than two teams each team wins or loses, as the case may be, by the number of tricks which its aggregate score exceeds or falls short of the average score of all of the competing teams.

In taking averages fractions are disregarded and the nearest whole number taken, one-half counting as a whole, unless it is necessary to take the fraction into account to avoid a tie, in which case the match is scored as won by "the fraction of a trick."

FORMING THE TABLE.

(b) Tables may be formed by cutting or by agreement.

In two-table duplicate, if the tables are formed by cutting, the four having the preference play at one table and the next four at the other. The highest two at one table are partners with the lowest two at the other. The highest two at each table sit north and south; the lowest two east and west.

DEALING AND MISDEALING.

(c) The deal is never lost. In case of a misdeal, or of the exposure of a card during the deal, the cards must be redealt by the same player.

THE TRUMP CARD.

(d) The trump card must be recorded before the play begins on a slip provided for that purpose. When the deal has been played the slip on which the trump card has been recorded must be placed by the dealer on the top of his cards, but the trump card must not be again turned until the hands are taken up for the purpose of overplaying them, at which time it must be turned and left face upwards on the table until it is the dealer's turn to play to the first trick. The slip on which the trump card is recorded must be turned face downwards as soon as the trump card is taken up by the dealer.

IRREGULARITIES IN THE HANDS.

(e) If a player is found to have either more or less than his correct number of cards, the course to be pursued is determined by the time at which the irregularity is discovered.

1. Where the irregularity is discovered before or during the original play of a hand: There must be a new deal.

AMERICAN WHIST—Continued.

II. Where the irregularity is discovered when the hand is taken up for overplay, and before such overplay has begun: The hand in which the irregularity is so discovered must be sent back to the table from which it was last received and the error be there rectified.

III. Where the irregularity is not discovered until after the overplay has begun: In two-table duplicate there must be a new deal; but, in a game in which the same hands are played at more than two tables, the hands must be rectified as above, and then passed to the next table without overplay at the table at which the error was discovered, in which case, if a player had a deficiency and his adversary the corresponding surplus, each team takes the average score for that deal; if, however, his partner had the corresponding surplus, his team is given the lowest score made at any table for that deal.

PLAYING THE CARDS.

(f) Each player, when it is his turn to play, must place his card face upwards before him, and towards the centre of the table, and allow it to remain upon the table in this position until all have played to the trick, when he must turn it over and place it face downwards, and nearer to himself, placing each successive card, as he turns it, on top of the last card previously turned by him. After he has played his card, and also after he has turned it, he must quit it by removing his hand.

A trick is turned and quitted when all four players have turned and quitted their respective cards. The cards must be left in the order in which they were played until the scores for the deal are recorded.

CLAIMING A REVOKE.

(g) A revoke may be claimed at any time before the last trick of the deal in which it occurs has been turned and quitted and the scores of that deal recorded, but not thereafter.

SINGLE-TABLE OR MNEMONIC DUPLICATE.

The laws of Duplicate Whist govern, where applicable, except as follows:

Each player plays each deal twice, the second time playing a hand previously played by an adversary.

Instead of turning the trump, a single suit may be declared trumps for the game.

On the overplay, the cards may be gathered into tricks instead of playing them as required by law (f).

In case of the discovery of an irregularity in the hands, there must always be a new deal.

THE PRIZE PROBLEMS OF 1894.*

PRIZE PROBLEM OF THE NEW YORK CHESS ASSOCIATION, 1894.
Black.

SOUVENIR OF THE NEW YORK CHESS ASSOCIATION, 1894.
Black.

White to play and mate in three moves.

White to play and mate in four moves.

The above problems were given out at the meeting of the New York State Chess Association, gold medals being offered for the correct solutions. The first was solved by Mr. Freere, of the Brooklyn Chess Club. The medal for the souvenir problem was awarded to Mr. Dudeney, of England. The position has been criticised as one of the most remarkable positions on record, and was composed as a companion piece to the other. The first shows an unnatural grouping of the pawns which, however, could readily occur in actual play. The second shows a graceful position which, however, can only be brought about by a marvelous sequence of play, which gives a key to the solution. Arrange the pieces as for a game and move as follows:

1894 WILL always be remembered as an eventful year in the annals of chess, on account of the important meetings and matches which tended to popularize the royal game. The year opened with the second meeting of the inter-collegiate tournament, wherein Hymes and Lébaire once more won the honors for Columbia, 8½; Hewins and Spalding, of Harvard, 7; Ross and Skinner, of Yale, 5; Ewing and Roberts, of Princeton, 3½. Arrangements were made for the third meeting.

Two international tournaments were held in New York, under the auspices of the City Chess Club. The scores in the first were: Pillsbury, 7; Hodges, 6; Showalter, 5½; Albin, 5; J. Baird, 4½; Halpern, 4½; Baird, Ettlinger, and Hanham, 3; Delmar, 2½. In the second, which closed November 13, Steinitz won 8½; Albin, 6½; Showalter, 6; Hymes, 5; Delmar and Pillsbury, 5; Hanham, Halpern, and Rocamora, 4; Baird and Jasnogrodsky, 3.

The event of the year was the great match for the chess championship of the world between Lasker and Steinitz, which was won by the former, May 26, by the decisive score of 10 to 5 and 4 draws. Negotiations are pending for a return match.

The New York State Chess Association held its semi-annual meetings. In that of February 22 the winners were Hodges, Baird, and Showalter. In the midsummer meeting, held in August, at Buffalo, the winners were Showalter, Pillsbury, and Albin. Highly successful meetings were held by the State Chess associations of New Jersey, Illinois, Pennsylvania, Rhode Island, Massachusetts, Virginia, and Ohio. At the annual meeting of the Canadian Chess Association the prizes were won by Messrs. Davidson, Narreway, Robertson, and Short. A match was arranged between Mrs. J. W. Showalter and Mrs. J. W. Norrell for the ladies' chess championship of the United States.

The annual European international masters' tournament was held at Leipzig during the first week in September, the result being: Tarrasch, 13½; Lipke, 13; Teichman, 12; Blackburne and Walbrodt, 11½ each.

The following are the solutions to the prize problems of 1893 given in last year's ALMANAC:

CHAMPIONSHIP OF AMERICA.

FROM 1884 to 1890, inclusive, the winners of the respective pennants of the National League and American Association played a post-season series for the championship of America. This series was omitted in 1891, owing to strained relations between the two bodies. In 1892 the Bostons and Cleve-lands, the winners of the first and second divisions of the League's season, played for the champion-ship. In 1893 there was but one season, the first and second divisions having been legislated out of existence. There was no post-season series played with any of the minor leagues for the championship of America, for obvious reasons. The results:

IN 1894 a National League trophy series was arranged. A silver cup was donated by Mr. Temple, of Pittsburgh, to be played for by the two leading clubs in the National League race at the termination of the regular season. If, for obvious reasons, the pennant winner refuses to play for the Temple trophy and the accompanying gate receipts, the second and third clubs play the series, and so down. The cup is valued at \$700, and will become the property of the club winning it three successive seasons. New York and Baltimore played a series for the cup in 1894, New York scoring four consecutive victories.

THE NATIONAL LEAGUE.

The record of the champion team of the National League, together with the name of the leading batter each year, since its organization, is as follows:

(a) and (b) represent the first and second divisions of the championship season.

The catcher's record of continuous games played was broken in 1890 by Charles Zimmer, of the Cleveland Club, who caught in 110 consecutive championship games.

The cities which have been represented at different times in the National League are Chicago, Boston, New York, Philadelphia, Pittsburgh, Cleveland, Indianapolis, Washington, Detroit, St. Louis, Kansas City, Providence, Buffalo, Troy, Worcester, Cincinnati, Brooklyn, Syracuse, Milwaukee, Baltimore, Hartford, and Louisville. Boston and Chicago have been in the League every year since its organization.

THE AMERICAN ASSOCIATION.

The American Association was organized in 1882. In December, 1891, it was merged with the National League. Its record follows:

BASEBALL RECORDS—Continued.

LONG DISTANCE THROWING RECORDS.

October 15, 1872—John Hatfield, of the Mutuals, threw the ball 133 yards 1 foot 7½ inches, at the Union Grounds, Brooklyn.

September 9, 1882—Ed. Williamson, of Chicago, threw the ball 132 yards 1 foot, at the Chicago Grounds.

October 12, 1884—Ed. Crane, of the Boston Unions, topped the record with a throw of 135 yards 1 foot ¾ inch, at Cincinnati.

Ed. Williamson won the Cincinnati competition in 1888, with a throw of 133 yards 11 inches.

The shortest 9-inning game on record was played on the Excelsior Grounds, Brooklyn, May, 1861, by the Excelsior and Field clubs; time, 50 minutes.

The longest game on record was played at Boston, May 11, 1877. The Manchester and Harvard College teams played 24 innings; score, 0 to 0.

The longest championship game on record was played at Tacoma, May 16, 1891, between the Tacoma and Seattle teams. The Tacomas won in 22 innings; score, 6 to 5.

Harry Berthrong's record of 14 2-5 seconds, for running around the bases, made at Washington, in 1868, is still the standard.

IMPORTANT BASEBALL EVENTS.

1876—Organization of the National League.

1882—Organization of the American Association.

1884—First baseball war, caused by the organization of the Union Association, under the leadership of Henry V. Lucas. The new Association was no match for the older bodies, and went to pieces before the season ended.

1890—Players' League organized. Its object was to conduct baseball on broader principles than those of the League and Association. The competition was disastrous to both sides, and at the conclusion of the playing season the new League was dismembered by the superior diplomacy of the old magnates.

1891—American Association withdrew from the new National Agreement and opened warfare against the National League. In December the two bodies met at Indianapolis, and the Association went out of existence, four of its clubs (St. Louis, Louisville, Baltimore, and Washington) being added to the League circuit. The other four were bought out.

1892—The League decided to divide the championship season into two halves, the winner of the first to play the winner of the second in a final series. Boston and Cleveland were the respective winners, the former taking the final series in five straight games. The scheme did not meet with great favor, and was abolished at the annual meeting at Chicago, November 17 and 18.

1893—At the annual meeting of the League at New York, November 16, the treasurer announced that the \$140,000 debt assumed when the Association clubs were absorbed had been cancelled.

1894—Death of Michael J. Kelly at Boston, November 8. At the annual meeting of the League at New York, November 14, 15, and 16, it was decided that out of the funds of the League in the hands of the treasurer there shall be created a sinking fund, not to exceed \$12,000, which shall be invested in Government bonds, all other funds to be placed in the treasury to meet current expenses. This law abolishes the 10 per cent assessment for an emergency fund. Under the new order the expenses of the League will be paid by assessing each club for its pro rata share. Charles Bennett, the well-known Boston player, had both his legs cut off in a railroad accident in Kansas.

Canoeing.

THE fifteenth annual meet of the American Canoe Association was held at Croton Point, N. Y., in July, 1894.

The results:

Trophy Sailing Race, 7 miles—Won by C. E. Archibald. Time, 2 hours 5 minutes and 34 seconds.

Jabberwook Trophy, 3 miles—Won by H. V. Backus. Time, 54 minutes 39 seconds.

Orilla Cup, 7½ miles—Won by C. E. Archibald. Time, 2 hours 4 minutes and 45 seconds.

Outclassed Sailing, 3 miles—Won by G. B. Douglass. Time, 54 minutes 26 seconds.

Club Sailing Race, 4½ miles—Won by Yonkers Club.

Dolphin Trophy, 7½ miles—Won by L. B. Palmer.

Unlimited Sailing, 6 miles—Won by C. E. Archibald. Time, 1 hour 37 minutes and 29 seconds.

Open Canoe, Single Blade, 1 mile—Won by C. E. Archibald. Time, 6 minutes 40 seconds.

Novice Race, 3 miles—Won by H. V. Backus. Time, 1 hour 9 minutes and 40 seconds.

Paddling Championship, 1 mile—Won by Clarence Euson. Time, 12 minutes 57½ seconds.

Record Paddling, 7½ miles—Won by L. B. Palmer. Time, 6 minutes 23 seconds.

Record Sailing, 4½ miles—Won by L. B. Palmer. Time, 1 hour 11 minutes and 11 seconds.

Unclassified Sailing, 4½ miles—Won by M. T. Bennett. Time, 1 hour 15 minutes and 29 seconds.

Sailing Upset, ½ mile—Won by C. E. Archibald. No time taken.

Trophy Paddling Race, 1 mile—Won by Clarence Euson. Time, 10 minutes 27½ seconds.

Tandem Paddling, ½ mile—Won by L. B. Palmer and James Duguid. Time, 5 minutes 42 seconds.

Club Four Paddling Race, ¾ mile—Won by the senior crew of the Iantho Canoe Club of Newark, N. J., L. B. Palmer, H. Farmer, B. Fredericks, and J. Duguid. Time, 4 minutes 52 seconds.

Sailing and Paddling Race, 3 miles (alternately)—Won by L. B. Palmer. Time, 56 minutes 20 seconds.

Record Points, Paddling and Combined Sailing—Won by L. B. Palmer.

Club Sailing Race, 4½ miles—Won by Yonkers Canoe Club.

Upset Paddling Race, ¼ mile—Won by L. B. Palmer. No time taken.

Hurry-scurry Race, 100 yards swimming and 100 yards paddling—Won by Charles Ahreneke. No time taken.

Gymnastic Competition—Won by G. P. Douglass (walkover).

The Passenger and War Canoe Races were not decided this season owing to the lack of entries.

INTERNATIONAL RACING.

1869, August 17. Oxford (Eng.) four beat Harvard (Am.) four over the Putney-Mortlake course on the Thames by three clear lengths. Time, 22. 17.

1876, September 1. Yale four beat Columbia four at the Centennial Regatta, rowed over a mile and a half course on the Schuykill, in 9. 10 $\frac{1}{4}$; Columbia, 9. 21. A four from First Trinity College, Cambridge, Eng., was entered, but withdrew by reason of illness of one of the four.

1878, a Columbia College four won the Visitors' Challenge Cup at Henley Regatta, Eng., in 8. 42.

HARVARD AND YALE—PREVIOUS RACES.

Previous races in which Harvard and Yale have rowed are summarized as follows:

1852, August 3. Lake Winipisogee, Centre Harbor, N. H., two miles straight to windward, in eight-oared barges, class of 1853, Oneida, of Harvard, beat Halcyon, of Yale, two lengths.

1855, July 21. Connecticut River, at Springfield, three miles with a turn, barges Iris (eight-oared) and Y. Y. (four-oared), of Harvard, beat Nereid and Nautilus (both sixes), of Yale. Allowances, 11 seconds per oar. Time: Iris, 22 m.; Y. Y., 22.03; Nereid, 23.38, and Nautilus, 24.38.

1858, no race. George E. Dunham, stroke of the Yale crew, was drowned at Springfield, six days before the race, in a collision while at practice.

1859, July 26. Lake Quinsigamond, Worcester, Mass., three miles with a turn, Harvard shell, 19. 18; Yale shell, 20. 18. Harvard lapstreak, Avon, 21. 13; Brown lapstreak, Atlanta, 24. 40. Same course, July 27, in Citizens' Regatta, Yale shell, 19. 14; Harvard, 19. 16.

1860, July 24. Lake Quinsigamond, Harvard, 18. 53; Yale, 19. 05; Brown, 21. 15.

There were no further races until 1864, when they were renewed by University six-oared crews, at three miles with a turn, and with the following results:

UNIVERSITY BOAT RACING—Continued.

COLUMBIA AND HARVARD EIGHTS.

In 1881 and since Columbia and Harvard have rowed a full university eight-oared race over the Thames course at New London. The race in 1882 was, however, a row-over for Columbia, Harvard declining to row on account of a dispute as to hour of race.

No races have been rowed since 1887.

FRESHMEN EIGHTS.

Previous to 1880 a number of races were rowed by "Freshmen" crews of the several universities and colleges, with six oars. In 1880 agreement was entered into by Harvard and Columbia to row an eight-oared race annually at two miles straightaway. In 1886 Yale joined in the arrangement, but sunk in the race. In 1890 Harvard did not row, and Yale and Cornell entered.

INTER-COLLEGIATE ROWING ASSOCIATION.

In 1883 and since a race for fours, without coxswains, has been rowed at a mile and a half straight, under the auspices of the Inter-Collegiate Rowing Association.

1883, July 4. At Lake George, N. Y., Cornell, 11.57; University of Pennsylvania, 12.29; Princeton, 12.40; Wesleyan, 12.47.

1884, July 7. At Saratoga, N. Y., University of Pennsylvania, 8.39¾; Cornell, 8.41; Princeton, 8.49; Columbia, 9.25, and Bowdoin, not timed.

1885, July 4. At Lake Quinsigamond (Worcester), Mass., Cornell finished first in 9.10½, followed by Brown, Bowdoin, and University of Pennsylvania. Referee decided Cornell disqualified for a foul, ordered Brown and Bowdoin to row over, and placed University of Pennsylvania third. July 15, same course, Bowdoin, 8.26; Brown, second.

1886, July 3. At Lake George, N. Y., Bowdoin, 8.06; University of Pennsylvania, second. Won by a length and a half.

1887, July 5. At Lake Quinsigamond, Cornell defeated Bowdoin by 2 feet, in 9.28¾.

1889, June 27. A match between Cornell, Columbia, and University of Pennsylvania, in eight-oared shells, was rowed at three miles over the New London course, from Winthrop's Point, up river, Cornell winning somewhat easily, Columbia second. Time not accurately taken, owing to darkness. Said to be between 15 minutes 3 seconds and 16 minutes 4 seconds.

1890, June 26. Cornell defeated University of Pennsylvania by six lengths in a three-mile race at New London. Time, 14 minutes 43 seconds.

1891, June 25. Cornell defeated University of Pennsylvania by six and Columbia by thirteen lengths in a three-mile race at New London. The time, 14 minutes 27½ seconds, breaks record.

1892, June 15. Cornell defeated University of Pennsylvania by six lengths in a three-mile race at Ithaca. The time was 17 minutes 26 seconds.

1893, July 8. Cornell defeated University of Pennsylvania in a four-mile race at Lake Minnetonka. The time was 23 minutes 52 seconds.

1894, June 16. Cornell defeated University of Pennsylvania in a four-mile race by two and a half lengths on the Delaware. Time, 21 minutes 12¾ seconds.

Fly-Casting Records.

THESE casts, except as stated below, were made at the National Rod and Reel Association tournaments, held at Central Park, New York, and the statement of records was contributed to THE WORLD ALMANAC by Mr. A. N. Cheney, of Glens Falls, N. Y.

Light Rod Contest (rods not to exceed five ounces in weight): Reuben C. Leonard, 95 feet, made 1888.

Single-Handed Fly-Casting, Amateur: R. C. Leonard, 85 feet, made 1882; R. B. Lawrence, 85 feet, made 1888.

Switch Fly-Casting: H. W. Hawes, 102 feet, made 1887.

Single-Handed Fly-Casting, Expert: R. C. Leonard, 102½ feet, made 1888.

Salmon Casting: H. W. Hawes, 138 feet, made 1888.

Minnow Casting for Black Bass: F. B. Davidson, average five casts, 167 1-5 feet. Made at Chicago, Ill., August 25, 1894.

Minnow Casting for Black Bass: C. E. Sturges, average of five casts, 140 feet 11 inches. Made at Camp Lake, Wisconsin, July 4, 1891.

Striped Bass Casting (Light): H. W. Hawes, average of five casts, 129 6-10 feet, 1884.

Striped Bass Casting (Heavy): W. H. Wood, average of five casts, 246 5-10 feet, made 1887. Longest single cast, same class as above, W. H. Wood, 250 feet, made 1885.

Fly-Casting for Black Bass: James L. Breese, 90 feet, made 1889.

ENGLISH FLY AND BAIT CASTING RECORDS.

Mr. Hobden 216 feet

THAMES BAIT-CASTING, AMATEUR. †

Mr. R. Gillson 190 feet 7 inches

NOTE—In minnow casting for black bass, Mr. Davidson used a half-ounce sinker. Mr. Sturges used a quarter-ounce sinker. Under these conditions Mr. Sturges made a single cast of 148 feet, and Mr. Davidson a single cast of 173 feet.

* This distance was made by measuring the line after the cast, and is not considered as good as Mr. Kelson's, which was made by measuring to the point where the fly struck on the water, as was Mr. Wood's.

† Mr. John Enright's cast of 138 feet, made on the Thames in 1894, was an exhibition cast made in the presence of witnesses. It equals the expert American record, and was made under similar conditions by measuring from the caster to the point where the fly struck on the water.

‡ This distance was made by measuring the line after casting.

§ This cast of Messrs. Marston and Clark is given in English reports as the best, but for some unknown reason Mr. Wood's cast of 82 feet 6 inches, and Mr. George M. Kelson's cast of 81 feet, have been entirely overlooked, although both are records at an international tournament.

|| In Nottingham casting the cast is made from the reel, as is done in America.

¶ In Thames casting the line is coiled at the feet of the caster.

THE NATIONAL CHAMPIONSHIPS.

SINGLES.

THE all-comers tournament at Newport was won by M. F. Goodbody, of Ireland, who defeated W. A. Larned, of Summit, N. J., in the final round, 4-6, 6-1, 3-6, 7-5, 6-2. During the tournament Goodbody beat Hovey and Hobart.

The championship was successfully defended by R. D. Wrenn, of Harvard, who defeated Goodbody, 6-8 6 1. 6-4. 6-4

LAWN TENNIS RECORDS—Continued.

DOUBLES.

The Western championship was won by the Neel brothers, of the University of Chicago, and the Eastern championship by J. Howland and A. E. Foote, of Yale. The East versus West match at Narragansett also resulted in favor of the Neel brothers, but Hobart and Hovey, the champions, easily defended their title at Newport. Score: 6-3, 8-6, 6-1.

The Golf Season.

GOLF has attained a firm place in the list of American outdoor sports. Clubs have been organized East and West, and the number of players is steadily on the increase. The St. Andrew's Club, with links at St. Andrew's, a pretty suburb of Yonkers, N. Y., was the first organized in the United States, in 1890. The Royal Montreal Club is the oldest in Canada. The best known clubs are the Chicago Golf Club, Chicago, Ill.; Tuxedo Golf Club, Tuxedo, N. Y.; Newport Golf Club, Newport, R. I.; The Golf Club, Washington, D. C.; Staten Island Golf Club, Staten Island, N. Y.; Lakewood Golf Club, Lakewood, N. J.; Shinnecock Golf Club, Southampton, L. I.; Essex County Golf Club, Orange, N. J., and the Morris County Golf Club, Morristown, N. J. There are links also on the grounds of the Brookline Country Club, Brookline, Mass.; the Meadowbrook Hunt Club, Hempstead, L. I.; the Richmond County Country Club, Staten Island, N. Y., and the New York Jockey Club, Morris Park, N. Y.

Two tournaments for the amateur championship of the United States were held during the season, about the same players taking part in each. The first, at Newport, R. I., in September, was won by William Lawrence, Newport Golf Club, who defeated C. B. McDonald, Chicago Golf Club, by one stroke. The second tournament, at the St. Andrew's Club, in October, was won by L. B. Stoddard, of the home club, from thirty-two contestants. The season closed with two champions, an anomaly that forcibly suggested the necessity of a national golf association, and one is on the verge of formation. An expert rating of the form of the best players would place Charles B. McDonald, Chicago Golf Club, above both the champions, L. P. Stoddard, St. Andrew's Club, and William Lawrence, Newport Golf Club.

The foursome, or pair, champions are L. B. Stoddard and J. B. Upham, St. Andrew's Club, who won the title at the October tournament. No tournament was played for the women's championship. The most important club tournament for women was the two-day match at the Morris County Golf Club, Morristown, N. J., for the Mrs. McK. Twombly Cup, in October. It was won by Miss A. Howland Ford. In November the Hunt Cup in the tournament for the women players of the Meadowbrook Club, Hempstead, L. I., was won by Miss Anna Sands.

Cricket.

THE game of cricket was more actively pursued in 1894 than ever before in the history of the game in this country, and it appears that the scientific pastime is rapidly gaining in popularity. The Metropolitan District Cricket League is the governing body for the game in New York, and each season arranges the championship schedules, which determine the pennant winners. The season was unusually interesting in 1894. The following are the records:

FIRST SECTION.

TOUR OF LORD HAWKE'S TEAM.

A team of English amateurs, under the captaincy of Lord Hawke, made a short tour of the United States and Canada in September and October. Bad weather detracted from the enjoyment of a very successful tour, during which five games were played, of which three were won and two drawn. The full team was as follows: Lord Hawke, G. W. Hillyard, C. W. Wright, L. C. V. Bathurst, A. J. L. Hill, C. E. de Trafford, J. S. Robinson, G. R. Bardswell, R. S. Lucas, W. F. Whitwell, G. J. Mordaunt, and Kenneth McAlpine. The record:

September 17—At Staten Island. Lord Hawke's team, 289. New York did not bat owing to rain on the 18th and 19th, and the match was left drawn.

September 21, 22, and 24—At Philadelphia. Lord Hawke's team, 187 and 178; Gentlemen of Philadelphia, 169 and 122. Lord Hawke's team won by 131 runs.

September 28 and 29—At Philadelphia. Lord Hawke's team, 211; Gentlemen of Philadelphia, 107 and 64. Lord Hawke's team won by an inning and 40 runs.

October 3 and 4—At Toronto. Lord Hawke's team, 147; Gentlemen of Canada, 55 and 125 for 5 wickets. Drawn.

October 6 and 8—At Lowell. Lord Hawke's team, 176; Fifteen of Massachusetts, 53 and 194. Lord Hawke's team won by an inning and 19 runs.

Pugilism.

THE most important pugilistic event of the year 1894 was the championship contest between Corbett, the world's champion, and Mitchell, England's premier boxer. It continued less than three rounds, and therefore goes on record as the shortest glove fight on record for the world's championship. After defeating Mitchell, Corbett was challenged by Bob Fitzsimmons, but this deft was not accompanied by the usual money guarantee of good faith until after the latter beat Dan Creedon in two rounds at New Orleans late in September. Corbett at first paid no attention to the New Zealander's challenge, but finally accepted it.

As it now stands these men are matched to fight in Jacksonville, Florida, some time after July 1, 1895, for a purse of \$41,000 and a side wager of \$20,000.

Here is a list of the various class championships and their holders:

HEAVYWEIGHTS.—Champion of the world—James J. Corbett, of New York City.

Champion of Australia—Peter Jackson, of Sydney, N. S. W.

Champion of England—Peter Jackson, of Sydney, N. S. W.

MIDDLEWEIGHT.—Champion of the world—Robert Fitzsimmons, now of Newark, N. J.

LIGHTWEIGHTS.—Champion of America—Jack McAuliffe, of Brooklyn, N. Y.

Champion of England—Dick Burge, of London, England.

FEATHERWEIGHT.—Champion of the world—George Dixon, of Boston, Mass.

BANTAMWEIGHT.—Champion of the world—Billy Plimmer, of Birmingham, England.

The University of Oxford has the reputation of having been founded by King Alfred in 872. The first college of the University of Cambridge was founded by Hugo, Bishop of Ely, in 1257. The University of Paris was founded by King Philip II, about 1200. The first German university was at Prague, 1348. Trinity College, Dublin, was incorporated by royal charter in 1591. The University of Edinburgh was founded in 1582 by a charter granted by King James VI. of Scotland.

Harvard University had its beginning at Newtown, afterwards Cambridge, Mass., in 1636. Yale University had its beginning at Saybrook, Conn., in 1700, and removed to New Haven in 1716. The first common schools established by legislation in America were in Massachusetts, 1645; but the first town school was opened at Hartford, Ct., prior to 1642. There are twenty-eight college Greek-letter societies in the United States, which have a membership of 100,000, with some 650 active chapters and 350 inactive chapters. They own 70 houses or halls in various college towns and cities.

The oldest college fraternity is the Kappa Alpha, which was founded at Union College, Schenectady, N. Y., in 1825. There are eleven ladies' college fraternities, the oldest being the Pi Beta Phi, founded at Monmouth in 1867.

There are also 16 professional fraternities founded by professional schools attached to colleges, and these number some 50 active chapters and 3,500 members. In addition are a number of local fraternities.

National Educational Association.

OFFICERS—*President*, Nicholas M. Butler, Paterson, N. J.; *Secretary*, Irwin Shepard, Winona, Minn.; *Treasurer*, J. M. Greenwood, Kansas City, Mo.; *Board of Trustees*, N. A. Calkins, New York City, Chairman; Z. Richards, Washington, D. C., Secretary; E. C. Hewitt, Illinois; H. S. Taibeni, Rhode Island; Nicholas M. Butler, New Jersey, *ex officio*.

DEPOSITORY: 450 PENNSYLVANIA AVENUE, Washington, D. C. Organized in 1857 as "The National Teachers' Association" and reorganized in 1870 as the "National Educational Association." Its object is "To elevate the character and advance the interests of the profession of teaching, and to promote the cause of popular education in the United States."

MEMBERSHIP—Any person in any way connected with the work of education, or any educational association, shall be eligible to membership. Such person or association may become a member of the association by paying two dollars and signing the Constitution, and may continue a member by the payment of an annual fee of two dollars.

The National Council of Education consists of sixty members, selected out of the membership of the National Educational Association. Any member of the association identified with educational work is eligible to membership in the Council. The association has 200 life members and an average of about 4,000 annual members.

University Extension.

THE popular educational movement known as University Extension was started by the University of Cambridge in 1872. In that year Professor Stuart gave a course of lectures before various women's clubs in the north of England. The popular favor which his lectures instantly won encouraged him to repeat them before various audiences of different character and make-up in all parts of the country. From this beginning the growth of the movement was constant both under the direction of Cambridge University and later under the direction of Oxford and of the London Society for University Extension.

Two hundred local centres, three thousand lectures yearly, and a total attendance of between eighty and one hundred thousand represent what has been accomplished in the last four years in one form of adult education in the United States. The University Extension system of instruction was started on this side, in conscious imitation of English methods, by Provost William Pepper, of the University of Pennsylvania. A society was founded in June, 1890, with a Governing Committee, made up of representatives of leading societies. The purposes of the Society were clearly formulated to include the widest possible dissemination of information in regard to University Extension, full co-operation with all local bodies in the introduction of the system, and a general supervision and direction of the work throughout the country.

The plan of instruction includes courses of six or twelve lectures on some narrow field of history, literature, or science, with accompanying classes, paper work, reference reading, and examinations. The standard of the work is of University grade, the lectures are by University men, and the instruction is in accordance with University methods. Whatever is merely popular has been carefully avoided by the governing body, which aims to give the fullest opportunity for real study to those engaged for the greater part of their time in the active affairs of life. The local management of the lectures is in the hands of a committee, the members usually representing every class and occupation in the community. The members of these committees are carefully trained to a proper conception of the movement, and are encouraged to co-operate with the Universities in maintaining the high standard of the work.

When Dr. Edmund J. James was chosen President of the American Society a beginning had just been made in the formation of local centres, which numbered during that year a total of twenty-three, at which some three hundred lectures were given to an estimated attendance of ten or twelve thousand people. The second season witnessed a growth measured by the establishment of sixty centres, with a like increase in the number of lectures and students. During the third year still further progress was made, until, under the direct management of the Philadelphia offices, centres were formed and conducted not only in Pennsylvania, New Jersey, Delaware, Maryland, Virginia, West Virginia, but also in the leading States of New England. Through the "circuit," or union of five or six towns, joining and engaging the same lecturer, towns most distant from University centres have enjoyed the advantages of the system, and even villages of a few hundred inhabitants have secured these courses.

In addition to the winter lectures at the centres, the Society has entered upon two other lines of educational activity. The first is the formation of classes of from twenty to fifty members, which, under the direction of its lecturers, engage in the study of history or literature through consecutive periods of from three to six months. The classes are intended to supplement the work of the "local centre" proper, and in places where conditions do not admit of the formation of a centre, to supply, as far as possible, its place. The second is the Summer Meeting, which was started in Philadelphia in 1893, where courses were given during four weeks by some of the most eminent professors of Harvard, Johns Hopkins, Cornell, and Pennsylvania. The lectures at the Summer Meeting form with the work recommended through the year a logical sequence of study, upon the successful completion of which a special certificate is granted.

The peculiar conditions of adult education have demanded on the part of the lecturers not only scholarship and pedagogical ability, but a special acquaintance with the best methods of such instruction. To give this necessary knowledge, the American Society organized two years ago, in Philadelphia, a seminary for the training of University Extension lecturers, with a score of teachers drawn from the faculties of neighboring colleges. The seminary is distinctly a place for advanced study, and has among its members graduates of the leading American Universities, who secure there not only necessary training for University Extension teaching, but also a broad training in the history, theory, and practice of education.

From Philadelphia the movement has spread to all parts of the United States. In Massachusetts, a committee of leading college men is acting in co-operation with the American Society. In Rhode Island, Brown University has organized many centres. In Connecticut, representatives of Yale, Wesleyan, Trinity, and Hartford Theological are on the executive committee of the State branch of the American Society. In New York, the University of the State, through its secretary, Mr. Melvil Dewey, has arranged for Extension lectures in many important towns and cities. Rutgers College, as the agricultural institution of New Jersey, has offered scientific courses especially for the farmers of that State. The Universities of Wisconsin, Indiana, Kansas, and California have done much for their respective States. Chicago University has made for University Extension a special department, at present under the acting management of Professor N. Butler, Jr.

The American Society publishes *University Extension*, a monthly journal, with reports of the movement in all parts of the world, and also a *University Extension Bulletin*, which is issued fortnightly, especially for the members of its own centres. Chicago University publishes the *University Extension World*. Those interested in the development of the movement in England can get full information from the *University Extension Gazette*, of Oxford, and the *London University Extension Journal*, Charterhouse Square, London.

The Chautauqua System of Education.

President, Lewis Miller, Akron, O.; *Secretary*, W. A. Duncan, Syracuse, N. Y.; *Treasurer*, E. A. Skinner, Westfield, N. Y.; *Chancellor*, John H. Vincent, Buffalo; *Principal*, Wm. R. Harper, Chicago; *Vice-Chancellor*, G. E. Vincent, Buffalo.

The *Chautauqua Assembly* was organized in 1874 as the result of a joint plan of Lewis Miller and John H. Vincent. It holds annual sessions during July and August at Chautauqua, N. Y. The plan includes classes in language, literature, science, and art, lecture courses, musicales, recitals, and concerts, and various forms of entertainment and recreation.

The *Chautauqua Literary and Scientific Circle*, J. L. Hurlbut, New York, General Secretary; Kate F. Kimball, Buffalo, Executive Secretary, was organized at Chautauqua in 1878, with the aim of continuing the influence of the Assembly throughout the year in all parts of the country. Since that time more than two hundred and twenty thousand members have been enrolled. The Circle aims to promote habits of reading and study in history, literature, science, and art, in connection with the routine of daily life. The course seeks to give "the college outlook" on the world and life. The essentials of the plan are: A definite course covering four years, each year's course complete in itself; specified volumes approved by the counsellors, allotment of time by the week and month, a monthly magazine with additional readings and notes, a membership book with review outlines, and other aid. Individual readers may have all the privileges, and local circles may be formed by three or four members. The time required is about one hour daily for nine months. Certificates are granted to all who complete the course. Seals are affixed to the certificates which are granted for collateral and advanced reading. Any one may become a member of the C. L. S. C. by sending an application together with fifty cents (the annual fee) to John H. Vincent, Drawer 194, Buffalo, N. Y.

Catholic Summer School of America.

OFFICERS.

President, Rev. Thomas J. Conaty, D. D., Worcester, Mass.; *First Vice-President*, Rev. P. A. Halpin, S. J., New York City; *Second Vice-President*, Thomas B. Fitzpatrick, Boston, Mass.; *Treasurer*, Rev. M. M. Sheedy, Pittsburgh, Pa.; *Secretary*, Warren E. Mosher, A. M.; *Chairman of the Directing Board of Catholic Reading Circle Union*, Rev. M. M. Sheedy, Pittsburgh, Pa.

A Roman Catholic Chautauqua or Summer School was opened at New London, Ct., in the summer of 1892 under the auspices of distinguished clergymen and laymen, and the first meetings were held from July 30 to August 14. The second Summer School was held at Plattsburgh, N. Y., on Lake Champlain, from July 15 to August 6, 1893, and the third at the same place from July 14 to August 13, 1894. The Summer School will meet annually hereafter near Plattsburgh, the association having acquired a site on the shore of Lake Champlain, upon which have been erected the buildings necessary to carry on the work of the institution. The object of this institution is "to encourage the diffusion of sound literature; to give those who desire to pursue their studies, after leaving school, an available opportunity to follow prescribed courses of the most approved reading; to enable others, who have made considerable progress in education, to review their past studies, and, particularly, to encourage individual home reading and study on systematic and Catholic lines." The plan consists of carefully prepared reading courses and wisely selected books. In these courses various books bearing on the subjects will be indicated and a criticism of the same given, together with practical questions that will make the reading of the books more profitable. The course for each year will be complete in itself. Members may pursue one or more of the studies recommended for any year. The lessons in these studies are marked in advance, for each week, and the amount of reading in each study clearly defined. About forty minutes each day will accomplish the reading. The members procure the books recommended and read the lessons at home. Those who may have other approved books on the studies than those recommended may use them. If there should be several persons in a place reading the course, they may meet together for mutual help and encouragement, and thus form a Local Reading Circle. A full course requires four years' study, but members may join for one year or longer. The term each year begins October 1 and ends July 1. Special or post-graduate courses will be prepared for those who complete the regular course. An annual fee of fifty cents shall be paid by each member. This fee is required to meet the necessary expenses incidental to the work, viz.: printing, postage, etc., and shall be remitted to the General Secretary with the application. Applications may be sent in at any time.

Smithsonian Institution.

THE Smithsonian Institution, at Washington, D. C., is the gift to the people of the United States of James Smithson, of England, who, in dying in 1829, left under certain conditions a bequest of \$541,379 for the establishment of an institution "for the increase and diffusion of knowledge among men." The original amount has since been increased by other bequests and means to about \$900,000. The government is invested by act of Congress in a Board of Regents, composed of the Vice-President and Chief Justice of the United States, three Senators appointed by the Vice-President, three Representatives appointed by the Speaker of the House of Representatives, and six citizens chosen by Congress. The presiding officer, *ex-officio*, is the President of the United States. The National Museum is under charge of the Smithsonian Institution. The Institution has published many important contributions to scientific knowledge.

American Society for the Prevention of Cruelty to Animals.

THIS society was incorporated in 1866, and is the parent society in America. The headquarters are at No. 10 East Twenty-second street, New York, for the purpose indicated in the title, and are open day and night and also on Sunday. Ambulances for the removal of disabled animals are provided. The organization is supported by voluntary contributions. The officers are: *President*, John P. Haines; *Secretary*, George G. DeWitt. Applications and complaints should be made to the President, at the above address. The arrests and prosecutions in 1893 were 980; complaints received and investigated, 7,599; animals disabled, 1,347; past recovery humanely destroyed, 8,178; disabled animals temporarily suspended from work, 3,779.

Harvard-Yale Debates.

THE following is the record of these inter-collegiate contests from their beginning:

1. AT CAMBRIDGE, January 14, 1892.—Subject: "Resolved, That a young man casting his first ballot in 1892 should vote for the nominees of the Democratic party."
Affirmative.—Yale: W. P. Alken, W. E. Thoms, R. D. Upton, debaters.
Negative.—Harvard: G. P. Costigan, A. P. Stone, R. C. Surbridge, debaters.
 No judges.
2. AT NEW HAVEN, March 25, 1892.—Subject: "Resolved, That immigration to the United States be unrestricted."
Affirmative.—Harvard: J. S. Brown, F. W. Dallinger, E. H. Warren, debaters.
Negative.—Yale: J. J. Ingersoll, T. Mullally, W. A. McQuaid, debaters.
 No judges.
3. AT CAMBRIDGE, January 18, 1893.—Subject: "Resolved, That the power of railroad corporations should be further limited by National legislation."
Affirmative.—Yale: H. S. Cummings, F. E. Donnelly, E. R. Lamson, debaters.
Negative.—Harvard: A. P. Stone, E. H. Warren, Carl Vrooman, debaters.
 The judges decided in favor of Harvard.
4. AT NEW HAVEN, May 2, 1893.—Subject: "Resolved, That the time has now arrived when the policy of protection should be abandoned by the United States."
Affirmative.—Yale: H. E. Buttrick, G. L. Gillespie, R. H. Tyner, debaters.
Negative.—Harvard: F. W. Dallinger, H. C. Lukin, F. C. McLaughlin, debaters.
 The judges decided in favor of Harvard.
5. AT CAMBRIDGE, January 19, 1894.—Subject: "Resolved, That independent action in politics is preferable to party allegiance."
Affirmative.—Yale: W. H. Clark, W. H. Cox, J. W. Peddie, debaters.
Negative.—Harvard: A. E. Apsey, A. S. Hayes, H. L. Prescott, debaters.
 The judges (Professor E. J. James, of the University of Pennsylvania; Carl Schurz, of New York, and General Francis A. Walker, President of the Massachusetts Institute of Technology) decided in favor of Harvard.
6. AT NEW HAVEN, April 27, 1894.—Subject: "Resolved, That members of the Cabinet should be made full members of the House of Representatives."
Affirmative.—Yale: G. H. Baum, H. E. Buttrick, H. H. Kellogg, debaters.
Negative.—Harvard: W. P. Douglas, W. E. Hutton, C. A. Duinway, debaters.
 The judges (Rev. Dr. W. S. Rainsford, of New York; Governor D. Russell Brown, of Rhode Island, and Brander Matthews, of Columbia College) decided in favor of Harvard.
 The decisions of the judges are based, of course, on the merits of the debaters, as speakers in presenting their cases.

State Flowers.

The following are "State Flowers," as adopted by the votes of the public school scholars of the respective States:

Alabama.....	Golden Rod	Minnesota.....	Cyripodium or Moccasin
Colorado.....	Columbine	New York.....	Rose
Idaho.....	Syringia	North Dakota.....	Wild Rose
Maine.....	Golden Rod	Utah.....	Sego Lily

In other States the scholars have not yet taken action. In New Jersey agitation in favor of the White Clover and in Vermont of the Red Clover is now going on.

The Peabody Education Fund.

IN 1867 George Peabody established a fund of \$2,100,000, increased in 1869 to \$3,500,000, to be devoted to education in the Southern States of the Union. The fund was placed in the charge and control of 15 trustees, of which the Hon. Robert C. Winthrop, of Massachusetts, was the chairman. Mr. Peabody died in London in 1869. The trustees hold meetings annually, usually in New York. They fill vacancies caused by death or resignation themselves. But two of the original trustees survive—Mr. Winthrop and ex-Senator Everts. The present trustees are: Robert C. Winthrop, who is President of the board; William M. Everts, Joseph H. Choate, J. Pierpont Morgan, and President Grover Cleveland, of New York; William C. Endicott and Samuel A. Green, of Massachusetts; Chief Justice Melville A. Fuller; Bishop H. B. Whipple, of Minnesota; William Wirt Henry, of Virginia; ex-Mayor William A. Courtenay, of South Carolina; Jabez L. M. Curry, of Virginia; Henderson M. Somerville, of Alabama; President D. C. Gilman, of Johns Hopkins University; George Peabody Wetmore, of Rhode Island, and Charles E. Fenner, of Louisiana. Dr. Curry is general agent of the fund, with headquarters at Washington, D. C., and has charge of the distribution of the fund in the several Southern States. In its earlier history, the chief aim of the fund was to encourage and secure the establishment of public school systems for the free education of all children. That having been accomplished, the income of the fund is now used for the training of teachers through Normal Schools and Teachers' Institutes.

The John F. Slater Fund.

IN 1882 Mr. John F. Slater, of Connecticut, placed in the hands of trustees the sum of \$1,000,000, for the purpose of "uplifting the lately emancipated population of the Southern States and their posterity." For this patriotic and munificent gift the thanks of Congress were voted, and a medal was presented. Neither principal nor income is expended for land or buildings. Education in industries and the preparation of teachers are promoted in institutions believed to be on a permanent basis. The board consists of D. C. Gilman, of Johns Hopkins University, as President; Chief Justice Fuller, as Vice-President; Morris K. Jesup, as Treasurer; J. L. M. Curry, as Secretary and General Manager, and Bishops Potter, Capers, and Galloway, Dr. John A. Broadus, and Messrs. William E. Dodge, William A. Slater, John A. Stewart, and Governor Northen, of Georgia. The fund is a potential agency in working out the problem of the education of the negro, and half a million of dollars has already been expended.

The Gaelic Society.

OFFICERS.

President, C. T. McCrystal; *Treasurer*, Patrick Reynolds; *Secretary*, William J. Balfe. *Secretary's* address, No. 117 East Twenty-eighth Street, New York. The Gaelic Society was founded in 1879 to promote the study and extend acquaintance with the Gaelic language and history.

The Irish National Federation of America.

President, Dr. Thomas Addis Emmet; *Secretary*, Joseph P. Ryan; *Treasurer*, Eugene Kelly. Founded in New York in 1891 by the Irish National Party, of which Justin McCarthy is leader. Headquarters, Room 26, Cooper Union.

THE Irish Independent Party, which supports the Parnellites under the leadership of Mr. John E. Redmond, has its headquarters at the southwest corner of Seventh Avenue and West Forty-second Street, New York. The officers are: *President*, Edward O'Flaherty; *Treasurer*, John Brenner; *Secretary*, Henry S. Bannon.

The Huguenot Society of America.

THIS society was organized April 12, 1883, and has its office in New York, at No. 105 East Twenty-second Street. *Henry G. Marquand is President*, Henry M. Lester *Treasurer*, and Lea McVaine Luquer *Secretary*. Descent from Huguenot ancestors is the qualification necessary for membership.

THE Huguenot Patriotic, Historical, and Monumental Society of New York was incorporated March 22, 1894, to record the virtues and to perpetuate the memory of the Huguenot patentees of New Paltz, and of the early settlers upon the New Paltz Patent, by erecting and maintaining a suitable monument to the patentees at New Paltz village. The Trustees are Louis Bevier, General George H. Sharpe, Judge A. T. Clearwater, Frank Hasbrouck, Irving Etting, Jacob M. Hasbrouck, Edmund Etting, Jesse Etting, Ralph Lefever, Jacob Lefever, Solomon Du Bois, Dr. Abraham Deyo, Joseph E. Hasbrouck, Abraham D. Broadhead, and Jonathan Deyo.

The Scotch-Irish Society of America.

OFFICERS.

President, Robert Bonner, New York City; *Vice-President-General*, Rev. J. S. MacIntosh, D. D., Philadelphia, Pa.; *First Vice-President-at-Large*, Colonel T. T. Wright, Nashville, Tenn.; *Second Vice-President-at-Large*, Dr. J. H. Bryson, Huntsville, Ala.; *Secretary*, A. C. Floyd, Chattanooga, Tenn.; *Treasurer*, John McIlhenny, Philadelphia, Pa. There are also vice-presidents for the States and Territories represented in the society, Rev. Dr. John Hall representing New York, Colonel A. K. McClure, Pennsylvania, and Bishop Hugh Miller Thompson, Mississippi.

This society was organized in May, 1889, when the first Scotch-Irish Congress was held at Columbia, Tenn. It is composed of the people of Scotch-Irish descent, residents of the United States and Canada. Its purpose is declared to be "the preservation of Scotch-Irish history and associations, the increase and diffusion of knowledge regarding the Scotch-Irish people, the keeping alive of the characteristic qualities and sentiments of the race, the promotion of intelligent patriotism, and the development of social intercourse and fraternal feeling." State societies are being formed, and the growth of the organization is expected to be large, as the race is widely extended over the Union, and particularly in the middle South, where such men as Andrew Jackson, John C. Calhoun, and Sam Houston were its types.

The second congress of the society was held at Pittsburgh, Pa., May 29-June 1, 1890; the third at Louisville, Ky., May 12-15, 1891; the fourth at Atlanta, Ga., April 28-May 1, 1892; the fifth at Springfield, Ohio, May 11-14, 1893; the sixth at Des Moines, Ia., June 7, 1894. The society publishes a series of annual volumes styled "The Scotch-Irish in America," which is the only distinctive history of the Scotch-Irish race.

The National Cymrodorion Society.

Presbyterian League of New York.

The League was organized by ministers and laymen in sympathy with Rev. Dr. Charles A. Briggs and Prof. Henry Preserved Smith, in May, 1894. Its object is declared to be "the promotion of constitutional liberty, truth, and progress within the Presbyterian Church. It aims to bring about, sooner or later, the reversal of the burdensome and unjust ecclesiastical action recently taken by courts of the Presbyterian Church, and the adoption by the Church of needed amendments to the Book of Discipline, according to the mode constitutionally provided for amendments." The Executive Committee of the League is composed of the following members: Rev. Dr. Anson P. Atterbury, Prof. Francis Brown, John Crosby Brown, Prof. F. M. Burdick, of Columbia College; William E. Dodge, Rev. Dr. J. H. Hoadley, Henry M. Humphrey, Rev. Dr. L. Laupman, of Newark, N. J.; Rev. W. M. Martin, T. B. Meigs, Rev. Dr. Thomas A. Nelson, of Brooklyn; Rev. D. John Balcom Shaw, J. E. Ware, Rev. George S. Webster and William A. Wheelock.

Universalist General Convention.

The Universalist General Convention has jurisdiction over the ecclesiastical organizations of the Universalist Church in the United States and Canadian provinces. It meets biennially, the next meeting being ordered for October 23, 1895, at the city of Meriden, Conn. The Convention is composed of the presidents and secretaries of the State conventions, and of clerical and lay delegates from the State conventions. All laws relating to fellowship, ordination, and discipline originate in the General Convention, and it is the final court of appeal in all cases of dispute or difficulty between State conventions. The officers of the Convention are: *President*, Hon. Henry B. Metcalf, Pawtucket, R. I.; *Vice-President*, Hon. Charles H. Russell, Brooklyn, N. Y.; *Secretary*, Rev. G. L. Demarest, D. D., Manchester, N. H.; *Treasurer*, Frank W. Wise, Boston, Mass.; *Trustees*, John D. W. Joy, Chairman, Boston, Mass.; Rev. E. H. Capen, D. D., Tufts College, Mass.; Rev. Henry W. Rugg, D. American Unitarian Association.

This association was organized in Boston, Mass., May 25, 1825, and incorporated in 1847. Its objects, as defined in the report of the Committee on Organization, are as follows:

1. To collect and diffuse information respecting the state of Unitarian Christianity in our country.
2. To produce union, sympathy, and co-operation among liberal Christians.
3. To publish and distribute books and tracts, inculcating correct views of religion, in such form and at such price as shall afford all an opportunity of being acquainted with Christian truth.
4. To supply missionaries, especially in such parts of our country as are destitute of a stated ministry.
5. To adopt whatever other measures may hereafter seem expedient—such as contributions in behalf of clergymen with insufficient salaries, or in aid of building churches.

OFFICERS.

The Baptist Congress.

FOR THE DISCUSSION OF CURRENT QUESTIONS.

The Congress is composed of delegates, both clerical and lay, from Baptist churches throughout the country. It possesses no governing power, but is convened annually for interchange of thought and discussion of subjects incident to the welfare of the denomination and of humanity in relation to Christianity at large. The last Congress was held at Detroit, Mich., Nov. 13-15, 1894. The officers are: *President*, Rev. H. M. Sanders, D. D.; *Corresponding Secretary*, Walter Rauschenbusch, New York City.

Baptist Young People's Union of America.

The third annual convention of this organization was held at Toronto, Canada, in July, 1894. Six thousand registered and about 2,000 unregistered delegates attended, representing young people's societies connected with Baptist churches in all the States and Canada. The following national officers were elected: *President*, John H. Chapman, of Chicago; *First Vice-President*, Frank Harvey Field, of New York; *Second Vice-President*, J. N. Shenstone, of Toronto, Canada; *Third Vice-President*, Rev. George Braxton Taylor, of Macon, Ga.; *Recording Secretary*, A. M. Brinkle, of Pennsylvania; *Treasurer*, Frank Moody, of Milwaukee, Wis.

American Bible Society.

The American Bible Society was founded in 1816. It is a charitable institution, whose sole object is to encourage a wider circulation of the Scriptures without note or comment. It invites the contribution and coöperation of "all who accept the Bible as their rule of life and believe that every human being is entitled to know what it teaches concerning truth and duty." The President is the Hon. Enoch L. Fancher, of New York, and there are twenty-seven vice-presidents, headed by the Hon. Robert C. Winthrop, of Massachusetts, the others being: James M. Hoyt, Ohio; Hon. J. L. Chamberlain, Maine; General O. O. Howard, N. Y.; Hon. William Strong, Pa.; Hon. George G. Wright, Iowa; Cortlandt Parker, N. J.; Hon. Frank M. Cockrell, Mo.; Hon. John W. Foster, Ind.; T. A. Brouwer, N. Y.; Cyrus Northrop, Minn.; James H. Carlisle, S. C.; Edward Spaulding, N. H.; Hon. Howard Van Epps, Ga.; Thomas B. Carter, Ill.; James H. Taft, N. Y.; Augustus Taber, N. Y.; Annis Merrill, Cal.; Hon. W. P. Dillingham, Vt.; Hon. E. E. Beard, Tenn.; Hon. David J. Brewer, D. C.; Merrill E. Gates, LL. D., Mass.; Hon. William J. Northen, Ga.; Hon. Edward H. East, Tenn.; William A. Robinson, Esq., Ky.; Elbert A. Brinckerhoff, Esq., N. J.; John Noble Stearns, Esq., N. Y. There are thirty-six managers, divided into four classes as to terms of office. The Secretaries are: Rev. E. W. Gilman, D. D., Rev. Alexander McLean, D. D., and Rev. Albert S. Hunt, D. D. The Treasurer is William Folke and General Agent, Caleb T. Rowe. The issues for the year 1893-94 were 1,447,659 copies, and for the seventy-eight years of the existence of the society 58,374,430 copies. This includes Bibles in many foreign tongues, and the languages of several American Indian tribes. (The British and Foreign Bible Society, established in 1804, has issued and distributed to date 139,559,008 copies.) The offices of the American Bible Society are at the Bible House, Eighth and Ninth Streets and Third and Fourth Avenues, New York.

American Board of Commissioners for Foreign Missions.

The head office of the American Board of Commissioners for Foreign Missions is at the Congressional House, Beacon Street, Boston, Mass. There are two district offices, at No. 121 Bible House, Fourth Avenue, New York City, Rev. C. C. Creegan, D. D., District Secretary, and at 151 Washington Street, Chicago, Ill. The following is a list of the officers of the Board elected at the last annual meeting: *President*, Richard S. Storrs, D. D., LL. D., Brooklyn, N. Y.; *Vice-President*, Eliphalet W. Blatchford, of Chicago; *Prudential Committee*, E. W. Webb, D. D., Charles C. Burr, Rev. Nehemiah Boynton, D. D., Albert H. Plumb, D. D., William P. Ellison, G. Henry Whitcomb, Elijah Horr, D. D., Col. C. A. Hopkins, Rev. William W. Jordan, James G. Vose, D. D., J. M. W. Hall, Henry D. Hyde; *Corresponding Secretaries*, Nathaniel G. Clark, D. D., Charles H. Daniels, D. D., Judson Smith, D. D.; *Recording Secretary*, Henry A. Stimson, D. D.; *Assistant Recording Secretary*, Edward N. Packard, D. D.; *Treasurer*, Langdon S. Ward; *Auditors*, Samuel Johnson, R. H. Stearns, E. H. Baker.

The American Board, which is the oldest foreign missionary society in the United States, was organized June 29, 1810. During the past 83 years of its history it has sent out over 2,000 missionaries, of whom 557 are now in service. Into the nearly 500 churches which have been organized by these missionaries there have been received about 130,000 members. The total receipts from the beginning have been about \$27,000,000.

The mission fields now occupied by the Board are: Mexico; the Hawaiian and Micronesian Islands; Japan; North China; Shansi, in Northwestern China; Foo Chow and Hong Kong, in Southern China; Ceylon; Madura, in Southern India; the Marathi field of Western India; East Central Africa; Southern Africa; West Central Africa; Eastern Turkey; Central Turkey; Western Turkey; European Turkey; Austria, and Spain.

The present statistics are: 20 missions; 1,223 stations and out-stations; 1,323 places for stated preaching, with average congregations of 69,357; 442 churches, with 41,566 members, of whom 3,570 were added during the last year; 145 higher schools, with 7,090 pupils; 1,019 common schools, with 40,615 pupils; total under instruction, 48,585; missionaries and assistant missionaries, 557; native pastors, preachers, teachers, and other native assistants, 2,738; total missionary force, 3,295.

Young People's Society of Christian Endeavor.

THE following statistics and statement of the purposes of the organization were prepared for THE WORLD ALMANAC by Mr. John Willis Baer, General Secretary of the United Society of Christian Endeavor:

OFFICERS OF THE UNITED SOCIETY OF CHRISTIAN ENDEAVOR.—Office, No. 646 Washington Street, Boston, Mass. *President*, Rev. Francis E. Clark, D. D.; *Treasurer*, Wm. Shaw; *General Secretary*, John Willis Baer.

The first Society of Christian Endeavor was formed February 2, 1851, in the Williston Church, Portland, Me., by Rev. F. E. Clark, pastor, for the purpose of training a large number of converts for the duties of church membership.

Each society is in some local church, and in no sense outside. It exists simply to make the young people loyal and efficient members of the Church of Christ. It is the Church training the young. Its motto is, "For Christ and the Church." September 15, 1893, there were 27,841 societies, with a membership of 1,650,000, chiefly in the United States and Canada, and in Australia, Great Britain, and in all missionary lands. It is found in about the same proportions in all the great evangelical denominations and in all their subdivisions. Wherever it has been established longest it is most fully endorsed by pastors and churches.

Its essential features are the prayer-meeting pledge, honestly interpreted, the lookout, prayer-meeting, and social committees, and the consecration meeting. Other committees are optional, and the constitution is entirely flexible in other points according to the needs of the local church.

The United Society is simply the bureau of information for all the societies. It prints the literature, supports one general secretary, and is the general headquarters of the work. It levies no taxes, however, and assumes no authority, but every society manages its own affairs in its own way. It is supported by the sales of its literature, badges, etc. It is managed by a board of trustees, representing the great evangelical denominations, the President being Francis E. Clark, D. D., the founder of the society; General Secretary, John Willis Baer; Treasurer, William Shaw; Trustees: Rev. C. A. Dickinson, Boston, Mass.; Rev. J. L. Hill, D. D., Medford, Mass.; Rev. R. W. Brokaw, Springfield, Mass.; Rev. H. E. Crose, Chicago, Ill.; Rev. N. Boynton, Boston, Mass.; W. H. Pennell, Boston, Mass.; W. J. Van Patten, Burlington, Vt.; John Henry Barrows, D. D., Chicago, Ill.; Wayland Hoyt, D. D., Minneapolis, Minn.; John Wanamaker, Philadelphia, Pa.; T. S. Hamlin, D. D., Washington, D. C.; P. S. Henson, D. D., Chicago, Ill.; H. C. Farrar, D. D., Albany, N. Y.; J. T. Beckley, D. D., Philadelphia, Pa.; W. H. McMillan, D. D., Allegheny, Pa.; Bishop Samuel Fallows, D. D., Chicago, Ill.; Rev. W. J. Darby, Evansville, Ind.; M. Rhodes, D. D., St. Louis, Mo.; Rev. W. W. Andrews, Sackville, New Brunswick; Gilby C. Kelly, D. D., Louisville, Ky.; President William R. Harper, Chicago, Ill.; David J. Burrill, D. D., New York City; Rev. J. Z. Tyler, Cincinnati, Ohio; Rev. William Patterson, Toronto, Canada; Rev. J. F. Cowan, Pittsburgh, Pa.; Rev. J. M. Lowden, Boston, Mass.; Rev. M. M. Binford, Richmond, Ind.; James L. Howe, Louisville, Ky.; Rev. Canon J. B. Richardson, London, Ont.; Rev. E. R. Dille, D. D., San Francisco, Cal.; and Rev. Rufus W. Miller, Hummelstown, Pa.; Auditor, F. E. Kidder. The trustees meet quarterly to consult concerning the best interests of the society.

The following table shows the total number of societies composing the organization, by States or Territories and countries (October, 1894):

Pannel; *Membership Secretary*, Rev. F. W. Farr, 692 Eighth Avenue, New York City; *Treasurer*, Mr. W. H. Burnham, Kenwood, Madison County, N. Y.; Rev. John Salmon, of Toronto, represents the work in Canada; Rev. O. M. Brown in Ohio. There is a board of managers of nine persons, of which Rev. Dr. Simpson is chairman, and there are 100 vice-presidents, representing most of the States of the Union, Canada, Mexico, England, and Ireland. The principal office is at 692 Eighth Avenue, New York.

The Christian Alliance was organized in 1857, and is spreading rapidly through this country and Canada. Membership consists of all professing Christians who shall subscribe to the principles of the order and enroll their names. The objects of the Alliance are stated to be "Wide diffusion of the Gospel in its fulness, the promotion of a deeper and higher Christian life, and the work of evangelization, especially among the neglected classes, by highway missions and any other practicable methods."

Auxiliary to the Christian Alliance is the International Missionary Alliance, with a missionary training college at 690 Eighth Avenue, New York. It has a board of officers, with Rev. Dr. Wilson, New York, as chairman, and Rev. B. A. Simpson, 692 Eighth Avenue, as secretary. This organization has already established 225 missionaries in India, Congo Free State, China, Japan, and Havi, and is extending its work as financial assistance is rendered, and during the year 1893 over \$225,000 was contributed toward furthering the Gospel in heathen lands.

The total membership of these American associations is 232,653; they occupy 291 buildings of their own, valued at \$15,155,950, and have a total net property of \$15,211,039, including 638 libraries, containing 476,572 volumes. They employ 1,253 general secretaries and other paid officials, and expended last year for current expenses—local, State, and National—\$2,354,724.

Young Women's Christian Associations.

The work of the associations among women is fourfold: Physical—Systematic training in the gymnasium, health talks, holiday excursions, and outing clubs. Social—Receptions and socials in home-like rooms, musical and literary entertainments, helpful companionships, noon rest, lunch rooms, boarding clubs, employment bureaus. Intellectual—Libraries and reading-rooms, educational classes, lecture courses, concerts, library, musical, and art clubs. Spiritual—Bible training classes, evangelistic meetings, personal work, gospel meetings.

The International Association was formed in 1886. General office, 1301 Venetian Building, 34 Washington Street, Chicago, Ill. The International Committee of thirty-three members controls the work. The officers are: *Chairman*, Mrs. John Y. Farwell, Jr.; *Secretary*, Mrs. F. T. West; *Treasurer*, Mrs. L. W. Messer; *General Secretary*, Miss Effie K. Price; *Office Secretary*, Miss Carrie B. Wilson; *Assistant Office Secretary*, Miss Lulu Haight; *Evangel Secretary*, Miss Eva Seever.

The World's Y. W. C. A. was founded in 1893. General Office, 316 Regent Street, London. Miss Annie M. Reynolds, Secretary. Nineteen States have organized State associations. Each State holds an annual convention. The international convention occurs biennially. Each year two summer schools are held for the training of young women in Secretarial and Bible work. *The Evangel*, the official organ of the associations, is published monthly at Chicago, Ill. The second Thursday of October is observed as a day of prayer for young women. A special department is maintained for young women of colleges, and through this department the student volunteer movement is connected with the association work.

Woman's Christian Temperance Union.

OFFICERS OF THE NATIONAL WOMAN'S CHRISTIAN TEMPERANCE UNION. — *President*, Frances E. Willard, Evanston, Ill.; *Corresponding Secretary*, Mary A. Woodbridge, the W. C. T. U. Temple, Chicago, Ill.; *Recording Secretary*, Mrs. L. M. N. Stevens, Portland, Me.; *Treasurer*, Mrs. Helen M. Barker, the W. C. T. U. Temple, Chicago, Ill.

OFFICERS OF THE WORLD'S WOMAN'S CHRISTIAN TEMPERANCE UNION. — *President*, Frances E. Willard, Evanston, Ill.; *Vice-President-at-Large*, Lady Henry Somerset, London, England; *Secretary*, Mary A. Woodbridge, W. C. T. U. Temple, Chicago, Ill.; *Office Secretary*, Alice E. Briggs, Chicago, Ill.; *Assistant Secretary*, Anna A. Gordon, Evanston, Ill.; *Treasurer*, Ella F. M. Williams, Montreal, Canada.

Object: To unify throughout the world the work of women in temperance and social reform, and to circulate a petition addressed to all the governments of the world for the overthrow of the alcohol and opium trades. Methods: Preventive, Educational, Evangelistic, Social, and Legal. Time of Prayer: Noon tide. Badge: A Knot of White Ribbon. Watchwords: Agitate! Organize! Motto: For God and Home and Every Land.

The following statement of the purposes of the society was prepared for THE WORLD ALMANAC by the President, Frances E. Willard.

The National W. C. T. U. was organized in Cleveland, Ohio, in 1874, and is the sober second thought of the great woman's crusade. It is now regularly organized in the forty-four States of the Union, and in every Territory except Alaska. Its headquarters are in Chicago, Ill., where it has a Woman's Temperance Publishing House that sends out about 135,000,000 pages annually, and has seven editors and 150 employés. This publishing house is a stock company, and all its directors and stockholders are women, as is its business manager. The *Union Signal* is the organ of the society, and has an average circulation of 80,000. The cash receipts of the publishing house in 1891-92 were, in round numbers, \$230,000.

The Woman's Lecture Bureau sends speakers to all parts of the country and Canada. The Woman's National Temperance Hospital demonstrates the value of non-alcoholic medication. The Woman's Temperance Temple, costing over \$1,000,000, has been built in Chicago. The National Society handled over \$4,000,000 in 1891-92 at its headquarters in Chicago, and its local auxiliaries expended not less than half a million dollars in their work.

There are about 10,000 local unions, with a membership and following, including the children's societies, of about half a million. The W. C. T. U. has forty-four distinct departments of work, presided over by as many women experts, in the National Society, and in nearly every State. All the States in the Republic except six have laws requiring the study of scientific temperance in the public schools, and all these laws were secured by the W. C. T. U., also the laws forbidding the sale of tobacco to minors. Most industrial homes for girls were secured through the efforts of this society, as were the refuges for erring women. Laws raising the age of consent and providing for better protection for women and girls have been enacted by many legislatures through the influence of the department for the promotion of social purity, of which the president of the society has, until the present year, been superintendent.

The World's W. C. T. U. was founded through the influence of the National Society, in 1883, and already has auxiliaries in more than forty countries and provinces. The white ribbon is the badge of all the W. C. T. U. members, and is now a familiar emblem in every civilized country. A great petition is being circulated in all parts of the world against legalizing the sale of opium and alcoholics. When two millions of names have been secured, this petition is to be presented to all the governments of the world by a commission of women appointed for that purpose.

Ministering Children's League.

THIS organization was founded by the Countess of Meath; now has branches all over the world, and is rapidly growing in membership. Each national branch has a central secretary, to whom all the local branches report, but each local branch elects its own officers. These exist in almost every State of the Union.

The members of the Ministering Children's League are children, and associated with them are parents, Sunday-school teachers, and others whose privilege it is to watch over the welfare of children, and they join as "associate members." Children of all ages and denominations are eligible for membership, and are invited to join; it is especially wished that the older ones become members, because their example and influence will be of great value among younger brothers and sisters. The objects of the League are stated to be: "To promote kindness, unselfishness, and the habit of usefulness among children, and to create in their minds an earnest desire to help the needy and suffering; to aid the necessities of the poor by supplying them with warm clothing, comforts, etc." The rule of the League is: "Every member must try to do at least one kind deed every day." The motto of the League is: "No day without a deed to crown it." Beds in charitable institutions are being supported by "Ministering Children." A chapel for the Indians has been built through the exertions of one little band of members in New York. "It is difficult to estimate the good this League has done; but it has certainly made 'homes happier,' taught members to become better sons and daughters, kinder brothers and sisters, truer friends, and to be good to dumb beasts. And they are also trained to be useful and helpful in every practicable way."

The *Honorable Central Secretary* and head of the League is the Countess of Meath, 83 Lancaster Gate, London, W., England. The *Central Secretary of the United States* is Mrs. F. E. Benedict, 54 Lefterts Place, Brooklyn, N. Y., from whom membership cards, costing a nominal sum, can be had. Badges, which are in the form of a small Maltese cross, can be had of Mrs. E. G. Day, 27 West One Hundred and Twenty-eighth Street, or James Potts & Co., publishers, Fifth Avenue, New York. All necessary information regarding the forming of branches of this growing order can be obtained from Mrs. Benedict.

Door of Hope.

THE DOOR OF HOPE, for fallen girls, was founded in New York City by Mrs. E. M. Whittemore, October 25, 1890. It is located at 102 East Sixty-first Street, and has a branch at Tappan, N. Y. Both homes are free of debt. A Door of Hope Union has grown out of those beginnings, and there are now ten distinct Door of Hope homes in different States. This is strictly a faith work, and since its inception nearly \$40,000 has been received, says the founder, "through answer to prayer alone for its support."

The International Order of King's Daughters and Sons.

THE following information about this organization was corrected for THE WORLD ALMANAC by the Corresponding Secretary, Mrs. Isabella Charles Davis.

OFFICERS OF THE CENTRAL COUNCIL.—Office, No. 158 West Twenty-third Street, New York City. *President*, Mrs. F. Bottoime; *Vice-President*, Miss Kate Bond; *General Secretary*, Mrs. Mary Lowe Dickinson; *Treasurer*, Miss Margaret P. Barker; *Recording Secretary*, Mrs. Robert Sturgis; *Corresponding Secretary*, Mrs. Isabella Charles Davis.

The Order of the King's Daughters and Sons is a religious order of service, composed of thousands of small circles of men, women, and children united in one great organization that numbers now over three hundred thousand members. It is a religious inter-denominational order, and its members may be found in all churches and in almost all nations. It was founded by ten women in New York City, and has spread over nearly every State in the Union, and has its representatives in Canada, England, Ireland, Scotland, France, Italy, Germany, India, China, Japan, Turkey in Europe, and in Asia, Australia, New Zealand, and other countries. Its members are bound individually and collectively to serve the needy and the suffering, to consider the poor, and to be helpful in good work. Each individual circle may choose its own field of labor, but cannot escape the obligations of service.

The badge is a small cross of silver, bearing the letters I. H. N. on one side and the date 1886 on the other, often worn with a knot of purple ribbon. The order is an incorporated society, of which this little cross is the seal. Its headquarters are at No. 158 West Twenty-third Street, New York City. State secretaries are appointed in twenty-five States and the District of Columbia, and there are six provincial secretaries in the various provinces in Canada.

Its original circle of ten women, to which have been made some additions, forms now the Central Council of the Order. The general officers are members of this Council. The first meeting of this original circle was held in New York City on January 13, 1886. It is now nine years old, and it ranks among the strongest and most useful societies of the world. It issues a monthly magazine called *The Silver Cross*, which is most helpful to the members of the Order, and takes a high rank among the religious and philanthropic periodicals of the country. Its work in aid of every charitable object is effective and increasing. Any information concerning the Order may always be secured by writing or calling at the headquarters, 158 West Twenty-third Street, New York City.

The Daughters of the King.

The Order of the Daughters of the King was organized on Easter Evening, 1885. It is desired by its promoters that a careful distinction shall be made between the Daughters of the King and the King's Daughters. This is the older society, and differs from the King's Daughters in many important particulars. In the first place, it is more of an order than a society, and is distinctively Episcopal. Its work is definite, and is, "for the spread of Christ's kingdom among young women," and the "active support of the rector's plans in the parish in which the particular chapter may be located." Its badge is a cross of silver, a Greek cross fleury, and its mottoes are "Magnanimiter Crucem Sustine" and "For His Sake." Its colors are white and blue—white, the old royal color of Israel, and blue, the color of the Virgin Mary, the "blessed daughter of Israel's King, the Mother of the King of Kings." Its constitution is framed, as far as is possible, in the terms of that of the Brotherhood of St. Andrew, the work of the two organizations being similar.

The officers of the Council are: *President*, Mrs. E. A. Bradley; *Vice-President*, Mrs. E. J. Warner; *Secretary*, Miss Elizabeth L. Ryerson, 520 East Eighty-seventh Street, New York; *Treasurer*, Mrs. John H. Kahrs.

The Brotherhood of St. Andrew.

THE following was prepared for THE WORLD ALMANAC by Mr. John W. Wood, General Secretary: The Brotherhood of St. Andrew is an organization of men in the Protestant Episcopal Church. Its sole object is the spread of Christ's kingdom among men. It works under two rules, known as (1) The Rule of Prayer: To pray daily for the spread of Christ's kingdom among men, and that Christ's blessing may be upon the labors of the Brotherhood, and (2) The Rule of Service: To make an earnest effort each week to bring at least one man within the hearing of the Gospel of Jesus Christ.

The Brotherhood started in St. James' Church, Chicago, on St. Andrew's Day, 1883. It takes its name from the Apostle, who when he had found the Messiah first found his own brother Simon, and brought him to Jesus. This Brotherhood in St. James' parish was started simply as a parochial organization, with no thought of its extending beyond the limits of the parish. Its work, however, was so successful in bringing men to church, that attention was called to it, and other Brotherhoods, having the same objects and the same rules, were formed in other parishes in Chicago and in different parts of the country. In 1886 there were about thirty-five of these separate Brotherhoods. It then was proposed to form them into one general church organization. This was done in 1886. Since that time the Brotherhood has gone on growing, and at present has spread to all parts of the United States. There are now ten hundred and thirty-six active chapters, with a membership of about twelve thousand men. The Brotherhood idea has also taken root in Canada, and the Brotherhood of St. Andrew in the Church of England in the Dominion of Canada has been formed, with one hundred and fifty chapters and eighteen hundred men. A similar organization has been formed in the Scottish Episcopal Church. Twenty-five chapters have also been formed in Australia, and have been organized into a Brotherhood of St. Andrew in the Church of England in Australia.

The officers for 1894-95 are: *President*, James L. Houghteling, 163 Dearborn Street, Chicago; *General Secretary*, John W. Wood, 281 Fourth Avenue, New York; *Treasurer*, John P. Faure, 281 Fourth Avenue, New York; *Editor of St. Andrew's Cross*, John W. Wood, 281 Fourth Avenue. The General Secretary will furnish information and documents to any one who may be interested in the work.

Society of St. Vincent de Paul.

THIS great Roman Catholic organization is engaged in the important work of caring for the Roman Catholic poor in the large cities of the United States. Its head is the superior council of the New York Circumscription, which has its office at No. 2 Lafayette Place. Local bodies, over which it has, in nearly all cases, jurisdiction, are known as Particular Councils.

The officers of the Superior Council are as follows: *Spiritual Director*, The Very Rev. Monsignor John M. Farley, V. G.; *President*, Jeremiah Fitzpatrick; *Vice-Presidents*, Joseph A. Kernan and James E. Dougherty; *Secretary*, Thomas M. Mulry; *Treasurer*, Philip H. Shelley. There are also seventeen councillors. The principal work of the Particular Councils consists in visiting the poor and relieving them, procuring situations for deserving persons out of employment, and promoting attendance on the Sunday-schools of the Church. There are fifty-seven conferences in the city of New York.

White Cross Society.

THE principal purposes of this organization are: (1) To urge upon men the obligation of personal purity; (2) to raise the tone of public opinion upon the subject of morality; (3) to secure proper legislation in connection with morality.

The White Cross movement was begun February 14, 1883, at Bishop-Auckland, England, by the Bishop of Durham, Miss Ellice Hopkins being present and bearing a prominent part. The work was taken up in this country by the young men of the Church of St. John the Evangelist, New York City, during the winter of 1883-84. It has now spread throughout the United States.

The methods of the White Cross are of a varied character. First, it seeks to promote the objects "By the full presentation of those spiritual truths which form distinguishing characteristics of Christianity, and demonstrate its unalterable hostility to every form of impurity." The methods do not favor so much the creation of new machinery as they seek to utilize that already existing. The platform of the White Cross is as follows:

"The member promises by the 'help of God' (1) to treat all women with respect, and endeavor to protect them from wrong and degradation; (2) to endeavor to put down all indecent language and coarse jests; (3) to maintain the law of purity as equally binding upon men and women; (4) to endeavor to spread these principles among my companions, and to try and help my younger brothers; (5) to use every possible means to fulfil the command, 'Keep THYSELF pure,'"

The officers are: *President*, Rev. B. F. Da Costa, D. D., New York; *Secretary*, Willoughby R. Smith, 224 Waverley Place, New York. The Central White Cross Committee is composed of the Protestant Episcopal Bishops of Chicago, New York, Minnesota, Central New York, and Pittsburgh, Rev. Drs. Morgan Dix, J. H. Eccleston, G. S. Converse, and D. Parker Morgan, with W. H. Arnoux and E. P. Dutton, of New York. The Secretary is Rev. Dr. Da Costa, and the Treasurer, E. P. Dutton.

National Christian League for the Promotion of Social Purity.

THIS association was organized in 1886. Its headquarters are at 33 East Twenty-second Street, New York. Its objects are: To elevate opinion respecting the nature and claims of morality, with its equal obligation upon men and women; to secure a proper, practical recognition of its precepts on the part of the individual, the family, and the nation, and to enlist and organize the efforts of Christians in protective, educational, reformatory, and legislative work in the interest of social purity. It aims to supply employment, funds, and advice to enable needy girls and women to gain an honorable living. It forms clubs and societies of the young for their training in wholesome and honest intelligence regarding social purity. It endeavors to instill the principles necessary for the prevention of immorality upon the minds of young children and youth. It seeks to protect young girls from all forms of temptation, and to prosecute those who deceive them. Its officers are as follows: *President*, E. B. Grannis; *Vice-Presidents*, Mrs. M. P. Buchanan, Rev. Henry Y. Satterlee, D. D., Mrs. Orson Taylor, Frank Moss, Mrs. Asa Hull, Rev. Abram H. Lewis, D. D., and Mrs. M. F. Scripture; *Corresponding Secretary*, Mme. Amelle R. Van Norman; *Recording Secretary*, Mrs. E. M. Hudders; *Treasurer*, Dr. Nancy M. Miller.

American Institute of Christian Philosophy.

THIS association was organized in 1881 by Charles F. Deems, D. D., Amory H. Bradford, D. D., and William O. McDowell to cultivate the study of the relation between science and religion, and especially to produce and circulate literature antagonizing agnosticism, materialism, and every other form of false philosophy. A successful summer school was held at Chautauqua last year at which twelve addresses were delivered by representative men on "The Reunion of Christendom." Its total membership is nearly 600. The expenses are borne by the Endowment Fund and annual membership fees. Its officers are: *President*, Amory H. Bradford, D. D., Montclair, N. J.; *Vice-Presidents* for New York, Bishop Henry C. Potter, New York, and Bishop John H. Vincent, Chautauqua, N. Y.; *Treasurer*, W. Harmon Brown, 45 Exchange Place, New York; *Secretary*, Charles M. Davis, Bayonne, N. J.; *Corresponding Secretary*, Rev. John B. Devins, Hope Chapel, 339 East Fourth Street, New York. Its Vice-Presidents represent fifty states, Territories, and countries in which members live.

American Society of Comparative Religion.

THIS society was organized at the University of the City of New York, May 9, 1890, and is an outgrowth of a course of lectures on Comparative Religion in that institution. The design of the society is, primarily, to furnish to its members a helpful agency, whereby the study, begun at the University, may be advantageously continued and expanded; and, secondarily, to awaken an interest in the subject among Christian thinkers and to exhibit its character, scope, and importance; also to secure such accurate information regarding the origin, development, and character of the religions of the world, especially of those now existing, as may qualify its members to fairly estimate and effectively oppose the endeavors of the adversaries of Christianity to exalt the non-Christian systems, to the disadvantage of the Christian faith and the disparagement of Christian enterprise.

The members of the society are the professor, graduates, and students in the Department of Comparative Religion in the University of the City of New York; also such other persons as the Executive Committee may from time to time elect, upon the nomination and second of members of the society. The President of the Council, the Chancellor and the Vice-Chancellor of the University of the City of New York are members *ex officio*. Honorary and corresponding members may be elected from specialists in this department of study. The officers are as follows: *President*, Rev. F. F. Ellinwood, D. D.; *Vice-Presidents*—Congregational, Rev. Howard S. Bliss; Episcopal, Rev. H. H. Sleeper, Ph. D.; Methodist Episcopal, Rev. William H. Lawrence, Ph. D., D. D.; Presbyterian, Rev. J. J. Lampe, Ph. D., D. D.; Reformed, Rev. J. W. Brooks, Ph. D.; *Secretary*, Rev. A. H. McKinney, Ph. D., New York City; *Corresponding Secretary and Treasurer*, Rev. C. R. Blauvelt, Ph. D., Nyack, N. Y. Total membership, 106. Annual dues, \$1. The next annual meeting will be held in May, 1895.

The Congregational National Council

is composed of representatives of churches of the Congregational denomination and was organized November 17, 1871. It meets once in three years, and the next triennial meeting will be held at San Francisco in the current year. The officers are: *President*, Rev. A. H. Quint, of Massachusetts; *Secretary*, Rev. H. A. Hazen, D. D., of Massachusetts; *Treasurer*, Rev. S. B. Forbes, of Connecticut; *Registrar*, Rev. W. H. Moore, of Connecticut.

The Salvation Army.

This is a body of men and women organized in the form of a military force, its object being the evangelization of the unchurched masses. It has its International Headquarters at 101 Queen Victoria street, London, E. C., England, and the headquarters for the United States at 120 West Fourteenth street, New York City. Its officers are: General, chief-of-staff, commissioner, colonel, brigadier, major, staff captain, adjutant, ensign, captain, and lieutenant.

The Salvation Army, known originally as the Christian Mission, was created at Mile End, London, July 5, 1865, by the Rev. William Booth, a minister of the "Methodist New Connection." The present name was adopted in 1878. At first treated with a good deal of derision and occasionally with violence from the classes among which it worked, its earnestness and remarkable achievements have gradually won the respect and encouragement of many of the most prominent divines and laymen of the evangelical denominations.

At the present time there are 11,036 officers, composed of men and women whose lives are entirely given to the work; 4,253 corps or societies operating in thirty-eight countries and colonies in thirty-four languages. There are some 2,008,631 meetings held annually out doors and in. The number of periodicals printed or published is forty-four, with a combined circulation of over a million. The annual rental bill is over \$1,000,000. The amount of property owned by this organization now exceeds \$4,000,000, and the annual income is \$3,645,000. The United States Division of the Salvation Army has to-day 2,000 officers, 602 corps or societies, 16 slum posts, 5 rescue homes, 3 food and shelter depots. They publish the *War Cry*, one edition in New York City and another on the Pacific coast, a Swedish and also German edition in New York City, with a combined circulation of ninety thousand.

William Booth is the general and commander-in-chief of the forces throughout the world. His headquarters are at London. The United States commander is Ballington Booth.

The following is a statement in detail of the distribution of the Salvation Army in the world:

Brotherhood of Philip and Andrew.

This new organization held its first federal convention in the city of New York in 1893. It is composed of members of ten evangelical religious denominations—the Reformed Church in America, the Reformed Church in the United States, the Congregational, Presbyterian, Methodist Episcopal, Methodist Protestant, Baptist, and others. Its objects are embodied in the statement that "Any man can belong to the Brotherhood who will promise to pray daily for the spread of the kingdom of Christ among young men, and to make an earnest effort each week to bring at least one young man within the hearing of the Gospel." The number of chapters of the Brotherhood in the United States is stated by the General Secretary, Mr. Wonder, to be 217 and the membership about 6,000, nearly double that of the preceding year. Rev. Dr. Rufus W. Miller is President of the Federal Council and Rev. Alfred E. Myers of the Local Council of New York and vicinity.

American Christian Convention.

The American Christian Convention is the representative body of a large number of Christians and churches, practically free; they might be called independent, but associated for Christian activities. Their association has caused them to be considered a denomination; and in a certain sense they are, for they are named, but in the ordinary sense they are not a denomination. The Convention represents over 100,000 Free Christians.

Their only rule of religious faith and practice, professedly and in fact, is the Bible. Their fellowship is determined by Christian character. They arose at the beginning of this century, in three different sections of the country, New England in the East, Kentucky and Southern Ohio in the West, and North Carolina and Virginia in the South, in each district being ignorant of the springing up of a people in any other locality teaching the same doctrines. In general tendencies and principles they seem to contemplate and secure a restoration of the Christianity and spirit of the early Church, as made known in the New Testament. They are interested in and render assistance to many collegiate institutions throughout the country.

The results of the general mission work cannot be stated in figures, but the following data will give some idea of the work accomplished for the four years ending October 14, 1890. The data of last general convention, held in Haverhill, Mass., October 9-15, 1894, was not obtainable at time of going to press.

Sermons preached, 12,172; pastoral calls, 25,630; meetings held, 16,162; converts in work, 3,210; members received, 2,398; baptisms performed, 1,005; churches organized, 40; Sunday-schools organized, 192.

Officers: *President*, Rev. Alvah H. Morrill, D. D., Haverhill, Mass.; *Secretary*, J. F. Burnett, Eaton, Ohio.

The above statement was prepared for THE WORLD ALMANAC by an officer of the Convention.

The Mormons.

HISTORY, TENETS, AND ORGANIZATION OF THE "CHURCH OF JESUS CHRIST OF LATTER-DAY SAINTS."

(Statement prepared for THE WORLD ALMANAC, and revised for the present issue by First President Wilford Woodruff.)

THE following statement prepared for a former issue of THE WORLD ALMANAC by the present head of the Church, at the invitation of the editor, has been revised by President Woodruff for this issue of the ALMANAC.

HISTORY.

Joseph Smith, the prophet and founder, under God, of the Church of Jesus Christ of Latter-Day Saints, was born December 23, 1805, at Sharon, Wind-sor County, Vermont.

While a youth, being under strong religious impressions, and not knowing which sect was right, he determined to go to the source of all knowledge and ask of God. While thus praying for wisdom, in 1820, at Manchester, Ontario County, New York, God, the Father, and his Son, Jesus Christ, appeared to him. The latter told him that all the sects were teaching incorrect doctrines; that he must follow none of them; that there was a great work for him to do, on which he should be further instructed, which he was by the ministration of angels on several occasions.

On September 22, 1827, some metal plates, engraved in Reformed Egyptian characters, and which had been hidden in the earth by divine direction for fourteen centuries, were given to him by an angel of the Lord, with the Urim and Thummim, by which he translated the engravings from the plates, and the record was published as the Book of Mormon, at Palmyra, New York, in 1830, being a history of God's dealings with the ancient inhabitants of the American continent.

On May 15, 1829, John the Baptist appeared to Joseph Smith and Oliver Cowdery, and ordained them to the Aaronic Priesthood. The same year the ancient apostles, Peter, James, and John, appeared to Joseph and Oliver, and ordained them apostles in the Melchizedek Priesthood.

On April 6, 1830, the Church of Jesus Christ of Latter-Day Saints was organized according to law, with six members, by Joseph Smith, at Fayette, Seneca County, New York. Numbers were soon added by baptism, and some settled at Kirtland, Ohio, also in 1831 at Independence, Jackson County, Missouri, from which county they were driven by mobs in 1833 into Clay County, afterward spreading into other counties, but mobs expelled them from the State in 1838-39.

Nauvoo, Illinois, was their next place of settlement. Joseph Smith and Hyrum, his brother, were murdered in Carthage Jail, June 27, 1844, while under gubernatorial pledge of safety. At the time of his death Joseph Smith was First President of the Church. In 1846 the Church was driven out of the State by mob violence. Brigham Young became the next President of the Church, and he led it into the Great Basin and founded Great Salt Lake City in 1847. In Utah and adjacent Territories and States the Church has remained ever since.

Brigham Young died in 1877, and subsequently John Taylor became the First President. He died in 1887. The present First President is Wilford Woodruff, who was accepted as such by the Church in April, 1889.

ORGANIZATION OF THE CHURCH.

There are in the Church two orders of priesthood—the Melchizedek, or higher, and the Aaronic, or lesser, the latter being an appendage of the former.

In the Melchizedek Priesthood are apostles, patriarchs, high priests, seventies, and elders, and it holds the keys of all the spiritual blessings of the Church, with the authority to preside, and to direct in all spiritual matters in the Church.

It is the duty of the above-named officers to preach the Gospel, baptize, lay on hands for confirmation and the gift of the Holy Ghost, for ordination, healing, and blessing; also to administer the sacrament of the Lord's Supper, and to officiate in all the ordinances of the Gospel.

In the Aaronic Priesthood are bishops, priests, teachers, and deacons, who have authority to administer in outward ordinances and temporal things, under the direction of the Melchizedek Priesthood.

For Church government there are various organizations. The First Presidency consists of three Apostles—the First President and his two Counsellors. Their duty is to preside over all the Church.

In the Council of the Twelve Apostles the oldest ordained apostle of the twelve presides. They are special witnesses of Jesus Christ in all the world, and they travel and preach the Gospel, and build up the Church, calling chiefly on the Seventies to assist them.

On the death of the First President the First Presidency is dissolved, and the presiding authority rests with the Council of the Twelve Apostles until another First Presidency is chosen.

The Elders are organized in councils of seventy, each with seven presidents. The presidents of the First Council preside over all the Seventies.

The duty of a patriarch is to administer patriarchal blessings.

The Presiding Bishop, with his two Counsellors, presides over the Aaronic Priesthood, including all bishops, priests, teachers, and deacons.

A bishop, with his two counsellors, sits as a common judge in the Church to settle minor difficulties; but their decisions only extend to the fellowship of the members, this being the extent of all Church jurisdiction.

A priest, as well as a bishop, can preach, teach, baptize, and administer the sacrament, and visit the members. A teacher's duty is to watch over the Church, visit the members, and teach them to live righteously. A deacon's duty is specially concerned with local temporalities in the Church.

THE MORMONS—Continued.

In and around Utah the Church is organized into districts termed Stakes of Zion, each stake having its President and two Counsellors, who are high priests, and a High Council of twelve high priests, which sits as a superior court in Church matters only. Each stake is subdivided into wards, each ward having its own meeting-house, and being presided over by a bishop and his two counsellors.

DOCTRINES OF THE CHURCH.

The following statement of the doctrines of the Church was issued with the approval of the Prophet Joseph Smith:

1. We believe in God, the Eternal Father, and in His Son Jesus Christ, and in the Holy Ghost.
2. We believe that men will be punished for their own sins, and not for Adam's transgression.
3. We believe that through the atonement of Christ all mankind may be saved, by obedience to the laws and ordinances of the Gospel.
4. We believe that these ordinances are: First, Faith in the Lord Jesus Christ; second, Repentance; third, Baptism by immersion for the remission of sins; fourth, Laying on of hands for the Gift of the Holy Ghost.
5. We believe that a man must be called of God, by "prophecy, and by the laying on of hands," by those who are in authority to preach the Gospel and administer in the ordinances thereof.
6. We believe in the same organization that existed in the primitive church, viz.: Apostles, prophets, pastors, teachers, evangelists, etc.
7. We believe in the gift of tongues, prophecy, revelation, visions, healing, interpretation of tongues, etc.
8. We believe the Bible to be the word of God, as far as it is translated correctly; we also believe the Book of Mormon to be the word of God.
9. We believe all that God has revealed, all that he does now reveal, and we believe that He will yet reveal many great and important things pertaining to the Kingdom of God.
10. We believe in the literal gathering of Israel and in the restoration of the Ten Tribes; that Zion will be built upon this continent; that Christ will reign personally upon the earth, and that the earth will be renewed and receive its paradisiac glory.
11. We claim the privilege of worshipping Almighty God according to the dictates of our conscience, and allow all men the same privilege, let them worship how, where, or what they may.
12. We believe in being subject to kings, presidents, rulers, and magistrates, in obeying, honoring, and sustaining the law.
13. We believe in being honest, true, chaste, benevolent, virtuous, and in doing good to all men; indeed, we may say that we follow the admonition of Paul, "We believe all things, we hope all things," we have endured many things, and hope to be able to endure all things. If there is anything virtuous, lovely, or of good report, or praiseworthy, we seek after these things.

GENERAL AUTHORITIES OF THE CHURCH, 1894.

First Presidency—Wilford Woodruff, George Q. Cannon, Joseph F. Smith.

Twelve Apostles—Lorenzo Snow, Franklin D. Richards, Brigham Young, Moses Thatcher, Francis M. Lyman, John Henry Smith, George Teasdale, Heber J. Grant, John W. Taylor, Mariner W. Merrill, Anthon H. Lund, Abraham H. Cannon.

Presiding Bishops—William B. Preston, Robert T. Burton, John R. Winder.

Latter-Day Saints in Utah and scattered throughout the inter-mountain region in some 490 branches or congregations have a total membership of about 300,000.

In the Latter-Day Saints' Sunday-School Union in Utah and adjoining States and Territories there are some 570 schools, with an attendance of scholars and teachers of about 92,000.

Brotherhood of Christian Unity.

AN outgrowth of the Religious Parliament of the World at the great Columbian Exposition at Chicago in 1893 was "The Brotherhood of Christian Unity." Its purpose was declared to be: "Union with all those who desire to serve God and their fellow-men under the inspiration of the life and teachings of Jesus Christ." Followers of all Christian creeds were invited to join.

The initial signers and the founders of the movement were: Dr. John Henry Barrows, Presbyterian; Dr. George Dana Boardman, Baptist; Dr. Lyman Abbott, Congregationalist; Dr. Alfred W. Moberie; London, Church of England; Dr. Edward Everett Hale, Unitarian; Charles C. Bonney, Swedenborgian; J. W. Plummer, Friend; Bishop J. H. Vincent, Methodist; Miss Frances E. Willard, President Woman's Christian Temperance Union; Dr. Hiram W. Thomas, Independent; Miss Jean Sorabji, Bombay, Church of England; Minas Theraz, King's College, London, Armenian; Bishop J. S. Mills, United Brethren; Dr. W. F. Black, Christian Disciples; Mrs. Laura Ormiston Chant, London, Independent; Dr. Charles H. Eaton, Universalist; Dr. Paulus Moort, Monrovia, Liberia, Episcopalian; Captain Allen Allensworth, Fort Bayard, New Mexico, United States Army Chaplain; Prince Momolu Massaquoi, Vey Territory, Liberia, Episcopalian; Dr. Carl von Berg, Stockholm, Sweden, Independent Lutheran; Bishop B. W. Arnett, African Methodist Episcopal; Dr. Tompkins, St. James Episcopalian, Chicago.

American Congress of Liberal Religious Societies.

OBJECTS.—To unite in a larger fellowship and co-operation such existing societies and liberal elements as are in sympathy with the movement toward undogmatic religion; to foster and encourage the organization of non-sectarian churches and kindred societies on the basis of absolute mental liberty; to secure a closer and more helpful association of all these in the thought and work of the world under the great law and life of love; to develop the church of humanity, democratic in organization, progressive in spirit, aiming at the development of pure and high character, hospitable to all forms of thought, cherishing the spiritual traditions and experiences of the past, but keeping itself open to all new light and the higher developments of the future.

The officers for 1894-95 are: *President*—Dr. Hiram W. Thomas, Chicago. *Vice-Presidents*—Col. T. W. Higginson, Cambridge, Mass.; Dr. E. G. Hirsch, Chicago; M. J. Savage, Boston; Marion D. Shuter, Minneapolis, Minn.; Heber Newton, New York City; William M. Salter, Philadelphia; B. F. Underwood, Chicago; Susan B. Anthony, Rochester, N. Y.; Mrs. Celia P. Woolley, Geneva, Ill. *General Secretary*—Jenkin Lloyd Jones, Chicago. *Treasurer*—Leo Fox, Chicago.

The Epworth League.

THE following statistics and statement of the purposes of the organization were prepared for THE WORLD ALMANAC by Rev. Edwin A. Schell, General Secretary of the Epworth League:

OFFICERS OF THE EPWORTH LEAGUE.—*President*, Bishop James N. FitzGerald, New Orleans, La.; *Vice-Presidents*: Department of Spiritual Work, W. W. Cooper, St. Joseph, Mich.; Department of Mercy and Help, Rev. W. J. Haven, 33 Mariou Street, Brookline, Mass.; Department of Literary Work, R. R. Doherty, 150 Fifth Avenue, New York; Department of Social Work, Rev. H. C. Jennings, Marshall Minn.; *General Secretary*, Rev. Edwin A. Schell, 57 Washington Street, Chicago, Ill.; *General Treasurer*, Chas. E. Piper, 108 La Salle Street, Chicago, Ill. The Central Office of the Epworth League is located at 57 Washington Street, Chicago, Ill.

The Epworth League was formed in May, 1889, by the union of five societies then existing in the Methodist Episcopal Church, which had under their united jurisdiction about 1,500 local societies, or "chapters," and about 6,000 members. On November 1, 1894, the Epworth League in the Methodist Episcopal Church numbered 16,579 chapters, with a membership of 1,000,000.

Its purpose is to promote intelligent and loyal piety in the young members and friends of the church, to aid them in religious development, and to train them in the works of mercy and help. Its constitution provides for development along social, intellectual, and religious lines. Its essential features are the weekly prayer-meeting, the "intellectual" and "mercy and help" departments, and its harmony with the officary of the church.

It has a weekly organ, the *Epworth Herald*, edited by Dr. Joseph F. Berry, with a circulation of 82,000. There are no salaried officers, except the General Secretary, the organization being entirely voluntary, and no assessments on local chapters. The incidental expenses thus far have been paid by voluntary contributions. The following table shows the total number of chapters composing the organization by States and Territories:

The Theosophical Society.

THE following information about this organization was prepared by William Q. Judge, General Secretary of the American section:

The Theosophical Society has been in existence nineteen years, having been founded in New York in November, 1875, with the following objects: First.—To form a nucleus of a UNIVERSAL BROTHERHOOD OF HUMANITY, without distinction of race, creed, caste, sex, color. Second.—To promote the study of Aryan and other Eastern literatures, religions, and sciences, and demonstrate the importance of that study. Third.—To investigate the laws of nature and the psychical powers latent in man.

The society appeals for support and encouragement to all who truly love their fellow men and desire the eradication of the evils caused by the barriers raised by race, creed, or color which have so long impeded human progress; to all scholars, to all sincere lovers of TRUTH, *wherever it may be found*, and to all philosophers, alike in the East and in the West; and lastly, to all who aspire to higher and better things than the mere pleasures and interests of a worldly life, and are prepared to make the sacrifices by which alone a knowledge of them can be attained.

The society represents no particular creed, is entirely unsectarian, and includes professors of all faiths. No person's religious beliefs are interfered with, and all that is exacted from each member is the same toleration of the views of others which he desires them to exhibit towards his own. The society, as a body, eschews politics and all subjects outside its declared sphere of work, the rules stringently forbidding members to compromise its strict neutrality in these matters.

As a condition precedent to membership, belief in and adherence to the first of the above-named objects is required; as to the other two, members may pursue them or not as they see fit. The act of joining the society, therefore, carries with it no obligation whatever to profess belief in either the practicability of presently realizing the brotherhood of mankind, or in the superior value of Aryan over modern science, or the existence of occult powers latent in man. It implies only intellectual sympathy in the attempt to disseminate tolerant and brotherly feelings, to discover as much truth as can be uncovered by diligent study and careful experimentation, and to essay the formation of a nucleus of a universal brotherhood.

The headquarters are at Adyar, a suburb of Madras, where the society has a property of twenty-seven acres and extensive buildings, including one for the Oriental Library and a spacious hall wherein the General Council meets annually in convention, on December 27.

Many branches of the society have been formed in various parts of the world and new ones are constantly being organized. Each branch frames its own by-laws and manages its own local business without interference from headquarters; provided only that the fundamental rules of the society are not violated. All branches in America and in the West Indies are under the jurisdiction of the American section; those in Europe under the jurisdiction of the European section; those in India, Ceylon, etc., under the jurisdiction of the Indian section. Each section is autonomous.

The President of the society is Colonel Henry S. Olcott, in India; the Vice-President, William Q. Judge (also General Secretary American section), 144 Madison Avenue, New York.

Throughout the world there are about 400 branches. The American section includes at this date the 96 branches in the United States, which are located in most of the principal cities and in many of the smaller towns. Addresses may be obtained from the General Secretary. Inquirers and applicants can address him at the address given above, enclosing a stamp, and will receive from him further information or application blanks. The American headquarters are at 144 Madison Avenue, New York, where a Theosophical meeting is held each Tuesday evening and a public lecture given each Sunday evening.

Reigning Families

OF THE PRINCIPAL EUROPEAN COUNTRIES.

AUSTRIA-HUNGARY.

Francis Joseph I., the Emperor of Austria and King of Hungary, was born August 18, 1830, and was proclaimed Emperor of Austria after the abdication of his uncle, Ferdinand I., on December 2, 1848. He was crowned King of Hungary June 8, 1867. He married, in 1854, Elizabeth, a daughter of Duke Maximilian of Bavaria. They have had issue:

1. Archduchess Gisela, born 1856; married to Leopold, son of the regent Luitpold of Bavaria. Issue, two daughters and two sons.

2. Archduke Rudolph, late heir apparent, born 1858; died by suicide 1889. He married, 1881, Stephanie, daughter of the present King of the Belgians, and had issue one daughter, the Archduchess Elizabeth, born 1883.

3. Archduchess Marie, born 1868; married, 1890, Archduke Francis-Salvator of Tuscany.

On the death of the Crown Prince, in 1889, the right of succession to the throne passed to the Emperor's eldest brother, the Archduke Charles Louis, who was born 1833; married, 1862 (second marriage), the Princess Annunziata, daughter of King Ferdinand II. of Naples, and had issue the Archduke Francis, born 1863, who is in the line of succession to the throne and is unmarried; the Archduke Otho, born 1865, and married to the Princess Marie of Saxony, and has one son (Archduke Charles, born 1887); the Archduke Ferdinand, born 1868, and unmarried, and the Archduchess Margaret Sophia, born 1870, who is Abbess of a retreat for noble ladies. By a third marriage, the Archduke Charles Louis has two daughters, who are children.

The Emperor has a second brother, the Archduke Louis Victor, born 1842, and who is unmarried. There are upward of fifty other archdukes and archduchesses of Austria, cousins of the Emperor, collateral relatives of the reigning house and members of the formerly reigning branches of Tuscany and Modena. The family is descended from Count Rudolph of Hapsburg, who was elected Emperor of Germany in 1276.

BAVARIA.

Otho, King of Bavaria, was born April 27, 1848, and succeeded his brother, Ludwig II., June 13, 1886, when that mad monarch committed suicide by drowning himself in the Starnberg Lake. Otho is also crazy, and is shut up in one of his châteaux, and the kingdom is governed by Prince Luitpold, his uncle, as regent. The latter is also the heir apparent to the throne; was born in 1821; married, 1844, the Austrian Archduchess Augusta of Tuscany, who is dead, and has four children.

1. Prince Louis, born 1845; married the Austrian Archduchess Maria Theresa, and has seven daughters and four sons, the eldest of the latter being Prince Rupert, born 1869.

2. Prince Leopold, born 1846; married to the Austrian Archduchess Gisela, daughter of the Emperor Francis Joseph I. There are two daughters and two sons.

3. Princess Theresa, born 1850, a nun.

4. Prince Arnulf, married, and has a son.

King Otho has five cousins who bear princely titles, children of his dead uncle, Adalbert.

The royal house of Bavaria comes from the Counts of Wittelsbach of the twelfth century, one of whose descendants was elevated to the rank of Elector, and a later one made King by Napoleon I.

BELGIUM.

Leopold II., King of the Belgians, was born April 9, 1835, and was a son of Leopold I., Prince of Saxe-Coburg-Gotha (uncle of Queen Victoria), who was elected King of the Belgians in 1831, and Princess Louise, daughter of King Louis Philippe of France. The present King, who ascended the throne in 1865, was married, in 1853, to the Austrian Archduchess Marie Henriette, and has the following children:

1. Princess Louise, born 1858; married to Prince Philippe of Saxe-Coburg-Gotha.

2. Princess Stephanie, born 1864; married, 1881, to the late Crown Prince Rudolph of Austria, and has one daughter.

3. Princess Clementine, born 1872.

The heir presumptive is Prince Philippe, Count of Flanders, the King's brother, born in 1837; married to the Hohenzollern Princess Marie. He had two sons, the eldest being Baldwin, who died in 1891, and the other, Albert, born in 1873, survives, and is next to his father in the right of succession to the throne. Prince Philippe has also two daughters, Henriette, born 1870, and Josephine, born 1872; married, 1894, to Prince Charles of Hohenzollern-Sigmaringen.

The sister of the King is the hapless ex-Empress Carlotta of Mexico, widow of Maximilian. She was born in 1840, widowed in 1867, has no children, and is now insane.

DENMARK.

Christian IX., King of Denmark, born April 8, 1818, was Duke of Schleswig-Holstein-Sonderburg-Glücksburg, and succeeded to the throne of Denmark by virtue of treaty and the law of the Danish succession on the death of his kinsman, Frederick VII., in 1863. He married the Princess Louise of Hesse-Cassel, and has had the following offspring:

1. Prince Royal Frederick, born 1843; married to the Princess Louise of Sweden in 1869 and has three daughters and five sons, the eldest of the latter being Prince Christian, born in 1870.

2. The Princess of Wales (Alexandra), born 1844; married the Prince of Wales, 1863, and has four living children.

3. The King of the Greeks (George I.), born 1845; married to the Grand Duchess Olga of Russia, and has two daughters and five sons, the eldest of the latter being Prince Constantine.

4. The Dowager Empress of Russia (Dagmar), born 1847; married the late Czar Alexander III. in 1869, and has five children.

5. The Duchess of Cumberland (Thyra), born 1853; married the present Duke of Cumberland (English title), son of the ex-King of Hanover, in 1878, and has three sons and three daughters. She became insane in 1887.

6. Prince Waldemar, born 1858; married, 1885, the Princess Marie of Orleans, daughter of the

REIGNING FAMILIES—Continued.

Duke of Chartres, and has three sons. He was elected reigning Prince of Bulgaria in 1886, but declined.

GERMANY

William II., German Emperor and King of Prussia, was born January 27, 1859; succeeded his father, the Emperor Frederick III., June 15, 1888. He married the Princess Victoria of Schleswig-Holstein-Sonderburg-Augustenburg (born 1858), and has had issue:

1. Frederick William, Crown Prince, born 1882; 2. William, born 1883; 3. Adalbert, born 1884; 4. Augustus, born 1887; 5. Oscar, born 1888; 6. Joseph, born 1890; 7. Victoria Louise, born 1892.

The Emperor's brother is Prince Henry, born 1862, and married, 1888, to his cousin, Princess Irene of Hesse, daughter of the late Princess Alice of England, and has a son; and the Emperor has four sisters, all the children of the late Emperor Frederick and the Princess Victoria of England (Dowager Empress), who survives. The sisters are:

1. Princess Charlotte, born 1860; married, 1878, to George, hereditary prince of Saxe-Meiningen, and has one daughter.

2. Princess Victoria, born 1866; married, 1890, to Prince Adolphus, of Schaumburg-Lippe.

3. Princess Sophia, born 1870; married, 1889, to Constantine, Crown Prince of Greece, and has one son.

4. Princess Margaret, born 1872; married, 1893, Prince Frederick Charles of Hesse, and has one son.

The Emperor has an aunt, the Princess Louise, born 1838, married to the present Grand Duke of Baden; and he has a number of cousins, descendants of the brothers and sisters of the Emperor William I. One of these, Prince Albert, born 1837, is a field marshal in the German army, and another, Princess Margaret, daughter of the late Prince Frederick Charles, is the wife of the British Duke of Connaught, son of Queen Victoria. The reigning family is descended from Frederick of Hohenzollern, a German count, in 980, and Frederick William, the Elector of Brandenburg, 1640-88, whose son became King of Prussia.

GREECE.

George I., King of the Greeks, born December 24, 1845, elected King in 1863. He is the son of the present King of Denmark, Christian IX., and brother of the Princess of Wales and the dowager Empress of Russia. He married, 1867, the Grand Duchess Olga, eldest daughter of the Grand Duke Constantine of Russia, grand uncle to the present Emperor. They have had six living children, five sons and one daughter. The eldest son is:

Prince Constantine, born 1868; married, 1889, the Princess Sophia, sister of the present German Emperor, and has one son, Prince George, born 1890.

The King's eldest daughter, Alexandra, married, in 1889, the Grand Duke Paul, uncle of the present Emperor of Russia, and died September 24, 1891, leaving a daughter and a son.

ITALY.

Humbert I., King of Italy, was born March 14, 1844, and was the eldest son of Victor Emmanuel, the first King of United Italy. He succeeded his father in 1878. He married, in 1868, his cousin Margherita, daughter of Ferdinand, Duke of Genoa, and they have had issue one child only:

1. Victor Emmanuel, Prince of Naples, heir apparent, born 1869.

The following are the sisters of the King:

1. Princess Clotilde, born 1843; married, 1859, to Prince Napoleon Jerome Bonaparte, the late head of the Bonaparte family, and has issue two sons and a daughter, Letitia. (See "Bonapartists.")

2. Princess Pia, born 1847, and married, 1862, to the late King Louis of Portugal, and has two sons.

The late Prince Amadeus, brother of the King, Duke of Aosta and ex-King of Spain, born 1845; married first in 1867, and had issue three sons—Emmanuel, now Duke of Aosta, born 1869; Victor, Count of Turin, born 1870, and Louis, Duke of Abruzzi, born 1873; married, second, 1888, his niece, Princess Letitia, daughter of Prince Napoleon Bonaparte and the Princess Clotilde. By this second marriage he had a son, Humbert, Count of Salemi, born in 1889.

The King's aunt by marriage, the Princess Elizabeth, widow of the Duke of Genoa, has a son and a daughter, the latter being King Humbert's wife. The family is descended from the Counts of Savoy, who flourished in the eleventh century.

NETHERLANDS.

Wilhelmina, Queen of the Netherlands and Princess of Orange-Nassau, born August 31, 1880, daughter of the late King William III. and Emma, daughter of Prince George Victor of Waldeck. Queen Emma is regent during the minority of the Queen, whose father died November 23, 1890.

The Queen's aunt is the Princess Sophia, married to the Grand Duke of Saxe-Weimar. She has a son, Prince Charles, born 1844, and two daughters. This family, known as the House of Orange, is descended from the Princes of Orange, the stadtholders of the Dutch Republic.

PORTUGAL.

Charles I., King of Portugal, born September 28, 1863, son of the late King Louis and his spouse, the Princess Pia, daughter of King Victor Emmanuel of Italy. He succeeded to the throne October 19, 1889. He married, 1886, the Princess Amelie of Orleans, daughter of the Count of Paris, and has two sons, Prince Louis Philippe, Duke of Braganza, born 1887, and Prince Manuel, Duke of Beja, born 1889.

The King has a brother, Prince Alphonse, Duke of Oporto, born 1865, and unmarried; and an aunt married to the Prince of Hohenzollern-Sigmaringen, and has three sons.

The reigning family belongs to the House of Braganza, whose founder was an illegitimate son of King John I. (A. D. 1400) of the old line of Portuguese kings.

REIGNING FAMILIES—Continued.

ROUMANIA.

Charles I., King of Roumania, born April 30, 1839, is a son of the late Prince Charles of Hohenzollern-Sigmaringen, and was elected "Lord of Roumania" by the nobles thereof in 1866. He was proclaimed King in 1881. He married, 1869, Elizabeth, a daughter of the princely German House of Wied. He has no children.

The succession to the throne, in the event of his being childless, has been settled by the constitution of the kingdom upon his elder brother, Prince Leopold of Hohenzollern-Sigmaringen; but he has renounced his right to the throne in favor of his son, Prince Ferdinand, born 1865, who is, therefore, the heir presumptive. He married the Princess Marie, eldest daughter of the British Duke of Edinburgh, January 10, 1893, and has two sons.

RUSSIA.

Nicholas II., Emperor of Russia, was born May 18, 1868, and succeeded his father, the late Emperor Alexander III., November 1, 1894. He is married to the Princess Alice (Alix) of Hesse-Darmstadt, daughter of the Princess Alice of Great Britain.

The late Emperor Alexander III., born in 1845; married, in 1866, the Princess Dagmar, daughter of the present King of Denmark, had issue three sons: 1. Nicholas, the present Emperor; 2. Grand Duke George (the Cesarewitch, until a son is born to the Emperor), born May 9, 1871; 3. Grand Duke Michael, born December 4, 1878, and two daughters: 1. Grand Duchess Xenia, born April 6, 1875, married August 6, 1894, her cousin, the Grand Duke Michael, and 2. Grand Duchess Olga, born June 13, 1882. The uncles and aunts of the Emperor are:

1. Grand Duke Vladimir, born 1847; married, 1874, the Princess Marie of Mecklenburg-Schwerin, and has three sons and one daughter.
2. Grand Duke Alexis, born 1850. He is unmarried.
3. Grand Duchess Marie, born 1853; married to the Duke of Edinburgh, and has one son and four daughters.
4. Grand Duke Sergius, born 1857; married, 1884, Princess Elizabeth of Hesse-Darmstadt, daughter of Princess Alice of England, and has no issue.
5. Grand Duke Paul, born 1860; married, 1889, Princess Alexandra, daughter of the King of the Greeks. She died September 24, 1891, leaving a son, the Grand Duke Demetrius, and a daughter.

The Emperor has one grand uncle (son of the Emperor Nicholas I.), Grand Duke Michael, born 1832, field marshal in the Russian army; married, 1857, Princess Cecelia of Baden, and has issue seven children, the eldest daughter, Anastasia, born 1860, being the wife of the reigning Grand Duke of Mecklenburg-Schwerin.

A grand uncle, the Grand Duke Constantine, born 1827; died January 12, 1892; married, 1848, Princess Alexandra of Saxe-Altenburg, and had issue five children, the Grand Duke Nicholas, born 1850, being the eldest, and the Grand Duchess Olga, born 1851, the eldest daughter, being married to the King of the Greeks.

A third grand uncle, the Grand Duke Nicholas, born 1831, field marshal in the Russian army, died in 1891; married, in 1856, the Princess Alexandra of Oldenburg, and had issue two sons, the youngest of whom, the Grand Duke Peter, married, in 1889, a daughter of the present Prince of Montenegro.

The Russian reigning family is descended from Michael Romanoff, elected Czar in 1613. The members of the family for over two centuries, however, have married so generally into the German royal houses that the present Romanoffs are practically, by blood, Germans; as much so as their kinsman, the head of the German Empire.

♦ SAXONY.

Albert, King of Saxony, born April 23, 1828, succeeded to the throne on the death of his father, 1873; married, 1853, Caroline, daughter of Prince Gustavus of Holstein-Gottorp-Vasa. They have no children.

The heir to the throne is the King's brother, George, born 1832; married, 1859, the Infanta Maria, daughter of the late King Ferdinand of Portugal. He has one daughter and five sons, the eldest of the latter being Prince Frederick, born 1865, and married, 1891, the Archduchess Louise of Austria-Tuscany.

The King has one sister, Princess Elizabeth, born 1830, who married Prince Ferdinand of Sardinia, and is a widow.

The royal house of Saxony is one of the oldest in Europe, having given an emperor to Germany as early as the beginning of the tenth century. The elector of Saxony was made King in 1615.

SPAIN.

Alphonso XIII., King of Spain, born May 17, 1886, nearly six months after the death of his father, Alphonso XII. His mother, Maria Christina, an Austrian princess, is the Queen Regent during his minority. He has two sisters, the Infanta Maria-de-las-Mercedes, born 1880, and the Infanta Maria Theresa, born 1882.

The King's aunts are the Infantas Isabella, widow of the Count de Girgenti; Maria, wife of Prince Louis of Bavaria, and Eulalie, wife of Prince Antonio of Orleans, who visited the United States and the World's Fair in 1893.

The King's grandmother is ex-Queen Isabella, born in 1830, crowned 1833, abdicated 1870. Her husband, the Infant Francis d'Assisi, born 1822, is living.

The King's grand aunt, the Infanta Louisa, widow of the Duke of Montpensier (son of King Louis Philippe of France), is the mother of a son and daughter, the latter being the wife of the late Count of Paris, head of the House of Orleans.

A second cousin of the King is Don Carlos, born in 1848, and a pretender to the Spanish throne, who is married, and has four daughters and a son, Prince Jaime, born in 1870.

The Spanish reigning family are Bourbons, descendants of King Louis XIV. of France.

REIGNING FAMILIES—Continued.

SERVIA.

Alexander I., King of Servia, born August 14, 1876, son of King Milan I., who abdicated in 1889, and Natalie, daughter of Colonel Keschko, of the Russian Imperial Guard. Alexander was proclaimed King in 1889, on the abdication of his father. He is the only child of his parents. The ex-King obtained a divorce from Queen Natalie in 1888.

The present reigning house was founded by Milos Todorovic Obrenovic, leader of the insurrection against the yoke of Turkey in 1815-29. The Turkish Government recognized the quasi independence of Servia in 1829, and confirmed the title of Obrenovic as reigning prince. The present King is the fifth of his dynasty, being descended from a brother of the founder.

SWEDEN AND NORWAY.

Oscar II., King of Sweden and Norway, born January 21, 1829; son of Oscar I., and grandson of Marshal Bernadotte. He married, 1857, the Princess Sophia of Nassau, and has had four sons, the eldest of whom is the Prince Royal Gustavus, born 1858; married, 1881, to the Princess Victoria of Baden, and has three sons, all small children. The King's other sons are: Prince Oscar, born 1859, married to Miss Ebba Munck, one of his mother's maids of honor, and relinquished his rights to the throne; Prince Carl, born 1861, and Prince Eugene, born 1865. The King has a niece, Louise, married to the eldest son of the King of Denmark. The royal family comes from Napoleon's Marshal Bernadotte, a Frenchman, who was elected heir apparent to the crown of Sweden and Norway in 1810, and became King in 1818.

WÜRTEMBERG.

William II., King of Württemberg, born February 25, 1848, succeeded his uncle, King Charles I., October 6, 1891. He married, 1877, Princess Marie of Waldeck, who died, leaving a daughter, Pauline, born 1877. The King married, secondly, Princess Charlotte of Schaumburg-Lippe, by whom he has no children.

The King's mother, Princess Catherine, is living, and he has an aunt, Princess Augusta, married to Prince Herman of Saxe-Weimar, with issue of four sons and two daughters. He has a number of cousins, one of them being the Duke of Teck, who is married to the English Princess Mary of Cambridge.

The French Pretenders.

BONAPARTIST.

Of the Emperor Napoleon I. and his brothers Joseph and Louis, male issue is now extinct. The Emperor's brothers Lucien and Jerome are represented by the following living descendants, and they constitute the present Imperialist house of France:

Prince Napoleon Victor, born July 18, 1862, son of the late Prince Napoleon (who died March 18, 1891) and the Princess Clotilde, sister of King Humbert of Italy. The Prince is now the undisputed head of the Bonaparte family. He lives in Brussels and is unmarried. His only brother, Prince Napoleon Louis, born 1864, is an officer in the Russian army. His sister, Princess Letitia, born 1866, is the widow of the late Prince Amadeus of Italy, her own uncle, by whom she had a son, Prince Humbert, born 1889.

The living aunt of Prince Napoleon Victor is the Princess Mathilde, born 1820; married, 1840, Prince Demidoff of Russia; now a widow without children.

Prince Lucien Bonaparte, who is the Cardinal Bonaparte, is the representative of the eldest son of Napoleon's brother, Lucien, and the head of that branch of the imperial family. He was born 1828; created Cardinal 1868. He has three living sisters, married respectively to the Marquis of Roccajoivoine, Count Primoli, and Prince Gabrielli, and one brother, Prince Napoleon, born 1839, married, and has two daughters, Marie, wife of Lieut. Gotti of the Italian army, and Eugenie, unmarried.

Prince Roland Bonaparte is the only living male cousin of the Cardinal. He is a son of the late Prince Pierre Napoleon Bonaparte; was born 1858; married, 1880, the daughter of Blanc, the proprietor of the Monte Carlo gambling-hell. His wife died in 1882, leaving him a daughter and a fortune. He has one sister, Jeanne, born 1861, and married to the Marquis de Villeneuve.

Ex-Empress Eugenie, widow of the late Emperor Napoleon III., was a daughter of Count Cyprien de Montijo, a Spanish grandee, and was born May 5, 1826. She married 1853. Became a widow 1873. Her only son, Prince Louis Napoleon, was killed in Zululand in 1879.

BOURBON-ORLEANIST.

Robert, Duke of Orleans, born 1869, succeeded his father, the late Count of Paris, in 1894 as the head of the royal family of France. His mother (still living) was the Spanish Infanta Louise of Montpensier, and he has one brother and four sisters, the eldest of the latter being the Princess Amelia, who is married to the King of Portugal.

The only uncle of the Duke of Orleans is the Duke of Chartres, born 1840, and married to a daughter of the Prince of Joinville. The issue are two daughters and two sons, the eldest son being Prince Henry, born 1867, and the eldest daughter, Princess Marie, being married to Prince Waldemar of Denmark.

The living grand uncles of the Duke of Orleans (sons of King Louis Philippe) are as follows:

1. Louis, Duke of Nemours, born 1814. He is the father of two daughters and two sons, the eldest son being the Count of Eu, born 1842, married to a daughter of Pedro II. of Brazil, and having three children, and the second son being the Duke of Alençon, born 1844, and married to a Bavarian princess, and having two children.

2. Francis, Prince of Joinville, born 1818, married to a daughter of Pedro I. of Brazil, and has one daughter and one son, the Duke of Penthièvre, born 1845.

3. Henry, Duke of Aumale, born 1822, childless.

The other grand uncle of the Duke of Orleans, Anthony, Duke of Montpensier, born 1824, died 1890; married, 1832, a sister of Queen Isabella of Spain, and had a daughter, the wife of the Count of Paris, and a son, Prince Anthony, born 1866, who married, 1888, his cousin, the Infanta Eulalie of Spain.

By the death of the Count of Chambord, in 1883, the elder line of the Bourbons of France became extinct, and the right of succession merged in the Count of Paris, grandson of King Louis Philippe, representative of the Younger, or Orleans line.

The British Parliament.

THE supreme legislative power of the British Empire is, by its constitution, vested in Parliament. This body is divided into two houses, the Lords and the Commons.

THE HOUSE OF PEERS.

The House of Peers is composed of the whole Peerage of England, and of certain representatives of the peerages of Scotland and Ireland, but many members of these latter have also English titles, which give them seats in the House. The Duke of Buccleuch sits as Earl of Doncaster, and the Duke of Leinster as Viscount Leinster. Exclusive of 13 minors and one baron, whose claim is not established, the House at present consists of 6 Princes of the Blood, 2 Archbishops, 21 Dukes, 22 Marquises, 116 Earls, 25 Viscounts, 24 Bishops, 299 Barons, 16 Scottish Representative Peers elected for each Parliament, and 28 Irish Representative Peers elected for life (1 Scottish and 2 Irish Representative Peers are also included as Peers of England)—in all 559 members.

The Lord Chancellor of England is always the Speaker of the House of Peers.

THE HOUSE OF COMMONS.

The present House of Commons consists of 670 members—461 for England, 34 for Wales, 72 for Scotland, and 103 for Ireland.

The division of parties in the House of Commons, returned in the general elections of June, 1892, was as follows: Conservatives, 268; Liberal-Unionists, 47; Gladstone Liberals, 273; Nationalists, 72; Parnellites, 9. Since then the Conservatives won 3 seats at by-elections from the Gladstone Liberals, and the latter won 1 from the Conservatives; the present combined ministerial majority being 35, or, exclusive of the Parnellites, 26.

The Speaker of the House is the Rt. Hon. Arthur Wellesley Peel, M. P. for Warwick and Leamington.

Estimates of area and present population are by Whitaker, and in some cases by the "Statesman's Year-Book," except for British Africa and the late accessions there, which are corrected by Ravenstein's figures. The entire population of the empire, according to the estimates of the "Statesman's Year-Book," is 381,037,374, and the total area, 11,335,806. The East Indian possessions extend over a territory larger than the continent of Europe without Russia; but the North American possessions are greater still, and, inclusive of Hudson's Bay and the great lakes, have a larger area than the whole of Europe. British Africa and Australasia are the next possessions in size.

The present Constitution of Mexico bears date February 5, 1857, with subsequent amendments down to October, 1887. By its terms Mexico is considered a Federative Republic, divided into States, nineteen at the outset, but at present twenty-seven in number, with two Territories and one Federal District, each having a right to manage its own local affairs, while the whole are bound together in one body politic by fundamental and constitutional laws. The powers of the Federal Government are divided into three branches—the legislative, executive, and judicial. The legislative power is vested in a Congress, consisting of a House of Representatives and a Senate; the executive in a President, and the judicial in Federal Courts. Representatives elected by the suffrage of all male adults, at the rate of one member for 40,000 inhabitants, hold their places for two years. The qualifications requisite are to be twenty-five years of age and a resident in the State. The Senate consists of two members from each State, of at least thirty years of age, who hold their places for four years. Senators are elected indirectly, half of them being renewed every two years. The members of both Houses receive salaries of \$3,000 each a year.

The President is elected by electors popularly chosen in a general election, holds office for four years, and, according to the last Amendment of the Constitution, there will be no prohibition to his re-election. The Senator who presides over the Senate by monthly election acts temporarily in default of the President of the Republic. Congress has to meet annually from September 16 to December 15, and from April 1 to May 31, and a permanent committee of both Houses sits during the recesses.

FINANCE AND COMMERCE.

The Federal revenue collected during the fiscal year ended June 30, 1894, was \$40,060,000; disbursements, \$41,076,260; value of imports year ended June 30, 1894, \$34,000,000; value of exports, \$72,000,000.

ARMY AND NAVY.

The army consists of infantry, 22,964; engineers, 766; artillery, 2,304; cavalry, 8,454; rural guards of police, 2,365; gendarmery, 250; total, 37,103. There are over 3,000 officers. There is a fleet of two unarmored gun-vessels, each of 450 tons and 600 horse-power, and armed with 20-pounders, one training-ship of 1,221 tons armed with four (4.72) guns, two of 57-m-m guns and two 32-m-m guns, and three small gunboats.

NATIONAL DEBT.

The external debt, contracted in London, is £10,500,000, and the total debt of the country was in 1890, in American money, \$113,606,675 (United States Census report).

INTERNAL IMPROVEMENTS.

Miles of railway in operation, 6,900; miles of telegraph line, 26,248; post-offices, 1,296. This information about Mexico, compiled mainly from the bulletins of the Bureau of American Republics, Washington, D. C., was corrected to date for THE WORLD ALMANAC at the office of the Mexican legation at Washington.

High Commissioner in London, England, Sir Charles Tupper, Bart. Salary, \$10,000.

The Dominion of Canada has an area of 3,457,000 square miles, and comprises one-sixteenth of the land surface of the globe. It is the largest of all the British possessions, Australia, the next in size, containing 2,944,628 square miles. The Government of Canada is Federal, centred at Ottawa, which city is the capital of the Dominion, while the seven provinces and the Northwest Territories have their respective local legislatures. The head of the Federal Government is the Governor-General, appointed by the Queen of Great Britain, and holding office for five years, his salary being paid by the Dominion Government.

The Lieutenant-Governors of the several provinces are appointed by the Federal Government for a term of five years. The Legislatures are elected by the people of each province. The highest Court in the Dominion is the Supreme Court, composed of a Chief Justice and five Judges, each of whom receives a salary of \$7,000 per annum, except the Chief Justice, who is paid an additional \$1,000. From the decisions of this Court the only tribunal to which appeal can be made is to the Judicial Committee of the Imperial Privy Council of Great Britain. The only other Federal Court is the Exchequer Court, presided over by a single Judge, for trying cases connected with the revenue. All others are of a provincial character, limited to jurisdiction in their respective provinces only.

* New York State census of 1892. The population of the territory embraced within the limits of "Greater New York" as proposed by the commission is over 3,000,000. This will constitute the New York of the immediate future the second city of the world. † A school census taken in Chicago in 1892 revealed an estimated population of upward of 1,400,000. ‡ Official estimate. The statistics of population of largest cities of the earth other than those of the United States have been taken mainly from the "Statesman's Year-Book" for 1893.

Note.—The population of Chinese cities other than Canton, Peking, and Shanghai is omitted, because reports respecting them are utterly untrustworthy. There are forty or more Chinese cities whose inhabitants are numbered by rumor at from 200,000 to 1,000,000 each, but no official censuses have ever been taken; and setting aside consideration of the Oriental tendency to exaggeration, there is reason to believe that the estimates of population in many instances covered districts of country bearing the same names as the cities, instead of definite municipalities.

Population of the United States.

(Compiled from the Reports of the Census of 1890.)

WHITE AND NEGRO POPULATION OF THE SOUTH.

GROWTH of the population by decades in the territory now covered by the sixteen Southern States of Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, North Carolina, South Carolina, Tennessee, Texas, Virginia, and West Virginia, and the District of Columbia.

YEARS.	White.	Colored.	YEARS.	White.	Colored.	YEARS.	White.	Colored.

1820	2,831,560	1,653,240	1860	8,097,462	4,215,614			

The table shows that the whites increased faster than the blacks in the last decade. In 1890 there were in the sixteen Southern States and the District of Columbia 6,898,806 colored inhabitants, and in 1880, 6,099,253. The colored element increased during the decade at the rate of 13.1 per cent. The white population of these States in 1890 numbered 15,549,358, and in 1880, 12,578,253. It increased during the decade at the rate of 23.6 per cent., or nearly twice as rapidly as the colored element.

GOVERNMENT OF THE DISTRICT OF COLUMBIA.

The government of the District of Columbia is vested by act of Congress approved July 11, 1878, in three Commissioners, two of whom are appointed by the President from citizens of the District having had three years' residence therein immediately preceding that appointment, and confirmed by the Senate. The other Commissioner is detailed by the President of the United States from the Corps of Engineers of the United States Army, and must have lineal rank senior to Captain, or be a Captain who has served at least fifteen years in the Corps of Engineers of the Army. The Commissioners appoint the subordinate official service of said government. The present Commissioners are John W. Ross (Democrat), President, whose term will expire January 3, 1897; George Truesdell (Republican), whose term will expire March 4, 1897; Captain Charles F. Powell (non-partisan), Corps of Engineers, United States Army, detailed during the pleasure of the President of the United States. The Secretary is William Tindall. The offices of the Commissioners are on First Street, between B and C Streets, N. W., Washington.

Washington had a municipal government from 1802 to 1871, when Congress provided a territorial form of government for the entire District of Columbia, with a Governor and other executive officers, a house of delegates, and a delegate in Congress elected by the people, and a Council appointed by the President of the United States. This form of government was not a success, and was abolished June 20, 1874, and a temporary government by three Commissioners substituted. The government by Commissioners was so satisfactory that the present form of government by three Commissioners was incorporated by act of July 11, 1878. Congress makes all laws for the District, but has entrusted to the Commissioners authority to make police regulations, building regulations, plumbing regulations, and other regulations of a municipal nature.

United States Military Academy at West Point.

EACH Congressional District and Territory—also the District of Columbia—is entitled to have one cadet at the Academy. There are also ten appointments at large, specially conferred by the President of the United States. The number of students is thus limited to three hundred and seventy-one. At present there are two extra cadets at the Academy, who were authorized by Congress to enter it at their own expense. One is from Venezuela, and the other from Salvador.

Appointments are usually made one year in advance of date of admission, by the Secretary of War, upon the nomination of the Representative. These nominations may either be made after competitive examination or given direct, at the option of the Representative. The Representative may nominate a legally qualified second candidate, to be designated the alternate. The alternate will receive from the War Department a letter of appointment, and will be examined with the regular appointee, and if duly qualified will be admitted to the Academy in the event of the failure of the principal to pass the prescribed preliminary examinations. Appointees to the Military Academy must be between seventeen and twenty-two years of age, free from any infirmity which may render them unfit for military service, and able to pass a careful examination in reading, writing, orthography, arithmetic, grammar, geography, and history of the United States.

The course of instruction, which is quite thorough, requires four years, and is largely mathematical and professional. The principal subjects taught are mathematics, French, drawing, drill regulations of all arms of the service, natural and experimental philosophy, chemistry, mineralogy, geology, and electricity, history, international, constitutional, and military law, Spanish, and civil and military engineering, and art and science of war. About one-fourth of those appointed usually fail to pass the preliminary examination, and but little over one-half the remainder are finally graduated. The discipline is very strict—even more so than in the army—and the enforcement of penalties for offences is inflexible rather than severe. Academic duties begin September 1 and continue until June 1. Examinations are held in each January and June, and cadets found proficient in studies and correct in conduct are given the particular standing in their class to which their merits entitle them, while those cadets deficient in either conduct or studies are discharged.

From about the middle of June to the end of August cadets live in camp, engaged only in military duties and receiving practical military instruction. Cadets are allowed but one leave of absence during the four years' course, and this is granted at the expiration of the first two years. The pay of a cadet is five hundred and forty dollars per year, and, with proper economy, is sufficient for his support. The number of students at the Academy is usually about three hundred.

Upon graduating cadets are commissioned as second lieutenants in the United States Army. The whole number of graduates from 1802 to 1894 has been three thousand six hundred and sixteen (3,616). It is virtually absolutely necessary for a person seeking an appointment to apply to his Member of Congress. The appointments by the President are usually restricted to sons of officers of the army.

The Academy was established by act of Congress in 1802. An annual Board of Visitors is appointed, seven being appointed by the President of the United States, two by the President of the Senate, and three by the Speaker of the House of Representatives. They visit the Academy in June, and are present at the concluding exercises of the graduating class of that year. The Superintendent is Colonel O. H. Ernst, of the Corps of Engineers, and the military and academic staff consists of sixty-three persons. First Lieutenant John M. Carson, Jr., Fifth Cavalry, is adjutant.

The three oldest living graduates of the Military Academy are General George S. Greene, U. S. A., retired, of New Jersey, who was graduated in 1823; John Archer, of Texas, who was graduated in 1826, and General Philip St. George Cooke, U. S. A., retired, of Michigan, who was graduated in 1827.

United States Naval Academy at Annapolis.

THERE are allowed at the Academy one naval cadet for each Member or Delegate of the United States House of Representatives, one for the District of Columbia, and ten at large. The appointment of cadets at large and for the District of Columbia is made by the President. The Secretary of the Navy, as soon after March 5 in each year as possible, must notify in writing each Member and Delegate of the House of Representatives of any vacancy that may exist in his district. The nomination of a candidate to fill the vacancy is made, on the recommendation of the Member or Delegate, by the Secretary. Candidates must be actual residents of the districts from which they are nominated.

The course of naval cadets is six years, the last two of which are spent at sea. Candidates at the time of their examination for admission must be not under fifteen nor over twenty years of age and physically sound, well formed, and of robust condition. They enter the Academy immediately after passing the prescribed examinations, and are required to sign articles binding themselves to serve in the United States Navy eight years (including the time of probation at the Naval Academy), unless sooner discharged. The pay of a naval cadet is five hundred dollars a year, beginning at the date of admission.

At the end of the third year the new first class is separated into two divisions, namely: the Line Division and the Engineer Division, the numbers of these divisions being proportioned to the vacancies that have occurred in the several corps during the preceding year.

At the end of the six years' course appointments to fill vacancies in the Line and in the Marine Corps are made from the Line Division, and to fill vacancies in the Engineer Corps from the Engineer Division.

If, after making assignments as above, there should still be vacancies in one branch and surplus graduates in the other, the vacancies in the former may be filled by assignment to it of surplus graduates from the latter.

At least ten appointments from such graduates are made each year. Surplus graduates who do not receive appointments are given a certificate of graduation, an honorable discharge, and one year's sea pay.

The Academy was founded in 1845 by the Hon. George Bancroft, Secretary of the Navy in the administration of President Polk. It was formally opened October 10 of that year, with Commander Franklin Buchanan as Superintendent. During the Civil War it was removed from Annapolis, Md., to Newport, R. I., but was returned to the former place in 1865. It is under the direct supervision of the Bureau of Navigation, Navy Department.

The post-office addresses of the naval stations are as follows: North Atlantic Station, Navy Department, Washington, D. C.; South Atlantic and European Stations, care B. F. Stevens, 4 Trafalgar Square, London; Asiatic Station, Yokohama, Japan; Pacific Station, care Navy Pay Office, San Francisco, Cal.

The origin of the Navy Department may be said to date from October 13, 1775, when Congress authorized the equipment of two cruisers, mounting respectively 10 and 14 guns. Before the end of that year fifteen more vessels of from 20 to 36 guns were authorized. The affairs of the navy were at that time entrusted to a "Marine Committee." In 1798 the present department was formally created, and Benjamin Stoddart appointed the first secretary.

Total uniformed militia, 110,796.

Naval Militia.

By act of Congress, 1858, the maritime States were authorized to organize naval battalions. Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, California, North Carolina, South Carolina, Maryland, Illinois, Michigan, and other States named below have taken advantage of this law to create these battalions. The Naval Reserve Artillery of the State of New York is a part of the State Militia, and is regularly mustered in as such. Its commander is Jacob W. Miller, Lieutenant-Commander, and it is composed of four batteries, each commanded by a lieutenant. There are 432 men in the force.

The duty of the Naval Militia in time of war will be to man the coast and harbor defence vessels, thus leaving free the regular force to carry on offensive operations at sea. The Naval Militia will also operate in boat squadrons with torpedoes against any hostile fleet in our waters. The New York Naval Militia is composed of a very high grade of volunteers—merchants, professional men, and others of like social position being the material. The principal officers are graduates of the Annapolis Naval Academy. The drills in summer take place in vessels of war in the harbor. The States which have organized naval militia battalions are as follows, with the number of men enrolled and the names of the commandants of each given:

STATES.	Battalions.	Divisions.	Number of Men.	COMMANDERS.	STATES.	Battalions.	Divisions.	Number of Men.	COMMANDERS.

*This includes one battalion in the city of New York and two separate divisions at Rochester commanded by Lieut. J. M. Angle, first division, and Lieut. E. N. Walbridge, second division.

Corps are to be organized in New Jersey, Virginia, Georgia, and Louisiana, the respective States having passed the necessary establishing acts. Similar action is soon expected in the States of Ohio and Washington. The officer of the Navy Department at Washington having cognizance of Naval Militia matters is Lieut. W. H. Schuetze, U. S. N.

The idea of a Naval Reserve is credited to Thomas Jefferson, and Massachusetts turned out some volunteer seamen in 1812. But nothing definite was done until 1858. Captain Ambrose Snow, Aaron Vanderbilt, and other members of the New York Board of Trade took an interest in the matter, and finally at their instance Congressman Whitthorne, of Tennessee, introduced a bill in Congress to authorize the maritime States to form naval battalions. The law was passed, and Massachusetts was the first State to respond by passing her own law defining what should be done. New York followed, and at the request of Mr. Vanderbilt and other members of the Board of Trade, Philip B. Low set about the formation of a battalion. By October 28, 1859, he had about 75 men pledged to join, and a meeting was held on that evening at the armory of the Second Battery, N. G. S. N. Y., in Seventh Avenue, near Fifty-third Street. This was the nucleus of the present organization in New York.

The whole number of Senators is 88, of whom 44 are Democrats, 36 are Republicans, and 5 are Populists, and there are 3 vacancies. The salaries of Senators are \$5,000 per annum, and their terms of office six years each.

* Appointed by the Governor to fill vacancy until the Legislature meets in January, 1895, and elects.
 † Senators were appointed to fill these vacancies by the Governors of the respective States. As these appointments had been made in each instance after the Legislature had failed to elect and had adjourned, the Senate (in the case of Lee Mantle, appointed from Montana) decided that the appointees were not entitled to seats.

Parties as constituted at the beginning of each Congress are given. These figures were liable to change by contests for seats, etc.

* During the Civil War most of the Southern States were unrepresented in Congress.

† Liberal Republicans.

‡ Greenbackers.

§ David Davis, Independent, of Illinois.

¶ Two Virginia Senators were Readjusters, and voted with the Republicans.

* People's party, except that in the House of Representatives of the Fifty-fourth Congress one member is classed as Silver party.

** Three Senate seats doubtful and two Representative seats were unfilled (Rhode Island had not yet effected a choice) when the session began.

†† Politics of the two North Carolina Senators to be elected was uncertain when this list was made up, but it was expected that one would be a Republican and the other a Populist.

Electoral Vote, Cleveland over Harrison.....	132
Electoral Vote, Cleveland over Harrison and Weaver.....	110
Total Popular Vote, 1892, including Scattering.....	12,110,636

The total Democratic popular vote in 1888 was 5,538,233; in 1892 it was 5,556,918, an increase of 18,685 from 1888 to 1892. The total Republican vote in 1888 was 5,440,216; in 1892 it was 5,176,108, a decrease of 264,108 from 1888 to 1892.

In the States of Colorado, Idaho, Kansas, North Dakota and Wyoming the Democrats ran no electoral tickets, and voted for the Populist electoral tickets for the purpose of taking those States from the Republicans. With a few exceptions they also voted for the Populist electors in Nevada. In Louisiana the Republican party and Populists united their vote, each nominating half of the eight candidates for electors, and in the table their aggregate popular vote is divided.

In five States the electoral vote was divided; in California and Ohio because the vote for the Cleveland and Harrison electors was so close; in Michigan because by act of Legislature each Congressional district voted separately for an elector; in Oregon because one of the four candidates for electors on the Populist ticket was also on the Democratic ticket, the result being three Republicans and one Populist elected; in North Dakota because one of the two Populist electors who were elected cast his vote for Cleveland, this causing the electoral vote of the State to be equally divided between Cleveland, Harrison, and Weaver.

* Harrison over Fusion vote, 14,182.

† In Oregon the highest vote for an elector was that cast for the one candidate who was on both the Democratic and Populist tickets. He received 35,813 votes. The next highest vote was for a Republican candidate for elector, 35,002. This gave the Fusion candidate (who afterward voted for Weaver) a plurality of 811, and it so appears in the column of pluralities above.

Greater New York.

A COMMISSION was created by act of the Legislature, in 1890, to inquire into the expediency of consolidating the city of New York and the various municipalities and towns in the State of New York composing its suburbs. This Commission presented a bill in the Legislature of 1893, submitting the question of municipal consolidation to a vote of the people of the various cities and towns proposed to be consolidated; a petition of over 10,000 Brooklyn citizens was sent to the Legislature, and a delegation of more than 200 prominent citizens from Brooklyn appeared in its favor before the Senate and Assembly Committees on Cities, but the bill failed to reach a vote before the Legislature adjourned. It was reintroduced in the Legislature, in the session of 1894, by Assemblyman Burtis, of Brooklyn, and passed both Houses by a large majority, and received the Executive approval. This bill described the limits of the proposed consolidated city, as stated below, and provided for the submission of the question of consolidation to the electors therein at the following general election, November 6, 1894, their ballots to be taken as an expression of their wishes for or against consolidation, but to have no further binding legal effect on the Legislature. The following is a statement of the vote cast at said election: New York, for consolidation, 96,938; against 59,959; Kings, for 64,744; against 64,467; Queens, for 7,712; against 4,741; Richmond, for 5,531; against 1,505; Mount Vernon, for 873; against 1,603; East Chester, for 374; against 260; West Chester, for 620; against 621; Pelham, for 251; against 153.

Accepting this result as the expression of the desire of the people for consolidation, the Commission will introduce a bill into the Legislature of 1895 to give it effect.

The territory of the proposed Greater New York, as outlined in the act of 1894, is as follows: The city of New York, Long Island City, the county of Kings, the county of Richmond, the towns of Westchester, Flushing, Newtown, and Jamaica, those portions of the towns of East Chester and Pelham which lie southerly of a straight line drawn from the point where the northerly line of the city of New York meets the centre line of the Bronx River to the middle of the channel between Hunter's and Glen Islands, in Long Island Sound, and that part of the town of Hempstead which is westerly of a straight line drawn from the southeasterly point of the town of Flushing through the middle of the channel between Rockaway Beach and Shelter Island to the Atlantic Ocean. A map will be found on page 481 of the ALMANAC.

The following is a statement in detail of the area of the new city and the population, as returned by the State census of 1892. The natural increase in inhabitants since that enumeration would make the present population over 3,100,000:

The area of Greater London (Metropolitan Police District) is 688.31 square miles; the area of Chicago is 180.12 square miles; of Philadelphia, 129.33 square miles. The Greater New York Commission is composed of eleven Commissioners: Andrew H. Green, President; J. S. T. Stranahan, Vice-President; the State Engineer and Surveyor (ex-officio); John M. Brinckerhoff, Edward F. Linton, Calvert Vaux, Frederick W. Devoe, William D. Veeder, George J. Greenfield, John L. Hamilton, and Charles P. McClelland. Albert E. Henschel is Secretary. The office of the Commission is at No. 214 Broadway.

Banks.

The bank Clearing-House is at No. 14 Pine Street. William Sherer is manager. Sixty-five banks are associated for the purpose of exchanging the checks and bills they hold against each other. Other banks, not members of the association, clear through members. The representatives of the members appear at the Clearing-House at 10 o'clock A. M. every business day, with the checks and bills to be exchanged. The resulting balances are ascertained in about an hour, and before half-past one o'clock those indebted pay their balances, and after that hour the other banks receive the amounts due them. The Clearing-House has been in operation since 1853.

Banks are open from 10 A. M. to 3 P. M., and on Saturdays from 10 A. M. to 12 noon. Commercial paper, except sight or demand bills, falling due on Saturday, is payable on the following business day.

ABOLISHING DAYS OF GRACE.—Following is the text of the bill abolishing days of grace in New York State, from January 1, 1895, which was passed by the Legislature May 9, 1894:

"On all notes, drafts, checks, acceptances, bills of exchange, bonds, or other evidences of indebtedness made, drawn, or accepted by any person or corporation after this act shall take effect, and in which there is no expressed stipulation to the contrary, no grace, according to the custom of merchants, shall be allowed, but the same shall be due and payable, as therein expressed, without grace."

THE PROPOSED NEW YORK AND NEW JERSEY BRIDGE.

COMMISSIONERS' OFFICE, 214 BROADWAY, NEW YORK.

Andrew H. Green, Chairman; Charles M. Vall, Evan Thomas, Frank K. Hain, Isidor Straus, Commissioners; Charles H. Swan, Assistant Secretary.

The Act of Congress directed the commission to recommend what length of span not less than 2,000 feet would be safe and practicable for a railroad bridge between Fifty-ninth and Sixty-ninth Streets, New York City. In making comparative estimates the board selected a location midway between Fifty-ninth and Sixtieth Streets, but the difference between this location and one further north, within the limits of the act, was considered so far as it affected the general conclusions. The minimum length of span which may be considered is 2,000 feet. The maximum length of span would be a clear span between the pier headlines, this distance varying from 3,130 feet at 59th St. to 3,080 feet at 69th St. Estimated cost about \$40,000,000. The bridge to be completed within ten years.

Baths.

The free public baths of the city of New York are located on the Hudson and East Rivers as follows:

Hudson River.

- Battery.
- Foot of Duane Street.
- Horatio Street.
- West Twentieth Street.
- West Fifteenth Street.
- West One Hundred and Thirty-fourth Street.

East River.

- Foot of Market Street.
- Grand Street.
- Fifth Street.
- East Eighteenth Street.
- East Twenty-eighth Street.
- East Fifty-first Street.
- East Ninety-second Street.
- East One Hundred and Twelfth Street.
- East One Hundred and Fortieth Street.

Visitors to the public baths are required to furnish their own towels and bathing suits. These must be removed when the bathers leave the place. The days for bathing in the season (June 1 to October 15) are: For females, Mondays, Wednesdays, and Fridays; for men and boys, the other days of the week and half a day on Sunday. The hours for bathing are from 5 o'clock in the morning until 8.30 o'clock in the evening. Policemen are in attendance to preserve order and enforce the rules.

The bath-houses will accommodate 60 persons at a time. Each bather is allowed 20 minutes in the water. In each bath-house are two tanks: for adults, four feet of water; children, three feet. Last year about 4,000,000 baths were taken in the public baths, about one-third by women and girls.

Hack and Cab Fares.

RATES REGULATED BY LAW.

THE city ordinance regulating the rates which may be charged customers by cabmen is as follows. Distance is computed at twenty blocks to a mile north and south, and seven blocks to a mile east and west.

Sec. 89. The price or rates of fare to be asked or demanded by the owners or drivers of hackney coaches or cabs shall be as follows:

Cabs.

1. For conveying one or more persons any distance, sums not exceeding the following amount: Fifty cents for the first mile or part thereof; and each additional half mile or part thereof, twenty-five cents. By distance, for "stops" of over five minutes and not exceeding fifteen minutes, twenty-five cents. For longer stops, the rate will be twenty-five cents for every fifteen minutes or fraction thereof, if more than five minutes. For a brief stop, not exceeding five minutes in a single trip, there will be no charge.

2. For the use of a cab, by the hour, with the privilege of going from place to place and stopping as often and as long as may be required, one dollar for the first hour or part thereof, and for each succeeding half-hour or part thereof, fifty cents, if agreed upon in advance.

Coaches.

3. For conveying one or more persons any distance, sums not exceeding the following amounts: One dollar for the first mile or part thereof, and each additional half-mile or part thereof, forty cents. By distance, for "stops" of over five minutes and not exceeding fifteen minutes, thirty-eight cents. For longer stops, the rate will be thirty-eight cents for every fifteen minutes. For a brief stop, not exceeding five minutes in a single trip, there will be no charge.

4. For the use of a coach, by the hour, with the privilege of going from place to place and stopping as often and long as may be required, one dollar and fifty cents for the first hour or part thereof, and for each succeeding half-hour or part thereof, fifty-five cents, if agreed upon in advance.

5. No cab or coach shall be driven by the time rate at a pace less than five miles an hour.

6. Line balls, two passengers, two dollars for first mile or part thereof; one dollar for each additional mile; fifty cents for each additional passenger.

7. Every owner or driver of any hackney coach or cab shall carry on his coach or cab one piece of baggage, not to exceed fifty pounds in weight, without extra charge; but for any additional baggage he may carry he shall be entitled to extra compensation at the rate of twenty-five cents per piece.

Sec. 91. All disputes as to prices or distance shall be settled by the Mayor or the police.

Sec. 92. In all cases where the hiring of a hackney coach or a cab is not at the time thereof speci-

fied to be by the hour, it shall be deemed to be by the mile; and for any detention, exceeding fifteen minutes, when so working by the mile, the owner or driver may demand at the rate of one dollar per hour.

Sec. 100. There shall be fixed in each hackney coach or cab, in such a manner as can be conveniently read by any person riding in the same, a card containing the name of the owner of said carriage, the number of his license, and the whole of section 89 of this article printed in plain, legible characters, under a penalty of revocation of license for violation thereof, said section to be provided by the License Bureau in pamphlet or card form, and to be furnished free to the owner of such hackney coach or cab.

It shall be the duty of the driver of every such hackney coach or cab, at the commencement of his employment, to present the passenger employing him with a printed card or slip, containing, in case of cabs, subdivisions 1 and 2, and in cases of coaches, subdivisions 3 and 4 of section 89 of this article.

Sec. 105. Any person or persons who shall violate any or either of the provisions of above sections of this article shall be liable to a penalty of ten dollars.

Complaints for violations of the above ordinances may be made at the office of the Mayor's Marshal, Room 1, City Hall.

The following table of distances is published by the Mayor's Marshal:

CENTRAL PARK.

The great Park of New York extends from 59th St. to 110th St., being over 2½ miles long, and from 5th Ave. to 8th Ave., being over half a mile wide. It covers 862 acres, of which 185 are in lakes and reservoirs and 400 in forests, wherein over half a million trees and shrubs have been planted. There are 9 miles of roads, 5¼ of bridle paths, and 28¼ of walks. The landscape architects of the Park were Frederick Law Olmsted and Calvert Vaux. Public park carriages can be found (except in winter) at the entrances on 6th Ave. and 8th Ave. The fare for an extended ride through the Park is 25 cents. Work was begun on the Park in 1857. The following fanciful names have been officially applied to the several entrances to the Park: 5th Ave. and 59th St., Scholar's Gate; 6th Ave. and 59th St., Artist's Gate; 7th Ave. and 59th St., Artisan's Gate; 8th Ave. and 59th St., Merchant's Gate; 5th Ave. and 72d St., Woman's Gate; 8th Ave. and 81st St., Hunter's Gate; 8th Ave. and 85th St., Mariner's Gate; 8th Ave. and 96th St., Gate of All Saints; 8th Ave. and 100th St., Boy's Gate; 8th Ave. and 110th St., Stranger's Gate; 5th Ave. and 67th St., Student's Gate; 5th Ave. and 72d St., Children's Gate; 5th Ave. and 79th St., Miner's Gate; 5th Ave. and 90th St., Engineer's Gate; 5th Ave. and 96th St., Woodman's Gate; 5th Ave. and 102d St., Girl's Gate; 5th Ave. and 110th St., Pioneer's Gate; 6th Ave. and 116th St., Farmer's Gate; 7th Ave. and 110th St., Warrior's Gate.

FACTS ABOUT PUBLIC PARKS.

Union Square was purchased by the city in 1833 for \$116,051; Madison Square, in 1847, for \$65,952; Tompkins Square, in 1834, for \$93,358; Washington Square, in 1827, for \$77,970, and Manhattan Square, in 1839, for \$54,657. The latter is assessed as a part of Central Park. The other four are assessed at over \$16,000,000, and are easily worth \$20,000,000, while their original cost to the city was only \$253,331. Prospect Park, Brooklyn, contains 516 1-6 acres. In woodland, 110 acres; in lakes and watercourses, 77 acres; in meadows, 70 acres; in plantations, 259 1-6 acres; in drives, 9 miles; in bridle roads, 3 1-10 miles; in walks, 12 miles. Ocean Parkway is 5 1-2 miles long and 210 feet wide. Eastern Parkway is 2 1-2 miles long and 210 feet wide. London has 271 public parks, containing 17,876 acres of ground. The largest European city park is in Denmark; it contains 4,200 acres. The great forest of northern New York covers an area of 3,588,803 acres. The Adirondack Park, or proposed reservation, includes 2,807,760 acres. The lands within the park line have been carefully classified, lot by lot, with the following result: Primeval forest, 1,575,483 acres; lumbered forest, 1,027,955; denuded, 50,050; burned, 13,430; waste, 18,526; water, 57,104; wild meadows, 495; improved, 64,717.

* The French Academy is one of five academies, and the highest, constituting the Institute of France. It was founded in 1635 by the Cardinal Richelieu, and reorganized in 1816. It is composed of 40 members, elected for life, after personal application and the submission of their nomination to the head of the State. It meets twice weekly, at the Palace Mazarin, 23 Quai Conti, Paris, and is the highest authority on everything appertaining to the niceties of the French language, to grammar, rhetoric, and poetry, and the publication of the French classics. The chief officer is the secretary, who has a life tenure of his position. The present permanent secretary is Charles Camille Doucet, who was elected an Academician in 1865. A chair in the Academy is the highest ambition of most literary Frenchmen.

The other academies of the Institute of France are: The Academy of Inscriptions and Belles-Lettres, with 40 members; Academy of Sciences, with 66 members; Academy of Fine Arts, with 40 members (as follows: Painting, 14; sculpture, 8; architecture, 8; engraving, 4; musical composition, 6), and Academy of Moral and Political Science, with 40 members. All members are elected for life.

Alliance of the Reformed Churches

(THROUGHOUT THE WORLD)

HOLDING THE PRESBYTERIAN SYSTEM.

This organization represents ten Reformed and Presbyterian Churches in the United States, with a constituency of 6,000,000; the Presbyterian Church in Canada, with a constituency of 600,000, and more than 80 different denominations on the five continents other than North America, with a constituency of at least 16,000,000 persons. The Sixth General Council of this Alliance will be held at Glasgow, Scotland, during the summer of 1896. The following are the organizations in the United States and Canada which are members of the Alliance:

PRESBYTERIAN CHURCH OF THE UNITED STATES OF AMERICA, COMMONLY KNOWN AS THE PRESBYTERIAN CHURCH NORTH.

Christian Science.

The following information about this faith and its followers was prepared for **THE WORLD ALMANAC** by M. John Higley, C.S., Austin, Ill.:

The number of Christian Scientists in the United States runs well into the hundreds of thousands. It is estimated that a million hopeless cases have been healed through Christian Science. There are 106 churches, 120 places where regular Sunday services are held, but without a church organization, and 65 dispensaries for the healing of patients and the free distribution of Christian Science literature.

Rev. Mary Baker Eddy, the discoverer and founder of Christian Science, has taught 4,000 students at her Massachusetts Metaphysical College, in Boston, Mass. Her instruction to her normal graduates is to form their own associations, churches, and dispensaries, as she has done before them. The associations thus formed are called Students' Christian Scientists' Associations, each is numbered, and each is composed of the students taught by the normal teacher under whom it is formed. These associations are tributary to the National Christian Scientist Association, E. J. Foster Eddy, M. D., C. S. D., President, and William H. Johnson, C. S. B., Secretary, both at Boston, Mass.

The last meeting of the National Association was at the Congress of Religions, in October, 1893, at Chicago, and it was adjourned subject to the call of the leader, Rev. Mary Baker Eddy. The Boston church, which was organized by Mrs. Eddy, is the mother church, and all Christian Scientists are privileged to unite with it. They are completing a beautiful church edifice at great cost. All churches formed throughout the world are tributary to the mother church.

Two hundred and seventy-one religious sects or organizations were registered in England and Wales in 1894, according to Whitaker. Among them were organizations bearing the following names: Army of the Lord, Baptized Believers, Believers in Joanna Southcott, Benevolent Methodists, Bunyan Baptists, Children of God, Christians Owning No Name But Lord Jesus, Eclectics, Hozanna Army, Loving Brethren, Particular Baptists, Peculiar People, Ranters, Recreative Religionists, Strict Baptists, Theistic Church, Universal Christians, and Worshipers of God.

Football Records.

The football season of 1894, while the most successful in the annals of the sport in many respects, ended in an unsatisfactory way. That is, no team could lay claim justly to the championship.

The Intercollegiate Association has only two members—Yale and Princeton. Of course the former stands first in that organization, out that counts for but little. Yale also beat Harvard. Pennsylvania gained victories over both Princeton and Harvard, but was unable to arrange a game with Yale. So Pennsylvania and Yale are practically tied for first honors in the college football world.

INTERCOLLEGIATE FOOTBALL ASSOCIATION.

The records of the first eight years of the Intercollegiate Football Association are summarized in the following table, which shows the number of games won by each college each year:

	1877.	1878.	1879.	1880.	1881.	1882.	1883.	1884.
Yale.....	2	2	0	2	2	3	2	3
Princeton.....	2	3	1	2	1	1	1	3
Harvard.....	1	1	0	1	1	2	0	2
Columbia.....	0	0	0	0	0	0	0	*

* Columbia was dropped in 1884.

The Association was reorganized in 1885 with the following members: Yale, Princeton, Harvard, University of Pennsylvania, and Wesleyan. The record from that year to date follows:

	1885.	1886.	1887.	1888.	1889.	1890.	1891.	1892.	1893.	1894.
Yale.....	2	3	4	4	3	3	3	3	3	1

Harvard.....	0	2	3	2	2	*
University of Pennsylvania.....	0	1	0	1	0	1	1	2	†	..
Wesleyan.....	1	0	1	0	1	0	0	0	†	..

* Harvard withdrew from the Intercollegiate Association late in 1889, but has played an independent game with Yale at Springfield, Mass., each year since. These games resulted as follows:

1890—Harvard, 12; Yale, 6. | 1892—Yale, 6; Harvard, 0. | 1894—Yale, 12; Harvard, 4.

1891—Yale, 10; Harvard, 0. | 1893—Yale, 6; Harvard, 0.

† University of Pennsylvania and Wesleyan withdrew.

The game between the leading colleges in 1894 resulted as follows:

October 20, New York—Princeton, 12; Cornell, 4.

October 27, New York—Harvard, 22; Cornell, 12.

November 11, Trenton—University of Pennsylvania, 12; Princeton, 0.

November 25, Springfield—Yale, 12; Harvard, 4.

November 29, Philadelphia—University of Pennsylvania, 18; Harvard, 4.

December 1, New York—Yale, 24; Princeton, 0.

The scores of the Yale-Harvard, Yale-Princeton, and Harvard-Princeton games, since the present system of scoring was adopted, are here given:

YALE-HARVARD.

1883—Yale, 23; Harvard, 2.
1884—Yale, 52; Harvard, 0.
1885—No game played.

AMERICAN COLLEGE FOOTBALL ASSOCIATION (NEW ENGLAND).

The championship was fought for by three colleges—Amherst, Dartmouth, and Williams. Dartmouth won with a clean record of victories for 1894. The scores follow:

November 3—Dartmouth, 10; Williams, 0.

November 10—Dartmouth, 30; Amherst, 0.

November 17—Williams, 34; Amherst, 10.

AMERICAN FOOTBALL UNION.

The Orange Athletic Club won the championship of the American Football Union for 1894. The score follows:

Orange A. C., 16; Crescent A. C., 8.

LOCAL SCHOOL CHAMPIONSHIP.

Cutler School won the championship of the Interscholastic Athletic Association, and the Brooklyn High School won the championship of the Long Island Interscholastic League. The annual game between the Polytechnic Institute and Brooklyn High School was decided at Eastern Park, November 29, 1894, the former winning by a score of 16 to 4.

FOOTBALL RECORDS—Continued.

MIDDLE STATES INTERCOLLEGIATE LEAGUE.

The strong team of Rutgers College, at Elizabeth, N. J., won the championship for 1894. The

scores: October 6—Rutgers, 12; Lafayette, 10.
October 17—Rutgers, 20; Stevens, 10.
Stevens did not meet Lafayette.

MISCELLANEOUS FOOTBALL (1894).

The Harvard Freshmen defeated the Yale Freshmen in the annual contest, December 1, by a score of 12 to 6.

Cornell was defeated by University of Michigan, 12 to 4, and Crescent A. C. was defeated by Cornell, 22 to 0; Cornell also defeated Lehigh, 10 to 6; Yale defeated Lehigh, 50 to 0; Orange A. C., 24 to 0, and Williams, 23 to 4.

Harvard defeated Orange A. C., 14 to 0.

University of Pennsylvania defeated Crescent A. C., 22 to 0 and 18 to 10.

The Union College team of Schenectady won the intercollegiate championship of New York State. The Orange A. C. was beaten by Princeton, 16 to 4.

Yachting Records.

YACHTING IN 1894.

THE most interesting class of the year 1894 was the little fleet of racing 21-footers fostered and originated by the Larchmont Yacht Club. Here is a list of them:

Boat.	Owner.	Designer.	Boat.	Owner.	Designer.
Houri	W. Butler Duncan, Jr.	Herreshoff	Blonde and } Brunette.. }	Herbert Seeley.....	Gardner.
Vaquero	Herman Duryea	Herreshoff	Flirt	W. Gould Brokaw.....	Gardner.
Adelaide	William P. Douglass.....	Herreshoff	Hoodoo	Howard P. Adams.. }	Whitehouse & Cheeseborough
Dorothy	H. P. Whitney	Herreshoff	Skimming..	Thomas Clapham.....	Clapham.
Celia	C. A. Gould.....	Herreshoff.			
Maysie	William Osborn, Jr.	Gardner.			
Minnetonka.	George Work	Dyear.			

These boats with the exception of Skimming are all of the fin keel variety. Flirt and Hoodoo were originally fitted with centreboards, but were altered to fins to give them more stability. These boats were built under a special code of rules drawn up by the Larchmont Yacht Club. Their length on the load water line was limited to 21 feet and their length over all to 31 feet, three-quarters of which had to be decked. Water line measured with full equipment on board exclusive of crew, limited to three; helmsman, a Corinthian; only one paid hand permitted; ballast to be permanent and all outside of hull. Sail area not more than 600 square feet nor less than 500 square feet; jib, mainsail, and spinnaker only allowed.

Counting a win as three points, a second place as two, and a third place as one point, Vaquero was easily the victor, scoring a percentage of 68 out of a possible 100. Dorothy was second with 47; Houri third with 45; Celia fourth with 37; Minnetonka fifth with 33; Adelaide sixth with 23; Maysie seventh with 19; Skimming eighth with 16; Blonde and Brunette ninth with 15; Flirt tenth with 5, and Hoodoo eleventh with 0.

Houri out of twenty-four starts finished first four times, was second on eight, and third on five occasions. Vaquero started in twenty races, finishing first in eleven, second in three, and third in two. Adelaide out of seventeen starts was second twice, and third six times. Dorothy out of sixteen starts won six first prizes, was second twice, and third six times. Celia started fifteen times, won two, was second in four, and third in three. Maysie won two races out of fourteen starts, and was second once. Blonde and Brunette scored two seconds out of nine starts, and also beat Maysie in a match race. Minnetonka out of thirteen races won two, was second in three, and third in one. Flirt started six times, taking one third place. Hoodoo started seven times and was not placed. Skimming out of two starts was third once.

Vaquero won the Larchmont Cup for the majority of the races of the series, the W. G. Brokaw Cup for having won the first three races, the Duryea Cup at Newport, the Ellis Cup at Newport, and her owner, Herman Duryea, won the New York Times prize, a pair of marine glasses, to the helmsman making the best record.

There being no race for the America's Cup in 1894, the chief interest was centred in the semi-centennial celebration of the New York Yacht Club. In the absence of Commodore E. D. Morgan, who had gone to England in his flagship May to witness the Vigilant's races, his place was filled by Vice-Commodore E. M. Brown, who took command of the squadron, his steam yacht Shearwater being the flagship. Aboard her were the Regatta Committee, S. Nicholson Kane, Chester Griswold, and Irving Grinnell; and also Fleet Captain Frank T. Robinson.

Prizes were offered to the winners in each class of the runs from port to port. August 6 the fleet made its rendezvous in Glen Cove. The squadron consisted of the steam yachts Shearwater, Aida, Au Revoir, Clermont, Neaira, Orienta, Reposo, Oneida, Dungeness, Electra, Alicia, Embla, Evelyn, Judy, Linta, Marietta, Nirvana, Nooya, Reverie, Sapphire, Stella, Thyra, and Viking. The schooners were Agnes, Alert, Ariel, Emerald, Atlantic, Crusader, Dagmar, Gevalia, Elsemarie, Loyal, Halcyon, Magic, Marguerite, Merlin, Montauk, Neaera, Varuna, Viator, Wayfarer, Shamrock, Sachem, and Nirvana. The sloops and cutters were Navahoe, Awa, Crocodile, Daffodil, Eclipse, Eleanor, Gossoon, Ilderim, Jessica, Katrina, Minerva, Polly, Viola, Queen Mab, Wasp, and Gloriana.

On the same day the races for the semi-centennial cups were sailed, the winners being schooners Emerald, Ariel, and Elsemarie, sloops Queen Mab, Wasp, and Gossoon. Next morning the yacht's made the run to Morris Cove, the winners being schooners Merlin, Ariel, and Elsemarie, sloops Queen Mab, Wasp, and Gossoon. August 8 the fleet left Morris Cove for New London, the winners of the run being schooners Emerald, Ariel, and Elsemarie, sloops Eclipse, Wasp, and Minerva. That day J. Malcolm Forbes' big sloop Volunteer joined the fleet at New London, as did the schooners Mayflower and Constellation. August 9 the squadron sailed for Newport, the winners of the run being schooners Constellation, Mayflower, Marguerite, and Elsemarie, sloops Navahoe (beating Volunteer 15 minutes 40 seconds elapsed time), Queen Mab Eclipse, Wasp, and Gossoon.

The race for the Golet cups was sailed off Newport August 10. The starters were schooners Emerald, Constellation, Mayflower, Merlin, Ariel, Marguerite, Elsemarie, and Shamrock; sloops

Gloriana, Queen Mab, Wasp, Navahoe, and Ilderim. The course was from Brenton's Reef Lightship to a mark boat off Block Island, thence to a mark boat off West Island, and back to the starting point, a distance of 38 miles. Emerald won the \$1,000 cup for schooners, beating Marguerite 11 minutes 13 seconds corrected time. Navahoe won the \$500 cup for sloops, beating Queen Mab 39 minutes 40 seconds elapsed time.

The run to Vineyard Haven from Newport August 11 resulted in the following winners: Schooners Emerald, Ariel, and Elsemarie, sloops Navahoe, Wasp, and Minerva, mixed class Katrina.

The fleet sailed to New Bedford August 13. The winners were schooners Emerald, Ariel, and Neera, sloops Wasp and Minerva, mixed class Queen Mab.

The following day the squadron sailed to Newport and disbanded, the winners of the run being schooners Emerald, Marguerite, and Neera, sloops Gloriana and Gossoon, mixed class Queen Mab.

The Atlantic Yacht Club sailed on its annual cruise in July, the rendezvous being Larchmont on July 3. The fleet consisted of the flagship Water Witch, Loyal, Ventura, Swannanoa, Rover, Chocataw, Eclipse, Penguin, Daffodil, Iola, Ilika, and Daphne. On July 4 the fleet sailed over to Oyster Bay, where the members were entertained by the Seawanhaka-Corinthian Yacht Club. Next day the squadron sailed for Morris Cove, where the yachts anchored for the night, sailing in the morning for New London. On July 7 the fleet sailed to Shelter Island, remaining there over Sunday and disbanding at colors next morning. Mr. Henry J. Gielow acted as Judge and Regatta Committee.

The Seawanhaka-Corinthian Yacht Club started on its annual cruise on June 26, the destination of the squadron being Morris Cove. The fleet consisted of the schooners Ariel and Elsemarie, and the sloops Navahoe, Gloriana, Katrina, Rajah, Gossoon, Daffodil, Madrine, and Indolent. On June 27 the yachts sailed to New London, the winners being Ariel, Gloriana, and Madrine. On June 29 the squadron returned to Oyster Bay, the winners being Ariel and Gloriana.

The first Yale-Harvard yacht race was sailed at New London on June 27. Ava (Yale) beat Nymph (Yale) 3 minutes 47 seconds corrected time. Tomboy (Harvard) beat Fancy (Harvard) 58 seconds. Christine (Yale) beat Bantam (Harvard) 1 minute 59 seconds. Hector (Yale) beat Tigress (Yale) 2 minutes. Nobska (Harvard) beat Boodler (Yale) 11 minutes.

Mr. Anthony James Drexel purchased and imported the big steam yacht Semiramis early in the spring. She is of steel, 206 feet over all, 194 feet on the load water line, with 27 feet beam and 14 feet 6 inches draught. She was built in 1891.

The year 1894 will be memorable in yachting for an innovation—the admission of a lady, Mrs. Lucy C. Carnegie, as a flag member of the New York Yacht Club. Her new steel steam yacht Dungeness was put into commission early in the spring. She is 120 feet over all, 100 feet on the load water line, with a beam of 22 feet and a draught of 7 feet.

Mr. Henry Allan, of Glasgow, commissioned Nat. Herreshoff to design the 10-rater fin keel Dakotah. She was sent across the ocean on the deck of a steamship and her racing career was highly successful. Starting 33 times she won 25 first prizes, amounting in value to \$274. In addition to these she also won two challenge cups. In her class the Fife boat Lilith came next with 32 starts, 11 firsts, and 10 other prizes valued at \$137. The Watson craft Sula was third with 26 starts, 2 firsts, and 6 other prizes valued at \$35.

The 2½-rater Meneen, another of Herreshoff's boats, owned by Mr. Hardie Jackson, won 46 prizes on the Solent in the season of 1894.

Mr. Nat. Herreshoff at the close of 1894 was at work on a fin keel 20-rater for Mr. Howard Gould to race against the British fleet of the same class. She will be 60 feet long and 45 feet on the water line. Her keel and frames are of oak and she will have a double skin of mahogany and a fin of Tobin bronze.

The Valkyrie rigged as a yawl sailed for Glasgow on May 3. She made the passage in 28 days and 9 hours. She was fitted out immediately, only to be sunk by colliding with Satanita, as told elsewhere.

The New York Yacht Club closed its season September 18, with the Autumn Sweepstakes Regatta. The schooners Emerald, Ariel, Elsemarie, and Shamrock, and the sloops Queen Mab and Wasp were the contestants. The latter was disabled soon after the start and put back, so Queen Mab had a walk-over, winning \$100 in cash and a \$100 cup. Emerald won in the schooner class, beating Ariel 14 seconds corrected time. Her prize was \$200 in cash and a \$200 cup.

October 10 a severe storm played havoc with yachts. Dilemma, the first fin keel craft owned by Latham A. Fish, was totally wrecked at Greenport. Amazon, Blonde and Brunette, Hoodoo, Banshee, naphtha launch Florence and Phoebe were wrecked at New Rochelle and Larchmont. Mr. William Steinway's steam launch was also battered in.

VIGILANT'S RECORD ABROAD.

The Vigilant, purchased in May by Messrs. George J. and Howard Gould, rigged as a yawl, and strengthened by the addition of a bilge angle bar on each side extending the whole length of the vessel to which twelve steel "struts" were bolted on either side and extended to the deck beams, left Erie Basin on Thursday, May 11. She was escorted down the bay by Mr. Frank T. Morrill's fast steam yacht Vamoose. She carried on her deck six dories in case of accident, and was provisioned for thirty-five days. She was in command of Capt. Leander Jeffrey, and Clayton Haff was first mate. Her crew was made up of men who had sailed on the cup defenders of the year before. All of the men before the mast were Scandinavians except two. She reached the Clyde June 16.

YACHTING RECORDS—Continued.]

The first race the Vigilant took part in was against Lord Dunraven's Valkyrie, the Prince of Wales' Britannia, and Mr. A. D. Clarke's Satanita in the regatta of the Mudhook Yacht Club in the Firth of Clyde on July 5. The Satanita on the port tack, while luffing to clear a small boat, ran into the Valkyrie amidships and, cutting into her about six feet, sank her. All hands were saved. Satanita was so badly damaged that she could not be repaired in time to sail in any of the July regattas. Thus the race was left to the Vigilant and Britannia, the course being 50 miles. Vigilant was beaten by 35 seconds elapsed time, and 3 minutes 3 seconds corrected time. The prize was the Muir Memorial Cup. Vigilant's record in the other races she sailed in British and Irish waters follows:

July 7—Royal Clyde Yacht Club Regatta, prize a Queen's Cup, course 50 miles, Britannia beat Vigilant 1 minute 55 seconds corrected time, but was beaten boat for boat by the American craft.

July 9—Royal Clyde Yacht Club Regatta, prize £75, course 25 miles, Britannia beat Vigilant 12 minutes 33 seconds.

July 10—Clyde Corinthian Regatta, prize a cup, course 50 miles, Britannia beat Vigilant 7 minutes 54 seconds.

July 11—Royal Northern Yacht Club, prize £50, course 50 miles, Britannia beat Vigilant 24 minutes 30 seconds.

July 12—Royal Northern Yacht Club, prize £60, course 50 miles, Britannia beat Vigilant 2 minutes 50 seconds.

Thus defeated six times on the Clyde, Vigilant had her topmast, bowsprit, and spinnaker boom shortened 4 feet 6 inches, 3 feet, and 4 feet respectively, and instead of being forced to allow Britannia 3 minutes on a 50-mile course, the allowance was reduced to 2 minutes. The Vigilant's rating was thus reduced to 165. Her next race was in Belfast Lough:

July 16—Royal Ulster Yacht Club Regatta over the Bangor Course, 50 miles, prize the County Down Cup, value £50, with £25 added by the club, Britannia beat Vigilant 2 minutes 41 seconds.

July 17—Royal Ulster Yacht Club Regatta, over same course as the day before, prize £50, presented by the Rear Commodore, with £25 added by the club, Vigilant won, beating Britannia 5 minutes 38 seconds on two rounds of the course. As they started on the third round Britannia's gaff band burst, and she had to return to anchor. The race was decidedly Vigilant's.

July 20—Royal St. George Yacht Club Regatta, prize £80, course 50 miles, Britannia beat Vigilant 3 minutes 17 seconds.

July 21—Royal St. George Yacht Club Regatta, prize £60, course 50 miles, Vigilant beat Britannia 1 minute 29 seconds.

July 23—Royal Munster Yacht Club Regatta, prize 60-guinea cup, course 50 miles, Britannia beat Vigilant 45 seconds.

July 24—Royal Cork Yacht Club Regatta, prize £100, course 50 miles, Vigilant beat Britannia 2 minutes 22 seconds. Vigilant sailed the last part of the race with a broken gaff and was unable to start in the race next day for the Royal Cork Yacht Club prize, so Britannia had a walkover.

July 28—Penzance and Mount's Bay Regatta, prize a £60 cup with £15 added, course 25 miles, Britannia beat Vigilant 6 minutes 23 seconds.

August 4—Private match between the Prince of Wales and Mr. George Gould for \$500 cup to be paid for by loser, course 48 miles off Isle of Wight, Vigilant beat Britannia by 6 minutes 33 seconds elapsed and 4 minutes 29 seconds corrected time. The only windward work was in the first 2½ miles, the rest being all reaching. Wind strong southwest. Average speed of Vigilant 12 knots.

August 6—Royal London Yacht Club Regatta, Cowes, prize £130, Vigilant beat Britannia 6 minutes 4 seconds; Satanita was third.

August 9—Royal Yacht Squadron Regatta, Cowes, prize the Town Cup, value £100, course 48 miles, Britannia beat Vigilant 4 minutes 17 seconds.

August 16—Royal Victoria Yacht Club Regatta, course 50 miles, prize the Ryde Town Cup and £20. Satanita won, beating Britannia, second, 4 minutes 17 seconds corrected time, and Vigilant 7 minutes 53 seconds. Britannia beat Vigilant 3 minutes 36 seconds.

On August 18 Vigilant was to have sailed another match race with Britannia for a cup offered by Lord Wolverton, but in passing by the Needles, where there are many sunken rocks, the Vigilant had her centreboard down, and she bumped heavily on the outer Goose Rock. The centreboard was jammed in the trunk, and at first it was thought it had been carried away altogether. Mr. Gould said he was willing to sail without the board, but the Prince of Wales declined to take advantage of Vigilant's disabled condition. The match was declared off, Lord Wolverton withdrawing the cup. Vigilant, while beating back to Southampton, grounded on a shoal off Hythe. When she got off the tide swept her athwart the hawse of a Swedish bark at anchor. She was assisted from her perilous position by a steam launch from the United States ship Chicago and by two English steam yachts. The Vigilant was then docked for repairs.

August 31—Royal Dart Yacht Club Regatta, course 40 miles, prize £40, Vigilant beat Satanita handsomely, but the committee called the race off, as it was not sailed within the limit of 8 hours.

This decision, being contrary to the principles of the Y. R. A., gave much dissatisfaction. September 1—Start Bay Yacht Club Regatta, course 42 miles, prize £40, Vigilant beat Satanita, which got becalmed and did not finish.

Mr. Gould presented this club with a 60-guinea cup to be sailed for in the big class in 1895.

September 5—This was the date fixed for the race for the Cape May Challenge Cup, won by Sir Richard Sutton's Genesta from the schooner yacht Dauntless in September, 1885. The cup had been defended successfully by Britannia against Navahoe in 1893, and Mr. Gould had challenged for it. The course was fixed from a stake boat off Alum Bay pier to and round Cherbourg Breakwater and back. Vigilant, on her passage from Portland to Cowes, while off the Needles on September 3 struck an "unknown rock," which carried away the centreboard completely, the hook on which it was suspended parting. Mr. Gould ordered four tons of lead to be shipped to make up for the loss of the centreboard, and said he was willing to sail the race. After consulting with the committee of the Royal Yacht Squadron and cabling to the Prince of Wales at Homburg, it was finally decided to allow Mr. Gould to withdraw his challenge and call the race off for the year. Vigilant was laid up at Southampton, this last fiasco ending her season's racing. Mr. Gould's steam yacht Atalanta also wintered there.

THE AMERICA'S CUP.

The record of races for the America's Cup, from 1851 to 1893, was printed in THE WORLD ALMANAC for 1894. There was no race in 1894, but at the beginning of 1895 a challenge was received by the New York Yacht Club from the Royal Yacht Club, which is building a new yacht to be named Valkyrie, for a race in September, 1895.

Stations Used as the Basis of Table on Preceding Page, with Actual Distance of Each Place from New York City.

The places are, with few exceptions, more or less distant than the stipulated distance at the head of each column in the table on preceding page.

The reason for this is obvious, there being but few places at the precise distance limit.

CATARRH.

ELY'S CREAM BALM

IS applied directly into the nostrils; all is absorbed, and causes a thorough cleansing and healing of the diseased mucous membrane.

CREAM BALM

effectually cleanses the nasal passages of catarrhal virus, causing healthy secretions; soothes and allays inflammation and irritation, protects the membranal lining of the head from fresh colds, completely heals the sores and restores the senses of taste, smell, and hearing. It also removes bad taste and foul breath when resulting from Catarrh. Wonderfully beneficial effects are realized by a few applications. A trial of the Balm will always relieve, and its continued use will produce a perfect cure. As an immediate relief for colds in the head, catarrhal headache and snuffles, and as a household remedy for local irritations, CREAM BALM gives the highest satisfaction.

Catarrhal sufferers should remember that ELY'S CREAM BALM is the only Catarrhal remedy which is QUICKLY AND THOROUGHLY ABSORBED by the diseased membrane, and for that reason it DOES NOT DRY UP THE SECRETIONS, but changes them to a limpid and odorless, and finally to a natural and healthy character. Even in acute cases, the Balm imparts almost instant relief.

Mothers will please observe that children may use the Balm with perfect safety, as in no case does it produce the slightest ill effect. For all stoppages and colds in the head, which often trouble them, it will be found the pleasantest and surest of prescriptions, and infinitely the easiest to administer.

If your druggist is not supplied, we will mail the Balm to any part of the United States, on receipt of 50 Cents.

Photo-Printing and Bromide Enlargement a Speciality.

Writes every letter in sight of operator.

Does most of the work, in writing, AUTOMATICALLY, and yields in the time thus saved additional work.

It acts as if it studied the convenience of the operator at

every turn, and thereby lightens his labor and renders him capable of doing more.

It has a knack of keeping well, and is always ready at critical or other times.

These are some of the reasons why it is so different from all other writing machines.

INK MAKERS.

OUR INKS combine great depth of color with free working qualities, making them adaptable to all varieties of paper and changes of temperature. They are made in large quantities, from the best material—with the most improved machinery—on strict chemical principles, thus ensuring first quality and constant uniformity. As samples of fine Wood Cut and Half Tone Work we call attention to the following, who, with many others, are our constant patrons:

“ILLUSTRATED LONDON NEWS,” Mrs. FRANK LESLIE,
Messrs. HARPER BROS., &c., &c.

OUR NEWSPAPER INKS are manufactured with the same care and attention as our finer Inks, and are, without doubt, the best value in the market, quality considered. Do you need any stronger evidence of their excellence than is furnished by their constant use on the following publications, admittedly among the best printed newspapers in the world:

New York “Tribune,” “Times,” &c. Philadelphia “Ledger,” “Press,” &c.
Pittsburgh “Dispatch,” “Post,” &c. Chicago “Daily News,” “Inter Ocean,”

HIRAM HITCHCOCK.

HITCHCOCK, DARLING & CO.

THIS noble pile of white marble, Corinthian architecture, covering eighteen full city lots and accommodating one thousand guests, marks a place in the heart of the great City of New York, and an era in the history of the Nation's wealth and advancement. It is located in the centre of the City, upon the charming Madison Square and at the intersection of the two great streets, Broadway and Fifth Avenue, and convenient to the most important points of interest in the Metropolis.

Its patrons include the names of the most prominent men and women in America—The Presidents, hundreds of Government Officials, Senators, Congressmen, Judges, Army and Navy Officers, Divines, Physicians, Authors, and in fact all who have attained prominence and celebrity in public and private life, both at home and abroad; and the most distinguished Europeans of rank and title who have visited this country.

It has been the centre of all the great public occasions which the City has witnessed for thirty years.

Years have come and gone, new hotels have multiplied with innovations and features introduced to affect and influence patronage, but the Fifth Avenue is as new and fresh as the most recent hotel construction, with more liberal accommodations than any of them, and its well-earned reputation as the leading Hotel of the world is more and more assured.—*King's Handbook of the United States.*

TOPICAL SCRAP-BOOK SYSTEM.

THE NEED OF IT.

Articles of great value are constantly appearing in the secular and religious periodicals; and any one who does not save newspaper matter is losing a great deal. The words of One wiser than Solomon are pertinent here: "Gather up the fragments that remain, that nothing be lost."

But all the methods for preserving newspaper clippings, previously in use, have *serious defects*:—take too much time to *find, to fold, refold and re-place* them, and are not handy for rapid reference.

THE TOPICAL SCRAP-BOOK SYSTEM does away with all these difficulties. With this library any literary person secures (in handsome form, and at his fingers' ends) a systematic classification of all valuable newspaper matter. It is not one or two scrap-books filled with all sorts of matter, but

A SEPARATE SCRAP-BOOK

for each important subject, *made expressly for the purpose*, with the *title lettered on the back* (see cut above), and bound in half leather,

# THE ADAMS HOUSE

NEW YORK CITY.

300 Rooms.  
50 Cents per Day and  
Upward.  
All Light and Airy.

Two Large Restaurants.  
Popular Prices.  
On European Plan.

TENTH AVE., TWO BLOCKS BELOW FOURTEENTH ST.

Belt line cars pass the door, making it very accessible to all ferries, steamships, railroad depots, and steamboats.

The front rooms look out upon Gansevoort Square, and those on either wing and at the rear command fine views of the Hudson River. The cars traversing Fourteenth Street carry guests to the shopping centre and all places of interest, and to the Sixth and Third Avenue "L" roads, and to the East River.

The location of the house is such that nothing intervenes to obstruct the view or to prevent the freest circulation. Thus it is pervaded by the coolest breezes in Summer. Its erection marks a new epoch in the history of New York. It meets the demand of the steady upward growth of business, which has become imperative.

***The Adams House is a substantial fireproof brick edifice, planned specially to meet the requirements of a Modern Hotel.***

A scale of prices for rooms and meals has been established in keeping with the popular demand. No other hotel in the city offers equal accommodations for the money.
